"Es evidente que América latina aun debe aprender mucho en ese sentido." Con estas generalizaciones no vamos a ninguna parte. Además, respecto al artículo, no puedo subestimar a la autora o autores de este blog que "se crean" todo lo que esta tendenciosa y repetidora cantinela dice sobre Chavez, puesto que no es casualidad que aparezcan este tipo de "intimidades" sobre el mandatario venezolano, a sólo semanas de la histórica aprobación de la reforma constitucional.
Un saludo y gracias por este Blog.

A Wornat lo que se le da bien es el sensacionalismo, pero no el periodismo. Le gusta hablar con amantes y ex-amantes, pero desbarra cuando se trata de economía o de temas de verdadera relevancia. Mucho mejor sería hablar de los motivos por los cuales el que esperamos sea el último de los Borbones (¿o será Bobones?) calló a los presidentes latinoamericanos: las denuncias que pesan en contra de Unión Fenosa, que era de lo que estaba hablando Ortega cuando Juan Carlos abandonó la Cumbre; o el papel estratégico de Aznar cuando desalienta la inversión en Venezuela (que era de lo que estaba hablando Chávez cuando lo "reconvino" el falso socialista José Luis Zapatero). O el papel, nuevamente, de Aznar en el golpe de 2002, reconocido hoy mismo por la izquierda española no franquista, según leo en los diarios (buscar en Google Noticias los términos "Izquierda Unida", "Gaspar Llamazares", "Hugo Chávez", "José María Aznar")... ¡Esto sí habría sido digno de figurar en tu blog! Y no las notas de novela rosa de Olga Wornat.

Pau: seguramente te has molestado en leer los libros y reportajes de Olga Wornat, y has llegado a la conclusión de que hace novela rosa porque no ha tenido ocasión de recalar en tus magistrales análisis sociológicos entreverados con revolcones.
Patricio Mendoza Arce: Parece ser que América Latina tiene mucho que aprender cuando elige una y otra vez a quienes se hacen millonarios a costa del cargo. Y le ruego que no se inquiete por el estado de nuestra credulidad respecto a esta autora: sólo sería alarmante si creyéramos que el calificativo "histórico" se puede aplicar a tontas y a locas, al intento caudillista de eternizarse en el poder de Chávez.
Eratóstenes: seguramente si hubiera visto otros artículos anteriores en Gatopardo, habría podido leer varios donde hablamos de los negocios e intereses de Juan Carlos y sus amigos.
Respecto al contenido y los enlaces: espero que no sea usted quien nos diga los que hemos de poner en nuestra bitácora, porque no me parece la persona idónea para pedirle consejo, visto lo visto en su blog.

Gatopardo, por mí puedes poner lo que te dé tu real gana; pero cuando veo una nota sensacionalista o de un mal periodista, no me puedo quedar callado. No tiene nada de malo y hasta creo que le puede sentar bien a tu blog la diversidad de oipiniones.

Ahora que si sólo aceptas aplausos y nada de crítica, pues, hombre, agrega a tu blog un letrero especificando tal cosa y así sabe uno a que atenerse.

En cuanto a mi blog, si revisas la sección de comentarios, verás que hay de todo, izquierdistas y derechistas. Los derechistas hablan exactamente como tú, y no será por mí que se queden callados, faltaba más. Simplemente: si dicen una falsedad, lo señalo. Y como dicen en la Iglesia: "se aborrece al pecado, no al pecador".

Como veo que me descubres...
Siempre tienes la tendencia de entender lo que te interesa, de prejuzgar sobre lo que crees que uno piensa y no dice.
No leo a dicha señora, no la conozco y por tanto no juzgo. Si lees bien mi frase: "El "artículo" que publicas "parece" de periodismo rosa. No profundiza en la problemática y desarrollo comercial venezolano, ni en los distintos caracteres económicos y humanos de los diferentes Estados que componen su federación.
Las palabras "artículo" y "parece" dan claramente a entender que no prejuzgo a su creadora y todo su trabajo, tampoco podría porque no lo conozco. En cambio sí que conozco las maniobras económicas que hace Chavez y, prudentemente, me había cubierto con el anonimato para profundizar sobre ello ya que dispongo de informaciones directas y personales que "dudo" que alguien de por aquí tenga (fíjate antes de acusarme con el "dudo")
Mis dudas sociológicas son mías y las publico lo mejor que sé. Mis pocos revolcones son míos y los publico cuando me siento con ganas. No creo que dichos revolcones influyan negativa o positivamente en mis dudas ni en mis análisis en tu blog.
Un abrazo.

Señora gatopardo: lo mismo dijeron machaconamente, y en su momento oportuno, de Salvador Allende en Chile: „el intento caudillista de eternizarse en el poder‟, más miles de otras joyitas en las „listas negras‟. No estoy comparando a Chavez con Allende, sino de indicar la misma pauta de desprestigio, de la misma clase social y el mísmo plan encubierto. Incluía demonización o „desnaturalización‟ de manera patéticamente oportunista: justo antes de elecciones, previos a consolidaciones de un proyecto popular de forma clara y masiva.
Porque el tema aquí y ahora no es Chavez, ni en su tiempo lo era Salvador Allende, sino un proyecto de país o „mejor gobierno‟ que está detrás. En el caso de Venezuela lo expresa la Constituyente, que venía trabajando desde las barriadas en cientos de organizaciones sociales de base más de diez años, hasta cuando aparece Chavez y la apoya.
La importartancia‟ histórica‟ se la da la gente marginada de ese país, que aprende, entiende y recupera cada vez más lo significativo que es el protagonismo en las decisiones que se deben tener en una comunidad. Que todo esto sea traicionado por sus dirigentes o representantes, ya veremos, y ya lo estamos viendo en estos tiempos de imposturas y conversión, a quiénes benefician sus „legítimos‟ alineamientos.
Es una pena que no se reafirme, frente a las decisiones colectivas, este punto: la importancia que tienen las contradicciones de clase. El olfato aquí es determinante, puesto que se dice que las clases privilegiadas, o que creen serlo, siempre tienden a disentir con la nariz : el populacho apesta y sus dirigentes, tambien. Me apresuro a aclarar que no es caso de la autora de "crónicas malditas", ni menos, por favor, de la „abuela‟ gatopardo, a quien admiro por sus escritos y este blog ; mis dudas vienen POR LA OPORTUNIDAD DE LAS CRÍTICAS que sólo tienen como fin, en el contexto social y político de Venezuela, crear un consenso para desestabilizar proyectos colectivos que tanto les ha costado construir a los pueblos latinoamericanos y de una manera tan digna.
Las crónicas periodísticas de Olga Wornat se ubican en el subyado de este punto contradictorio y que la llevan a ser defendida por Reporteros sin Fronteras, por ejemplo.

Un abrazo

Patricio: Resulta que por origen y biografía pertenezco al lumpen barriobajero y pendenciero, y eso me predispone a desconfiar de los salvapatrias que consideren "sospechosa" cualquier oposición, disidencia y discusión. Como quizás usted no había nacido cuando Allende tenía como opositores, a la derecha, la burguesía auspiciada por la CIA, y su izquierda el MIR, y otras organizaciones sociales, me permito recordarle que Allende no cayó en el delirio de considerar a sus críticos como enemigos de Chile y de la democracia, ni consideró necesario abolir las elecciones para quedarse in illo tempore en el poder. Y tampoco se le ocurrió colocar a amigos y parientes en cargos públicos; ni mejoró su situación económica ostentosamente con cargo a los presupuestos generales del Estado. Cosa que nadie podría decir de Chávez.

El libro de Olga Wornat ,"Crónicas malditas", fue publicado en 2005, cuando estaba amenazada de muerte, y los Sahagún-Bribiesca habían movilizado a sus sicarios judiciales en México, por su de libro "La jefa". En su haber ya tenía el libro "Nuestra santa madre", sobre los crímenes de la iglesia católica en Argentina, (http://www.elortiba.org/sm.html) y había puesto negro sobre blanco quien era Ménem y sus negocios sucios.
Es decir, es una entre tantos periodistas en latinoamérica que se atreven a ser diana de los sicarios, arriegando su vida por contar lo que saben, y me temo que mi gratitud y admiración por el coraje de todos ellos corre pareja con la desconfianza que me provocan los políticos que tratan de hacer creer que las críticas y la oposición a su persona es un ataque al país que los eligió en las urnas.
De hecho, ejercer la profesión periodística en latinoamérica, y especialmente en México es la segunda más peligrosa del del mundo. Y no va a ser el respaldo que le a dado "Reporeros sin fronteras" la que pueda invalidar el magnífico trabajo de denuncia desarrollado por Olga Wornat, y tampoco el hecho de que publiquemos en Gatopardo su retrato de Hugo Chávez, cuando los memos de izquierda y de derecha lo convierten en un icono de la revolución libertadora, siendo como es un puro fraude.
Y la "obediencia debida" y la "suspensión del juicio crítico" por lealtades a la sagrada causa de la izquierda se la dejo a los acólitos de las sectas católicas, que están entrenados y educados para eso.
Salud

"Creo" que el cambio constitucional de Chavez no es para perpetuar a nadie en el poder. En todo caso, "tengo entendido" que es para que un individuo se pueda presentar tantas veces como quiera a las elecciones, algo que ya ocurre en casi todo el mundo.
A mi no me gusta, pero es tan democrático como nuestro sistema.
Ciertamente, Allende no consideró a sus críticos... pero en algunos casos erró. De haber tratado a cada cual como era, al crítico como crítico y al antidemócrata como tal, seguramente la historia hubiese sido distinta.
Un error lo tiene cualquiera y el pagó el suyo con la vida, pero no olvidemos que el resto

del país, el demócrata, pagó muy caro su error y eso ya no es tan de recibo.
Chavez no es mi ídolo, pero me gustaría ver a muchos de los que hoy lo atacan "tan exhaustivamente" vivir en su contexto social y nacional.
Podríamos, de vez en cuando, hablar de Perú, Colombia, Argentina y su curiosa democracia con papeletas falsas y barrios enteros sin ellas...
Que yo sepa, en Venezuela todo el mundo pudo votar a quien quiso, eso dijeron los inspectores europeos y de la OEA.

Gatopardo: Sí, es verdad todo esto de los errores de métodos y contenidos del proceso de reforma en este „movimiento‟ que se quiere revolucionario.

¿ Pero porqué no se empieza por otras fuentes menos cotilleras y efectistas por mas arriesgadas o valientes que hayan sido ?

Si usted me lo permite, quisiera sólo sugerir para los lectores de este foro, algunos artículos con observaciones críticas a Chávez y al proceso, hechas por Roland Denis, organizador de la Coordinadora de Defensa de Revolución, junto a, nada menos, Isaías Baduel, el saliente Ministro de Defensa , entre los años 2001-2002.
Pienso que las críticas del „mortal‟ Denis a Chávez, mas otras voces „oficialistas‟ de igual tono, tienen la virtud de estar al margen de chismes agregados y promociones tendenciosas, nada más.

Los artículos de Roland Denis:

-. Tres errores de Chavez y la formación del estado contrarrevolucionario. Aporrea, 12.08.007
-. Disculpe Señor Presidente, pero en eso no estamos de acuerdo con usted. Aporrea, 16.07.004
-. A propósito de „mi general Baduel‟: carteo entre un compañero argentino y este mortal.

Autor: Gatopardo a Patricio, agradecídisima por la recomendación

Esto es lo que dice el foro de aporrea.org:

"Para poder entender por qué este foro no acepta opositores, hay que conocer un poquito de su historia.
Internet en Venezuela:
Corría el año 2002, cuando Internet en Venezuela era usado eminentemente por personas de clase media y media-alta, de gran poder adquisitivo. Eso causaba que la gran mayoría de los venezolanos que usaban Internet eran opositores, situación que se mantiene hasta hoy.
En ese momento, los espacios participativos del chavismo en Internet no eran muchos. Existía el chat y el foro de Antiescuálidos, los cuales no tenían moderadores ni vigilancia. En consecuencia, la mayor parte del tiempo estos foros se llenaban de jóvenes opositores quienes se dedicaban a insultar con descalificativos soeces a los chavistas que los frecuentaban: MALDITOS CHAVISTAS, HIJOS DE PUTA, etc. El saboteo era tan intenso que en los chats la gente pasaba más tiempo defendiéndose de los opositores que hablando de ideología revoucionaria.

Y, como era obvio, muchos chavistas se iban. A nadie le gusta pasar dos o tres horas diarias de su tiempo libre en un lugar siendo insultado; prefirieron irse a otras páginas web, o -peor aún- abandonar por completo la participación en Internet, lo que causaba otro problema grave: hacía ver ante otros países que en Venezuela la oposición es mayoría.

Algunos opositores incluso hicieron trabajos de "inteligencia", fingiendo ser chavistas para ganarse la confianza de algunos compatriotas. Así lograron identificar a algunos de estos compatriotas, y de allí surgieron páginas como "Mierda Chavista", la antecesora de Reconocelos.com, donde opositores publicaron fotos de personas que apoyaban a Chávez, identificándolas con nombre y apellidos, lugares de trabajo, etc.

El foro de Aporrea

En Aporrea, su webmaster Martín Sánchez había montado un foro a mediados de 2002, pero mantenía las mismas características que el de Antiescuálidos: cero moderación ni administración, lo que causaba que la mayor parte de los mensajes fueran insultos de opositores contra el presidente Chávez, contra el proceso bolivariano, y discusiones sin fin (con insultos y todo) entre chavistas y opositores. Nuevamente, estos últimos eran mayoría.

En ese momento, yo era colaborador de Aporrea (desde julio de 2002), y pude convencer a Martín de que le cambiáramos el sentido a ese foro y lo volviéramos un foro sólo para chavistas."

¿Ésta es la web donde se hace una crítica seria del chavismo?
Si hubiera buscado una posición que ejemplifique por qué es un sinsentido y un insulto a la inteligencia el chavismo no habría encontrado nada mejor que éste que nos recomienda usted.

Fiorella: ¿Y todo ese análisis sobre Olga Wornat lo ha inferido usted despues de leer la tercera parte de un capítulo, que es lo que está publicado aquí, o en su rigor intelectual se ha leído usted toda su obra para poderla descalificar?
No se moleste en contestar porque me temo que sé la respuesta.
Fritz:Si siguen así en Venezuela, verá como se llega al 99'7% de partidarios de Chávez, igualando las estadísticas de la Rumanía de Ceacescu, de la España de Franco y del Portugal de Salazar: perseveren, que lo conseguirán.
Pau: como ya tengo bastante experiencia de lo que tú llamas fuentes de información fidedignas, consistentes en preguntarle a un amigo de allí o acordarte de unas vacaciones de un mes en la zona, que te da para ser un experto en el país, no me voy a cansar, porque no te has leído el proyecto de reforma constitucional en todos sus puntos y dudo mucho que lo vayas a hacer. Y para hablar de oídas ya estoy muy viejecica.

Por descontado, y previendo tus dudas y posteriores recriminaciones, tuve a bien releer de cabo a rabo el proyecto de reforma constitucional venezolano antes de entrar en tu blog. Digo releer porque ya lo leí hace tiempo. Me interesaba por asuntos que ahora no vienen a cuento.
Ocurre que soy lego en la materia y no me atrevo a sentar cátedra sobre lo leído con respecto al sistema electoral, de aquí lo de "creo" y "tengo entendido".
A estas alturas deberías saber que antes de opinar en tu casa me lo miro bastante bien, incluso pregunto a "gente" enseñada, la cual, y en este tema en particular, considera a Chavez un futuro dictador. También es verdad que tal como dicha gente piensa en cuestiones de reparto de la riqueza, no quedan demasiadas opciones.

Podríamos hablar mucho sobre constituciones, lecturas derechistas o izquierdistas según quien las lea. La que tratamos deja poco margen a una lectura derechista, como también es muy vaga con respecto al sistema electoral. Más que vaga es que apenas dice nada. Lo que sí aclara y eso es de lo que muchos se quejan, es que el presidente puede ser reelegido cada siete años sin interrupción alguna.

Valga decir que esta Constitución no me gusta, y si se planteara en España yo mismo saldría a la calle. Lo que me pregunto es si también lo haría en caso de ser venezolano y no pudiente. En eso sí que tengo mis dudas.
Estamos hablando de una Constitución algo estrecha y de fácil comprensión, y así y todo, la gente venezolana tan contraria a ella, cuando les pregunto apenas la conocen.
Curiosamente he sido mejor informado sobre ella y sus defectos, los que inciden sobre la futura ordenación económica, -que no electoral- por un gran industrial peruano, varios de media África y alguno español.
Vamos... igual que con lo del nuevo Estatut, que lo conocía mejor un amigo francés y mi amiga aragonesa, que la mayoría de los catalanes que tanto lo defendían.
Ya ves.

No juegues de farol conmigo, nene: si hubieras leído aunque sólo fuera el artículo 156 y el 236 sabrías que no me la vas a dar hablando de la reelección por periodos de siete años, que es lo que todos los tertulianos comentan, sin molestarse en comprobar y leer. Igual que tú, de farol.
Sustraer al parlamento la facultad de suspender las garantías constitucionales, dejándolas al arbitrio del presidente es mucho más grave. Y cualquiera que lea la reforma de verdad, saltándose toda esa morralla populista, lo sabría.
O no la has leído ni releído o no sabes leer. Una de dos.

No te prohibo que me respondas Gatopardo, pero tampoco es necesario. Lo que voy a decir es más bien para los demás lectores del blog (son críticas pero con simpatía), porque hay comentarios que me llamaron la atención.

1. De Olga Wornat, por supuesto, estamos juzgando únicamente lo que está aqui, eso es obvio. Y lo que hay es malo. No recomiendo leer las obras completas de Wornat habiendo tantas otras lecturas más interesantes. Lo que puedo decir sobre este capítulo (nada más) es que es sensacionalista y muy típico de revistas del corazón (hablar con amantes) y antichavistas (un ejemplo clarísimo es cuando dice "mi instinto hizo que no le creyera"... esa frase no se la habría permitido a sí mismo un verdadero periodista.)

2.- Lo siguiente que dice Wornat es rotundamente falso: "que cuenta sus intimidades de manera vulgar en su programa de televisión Aló Presidente". Me he tomado la molestia de ver el programa y puedo asegurar que Chávez habla ahí de política y nada más.

3. Se le sale a Wornat una verdad cuando habla de la oposición a Chávez. En efecto, esa oposición es tan ultraderechista que sin querer le hace un favor al presidente, porque a la mayoría de la gente de Venezuela le disgusta los ricachones racistas y discriminadores que están en contra de Chávez.

4. La persona que dijo "los memos de izquierda lo convierten en un icono de la revolución libertadora" sólo está demostrando su propia memez. Lo digo con todo respeto, no deseo polemizar, pero se necesita estar en Venezuela para entender por qué confían los venezolanos en él. No es porque sean memos. De eso intentaré hablar enseguida.

5. Wornat no toca el tema económico más que para decir que Venezuela se ha empobrecido. Eso fue muy repetido por la época en que salió este texto de Wornat. No sé cómo poner aquí links, pero les pido que busquen (está en el sitio web "rebelión.org", es un documento .pdf) un artículo del Profr. Vicenc Navarro (así se escribe), de la Universidad Pompeu i Fabra, donde habla precisamente de ese supuesto aumento a la pobreza. Wornat y otros que lo han repetido tomaron su información del Financial Times

o bien de alguno de los numerosos periódicos que se basaron en el Financial Times. Se difundió la noticia y nadie la cuestionó. Bien. Pasó el tiempo y 3 economistas norteamericanos (Mark Weisbrot, Luis Sandoval y David Rosnick, del Center for Economic and Policy Research) quisieron comprobar por sí mismos el asunto de la pobreza en Venezuela... y llegaron a la conclusión de que ha disminuido. Esto es interesante porque en su estudio dan detalle de lo que "falló" en los estudios iniciales. Y es interesante no sólo para Venezuela sino para el mundo, porque significaría que lo que está haciendo Chávez en Venezuela, al menos en lo tocante a la economía, puede ser adoptado por otros países. Por ejemplo, la política social, que muchos economistas critican (invertir en asistencia); eso en Venezuela está dando resultado y está siendo apoyado hasta por economistas que desconfiaban de la asistencia. Por ejemplo Joseph Stiglitz, Premio Nobel de Economía 2003.

6. En Venezuela, las ganancias del petróleo se están reinvirtiendo en la propia población. En otros países petroleros se destinan principalmente al pago de su deuda externa. Esta es otra razón por la cual los venezolanos prefieren a Chávez.

7. La reforma constitucional no proclama a Chávez dictador eterno. La modificación es para que Chávez pueda ser votado una vez más; la decisión es de los ciudadanos. Hay un montón de países que permiten hacer lo mismo a sus presidentes, pero esto no lo destaca la prensa porque de lo que se trata es de pegarle al "Diablo" Chávez. Voy a mencionar algunos presidentes que fueron votados varias veces en sus respectivos países, a los cuales condujeron por años y hasta por décadas: Franklin Roosevelt, Felipe González, Francois Miterrand, Helmut Köhl, Álvaro Uribe, Margaret Thatcher. Yo creo que la prensa europea y norteamericana demuestra hipocresía al criticar a Chávez por esa razón y no decir que dentro de sus constituciones se permite lo mismo. De hecho la modificación constitucional venezolana, en ese rubro, está inspirada en las constituciones de ellos.

8. Chávez puede ser un buen contrapeso a la influencia norteamericana en América Latina. Es un gran defensor de la integración regional, lo cual le conviene no sólo a Venezuela sino a toda Sudamérica. Además inspira a otros líderes a buscar un cambio en la política social interna; por ejemplo, Correa en Ecuador, Evo Morales en Bolivia y otros políticos que, aunque no gobiernan, cuentan con una base de apoyo popular muy importante, como Ollanta Humala en Perú.

9. Algo importantísimo: en Venezuela se respeta la libertad de expresión. Todos los días la televisión aturde al público con críticas feroces y ataques en contra de Chávez y de sus partidarios. En la radio y la prensa pasa igual: al que quiera gritar en contra de Chávez no le faltan lugares para difundir su mensaje. Y también hay que señalar que están en manos privadas la inmensa mayoría de los medios de comunicación de todos los tipos (textuales, audiovisuales). La situación de Venezuela en nada se parece a la de Cuba, e incluso me parece que hay mayor libertad de expresión y de información en estos momentos en Venezuela que en Estados Unidos.

10. Aporrea es un buen sitio. Si en su foro no publican cosas de la oposición, lo mismo se puede decir de este blog y de otros muchos sitios y periódicos (la mayoría ni siquiera tienen foro). Se podría, en todo caso, señalar una falla del foro de Aporrea, por no admitir al antichavismo. Pero lo relevante de Aporrea es la información, los artículos, los reportajes. Y ahí sí sale muy bien parado el sitio Aporrea.

11. Si todavía quedan con recelo hacia Chávez, hablen con uno de sus opositores, pídanle que explique por qué critica al presidente y luego busquen si lo que les dijo es

verdadero o no. Les garantizo que quedarán sorprendidos de la cantidad de mentiras que se dicen de Chávez. Recientemente, por ejemplo, se acusó a la policía bolivariana de matar a dos estudiantes, cuando lo que ocurrió fue un tiroteo entre dos grupos de opositores a Chávez que también eran opositores entre sí.

Ya por último, sólo agrego por ahora que sí me parece bien criticar a Chávez. A cualquier presidente. Pero con fundamento, no con mentiras. Y también hay que buscar las razones por las cuales la población lo apoya, para entender bien lo que está pasando; porque si no, será como no querer ver la mitad del paisaje.

No me molesta que nuestras conversaciones sigan siendo un constante rifi-rafe, es divertido y me adiestra.
Me sigues dando una de las razones que tengo y doy: soy lego en la materia y me pueden dar con mucha facilidad gato por liebre. Evidentemente llevas razón con lo del artículo 236. 22: "Disolver la Asamblea Nacional de acuerdo con lo establecido en esta Constitución." Pero su párrafo final dice claramente hasta donde está habilitado para disolverla. Entonces, si lees el artículo 70 te darás cuenta que el poder popular, en este caso, obliga al poder ejecutivo.
Creo que cometemos un fallo en nuestro empeño por mirar esta Constitución desde nuestro punto de vista europeo. Es posible que esta Constitución sea demasiado simple y no aborde suficientemente todos los temas, pero no deja de ser una completa revolución social. Deberemos ver como termina, los inevitables retoques del parlamento y su difícil puesta en marcha. Mientras tanto y por lo que veo -que ni tu ni yo estamos preparados para opinar sobre ella- deberíamos esperar.
Hoy por hoy las críticas más demoledoras proceden de medios políticos e informativos que solo se han distinguido por sus mentiras y catastrofismos económicos, aparte de ser parte en el asunto.
Mientras, deberé seguir confiando en su política económica, que hasta ahora ha demostrado ser más beneficiosa que la nuestra en el tercer mundo. Da más trabajo y riqueza en el África subsahariana un petrodólar de Caracas que cien euros de Bruselas. Ya ves... Y de eso si que entiendo.

"El aspecto físico y las innovaciones en la vestimenta de Chávez llaman la atención de los columnistas de sociales de los diarios nacionales. Roland Carreño, el periodista estrella de la sección de eventos del diario El Nacional, de Caracas, afirma:
En lo que hace al vestuario, el comandante mantiene, como en todo, un doble discurso. Cuando visita las barriadas populares viste ropa deportiva, que más lo hace parecer un entrenador cubano de boxeo que un jefe de Estado. Pero cuando está lejos de la plebe, se convierte en un hombre de ternos de gabardina de 1000 dólares, camisas de algodón italiano o piqué con monograma bordado en los puños o en uno de los laterales, yuntas de plata, bolígrafos Mont Blanc, relojes Cartier, sus preferidos, o Bulgari, que son adquiridos en Francia o en las joyerías Gerais o Daoro, las más caras de Caracas."

Recomiendo: "La corrupción en tiempos de Chávez" del periodista Agustín Beroes:
Capítulo I:
"El 15 de marzo el presidente del Fondo Unico Social, Comandante William Fariñas, antes primer funcionario coordinador interministerial del Plan Bolívar 2000, fue removido de su cargo y sustituido por el Teniente Alejandro Andrade, quien fue juramentado por la ministro de Salud y Desarrollo Social, María de Lourdes Urbaneja, para dirigir el FUS.
Urbaneja llegó al ministerio bajo la promesa de hacer cambios en el Fondo, debido a los señalamientos que pesaban sobre las cabezas de sus administradores (TalCual, 15/03/2001).
William Fariñas revelaba a un vespertino que "se nos acusa de ser Bandera Roja, pero en este país todo el mundo tiene su corazón comunista... Si nosotros le hiciéramos caso a todo lo que escriben nuestros adversarios, nos hubiésemos vuelto locos... El FUS es uno de los organismos más atacados y sabemos que tenemos que andar con pie muy firme. El ataque comenzó dentro del mismo FUS...
Al Fondo se le atribuían innumerables irregularidades, relacionadas con los más de 272 mil millones de bolívares que administró, donde destacan: la asignación de recursos a ONG's fantasmas, la entrega de dinero sin proyectos definidos y sin licitaciones, finiquitos y contrataciones vía telefónica, entre otros hechos.
El señalamiento más notorio quizás haya sido la asignación irregular de recursos por 347 millones a una ONG atribuida a la esposa del chofer de Fariñas (TalCual, 19/03/2001), como también la colocación bancaria y no en el Fondo de Inversiones de Venezuela de un fideicomiso de 18.000 millones de bolívares, destinados a la Tragedia de Vargas.
La periodista Marbelys Mavárez, de TalCual, lo entrevistó ese día.
— ¿A qué atribuye su salida del FUS?
— Es perfectamente razonable -respondió Fariñas-. Yo tengo dos años en el cargo. He

llevado la peor parte, nos hemos comido las verdes con mucha dignidad...
— ¿Por qué lo destituyen?,- insistió la periodista.
— Fíjate una cosa. Nosotros respetamos profundamente a nuestro Jefe del Ejecutivo y Presidente de la República. El tiene esa potestad, nosotros lo seguimos y acatamos sus decisiones. Yo soy un soldado de la revolución y quien la comanda en este momento es Hugo Chávez.
— Sin embargo fue la ministro de Salud quien lo destituyó...
— Bueno, la doctora Urbaneja es otra soldado. Yo conozco a esa mujer de extraordinarios dotes profesionales y humanos y es por eso que tiene ese cargo.
— ¿Es injusta su salida? —replicó la periodista.
— No hay injusticia —dijo-. Todo se está haciendo dentro del marco de la ley.
— Justamente. ¿Por qué entonces sale del FUS?
— Es un acto de justicia que después de dos años y después del nivel de desgaste que se ha tenido aquí el Presidente haya tomado esa decisión.
— ¿Para dónde va? ¿Qué cargo asumirá?, -concluyó la periodista.
— El mejor cargo es la vida. Y eso es lo que estoy haciendo. De allí que admiro profundamente al subcomandante Marcos.
Pero Fariñas tenía razón cuando afirmó que sus problemas habían comenzado desde adentro mismo del FUS. Ciertamente, en la edición de El Universal del 22 de octubre de 2000, se informaba de un documento elaborado por el Departamento de Tesorería y Finanzas donde se acusaba que "más de 5 mil millones de bolívares fueron transferidos... a entidades públicas y privadas (37 en total) que, para la fecha de la respectiva transferencia, no habían presentado un proyecto que justificara tales erogaciones".
Fariñas declaró, adicionalmente, "cometí errores y tuve que saltar talanqueras porque, lamentablemente, son muy engorrosos los trámites de la administración pública para poder cumplir con todas las pautas que se establecen para cualquier transacción" (El Nacional, 20/03/2001).

Y para considerar significativo -y escandaloso- los 100 trajes (a 1000 dólares) del armario de Chávez, las joyas y los relojes de Cartier no es necesario llamar a Boris o a Bosé, teniendo en cuenta que ese dinero sale del erario público, a no ser que el comendante tenga una fuente de financiación externa secreta.
Pero no es de extrañar que la mayoría de los pequeño-burgueses izquierdosos tengan atrofiado el espíritu crítico: aún recuerdo el chorreo que me caía cada vez que escatimaba las loas a Enver Hoxha y a Ceacescu.

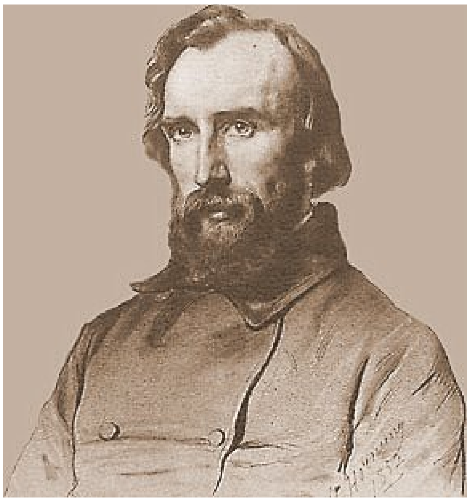
DIARIOS



(…) ”Nunca tiene nada que decir y es incapaz de dar detalles sobre alguien, ni siquiera de su familia; tiene la discreción o la indiferencia más diplomática de cuantos conozco. Es esencialmente solemne, y todo lo que no es rigurosamente directo no lo considera como sucedido; no adivina, no observa, no pregunta; se aísla como por gusto, y sólo conoce lo oficial, lo ritual, lo indispensable. Es la etiqueta del amor propio aliada a la bondad de corazón y a la debilidad de carácter. Hombre excelente, pero blando, lento, débil, tímido, y, por desgracia, susceptible, aunque en el fondo nada rencoroso. Su voluntad es recta, perfecta su conciencia, pero su inteligencia es perezosa y roma, y su carácter estropeado por muchos pequeños reveses. Su vida es limitada y monótona, y su falta de energía ha tenido fatales consecuencias para su felicidad y para la educación de sus hijos.”

SGAE: LA PUNTA DEL ICEBERG DE UN ENTRAMADO SOCIETARIO

vía www.publico.es

La Sociedad General de Autores y Editores (SGAE) es mucho más que una entidad de gestión colectiva, lo que la obliga según la ley a no tener ánimo de lucro. Esto le ha permitido obtener del Ministerio de Cultura la potestad para recaudar dinero allí donde suene o pueda sonar música de uno de sus asociados.
Sin embargo, como demuestran los datos del registro mercantil, SGAE es sólo la punta del iceberg de un entramado societario. Dentro de éste, la práctica totalidad de las compañías son sociedades limitadas, es decir, sí tienen ánimo de lucro. Además, la facturación de éstas se obtiene básicamente por servicios a SGAE y procede por tanto de la recaudación de derechos de autor.
De momento. SGAE lleva desde 2003 modificando su estructura y traspasando activos (monetarios y tecnológicos) a sus filiales para convertirlas en lucrativos negocios. De SGAE cuelgan dos patas: por un lado la Fundación Autor , que como tal fundación no puede tener tampoco ánimo de ganancia o lucro. Y por otro, la Sociedad Digital de Autores y Editores (SDAE) , una sociedad limitada que es el brazo tecnológico de SGAE.
Fundación Autor no puede ganar dinero pero es el único accionista de Iberautor, una sociedad limitada. Ésta a su vez es el principal o único propietario de otras cuatro sociedades limitadas.
Todas ellas se dedican a obtener negocio de actividades relacionadas con la cultura, ya sea con la publicación y distribución de libros, discos y vídeos o con la programación y ejecución de espectáculos. Se trata de Sello Autor , Centro de Producción Audiovisual Autor , Altos del Río y Teatro Príncipe Pío S.L

Gestión de teatros
Teatro Príncipe Pío S.L ., de cuyo capital Iberautor controla el 60,28% (el resto está en manos de Antonio Banderas que redujo su participación en 2002), debe su nombre a un proyecto que nunca vio la luz: la creación por parte de SGAE junto con Riofisa de un espacio escénico en la estación de ferrocarriles de Príncipe Pío en Madrid.
Riofisa acabó aliándose con la productora holandesa Stage Hólding para el proyecto, lo que motivó una denuncia de SGAE que ésta perdió al demostrar Riofisa que ni se había solicitado licencia de obras.
Pero aunque fallase aquel intento, SGAE ya le tiene preparados casi una decena de teatros a la filial para que desarrolle su actividad, en competencia con otras salas de teatro privadas. Ni Teatro Príncipe Pío ni Iberautor invertirán un euro en la puesta en pie de los espacios escénicos porque no son sus propietarios.

El dueño (o gestor, porque en algunos casos son edificios históricos cedidos por administraciones públicas por hasta 75 años) es la Fundación Autor.
¿Cómo los ha conseguido? En el año 2003, la junta directiva de SGAE decidió iniciar el llamado Plan de Sedes Integrales y dotar a la Fundación Autor del dinero necesario para emprenderlo (ver información en página siguiente). Según la memoria de SGAE de 2004, la decisión se toma en base a un informe de la consultora Ernst & Young.
También en 2003, SGAE decide traspasar sus activos tecnológicos a otra filial 100% suya: SDAE. La actividad fundamental de ésta se centra en el mundo digital y de Internet.
Portales de venta de contenidos, sistemas de protección de copia privada (DRM) con la clara intención de ser comercializados y obtener con ello un beneficio lucrativo. Es el caso del sistema Argos, activo fundamental de Argos International Organization, participada por SGAE, SDAE y la SGAE de Francia.

Directivos pluriempleados
Junto al entramado societario de SGAE existen compañías que no cuelgan de la gestora pero comparten directivos, domicilio social y en algunas ocasiones incluso el teléfono de contacto.
La principal es Microgénesis, de la que fue presidente hasta el año 2000 el actual director general de SDAE, José Luis Rodríguez Neri. Coinciden además entre sus directivos otros de SGAE como Rafael Ramos Díaz o Eva García Pombo.
Entre los negocios de Microgénesis está la gestión de los portales de venta de música Latinergy, Museekflazz, Egrem y Nubenegra y entre sus proyectos (según su página web) está el sistema Teseo (proyecto de SGAE) o La Central Digital (web de Portal Latino). Microgénesis, Coqnet, La Central Digital y Portal Latino, entre otras, han compartido sede en Gran Vía 36 durante años. Ahora se están trasladando todas a Abdón Terradas 4.

Mil fórmulas para sacar de SGAE el dinero recaudado
De la recaudación de SGAE no han escapado ni Inditex, ni TVE, ni las bodas, ni lo van a hacer los móviles, por citar algunos ejemplos. La sociedad sigue incrementando sus ingresos, que en 2006 alcanzaron los 343 millones de euros.
La mayor parte se distribuye entre sus asociados por una fórmula que SGAE no revela.
Pero hay otras vías que consumen parte del dinero. Una es el traspaso de activos.
Es el caso de los 55 millones que se traspasaron entre 2003 y 2006 a Fundación Autor procedentes del fondo de promoción. O los activos tecnológicos que se han traspasado a SDAE mediante ampliaciones de capital (de aportación no dineraria, según las cuentas del registro).
Otra de las opciones aparece en las cuentas auditadas de las filiales de SGAE. Iberautor debe su facturación (que ha rondado entre 2002 y 2005 los 10 millones de euros anuales) fundamentalmente a SGAE, que aportó el 93% del total en 2004 y el 84% en 2005.
La factura de 2005, por ejemplo, equivale al 3,4% de todo el dinero recaudado ese año por SGAE como derechos. No se especifican las actividades de Iberautor porque, aclaran, eso puede "provocar perjuicios" a la sociedad. En el caso de SDAE, obtiene el 99% de su facturación de SGAE. Además están las ampliaciones de capital, a las que acude SGAE para reequilibrar el patrimonio cuando una filial entra en quiebra (como SDAE en 2004 o Portal Latino en 2005).
Pero una de las partidas más significativas de las cuentas de las filiales de SGAE son los "servicios exteriores", que figuran en el apartado de gastos y consumen buena parte de lo que se factura a la gestora. Iberautor, en 2005, gastó en servicios exteriores 7,1 millones de euros. SDAE en ese mismo año refleja por ese concepto 0,51 millones de euros.

SGAE contrata con asiduidad a algunas sociedades no del grupo con las que sí comparte directivos y el domicilio social de sus filiales.
Es el caso de Microgénesis, que tiene entre sus proyectos La Central Digital o el proyecto Teseo de SGAE. Otra es Coqnet. Son quienes figuran como contacto técnico y de facturación de los principales portales de venta de contenidos de SGAE.

La SGAE va de legal pero...
La SGAE resulta que encargó a uno de los estudios que están siendo investigados por el juez Torres en la "Operación Guateque" la tramitación de una licencia para el Cine California, local adquirido en 2002 pero que en 2006 aún seguía sin permiso.
El Mundo asegura que en los próximos días el presidente ejecutivo del organismo, Teddy Bautista, será llamado a declarar. Ante la publicación de esta información, la SGAE ha emitido un comunicado aclarando que no han "gestionado directamente la tramitación de licencias".
¡Tendrán cara!

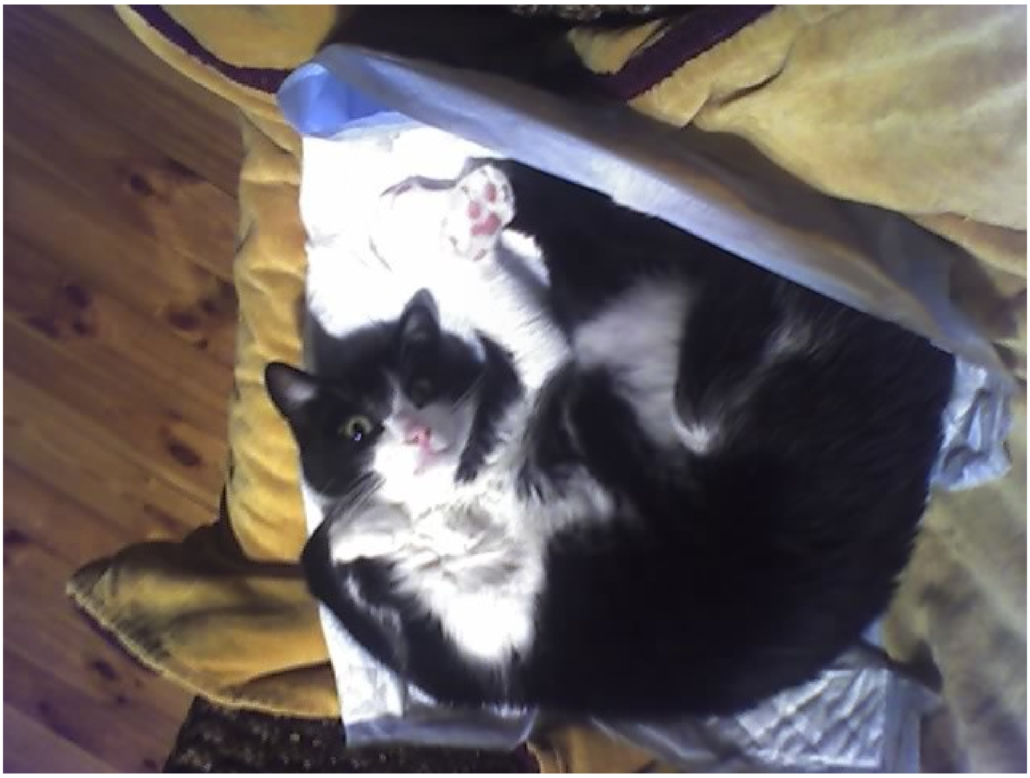
TORREVIEJA ESTÁ EN EUROPA; PERO NO LO PARECE...



En el primer mundo nos sentimos muy ufanos con nuestra civilizada superioridad. Hasta que nos damos de narices con las mafias del ladrillo y la mofa y befa que se hace a las leyes en centenares de Ayuntamientos., donde los políticos electos desoyen y se pasan por el forro, sin que ocurra nada, la Ley de Administración Local y la Constitución, Ley de Leyes.
En **Torrrevieja Digital** , un grupo de valientes ciudadanos informan de lo que los jueces, el fiscal anticorrupción, el Tribunal de Cuentas y otros organismos de control no encuentran tiempo para investigar y poner coto. Léanlo. Es un viaje al tercer mundo, con su alcantarillado desbordante de inmundicia a pie de playa cada vez que llueve, su policía local sin los estudios básicos preceptivos, tan parecidos a los que vemos en Haití, su imaginativa interpretación de la legalidad, su horda de extranjeros etílicos y añosos, que logran ignorar la lengua y el paisaje humano hasta que se mueren, pero respaldan a ultranza al Ayuntamiento que les organiza verbenas con barra libre, gratis total, mientras tiene a los niños de primaria en barracones inhóspitos... como los niños de los países de origen de los mafiosos internacionales que blanquean su dinero en España, el país Europeo donde circulan más billetes de 500 euros.
Lean **Torrrevieja Digital:** es una lección diaria de periodismo ciudadano, y un análisis al microscopio de la joven democracia española, tan corrupta, tan decrépita, y tan agusanada como sus políticos. Y la demostración de que hay ciudadanos que no merece soportar esta basura como representantes.
De nada, ya saben que me gusta ser útil.

¿Sabías que Torrevieja es la población más arruinada y con más deuda municipal por habitante?
La obsesión gubernamental de que los ayuntamientos se autofinancien con solo la nueva edificación ha hecho que Torrevieja, un pueblo que ya no tiene un centímetro cuadrado urbanizable, no disponga de entradas económicas. Sus arcas apenas pueden pagar los sueldos de sus funcionarios, no tardaremos mucho en ver a su policía municipal cobrar con sobornos y multas administradas al instante.
Así y todo hemos de entender que la política educativa de una población de su tamaño no depende de su ayuntamiento, sino de la Generalitat valenciana, que tiene traspasado el asunto. De todos es sabido que la Generalitat valenciana pasa olímpicamente de la educación de las clases más humildes. Y no pasará mucho que veamos su sanidad pública, como la de Madrid, privatizada.

Gatopardo nos llenas de satisfacción al apuntar y dedicarnos un post a estos tres vándalos que componemos Torreviejadigital.
Nustro proyecto nació de la necesidad de ofrecer a los ciudadanos la verdad de una realidad camuflada por la publicidad engañosa de las inmobiliarias, los medios locales controlados por el poder o simplemente censurados y maniatados.
Desde hace un tiempo estamos recogiendo frutos y ya tenemos lectores que no sólo nos leen fielmente, además nos envían sus preocupaciones de inseguridad, ilegalidad de obras, jardines infantiles tercermundistas, la falta de un alcantarillado que se cobra religiosamente junto con el recibo del agua... y lo que es peor, la pasividad

administrativa del Gobierno Local.
Pau, desgraciadamente la sanidad pública (el nuevo hospital) está gestionado por una empresa privada, al igual que las basuras (nos matamos por ver pasar al barrendero por la puerta de casa), la grua municipal (que no lo es) o el transporte urbano y escolar, que también es gestionado nefastamente por una empresa privada.
Estos servicios cuestan mucho más que si fueran municipalizados y públicos y realizan peores servicios a la comunidad. Pero que más dá si el primo, el cuñao o el pelota de turno se hace un nuevo rico sin cultura alguna...

Muchas Gracias a Gatopardo y a ver si nos mandáis al Espía que surgió del Frio... Le avisaremos para la próxima fiesta que Putin prepare de tapadillo para los constructores y autoridades locales.

Saludos

Addio Lugano bella o dolce terra pia
cacciati senza colpa gli anarchici van via
e partono cantando con la speranza in cuor.
E partono cantando con la speranza in cuor.

Ed è per voi sfruttati per voi lavoratori
che siamo incatenati al par dei malfattori
eppur la nostra idea è solo idea d'amor.
Eppur la nostra idea è solo idea d'amor.

Anonimi compagni, amici che restate
le verità sociali da forti propagate
è questa la vendetta che noi vi domandiam.

Ma tu che ci discacci con una vil menzogna
repubblica borghese un dì ne avrai vergogna
noi oggi ti accusiamo in faccia all'avvenir.
Noi oggi ti accusiamo in faccia all'avvenir.

Cacciati senza tregua andrem di terra in terra
a predicar la pace ed a bandir la guerra
la pace tra gli oppressi, la guerra agli oppressor.
La pace tra gli oppressi la guerra agli oppressor.

Elvezia il tuo governo schiavo d'altrui si rende

Había una canción que se cantó a la muerte de Durruti, que decía más o menos así "Día 20 de noviembre,
día nublado y sin sol,
hemos sabido la muerte
de un valiente luchador,
que pleaba en Madrid
con sus bravos milicianos,
para aplastar al fascismo
con el fusil en la mano.
Una bala traicionera
salida de una ventana.....

¡Ya no sé más!
¿alguien la sabe?
Yo sé cantar lo que escrito....con su música.

Por cierto, se ha editado un libro-disco con las mejores canciones anarquistas del mundo.

DE LA EGOLALIA VICTIMISTA

La historia del Derecho Penal refleja la lucha de la justicia por sustituir a la venganza.

La administración de justicia debe atenerse a un procedimiento objetivo para valorar las pruebas y los testimonios, teniendo en cuenta que las víctimas suelen ser parciales y poco fiables por estar contaminadas de un vehemente deseo de venganza, muy comprensible, pero ilegítimo para determinar la sentencia.

La figura de un tribunal que dictamine imparcial y desapasionadamente es una conquista de la civilización contra la barbarie que suele representar el expeditivo afán justiciero de las víctimas, a las que le basta con la simple sospecha para desencadenar el linchamiento moral del acusado, el ajusticiamiento colectivo, su aniquilación como ciudadano con derechos inalienables, que incluyen las garantías de un proceso justo.

En los últimos tiempos, gracias al morboso interés que provocan los psicodramas lacrimógenos de las víctimas, la "alarma social" se ha convertido en un motivo válido para que los jueces que instruyen un sumario modifiquen sus decisiones, y adoptan medidas de carácter punitivo cuando su labor debería limitarse a recabar pruebas y testimonios para descubrir la verdad y adoptar las medidas cautelares para evitar la destrucción de pruebas y la fuga del sospechoso.

Los medios de comunicación suelen compensar la falta de talento, rigor y creatividad por una moviola que repite cientos de veces las mismas escenas, los mismos relatos, en una especie de mantra casi hipnótico que exacerba las opiniones, conmociona, y no informa, con lo que se consigue la "alarma social" con la que maquillamos lo peor de nosotros mismos en un delirio vengador colectivo. Y eso cuando, teóricamente, el juicio y la sentencia es prerrogativa de un tribunal imparcial, cuya subjetividad no esté contaminada por la instrucción del sumario.

Las víctimas se han investido de una autoridad moral de la que carecen, exigen un protagonismo que no debería concedérsele, y reciben un crédito por su condición de víctimas, parientes o allegados que es un atentado contra el sentido común y la idea del Derecho moderno. Ningún juez —ni nadie con dos dedos de frente— debería tomar en cuenta su cantinela ecolálica, rebozada con un ego hipertrofiado por el victimismo. Por mucho que se nos exija en nombre de esa "sensibilidad y solidaridad" edulcorada y bobalicona que persigue el chantaje emocional al que nos someten.

Si hay que tomar una decisión trascendental en la que esté en juego la justicia, hay que usar el cerebro y no esa lepra emocional producto de las hormonas y las gónadas que mueve a los querulantes.

He dicho.

Gato totalmente de acuerdo porqué últimamente como tu dices la justícia se parece más a una terúlia de vecinos que pasan la tarde jugando al parchís (sin tener nada en contra del parchís al cual juego de vez en cuando con mis amigos y amigas) e imponiendo penas y castigos. No sé muy bién quien propicia este circo o si han dejado que se pueda proiciar.

PD. gato no podia entrar en tu página ultimamente , cada vez que lo he intentado se me quedaba enganchado el ordenador y tenia que aparagalo, te lo digo por si has tenido notícias de que le haya pasado a alaguien más o és solo un problema de mi ordenador, pero sólo me pasa con tu pagina.

Querido gato, estoy totalmente de acuerdo contigo. Esto de los medios de desinformación es la leche. Nos machacan con eso de la alarma social. ¿Qué significa eso? En realidad lo que hacen es que la gente tenga miedo. Un miedo irracional y no justificado. Siempre hemos tendo la garrota lista, pero ahora, entre los "afectados" y los "presuntos culpables", andamos sin saber muy bien quien es quien. Hace tiempo que he decidido ver las noticias de vez en cuando, en todas las cadenas que pillo. Y es como si viese la misma. Un machaque mental total. En vez de noticias, cada vez se parecen los telediarios a la vieja revista "El caso".
Y luego dicen que vivimos en una sociedad insegura... Si ellos mismos se ocupan de enseñarnos todas las aberraciones y nada de educación, cultura, humanidad, solidaridad... Y si lo hacen, son pequeñas gotas en un mar de desastres.
Un saludo, querida Gatopardo. Sigues en línea.

ENTRE ESPAÑA Y MÉXICO

Qué hilo tan fino, qué delgado junco
-de acero fiel- nos une y nos separa
con España presente en el recuerdo,
con México presente en la esperanza.
Repite el mar sus cóncavos azules,
repite el cielo sus tranquilas aguas
y entre el cielo y el mar ensayan vuelos
de análoga ambición nuestras miradas.
España que perdimos, no nos pierdas;
guárdanos en tu frente derrumbada,
conserva a tu costado el hueco vivo
de nuestra ausencia amarga
que un día volveremos, más veloces,
sobre la densa y poderosa espalda
de este mar, con los brazos ondeantes
y el latido del mar en la garganta.
Y tú, México libre, pueblo abierto
al ágil viento y a la luz del alba,
indios de clara estirpe, campesinos
con tierras, con simientes y con máquinas;
proletarios gigantes de anchas manos
que forjan el destino de la patria;
pueblo libre de México
como otro tiempo por la mar salada
te va un río español de sangre roja,
de generosa sangre desbordada.
Pero eres tú esta vez quien nos conquistas,
y para siempre, ¡oh vieja y nueva España!

FUNDACIÓN ARECES: CURSOS DE CORRUPCIÓN

El día 2 (San Justo, martir y San Jorge, ob.) y 3 de noviembre de 2007 (San Martín de Porres, San Pedro Armengol y Huberto, ob) éstos que lo son, hacemos un curso sobre la corrupción en la Fundación Ramón Areces , *magistra magistris*. No nos duelen prendas: reconocemos que de corrupción sabe cantidad, con mucho, de largo, nos sobrepasa por la derecha, por la izquierda, silbando, sin manos, y en superdirecta. Nos podría impartir un doctorado en triquiñuelas, engañifas, argucias, artimañas, componendas, estratagemas, martingalas, tretas, amaños, ardides, magancerías, magañas, trampas, añagazas, embelecos, embrollos, enredos, tinglados y filfas; pero, por ahora, se contentan con dar un curso de corrupción.
Contritos, humildes, mohínos, fanés y descangayados, l'agüela, El Pendón Volteriano, El espía que surgió del frío, y este servidor, Alimaña (redactor jefe de Alimaña News: *la noticia antes de que ocurra*) nos vamos a chutar en vena el monográfico, que como muy bien dicen: *"El estudio de la corrupción es muy difícil: por su propia naturaleza, la corrupción no puede observarse directamente y por tanto no se ha estudiado a fondo en las ciencias sociales con un enfoque cuantitativo."*
Vamos a ir becados. Nos pagan por enseñarnos. Con estos cursos, la Fundación Areces inicia un nuevo espíritu, ya vaticinado por CC.OO, que hemos de agradecer a Magda Salarich . (Repetimos: Magda Salarich, y no ese portento de la ingenieria en demoliciones, que es nuestra ministra de Fomento, Magdalena Álvarez)
Si para esas fechas se les rompe alguna tripa, estamos en Vitrubio, 5, Madrid: pregunten en conserjería por los triunviros y l'agüela.
A mandar.

HA MUERTO JUAN ANTONIO CEBRIÁN,

Deja cientos de miles de huérfanos entre los oyentes de "La Rosa de los vientos" -entre los que se contaban sus adversarios y amigos de otras empresas de la competencia-, un *magazine* que los directivos de Onda Cero desterraron a la madrugada, en el que hablaba de la historia de los godos, de los romanos, de Egipto, de Grecia, de la intrahistoria secreta de algunos episodios contemporáneos, de asuntos de calado social, mezclando un humor socarrón con grandes dosis de escepticismo y con una enciclopédica cultura, y que logró convertir, como todos los que dirigió, en uno de los programas de culto de la radio española, con apasionados seguidores en todas las capas sociales.
Misterios de un público al que se le ofreceN programas basura, con la excusa de que es lo que gusta, que ha trasnochado o madrugado para escuchar durante diecisiete años los programas de Juan Antonio Cebrián, y que ha colapsado los contestadores de todos los programas de las diferentes cadenas que anunciaron su muerte, victima de un infarto, con mensajes de profunda tristeza, como si se les hubiera muerto un amigo muy querido, un familiar muy cercano, porque la pérdida de quien respetó la inteligencia de sus oyentes no es un drama menor.
En el curriculum de su página web dice: *"Ha sido distinguido, dentro de su importante trayectoria, por la Asociación de Corresponsales Diplomáticos con el premio al "Mejor Locutor" (1994); "Mejor programa radiofónico" (1996) "Turno de noche" por el semanario Águeda; "Gajo de oro" de 1998 concedido por la confederación de cooperativas agrícolas; Premio a la "Mejor divulgación" (1998) por el Fondo Mundial de Protección a la Naturaleza WWF/Adena, Insignia de oro de 2002 concedida por el ayuntamiento de Quintanar del rey(Cuenca) y Premio Reloj de Arena 2007 al "mejor*

programa de radio en cadena nacional" con temática de misterio.
Es autor de "Pasajes de la Historia" Corona Borelis 2001, "La aventura de los godos" La Esfera de los Libros 2002, "La cruzada del sur" La Esfera de los Libros 2003, Pasajes de la Historia II "Tiempo de héroes", Corona Borealis 2003, "Pasajes del Terror, psicokillers asesinos sin alma" Ediciones Nowtilus 2003, "La aventura de los romanos en Hispania" La Esfera de los libros 2004, "Mis favoritos", la Esfera de los libros, "Enemigos íntimos de la historia", La Esfera de los libros 2005 (opúsculo exclusivo para la Casa del Libro) , "Enigma, de las pirámides de Egipto al asesinato de Kennedy", Temas de hoy escrito en compañía de Bruno Cardeñosa, Carlos Canales y Jesús Callejo, "El Mariscal de las Tinieblas, la verdadera historia de Barba Azul" , Temas de Hoy 2005, "La aventura de los conquistadores" Esfera de los libros 2006, "Los Borgia: historia de una ambición" Temas de hoy 2006 , "El misterio de Tutankamón y otros personajes favoritos de la historia" Esfera de los libros 2007 y "Pasajes de la historia, de la batalla de las Termópilas al barón rojo", Temas de hoy 2007. Obras de amplia difusión con traducciones al catalán y portugués y con más de 100 ediciones en el conjunto de sus libros."
Lo que no dice es que para poder desarrollar su labor profesional, que incluía la investigación, recopilación y búsqueda documental recurría a los libros leídos digitalizados, a los programas de ordenador con un programa de lectura de voz, porque cuando todos exhibimos nuestras debilidades y nuestros alifafes como coartada para rebozarnos en el victimismo y cultivar la esterilidad, Juan Antonio Cebrián olvidaba, y hacía olvidar a los demás, que era ciego.
¡Que los dioses paganos nos libren de olvidárlo!

MI PADRE ES EL MÁS CHULO, CON DIFERENCIA,,,

Hablar de mi padre es describir al tipo más original que he conocido.
En mi familia, en la que somos ciento y la madre, mi padre es el patriarca. Cuando conoció a mi madre, él ya tenía dos libros de familia a cuestas y ella la esperanza de que alguien la librara del martirio que vivía con apenas 16 años.
De su primera mujer no sé mucho, tan sólo que se quedó viudo muy pronto, con una hija muy chica, y que no tardó en volver a casarse con su segunda mujer. Nunca se divorciaron, sin embargo, desde que se escapó con mi madre, no han vuelto a verse. Los dos hijos que tuvo con ella, José y Antonio, pasaron largas temporadas con nosotros. Mi madre parió tres hijos más. A mi hermana mayor la concibieron en prisión, llamándola Libertad, detrás nací yo y por último Manuela.
Mi padre pasó doce años en la trena. Pagó con cárcel el haber liberado a mi madre de uno que quiso ser su chulo. La mayor parte de su condena la pasó en Cádiz, pero aun así, a pesar de los mas de 500 km, mi madre nunca faltó a ninguna de las comunicaciones. Y nosotros tampoco.
Mi padre me había enseñado lo que era ser hombre en aquel chabolo de paredes húmedas y desconchadas, con olor a lejía y a moho. Y cuando me sentaba en sus rodillas y me cantaba bulerias por la libertad y el amor a la madre, me sentía orgulloso de ser su hijo..
Cuando cumplió su pena yo ya tenía diez años. Padre volvió a casa y la fiesta duró tres días... ningún calé de la provincia que fuera familia faltó. Bailes, palmas, llantos y risas

llenaron la casa por la libertad de mi padre y el cautiverio de otros.

Si yo abiyelara er mando
Que Undebé le dio a la muerte
Yo quitara d'este mundo
Ar que m'estorba er quererte

Se rompieron muchas camisas bailando para celebrarlo.Pasados los primeros días, descubrí a padre ante el espejo. Se afeitaba sin mirar por donde pasaba la hoja su navaja de asta de ciervo, tan sólo se miraba a los ojos... Y si no fuera por que sé que mi padre jamás lloró por nada, aquel día hubiera pensado que el brillo de sus ojos eran lágrimas congeladas.
-*Juanillo, ahora que tu padrecico está aquí, la mama ha de estar en la casa y vosotros me ayudaréis con los caballos. El colegio está hecho pa' los payos... vosotros sois hombres, no necesitáis aprender tonterias, la vida se aprende en la calle, currando. Un gitano tiene sólo su propia ley, ser un macho y respetar las costumbres. Te lo dice tu bato que de esto chano, la trena me ha hecho viejo*.
Pasaron los años y mi madre perdió la ilusión y la lozanía. Se había vuelto una mujer callada y desganada. Ahora apenas hablaba de mi padre. Mientras él estaba preso, no hubo día que no nos contara cómo se hizo boxeador, o las veces que había ayudado a la familia...Ahora su rostro se había derrumbado y su mirada, antes tan vivaz, era bovina. Nunca salía de casa, tan sólo esperaba a que el papa volviera y lo hiciera bien.
José, el mayor de mis hermanos se fue a Barcelona, y allí se hizo mecánico ; Antonio, venía poco a vernos, y nunca nos dijo que es lo que hacía. Y yo me había convertido en la mano derecha de mi padre. Por el contrario mi padre había rejuvenecido, y sus negocios le llevaban a faltar de casa durante días. Compró un mercedes blanco, vestía trajes negros con finas rayas blancas de estilo italiano y su familia había crecido enormemente, pues cuando volvía por la casa ademas de la chusquela, traía algun nuevo primico al que todos debiamos de atender como tal.
Un día padre mandó a llamarme a las cuadras, quería hablar conmigo.
-*Mandé araquerarte pa'pedirte algo. Juan, eres un hombre como tu viejo, y el único de mis chavales que esta conmigo. Ahora vas a hecer algo por la familia. Hay un fulano que me ha levantao material y no quiere soltar el parné*... -dijo mi padre. Y poniendo una navaja sobre la mesa, bebió su chato de vino blanco y prosiguió - *Esto es pa'ti...Tendrás que merar al payo, hoy a la noche.*
-*Pero viejo, yo no*.
-*¡Tú harás lo que tu padre diga!, ¿o es que no eres hombre*? y mirándome como poseso me empujó.
-*¡Vete pa' ca tu madre y espera a que yo vaya! Y no le puches na a tu madre, no tardo.*
Hubiera dado lo que fuera para que todo hubiera sido un sueño, pero ese día supe que, si no hacía lo que padre me ordenaba, tendría que marcharme deshonrao para siempre, y esconderme donde nadie supiera quien era. No habría caló que quisiera cuentas conmigo si no cumplía. Sentí terror. Marché a la casa y allí esperé.
Cuando él llegó venía con dos de sus compadres... Venían alegres, cantaban y quisieron comer. Mi madre les puso jamón, queso, morcillas y todo el mejor embutido. Hicieron todo tipo de bromas sobre mí.
- *Hoy serás un hombre*- me decían. Mandaron a mi madre fuera de la habitación y me dieron de beber mientras cantaban y reían. No sé cuánto bebí, tan sólo recuerdo ver a mi madre llorar en silencio mirándome desde el balcón cuando me iba.
De lo que esa noche ocurrió, ni puedo hablar, ni puedo recordar. A la mañana siguiente desperté en un club de carretera. Me dolía la cabeza, como si fuera a estallar... Una puta medio desnuda me miraba con sonrisa socarrona, mientras yo me levantaba desorientado. Imágenes sueltas como fotogramas, se agolpaban en mi cabeza. No podía

y no quería recordar, tan sólo quería desaparecer de allí.
-Quien eres tú? ¿Dónde está mi padre? ¿Donde estoy?
La fulana contestó con un dulce acento, tal vez colombiano.
-Ay, no... mi papito. Ándate tranquilo, mi amor. Tu padre me encargó que te cuidara. Él tiene sus cosas que atender y mañana volverá. Tú estás aquí y eres el rey de esta casa, no te preocupes y pide lo que papi quiera.
Padre no volvió al día siguiente, ni al otro... Padre tardó seis días en volver. Y yo estaba perdido en aquel lugar cuidado por mujeres. Era el sueño de cualquier hombre, y cuando no era el único en la casa, cuando llegaban los clientes a eso de la media tarde, Sara me llevaba a su habitación y me enseñaba el venturoso arte de amar a las mujeres...

Un tema interesantísimo el de los valores familiares y sociales de la etnia gitana que a los que la sociedad nos cataloga como diferentes, (creo que todos somos iguales) constituye un ejemplo digno para aprender y comprender. Un comentario magnífico.

GACHÉS, GACHÍS, CHANOS Y CIBERVÁNDALOS EN EL AMBIGÚ CULTURAL DE EL CORTE INGLÉS/ FUNDACIÓN ARECES.

La Fundación Ramón Areces ha decidido prescindir de ese Girón de Velasco de los Grandes Tenderos de Ultramarinos que es Juan Manuel Mingo Contreras. En su lugar ha contratado a Magda Salarich Fernández de Valderrama, antigua directora de Citroën en España y responsable comercial y de marketing en Europa. En el brillante *curriculum* de esta dama que la prensa española ha publicado, se ha omitido algunos detalles, como el de que su dimisión, en julio de 2007, *"por motivos personales"* era un cese inevitable, anunciado desde finales de 2006 en los círculos económicos franceses.

Christian Streiff, nuevo presidente del grupo PSA Peugeot-Citröen desde febrero de 2007, tenía decidido deshacerse del lastre que suponían Frédéric Saint-Geours, presidente de Peugeot, y Claude Satinet, presidente de Citroën y "padrino" de Magda Salarich. Con ello, Streiff intenta iniciar una estrategia nueva de mercados y lavar la imagen del grupo de la mancha de ciertos escándalos como el de Faurecia S.A .

Salarich es un fichaje perfecto de la Fundación Ramón Areces. Con su nombramiento se continúa el lema de que el mal gusto combinado con la falta de escrúpulos es la fórmula magistral más rentable en este país. Los anuncios de Citröen no han sido los más horteras de Europa porque el primer puesto se lo ha arrebatado los del Corte Inglés. Respecto al trabajo de presos del que se benefician las dos empresas, es un modelo de prosperidad, beneficencia y paz sindical, que sólo tiene un parigual en los orfanatos y asilos británicos de la época victoriana.

Pero Magda Salarich no ha "desbancado" a Mingo, como se rumorea maliciosamente en la Fundación Ramón Areces. Sus familias mantienen una buena amistad. La sobrina de Juan Manuel Mingo, Eva de Mingo Nieto, diplomática de carrera, fue destinada como cónsul en Sumatra, siendo Director General de Política Exterior para Asia y Pacífico, José Eugenio Salarich Fernández de Valderrama, hermano de Magda Salarich, cuando aún seguía candente el caso de Noelia de Mingo. Este José Eugenio Salarich, una de las joyas más preciadas de Rodríguez Zapatero, es el máscarón de proa gubernamental que empresas como Induyco/ El Corte Inglés tienen en Asia.

O lo que es lo mismo, el Gobierno, a través de su Ministerio de Asuntos Exteriores, se preocupa y esfuerza para facilitar, a estas grandes empresas, la deslocalización del sector textil en España y su reubicación en países con mano de obra quasi-esclava. Dadas estas facilidades, nuestro simpar Director General de Política Exterior para Asia, no se explica cómo hay tan pocas empresas españolas en China. Yo tampoco. Y cuando veo los foros, congresos, becas y estudios sobre el mercado asiático que la Fundación Areces y el Corte Inglés están subvencionando, me pregunto por qué no le endilgan la factura al Ministerio de Cultura o al de Educación y Ciencia. Ésos pagan sin rechistar y, además dan las gracias.

Engolfada con estos devaneos con el gobierno, a la Fundación Areces se le están sublevando las tropas en la patria: parientes levantiscos, traidores y querulantes la arrastran por los tribunales exigiendo partes justas y aliquotas; un inofensivo (salvo por su prosa) erudito como Diego Catalán se ha transmutado en Blas de Lezo y Olavarrieta y amenaza con sus cañones desde los matacanes del Olivar de Chamartín; un día de éstos, los becarios y otros pordioseros culturales van a colgar de las orejas al limosnero, si éste sigue negándose a pagarles la Seguridad Social... Mala señal es quedarse sin pobres. Y peor, cuando la *famiglia* se rompe. Viene la anarquía y el gamberrismo. Miren en qué estado han quedado las oriflamas culturales de la Fundación Areces/ El Corte Inglés en una institución tan querida y respetada por todos nosotros como la **Wikipedia** :

Aparece un gamberrete en la Wikipedia que no se identifica con un nombre de usuario ni un *nick* y planta un artículo sobre el costo. El bibliotecario de Wikipedia, luego de saludarlo cortesmente y llamarlo por su IP, que es la **194.179.126.151** (¡Por Dios, que alguien explique a los de Informática El Corte Inglés qué es una IP!), le amonesta:

> *(...)"hay un problema con tus colaboraciones en el artículo Costo, que han consistido en la copia literal del contenido de otras páginas web, o de otros medios que podrían estar protegidos por derechos de autor. Como se explica en Wikipedia:Copyrights, esta clase de aportaciones no son aceptables, porque pueden implicar una violación a los derechos de los autores del mismo. Por esa razón, el texto ha sido retirado y un aviso de posible violación de copyright se ha colocado en su lugar."*

Este primer aviso al copión es de 15 de diciembre de 2006.

El 31 de enero de 2007, el figura con **IP 194.179.126.151** vuelve a fastidiar a Wikipedia y se le da el último aviso:

> *"Hola,* ***194.179.126.151*** *Te agradeceré no edites arbitrariamente los artículos de Wikipedia; al hacerlo, obligas a otros editores a perder tiempo valioso en revertir tus acciones, y empañas la imagen que puede hacerse de Wikipedia un visitante ocasional. Si no quieres ser considerado un vándalo destructivo (lo que nos obligaría a bloquearte), utiliza la zona de pruebas para hacer tus ensayos de edición."*

Y la Wikipedia acaba bloqueándolo como "cibervándalo".

Este personaje, cuya IP es de El Corte Inglés y cuya localización es la Fundación Ramón Areces, no tiene desperdicio. Sus últimas apariciones en la red, firmadas bajo el nick de *"La pelitos"*, curioso seudónimo en un señor casado amante de los bull terrier,

no decaen ni en espíritu ni en nivel cultural.

Pero la gente de la Areces no perdona el dolor de entrecejo que les entró en la infancia cuando tuvieron que leer dos palabras juntas. Así que vuelve a la Wikipedia, está vez desde la ***IP 194.179.126.152*** y se arma otra bronca:

> *"Hola, **194.179.126.152**. Estamos encantados de que Wikipedia haya atraído tu atención, y de que te hayas interesado en aprender a editar en ella. La prueba de edición que has hecho funcionó; sin embargo, deberías tener en cuenta que el objetivo de este proyecto es desarrollar una enciclopedia fiable y completa que todos puedan consultar. Tu edición afectaba a un artículo, por lo que ha sido retirada."*

(Primer aviso de 6 de octubre de 2006)

> *"Posible violación de derechos de autor en Predrag Danilovic"*
> *"Hola, **194.179.126.152**.*
>
> *Gracias por colaborar con Wikipedia. Te damos la bienvenida al proyecto; sin embargo, hay un problema con tus colaboraciones en el artículo Predrag Danilovic, que han consistido en la copia literal del contenido de otras páginas web, o de otros medios que podrían estar protegidos por derechos de autor. Como se explica en Wikipedia Copyrights, esta clase de aportaciones no son aceptables, porque pueden implicar una violación a los derechos de los autores del mismo. Por esa razón, el texto ha sido retirado y un aviso de posible violación de copyright se ha colocado en su lugar."*

(Segundo aviso de 12 de febrero de 2007) Sigue este contumaz cenutrio vandalizando en Wikipedia y provocando la ira de sus bibliotecarios:

> *"Deja de vandalizar esta pagina"*

(Tercera llamada al orden de 22 junio 2007)

> *"Hola, **194.179.126.152**. Te agradeceré que no edites arbitrariamente los artículos; otros editores deben perder tiempo valioso en revertir tus acciones y empañas la imagen de Wikipedia que puede hacerse un visitante ocasional. Recuerda además que las ediciones arbitrarias pueden ser consideradas un acto de vandalismo (lo que nos obligaría a bloquearte)."*

(Cuarto aviso de 20 julio de 2007 y hay que reconocer que Wikipedia es paciente). Pero vuelve pocas horas despues y el 21 de julio de 2007 se le impide el acceso definitivamente:

> *"Tu cuenta ha sido bloqueada para evitar que sigas vandalizando en Wikipedia. Si deseas hacer contribuciones útiles, eres bienvenido a regresar después de que tu bloqueo expire"*

Sigan esta IP por la red y verán que, del bull terrier, pasamos a las aficiones a paginas militronchas y nazis. Otro día seguiré contando el *curriculum* cultural que han dejado otras IPS de El Corte Inglés-Fundación Areces en su paso por Internet.
A la Fundación Areces le falta una estatua en sus jardines, y es la de Millán Astray.

MUERTE DE UNA PUTA

TODOS SOMOS HIJOS DE GRISÉLIDIS
Lydia Vázquez

"*El burdel del futuro*" es un pequeño ensayo de Grisélidis Réal, prostituta libre de Ginebra. En él nos cuenta Grisélidis cómo, tras arduas batallas políticas envueltas en propaganda medico-terrorista, se consiguió que el palacio Wilson, a orillas del lago de la ciudad suiza, en ruinas tras un incendio, se convirtiera en "*Burdel esotérico futurista Internacional*". Su fachada, magníficamente renovada, pintada en color rosa, coronada con oriflamas violetas salpicadas de oro y plata, es tan acogedora como su interior adornado de esculturas de hombres y mujeres desnudos de todos los rincones de la tierra, iluminadas por luces tenues coreadas por los inmateriales sones de la *Pequeña música nocturna* de Mozart. Allí van los "consumidores del amor", ciudadanos libres de de Ginebra que, exentos de todo sentimiento de culpa, funcionan como un usuario más de cualquier tipo de servicio urbano. Van allí como irían a un museo. Se desplazan autónomamente, eligiendo por sí mismos una mano acariciadora, un culo compasivo, una

verga con la delicadeza de la pulpa, un clítoris afrutado, perfumado a la fresa o al lirio,... Un espacio, concluye nuestra amiga, dentro de la ciudad, Ginebra, villa humanista desde siempre, que ha sabido reciclar su halo de tiempos pasados de pureza calvinista, en aras de una defensa suprema y universal de los derechos del hombre, por una vez unidos a los demasiado a menudo menospreciados de la mujer.
Y es que la pornoutopía es posible. En la ciudad. En la gran urbe. No sólo posible, sino necesaria. Para que desaparezca la prostitución infantil y la esclavitud sexual del orbe, que se desarrolle la prostitución libre y ejercida solarmente.
Grisélidis Réal, nacida en 1929, ha luchado desde siempre por los derechos de las prostitutas en Europa y en el mundo entero. Ella que goza de todos los derechos, ha luchado por sus compañeras y amigas. Pero sobre todo por sus clientes. Para que ese uno de cada tres hombres que ha ido alguna vez en su vida de putas deje de sentirse culpable, infractor de leyes, delincuente o, lo que es peor, perverso.
Las putas nacieron a la vez que las ciudades. O éstas con ellas. Como el huevo o la gallina nunca se sabrá si la acera se hizo para que la prostituta se instalara en ella, o si la cortesana, harta de su trono palaciego, se lanzó a la calle y se subió a ese pequeño estrado para que se le viera mejor. Y con ellas crecieron. Y gracias a las putas los habitantes de las urbes no se volvieron locos. Y soportaron la falta de afecto que conlleva toda macroaglomeración humana.
Y, sin embargo, "irse de putas" sigue siendo algo extraño. Porque, como todo lo proscrito, no se dignifica, más bien al contrario.
Soy mujer. Nunca me he "ido de putas". Pero de siempre, en la calle, en los bares, a mis amigos, les he oído decir que "se van", "les gusta irse de putas". Y también les he escuchado, con la sonrisa puesta, presumir de que anoche "estuvieron de putas", "en el burdel pasando la noche con las putas". Y como no soy hombre y nunca me contaron exactamente en qué consistía eso, de pequeña me imaginaba que "las putas" era una especie de ente colectivo con una sola cabeza, muy pintada, y muchos sexos siempre abiertos; una ogresa que, reina de la noche, libraba a los hombre del pesado fardo de su semen prolongadamente contenido, a cambio de sus corazones, que devoraba, y de sus almas, que quedaban para siempre condenadas.
Luego pasó por mi imaginación *Alicia en el país de las maravillas,* y entendí que uno podía ir del otro lado del espejo, y que las cosas eran al revés de como las habíamos pensado. Y que seguramente las putas, cada una de ellas, todas distintas, en cada uno de sus hogares, contarían a cada uno de sus maridos y de sus hijos que iban a trabajar, a trabajarse a los clientes, a "los hombres". Y que para esos maridos e hijos de puta, "los hombres" sería algo así como un ser monstruoso lleno de pollas en erección permanente, de respiración sofocante y ruidosa, gritón, sudoroso, que gozaba agotando esos frágiles y dulces cuerpos maternos, hechos para el sacrificio, para la entrega, para el don.
Imagínense la sorpresa que me llevé al leer el *Carnet de bal d'une courtisane* de Grisélidis Réal (París, Verticales/Le Seuil, 2005). Por un lado mis suposiciones a la inversa resultaban ciertas puesto que Grisélidis, una "cortesana", no solo tenía nombre (¡y qué bonito!, el nombre de la campesina de Perrault, bella y blanca como la flor de lis, que *"habría podido domar los corazones más salvajes"*), sino también apellido. De los más noble. "Réal". Por otra parte de lo más lógico para una cortesana. No era una puta más, elemento informe conformador de ese conjunto denominado "las putas". Era Grisélidis Réal. Con un nombre, un apellido. Y un rostro. De una belleza infinita. Con unos ojos que traspasan corazones y almas. Pero no para devorarlos sino para conocerlos. Y amarlos.
Y su "carnet de bal" era eso, una lista de aquellos hombres que le habían pedido baile alguna vez

en su vida. El baile más hermoso que existe en el mundo. La danza nupcial. Algunos, muchos, repetían. Así que ella decidió anotarlos. No por saber lo que le pagaban, porque lo aceptaba todo, hasta los miserables 50 francos suizos que le pagaba algún estudiante de bolsillos agujereados o algún parado sin blanca. Sino para conocerlos mejor. Porque tampoco ellos eran parte de "los hombres", anónimos, amorfos, intercambiables. Al contrario, cada uno tenía su nombre. Y si alguno se llamaba igual que otro, sus rasgos físicos, caracteriales, de corazón, sus gustos amorosos, lo distinguían radicalmente de su homónimo.
Abrir el *Carnet de bal* es adentrarse en el mundo de "los hombres" que "se van de putas". Aprender a conocerlos. A cada uno de ellos. Y darse cuenta sobre todo de que en la relación entre un hombre, Aymé o Gérard, y una puta, Grisélidis, Chantal o Sonia, hay mucho, mucho amor. Afecto, complicidad, comprensión.
En la primera línea de la primera página (¡los hay con suerte!) vemos a Aymé, y nos enteramos de que es panadero, que tiene los ojos azules, que tiene el físico de un luchador, que es amable y cariñoso y que le gustan las caricias; también de que le gusta que metan un dedo en el culo, "pero con mucha ternura". Encontramos un poco más adelante a Antoine, tímido y sensible, que le encanta que le acaricien el culo, que le penetren, que le besen los cojones, y eyacular en la boca... Basile viene de parte de Chantal, Bernard vive en casa de su padrastro que le hace la vida imposible, Claude es un pelirrojo bonachón y muy cultivado... Charles, enviado por Josy, le invita siempre a cenar, antes o después, Constantino es un obrero español, pequeñito pero matón, y Doudou es un judío a quien le gusta recitar la Biblia en plena faena... El pobre Emile tiene una mujer que no sabe besar en la boca, Eugène, un sibarita, adora beberse lentamente un vaso de buen vino tinto mientras le acarician, a Eric le gusta la lencería, y a Gérard los tacones de aguja... En cuanto a Freddy, culto y viajero, tiene mucho potencial por descubrir, a Frédéric habrá que enseñarle un días los placeres del masaje de próstata y a François, el brasileño, le resulta imposible hacerlo sin música... Guy, un negro de Madagascar, es un genio, y le encanta que se la chupen bien, a Gaby le gusta sobre todo que le den pellizcos bien fuertes en los pezones, y Henry, tímido y cerebral, conoce los clásicos griegos y latinos de memoria... Inocente es un cerrajero italiano, rechoncho y amable, a Joseph hay que tratarlo con mucha dulzura porque se ha quedado viudo hace poco, a Jean-Pierre le gusta el cuero, y Killy se pasaría horas besando a una mujer... Louis no se quita nunca la ropa, mientras que Manuel, español, se muere del gusto mientras desnuda poco a poco a una mujer, a Marcel, especie de enorme tipo estilo carnicero, le gusta hacer el amor como papá y mamá, y Michel, el electricista, juega a hacerse el duro pero en el fondo es un sentimental y un pedazo de pan... a Otto le gusta masturbarse mientras mira, a Pierrot le encanta bromear mientras me coge los pechos, y Roland prefiere hablar que hacer el amor... Raymond quiere hacerlo despacio, Tonio es un portugués de lo más sencillo y cariñoso como él solo, y Willy es un hombre encantador, tipo mediterráneo, al que le gusta acariciar y que se la chupen muy suavemente, de esos que enamoran...
En otro de sus escritos, "Prostituirse es un acto revolucionario", firmado en 1977, y escrito "en la acera, en Ginebra" para la revista Marge nº 13, Grisélidis exige *"que se nos reconozca bellas, útiles, deseables, hábiles, que se reconozca que hacemos que miles de hombres tengan erecciones, y eyaculen, y que se reconozca que el dinero ganado con el sudor de nuestros culos y nuestros cerebros es nuestro y que nos lo hemos merecido"*. Y yo añadiría "con el sudor de sus corazones". Que se les respete, a esas hadas de nuestras aceras, de nuestras urbes, como hicieron los poetas de la Antigüedad, que las hicieron heroínas de su poemas y las ensalzaron como lo que eran, lo que son, unas reinas del pavimento. Que deberían volver a sus palacios. Como el que está a orillas del lago, en Ginebra la libre.

Porque todos somos hijos de... Grisélidis. Y a mucha honra.

"Treinta años de prostitución marcan, estragan el cuerpo y el alma y os dan, también, un inmenso amor a la vida, respeto humano por el sufrimiento del Otro, por su soledad, por su desesperación al ser privado de mujer y de ternura, por sus propios fracasos, que se unen a los vuestros, y si el más allá existe deseo danzar al son de músicas gitanas, beber alcoholes maravillosos, y reencontrarme con mis hombres, aquellos que he amado, aquellos que he odiado, ayudado, aliviado, esperado, atendido, rechazado, reconfortado y tenido por encima de todos los prejuicios, los tabúes, las hipocresías de esta moral enferma e inhumana que no me ha matado, de la que simplemente me he evadido hacia una mayor libertad, arriesgando mi vida."

Emisión: 23 de mayo 2006. Documentos TV
"Historias de amor, solidaridad y compromiso llenas de alegría y voluntad transformadora. Nunca antes estos términos se habían asociado al mundo de la prostitución. "Muerte de una puta" es una visualización inédita del trabajo sexual que nos presenta mujeres excepcionales que transgreden todos los prejuicios.
El 31 de Mayo de 2005 muere en Ginebra la prostituta más famosa y mediática de Suiza: Grisélidis Réal. El viaje por su biografía nos llevará a conocer paisajes y mujeres fuera de lo común. Prostitutas de Bélgica, Suiza, Italia y España que han compartido con ella una forma singular de vivir el trabajo sexual. Son mujeres que narran su experiencia en la prostitución de un modo positivo y que a su vez lideran los colectivos europeos más activos en la defensa de la regularización del trabajo sexual.
Nos hablan de la prostitución sin ambages. A cara descubierta. Con ellas conoceremos el lado más desconocido de la prostitución: el más doméstico y personal. Si hasta ahora los retratos de las prostitutas se han centrado en describir su actividad profesional, "Muerte de una puta" nos narra su vida fuera de la prostitución: Su casa, su familia, sus amistades, sus aficiones... Todos ellos aspectos que enriquecen las representaciones más convencionales y consabidas de la prostitución.
En el mundo, la circulación de mujeres destinadas al comercio sexual se estima en 4 millones de personas. Las estadísticas publicadas en los medios de comunicación cifran

en más de 300.00 las mujeres que se dedican en España a la prostitución. Mas de un 90% inmigrantes. Un negocio que se calcula que mueve en nuestro país unos 18.000 millones de euros anuales.
A pesar de su magnitud, la prostitución continúa en España sin un marco legal de derechos y deberes para las personas implicadas en esta industria.

SOY ANTIFEMINISTA Mujeres… uf, no puedo con ellas!!!

Las mujeres de hoy en dia me parecen superficiales, vacías y acomplejadas, por supuesto que sin valores, ya que no se quieren ni ellas mismas…su única meta es ir seduciendo al mundo con sus trapitos, sus maquillajes y sus tonterías, y llorando por los rincones por haber engordado un kilo.
Y encima quieren que el hombre lleve un delantal? Que fuerte!! Si, mientras vosotras veis Salsa Rosa…o es que ellas se van a la obra? No, se romperían las uñas…
La gran mayoría se cambia de novio como de bragas, que vergüenza!!! yo no podría tener un currículum de hombres con los que me he rozado, se me caería la cara de vergüenza… pero no me extraña, si van por la calle diciendo (aquí estoy). Son incapaces de mantener una relación estable, para que si con la pinta pagan, éstas son solo para un ratito, o es que osan pensar que el hombre es tonto? Lo bueno de todo es que luego el hombre se queja de que todas estas frescas no valen para el tema….sólo son fachada…jejeje. Así que para un matrimonio se quedan con las recatadas.
Hay cuatro de ellas para mi admiradas, que tienen cultura, educación, moral, saber estar, son familiares, tienen hijos, saben ser buenas amas de casa y además un gusto exquisito para vestir con clase, a todas ellas las felicito, a las demás, para mi ni existen, siendo una lástima porque son el 99%.
Mujeres objeto, Y para más INRI, está de moda dedicarse a ser puta, ya no digo prostituta, ya que la gran mayoria lo hacen para vivir bien, fácil y por vicio, no para dar de comer a sus hijos…. Y además son tontas porque irse a la cama con un hombre que acaban de conocer.. ¡Qué asco! por lo menos algunas cobran!
Que bien les va a todas la crisis para dedicarse a ello, como si no hubiera más salida…Y que fuerte!!! Hasta gratis y dando la cara en internet!! Pobres madres!!! Uf, no quisiera parir una hija que hiziera eso…
Bueno, no continúo porque sería la biblia…
Por cierto, tengo 34 años y me encanta mi forma de ser, así que no os escandaliceis
Un saludo para todas
Y porfavor, no os ofendais, al fin y al cabo, es lo que sois.
Saludos cordiales,
Mónica

EL IDIOMA CASTELLANO

Señores: Un servidor,
Pedro Pérez Paticola,
cual la Academia Española
"Limpia, Fija y da Esplendor".

Y no por ganas de hablar,
pues les voy a demostrar
que es preciso meter mano
al idioma castellano,
donde hay mucho que arreglar.

¿Me quieren decir por qué,
en tamaño y en esencia,
hay esa gran diferencia
entre un buque y un buqué?,
¿por el acento?. Pues yo,
por esa insignificancia,
no concibo la distancia
de presidio y presidió,
ni de tomas a Tomás
ni de topo al que topó.

Más dejemos el acento,
que convierte, como ves,
las ingles en un inglés,
y pasemos a otro cuento.

¿A ustedes no les asombra
que diciendo rico y rica,
majo y maja, chico y chica,
no digamos hombre y hombra?
por eso no encuentro mal
si alguno me dice cuala,
como decimos Pascuala,
femenino de Pascual.

¿Por qué llamamos tortero
al que elabora una torta
y al sastre, que trajes corta,
no lo llamamos trajero?.

¿Por qué las Josefas son
por Pepitas conocidas,
como si fuesen salidas
de las tripas de un melón?.

¿A vuestro oído no admira,
lo mismo que yo lo admiro,
quien quiera descerraja un tiro,
dispara, pero no tira?.

Este verbo y otros mil
en nuestro idioma son barro;
tira, el que tira de un carro,
no el que dispara un fusil.

De largo sacan largueza
en lugar de larguedad,

y de corto, cortedad
en vez de sacar corteza.

De igual manera me quejo
de ver que un libro es un tomo;
será tomo, si lo tomo,
y si lo no lo tomo, un dejo.

Si se le llama mirón
al que está mirando mucho,
cuando mucho ladre un chucho
se lo llamará ladrón.

Porque la sílaba "on"
indica aumento, y extraño
que a un ramo de gran tamaño
no se lo llame Ramón.

Y por la misma razón,
si los que estáis escuchando
un gran rato estáis pasando,
estáis pasando un ratón.

Y sobra para quedar
convencido el más profano,
que el idioma castellano
tiene mucho que arreglar.

LA BALLADE DES GENS QUI SONT NÉS QUELQUE PART

C'est vrai qu'ils sont plaisants, tous ces petits villages,
Tous ces bourgs, ces hameaux, ces lieux-dits, ces cités ,
Avec leurs châteaux forts, leurs églises, leurs plages,
Ils n'ont qu'un seul point faible et c'est d'être habités ,
Et c'est d'être habités par des gens qui regardent
Le reste avec mépris du haut de leurs remparts ,
La race des chauvins, des porteurs de cocardes,
Les imbéciles heureux qui sont nés quelque part
Les imbécil's heureux qui sont nés quelque part. (bis)

Maudits soient ces enfants de leur mère patrie
Empalés une fois pour tout's sur leur clocher ,
Qui vous montrent leurs tours, leurs musé's leur mairie,
Vous font voir du pays natal jusqu'à loucher.
Qu'ils sortent de Paris, ou de Rome, ou de Sète,
Ou du diable vauvert ou bien de Zanzibar
Ou même de Montcuq, il s'en flattent, mazette,
Les imbéciles heureux qui sont nés quelque part. (bis)

Le sable dans lequel, douillettes, leurs autruches
Enfouissent la tête, on trouve pas plus fin ,
Quand à l'air qu'ils emploient pour gonfler leurs baudruches
Leurs bulles de savon, c'est du souffle divin .
Et, petit à petit, les voilà qui se montent
Le cou jusqu'à penser que le crottin fait par
Leurs chevaux, même en bois, rend jaloux tout le monde ,
Les imbéciles heureux qui sont nés quelque part . (bis)

C'est pas un lieu commun celui de leur naissance,
Ils plaignent de tout cœur les pauvres malchanceux,
Les petits maladroits qui n'eurent pas la présence ,
La présence d'esprit de voir le jour chez eux .
Quand sonne le tocsin sur leur bonheur précaire,
Contre les étrangers tous plus ou moins barbares ,
Ils sortent de leur trou pour mourir à la guerre ,
Les imbéciles heureux qui sont nés quelque part . (bis)

Mon dieu, qu'il ferait bon sur la terre des hommes
Si on y rencontrait cette race incongrue',
Cette race importune et qui partout foisonne :
La race des gens du terroir, des gens du cru .
Que la vi' serait belle en toutes circonstances
Si vous n'aviez tiré du néant ces jobards,
Preuve, peut-être bien, de votre inexistence :
Les imbéciles heureux qui sont nés quelque part. (bis)

Odio a muerte (eso sí de buen rollo) a las patrias y a los patriotas, banderas que solo sirven para limpiar la sangre de los pobres borregos muertos en nombre de ellas y en beneficio de aquellos que nunca pegarán un tiro en el campo de batalla.

VOCABULARIO CALÓ (A-G)

"Vocabulario caló" de Gabriel Veraldi-Pasquale, ha sido publicado en Bubok, www.bubok.es/libros/206559/VOCABULARIO-CALO: pueden comprarlo como libro de papel o libro digital.

"Lo que me motivó a escribir fue ver con tristeza que hasta nuestro idioma se iba acabando poco a poco. Se ha estado perdiendo todo lo bueno de nosotros; algunos todavía conocemos nuestra historia, los que vienen detrás de nosotros ya no van a conocer nada. Los hijos de nuestros hijos ya no van a saber quienes somos."
Ricardo Pérez: *"Rom Ludar"*.

"...el célebre Mezzofanti, profesor de Bolonia, que hablaba treinta y dos lenguas, había hecho encomios científicos del dialecto gitano prefiriéndolo a otros idiomas, y de tal modo, que al volverse loco en 1832 no lo confundió con ningún otro cuando embrollaba en su parla tanto lenguaje."
Francisco de Sales Mayo. *El gitanismo. Historia, costumbres y dialecto de los gitanos* (1870).

"En el bejí d'Olivete entrisaré,/ trin braquia callardía encontrisaré,/ en trin bedos las ordeñisaré,/ y trin quiralis callardía nicobé: / yeque se lo díñelo a la bar lachí/ para que me nicobele de meripé;/ y l'aver se lo diñelo a Padilla romí/ con saria su suestí;/ y l'aver al Bengui langó/ para que m'otorguisarele lo que camelo yo."
Georges Barrow. *The Zincali; or Account of the Gypsies in Spain* (1841).

¿No se habrá confundido usted el "vocabulario caló" con algún artículo de cotilleos y de artisteo, en los que parece muy interesante quién se casa con quién?

Sabe alguien, por favor, ¿en qué siglo desapareció el caló como lengua propia de comunicación diferenciada claramente del español? No me refiero a palabras sueltas, sino al idioma en conjunto. Gracias

para n.n.i y para A A L el calo como lengua no se perdio tan pronto. hay documentos que demuestran que la lengua se perdio alrededor del año 1850 en el norte de españa, y 1800 en el sur. y no es que se perderia sino que hubo una rotura de la gramatica dando paso al uso gramatical del español, y ahi es cuando se empezo a perder.

por otro lado solo quiero ADVERTIR A TODOS QUE LEAN ESTO, que este diccionario de calo no es bueno, y que no muestra realmente la lengua gitana. son palabras de germania de siglos atras, palabras inventadas de forma artificial por autores no gitanos ignorantes de la lengua gitana real, y palabras de la aficcion de sevilla.

bendiciones.

LOS NEGOCIOS DE JUAN CARLOS I: TREINTA AÑOS A CUERPO DE REY

Por Decio Machado *

Los intereses financieros del jefe de Estado se han visto envueltos en numerosas irregularidades. Los negocios del rey, así como su relación "carnal" con la clase empresaria, contrasta con la figura mediática de "el rey de todos los españoles". Su intermediación a favor de los intereses de las multinacionales españolas y de las cúpulas de la CEOE han marcado su labor como máximo representante del Estado en el exterior
Con inmunidad penal ante cualquier delito y sobreprotegido como una delicada planta de invernadero, se han publicado muy pocas cosas con un mínimo de objetividad sobre el monarca y sobre sus actuaciones políticas. En el artículo 490.3 del Código Penal se puede leer: *"el que calumniare o injuriare al Rey (...), será castigado con la pena de prisión de seis meses a dos años si la calumnia o injuria fueran graves, y con la de multa de seis a doce meses si no lo son".*
Esto generó procesos por injurias al rey en varias ocasiones. Los artículos y un dibujo de Jesús Zulets llevaron a la revista *El Cocodrilo* al banquillo en 1987. También Javier Madrazo tuvo que vérselas con la justicia por decir: *"ya que le pagamos policías, yates, viajes a esquiar y a montar a caballo, no habría estado de más que, por una vez abandonase sus ocupaciones y compartiese con la sociedad su preocupación por la guerra de Iraq"*; o Arnaldo Otegi, por referirse al rey como el *"jefe de los torturadores"*, así como Soziedad Alkohólica, Eskorbuto o Manolo Kabezabolo por el contenido de sus canciones.
A pesar del silencio mediático, la figura del rey dista mucho de ser incuestionable: desde su falta de legitimidad democrática a la construcción de su importante fortuna personal, pasando por una nunca bien aclarada actuación en el 23-F, el rey nunca ha tenido que rendir cuentas de sus acciones. La intermediación del rey en los intereses de las multinacionales españolas y de las cúpulas de la CEOE han marcado su labor como máximo representante del Estado en el exterior. Numerosos medios latinoamericanos no han dejado de denunciar sus actuaciones en beneficio del Santander Central Hispano o de Repsol en Argentina, ante la ofensiva española por hacerse con YPF.
Al mismo tiempo que la popularidad de la monarquía desciende en los sondeos, un nuevo movimiento republicano emerge con fuerza al cumplirse los 75 años de la proclamación de la II República.

Juan Carlos I, un as de los negocios
Las tramas financieras del monarca y el rico prosperar de su familia y de toda una subcorte que utiliza la imagen real para optimizar sus inversiones, señala a uno de los asuntos más oscuros de la Casa Real.
Se suele decir que la corte española es *"una corte sin cortesanos"*, y es cierto que los monarcas no han sido amigos de aliarse con la aristocracia. En su lugar han preferido empresarios, banqueros y élites del poder económico y jet set en general.
Juan Carlos I llegó al trono literalmente con lo puesto. Se dice por cronistas del momento que incluso tenía que pedir el dinero a su padre, para visitar a su novia en Atenas.

Labrándose un futuro
El comienzo de su autosuficiencia económica, se remonta a 1962 (coincidiendo con su boda con Sofía), cuando el banquero Luis Valls Taberner comenzó a administrar una "suscripción popular" que aportaría liquidez económica a los recién casados. En aquella "renta básica real" colaboraban además de otros banqueros, muchos nobles y empresarios del franquismo, según indica Patricia Sverlo (seudónimo del autor) en su libro *Un rey golpe a golpe*.
Otro de los que ha declarado haber hecho transferencias importantes al monarca fue Ruiz Mateos. Tras la expropiación de Rumasa, siendo prófugo de la Justicia en Londres, acusó al rey de haber aceptado "miles de millones" no solo de su propio bolsillo, sino del de diversos empresarios. El Fiscal General del Estado le acusó de un delito de injurias: lo que podría haberse convertido en un sumario comprometedor quedó reducido a nada.
En su libro *El negocio de la libertad*, Jesús Cacho habla de las vías de financiación personal del rey, según señala *"una de las primeras formas conocidas fue el petróleo, las comisiones del crudo que importaba España para cubrir sus necesidades de energía. Nada más ocupar Juan Carlos I el trono a la muerte del dictador, Manuel Prado [y Colón de Carvajal, el hombre de confianza del rey] se dedicó a remitir varias misivas reales a otros tantos monarcas reinantes, especialmente del mundo árabe, para pedirles dinero en nombre del rey de España"*.
Hay constancia documental de una carta firmada por Juan Carlos I y dirigida al Sha de Persia, el 4 de julio de 1977, donde el monarca tras una descripción de la situación política dice: *"me tomo la libertad, con todo respeto, de someter a tu generosa consideración la posibilidad de conceder 10 millones de dólares como tu contribución personal para el fortalecimiento de la monarquía española".* Dos años después el Sha de Persia, títere de EE UU en la zona, cayó tras la revolución islámica.
Sus buenas relaciones con los dictadores árabes también quedó patente en la respuesta favorable de la monarquía saudí a la petición de un crédito de 100 millones de dólares. Exactamente la misma cantidad pagada por la empresa kuwaití KIO a Colón de Carvajal, indica Cacho. Y prosigue: *"los pagos se justificaron en Kuwait por la necesidad de que, durante la llamada `Tormenta del Desierto", la aviación estadounidense pudiera disponer a su antojo de las bases aéreas españolas de Rota y Torrejón, para lo que era preciso `untar" a los políticos".*
El último escándalo real llegó de Francia, donde en la instrucción del caso *Elf* (2003) por apropiación indebida, su ex presidente Le Floch- Prigent declaró sobre la compra de Ertoil *"haber entregado 55 millones de francos en España a numerosos hombres políticos; en particular a los próximos a Felipe González y del entorno del rey Juan Carlos"*, con el que Le Floch-Prigent aseguraba haberse visto en múltiples ocasiones.
Según José García Abad, autor del libro *La soledad del rey: "Felipe González hizo la vista gorda ante los negocietes y escapadas reales e incluso llegó a realizar alguna importante negociación en beneficio de la Familia Real: envió a su hombre de confianza, Julio Feo, a gestionar cerca del Gobierno griego la devolución de los bienes de la familia*

de doña Sofía, que habían sido confiscados cuando el rey Constantino fue destronado".
Próximos a Juan Carlos I aparecen además nombres como Mario Conde, Alfonso Escámez, los Albertos... Destaca en sus relaciones el conocido como "clan de Las Cuatro Estaciones", nombre del restaurante del que Miguel Arias, Joaquín Vázquez Alonso, Jaime Cardenal Pombo y el propio rey son socios. Algunos aparecieron implicados en la trama de Ibercorp. Entre ellos se tejió una tupida trama de negocios. Cardenal Pombo fue socio de Borja Prado (hijo de Manuel Prado) en el sector armamentístico. Este último también coparticipa, junto a su madre Paloma Eulate y la Infanta Elena en la empresa *Micos Mi Primer Cole, SL.* Borja Prado fue requerido como testigo por parte de la Audiencia Nacional en la instrucción del caso Banesto y se ha visto relacionado con traficantes de armas.
Joaquín Vázquez Alonso fue el constructor que remodeló en su día el Palacio de la Zarzuela, y socio de Cardenal Pombo y Arias en varios negocios inmobiliarios.
La desaparecida revista de investigación Kalegorría indicaba que próximo a este grupo estaba Francisco Sitges, ex presidente de Asturiana de Zinc y ex propietarios de los astilleros Mefasa. Esta empresa fue la encargada de construir el yate Fortuna, tras una adjudicación estatal. Sitges acabó en el banquillo de los acusados del caso Banesto.

El paraíso mallorquín
Mallorca ha sido el otro espacio de ilustres amistades del monarca, en este caso mucho más aristocráticas. Allí, el rey Juan Carlos intimó con el príncipe Zourab Tchokotua, un aristócrata georgiano que fue procesado por un juzgado mallorquín en 1978 y en 1992 en relación con presuntas estafas inmobiliarias. En la última instrucción figuraba también su socio Oliver Mateu, otro hombre cercano al rey. Según Kalegorría, el clan Mallorca se completaba con un grupo selecto de empresarios hosteleros.
El rey fue fotografiado el 7 de agosto de 1990 en Puerto Portals, junto a sus amigos Giovanni Agnelli (dueño de FIAT) y Raul Gardini , ex presidente de *Montedison*, la empresa química a la cual Juan Abelló vendió su laboratorio *Antibióticos* con un beneficio de 450 millones de dólares. Tanto Agnelli como Gardini se vieron implicados en casos de corrupción en Italia. Este último se suicidó en 1994.
Es público que el Fortuna II fue financiado por un grupo de empresarios mallorquines, los cuales juntaron 17,5 millones de dólares para hacer el regalo real. Hoy el monarca navega en el Fortuna III, valorado en más del doble que el anterior.
Mallorca es una buena fuente de ingresos para el rey en patrocinios, ropa y equipamientos deportivos, bebidas y relojes para la familia real, convertida en un atractivo modelo publicitario a veces subliminal y otras descarado.

¿Qué dinero tiene el rey?
La partida de los Presupuestos Generales del Estado para los gastos de la Casa Real no esta sometida por ley al control del Tribunal de Cuentas. La Constitución de 1978 permite al monarca disponer de él sin dar más explicaciones. En 1980, el Gobierno le asignó 200 millones de pesetas. Hasta entonces, el rey apenas cobraba un sueldo de Capitán General. Actualmente, la partida del Presupuesto General del Estado asciende a los 7,78 millones de euros.
Debido a la opacidad de la casa real, la fortuna del rey es difícil de cuantificar. La revista Forbes (abril 2003) incluye a Juan Carlos I en el sexto lugar de los monarcas más ricos de Europa con una fortuna de 1.790 millones de euros, el puesto 134 entre los más ricos del planeta.

Una familia como cualquier otra
La hermana: Pilar de Borbón y Borbón , duquesa de Badajoz. Presidenta y consejera delegada de Labiernag 2000 SA. Administradora única de Labiernag SL, y de San Jacobo SL, y consejera de Plus Ultra Seguros, Plus Ultra Vida, Boga SA y Vendome LG Ibéric.

El primo hermano: Carlos de Borbón-Dos Sicilias y Borbón-Parma, duque de Calabria. Consejero accionista de Grupo Dragados, Inmobiliaria Urbis, Cepsa, Viajes Marsans y de Sociedad Española del Acumulador Tudor, entre otras.
La prima hermana: Teresa de Borbón-Dos Sicilias y Borbón-Parma Vinos, duquesa de Salermo. Presidenta de San Dimas SL. Su hija Clara Moreno de Borbón es administradora de Salubre Consulting SL, y propietaria de Bodegas Tarsus y de Navamayor SA
El primo segundo: Alfonso de Borbón y Escasany. Presidente de Ahorro Familiar SA. Consejero de Axa Aurora Ibérica. Presidente de Ildefonso SL y de Keka SL. Consejero delegado de Gilgamesh Inmoinversión SL, y de ZRZ SL. Preside Data Rent SA BRIBÓN. Numerosas firmas patrocinan las actividades deportivas del monarca.
El yerno: Jaime de Marichalar y Sáez de Tejada, duque de Lugo. Esposo de la infanta Elena, miembro de la comisión ejecutiva de Pórtland Valderrivas, empresa perteneciente a Fomento de Construcciones y Contratas, presidida por Marcelino Oreja. Marichalar además preside la Fundación Winterhur, del grupo asegurador del mismo nombre, integrada en el grupo Crédit Suisse. Fue director gerente de Crédit Suisse First Boston en Madrid. Dado su dominio de la moda, el ocio y el gran lujo, fue nombrado consejero de Loewe. Un genio de la promoción por sus relaciones con Volvo, Hérmes o los modistos Christian Lacroix o Charles Jourdan.
El otro yerno: Iñaki Urdangarín, duque de Palma de Mallorca. Esposo de la infanta Cristina, director de planificación de Octagon Esedos S.L., de la multinacional Interpublic. Preside el Instituto Noos de Estudios Estratégicos. Vinculado también al Instituto Noos S.L y a Motorpress Ibérica. Participó en Dentipartnes SL, Odont Mad S.L., Sport e Rormaczione S.L., Enveitg XXI S.L. y Aizoon S.L. Nóos ha sido la adjudicataria de eventos de promoción turística y deportiva en Palma de Mallorca y en Valencia, ambos cuestionadas por sus costos desproporcionados. Actualmente también forma parte de la imagen patrocinadora del Govern balear.

Los amigos del rey
Manuel Prado y Colón de Carvajal
Hay constancia documental de que *"el administrador privado del rey"*, Manuel Prado, utilizaba cartas con membrete real en las que pedía apoyo para determinados negocios. Hizo una fortuna a la sombra del monarca. Fue condenado por sus trapicheos con Javier de la Rosa en el caso KIO, donde recibió 100 millones de dólares del empresario catalán. Gracias a la intervención de la monarquía kuwaití, Prado logró evitar la orden de búsqueda de la Corte Comercial de Londres, ciudad donde se encuentra la sede de las operaciones internacionales de KIO. Las Cintas en posesión de De la Rosa que implicaban al rey en conversaciones telefónicas con importantes personalidades árabes, dan credibilidad a la tesis de que esos 100 millones de dólares salieron de KIO para premiar los servicios del monarca en la guerra del Golfo.

Marc Rich
Considerado el evasor de impuestos más importante en la historia de los EE UU. Le han calificado en diferentes medios como *"el gran dragón de la corrupción", "monsieur pétrole" o "el delincuente más inescrupuloso de la era moderna"*. Cuando en 1983 se fugó de EE UU, el FBI lo perseguía por 65 delitos, como fraude, ganancias de 105 millones de dólares por venta ilícita de petróleo, simulación de precios, cotizaciones falsas y evasión fiscal por 48 millones de dólares. Rich adquirió la nacionalidad española y se estableció en Suiza. Organizó su red de empresas e hizo suculentos negocios con la mafia rusa, con Milósevic y con la Halliburton de Cheney. En 1998 fue indultado por Bill Clinton, tras financiar la campaña para senadora de Hillary. El rey Juan Carlos I figura entre los solicitantes del indulto, junto a Shabtai Shavit, ex jefe del Mossad; Camilo José Cela, ex presidente de la Fundación Marc Rich en el Estado; y por el ex vicepresidente

del Real Madrid, el empresario Fernández Tapias.

Mario Conde
Este personaje no encaja exactamente en la sección de la economía golfa. El dinero y el éxito fue fomentado como estrategia de fuerte carisma sobre la realeza. Mario Conde aspiraba a que la monarquía le diera su respaldo para alcanzar el poder político, indican varios de sus biógrafos. El que llegó a convertirse en el *"banquero de la monarquía"* fue una de las amistades más peligrosas del rey. Cuando Banesto fue intervenido, aparecieron al menos dos cuentas a nombre del monarca (la cuenta 8317-172 y la 148963-172) vinculadas con operaciones en Asturiana de Zinc, Sindibank, y Banesto, así como opciones para la gran ampliación de capital que no llegó a realizarse, según denuncia Ernesto Ekaizer en su libro *Vendetta*. Revela Jesús Cacho que fue el rey quien intercedió entre Alfonso Escámez y Gustavo Villapalos para que el banquero fuera investido *doctor honoris causa*. Conde fue condenado por un "agujero" de 605.000 millones de pesetas y por apropiación indebida.

La familia real en cifras **
800 millones de pesetas aumentó el presupuesto de la Casa Real entre 2002 y 2005
29 millones de pesetas fue el gasto en gasolina de la Casa Real en 1994. En 1995 el dato ya no figuraba en ese mismo informe.
1.790 millones de euros es la fortuna del rey, estimada por la revista Forbes en 2003.
6 millones de euros es lo que ha costado la nueva casa de los duques de Palma en el barrio de Los Pedralbes en Barcelona.

Los españoles estamos de la Corona hasta la coronilla y de los Borbones hasta los ....

El tener a un personaje de la talla intelectual y moral de Juan Carlos Borbón al frente del Estado, hace que la mayoría de los españoles sintamos auténtica vergüenza de serlo.

JULIA MIGENES-JOHNSON CANTA LA HABANERA DE CARMEN

Enlace directo en youtube.com/

L'amour est un oiseau rebelle
que nul ne peut apprivoiser,
et c'est bien en vain qu'on l'appelle,
s'il lui convient de refuser!
Rien n'y fait, menace ou prière,
s'il lui convient de refuser!
l'un parle bien, l'autre se tait;
et c'est l'autre que je préfère,
il n'a rien dit, mais il me plaît.

L'amour! L’amour! L’amour! L’amour!

L'amour est enfant de Bohême,
il n'a jamais, jamais connu de loi,
si tu ne m'aimes pas, je t'aime,
si je t'aime, prends garde à toi!

Si tu ne m'aimes pas,
si tu ne m'aimes pas, je t'aime!

Mais si je t'aime,
si je t'aime, prends garde à toi!

Si tu ne m'aimes pas,
si tu ne m'aimes pas, je t'aime!

Mais si je t'aime,
si je t'aime, prends garde à toi!

L'oiseau que tu croyais surprendre
battit de l'aile et s'envola;
l'amour est loin, tu peux l'attendre,

tu ne l'attends plus, il est là.
Tout autour de toi, vite, vite,
il vient, s'en va, puis il revient;
tu ne l'attends plus, il est là
tu ne l'attends plus, il te tient!

l'amour! L'amour! L'amour! L'amour!

L'amour est enfant de Bohême,
il n'a jamais, jamais connu de loi,
si tu ne m'aimes pas, je t'aime,
si je t'aime, prends garde à toi!

Si tu ne m'aimes pas,
si tu ne m'aimes pas, je t'aime!

Mais si je t'aime,
si je t'aime, prends garde à toi!

Si tu ne m'aimes pas,
si tu ne m'aimes pas, je t'aime!

Mais si je t'aime,
si je t'aime, prends garde à toi!

MEMORIAL DE TLATELOLCO

La oscuridad engendra la violencia
y la violencia pide oscuridad
para cuajar el crimen.
Por eso el dos de octubre aguardó hasta la noche
para que nadie viera la mano que empuñaba
el arma, sino sólo su efecto de relámpago.

¿Y a esa luz, breve y lívida, quién? ¿Quién es el que mata?
¿Quiénes los que agonizan, los que mueren?
¿Los que huyen sin zapatos?
¿Los que van a caer al pozo de una cárcel?
¿Los que se pudren en el hospital?
¿Los que se quedan mudos, para siempre, de espanto?

¿Quién? ¿Quiénes? Nadie. Al día siguiente, nadie.
La plaza amaneció barrida; los periódicos
dieron como noticia principal
el estado del tiempo.
Y en la televisión, en la radio, en el cine
no hubo ningún cambio de programa,
ningún anuncio intercalado ni un minuto de silencio en el banquete.
(Pues prosiguió el banquete.)

No busques lo que no hay: huellas, cadáveres
que todo se le ha dado como ofrenda a una diosa,
a la Devoradora de Excrementos.

No hurgues en los archivos pues nada consta en actas.

Más que aquí que toco una llaga: es mi memoria.
Duele, luego es verdad. Sangre con sangre
y si la llamo mía traiciono a todos.

Recuerdo, recordamos.
Ésta es nuestra manera de ayudar a que amanezca
sobre tantas conciencias mancilladas,

sobre un texto iracundo, sobre una reja abierta,
sobre el rostro amparado tras la máscara.
Recuerdo, recordemos
Hasta que la justicia se siente entre nosotros.

Los acontecimientos de esos días deben permanecer presentes en la mente de los mexicanos. Deben ser advertencia permanente de los riegos del autoritarismo, pero no debe permitirse que se conviertan en un ancla que impida el uso del autoridad para proteger los derechos de las minorías frente a las mayorías, de las masas frente al individuo.

A quien guste hacerlo, los invito a leer el texto

Honestamente, nunca crei que los eventos del 2 de octubre hubieran sido tan grandes.
Habia escuchado con respecto a esto,pero nunca vi imagenes como estas.
Es una infamia que el gobierno haga de un deseo sano de superacion, un arma para realizar tranza-acciones en su forma de gobernar.
como siempre, yo apruebo la protesta contra los malos gobiernos, y que se den cueta todos, que la educacion se realiza para superarse y no debe ser prohibido.

Gracias, y es un orgullo que los estudiantes defiendan sus derechos

Yo pienso que posiblemente a como esta la situacion actualmente tal vez podria repetirse pero de un forma mas violenta viniendo de parte de las personas que ya estan cansadas de tanta injusticia, delincuencia, corrupcion de parte de el gobierno y las alsas de precio tal vez este suceso sea una forma de como organizar un marcha de protesta pero para eso ya han de estar preparados por si el gobierno se opone y vuelve a reaccionar otra vez de esa forma de repetirse esto.

Es lamentable ese hecho que muchos mexicanos no conocemos acerca de lo que en realidad paso, muchos jovenes son de otra generacion ya y es dificil que elos comprendan pues casi no se les habla del tema, por eso es necesario que todos los mexicanos nos demos cuenta de la clase de gobierno que tenemos, de los abusos de autoridad y de que si es necesario luchar para llegar con el verdadero culpable o culpables esto no puede quedar sin castigo, ya que muchos jovenes murieron y con ellos tambien sus sueños, muchos de los que nacimos en otro tiempo lo vemos muy lejano, tal vez como la revolucion pero de todas formas no deja de doler el corazon al darnos cuenta como mexicanos que mucha gente ha muerto por darnos soberania, libertad y una vida digna.

Fecha: 05/10/2008 11:28.

¿Ha dicho usted soberanía, libertad y una vida digna? No se referirá a los mexicanos que padecen, según el Banco Mundial, "la pobreza en niveles inaceptablemente altos: alrededor del 53 por ciento de los 104 millones de habitantes están en un nivel de consumo por debajo de las necesidades mínimas de alimentos y de otras necesidades consideradas básicas.
-La décima parte de la población gana mas de 40 por ciento de los ingresos totales
-La décima parte de la población solo obtiene 1.1%
-Cerca del 24 por ciento de la población es considerada "extremadamente pobre", es decir, con un ingreso insuficiente incluso para una nutrición adecuada."
A ese 24% pertenecen los que arriesgan su vida para llegar a otro país en el habrán de sobrevivir en los trabajos más penosos, sin derechos laborales ni sociales. En el desierto y en la frontera, miles de cadáveres atestiguan las dificultades que habrán de arrostrar, nadie sabe cuántos mueren en el intento cada año. Y sin embargo:
- las divisas que provienen de sus envíos de dinero a México es superior a la inversión extranjera directa.
-Aumentaron 23.1% con respecto a 2005, para llegar a 11.425 millones de dólares
-La inversión extranjera directa cayó 10.32%, para situarse en apenas 8.692 millones de dólares.

No se engañe por ser usted del 10% que no está condenada a la miseria extrema.
No puede haber dignidad ni liberatd para nadie mientras se permitan impunemente las razzias en Atenco, Oaxaca, Chiapas, y tantos otros; mientras se encarcele, se asesine y se haga desaparecer a los luchadores sociales, a los sindicalistas, a los defensores de los derechos humanos.
Lea el informe de Amnistía Internacional sobre México. Es una ignominia.

La plaza amaneció barrida...", "No busques lo que no hay: huellas, cadáveres

a la Devoradora de Excrementos." simbran mi cabeza, fue un día terrible aquel, y lo que le siguió tampoco fue mejor, en canal 11 han estado pasando (desde hace tiempo) la historia de México en torno al 68, es conmovedora, desgarradora, sobre todo porque ellos lucharon por la educación, por la libertad de elección, por amor a las instituciones que admiraban y respetaban, hoy día es tan fácil ver a pseudoestudiantes, vagando por las facultades de la UNAM, haciendo valer nada esos centavos que pagan por una gran educación, sangrando, chupando como sanguijuelas a la institución que más enaltece a este país, abusando de ella como si fuera una ramera.

HA FALLECIDO EL FAMOSO PRIMO CARLOS

Los primos de los ricos son muy suyos y cuando se mueren le estropean la cena de 50.000 pavos a Donald Trump.
El famoso primo Carlos ha dejado tras de sí un discreto rastro que pasa por las cloacas de Gatopardo, el desparpajado juez Garzón, el cabreo en un avión de Iberia, de camino a Quito, que dio con él en una cárcel ecuatoriana, y la delirante e imprevisible web de su primo Ernesto, ese hombre.
Y pare usted de contar.
Sus finanzas, sus más que imaginativas formas de hacer dinero a pesar de Guillermo Visedo Navarro, Esther Koplowitz Romero de Juseu, Alicia Koplowitz Romero de Juseu, Gonzalo Anes Alvarez-Castrillon, Miguel Boyer Salvador, Rafael Cabello de Alba y Gracia, Francisco Mas Sarda Casanelles, Justiniano de Miguel Ferrero, Concha Sierra Ordoñez, Emilio Cebamanos Jarreta, Rafael Montes Sanchez, Ignacio Bayon Marine, Rafael Martinez-Ynzenga Canovas del Castillo, Santiago Foncillas Casaus están recubiertas por un manto de silencio, como dicen los cursis.
Sus primos Koplowitz, sus primos Grunbaum, los mentideros periodísticos, y hasta el Registro de la Propiedad Intelectual y la SGAE, silencian tanto su existencia como su paso al Gran Oriente, donde, quizás, el Gran Arquitecto lo espera para revisar los planos y los materiales.
Ha muerto Carlos Koplowitz Grünbaum.

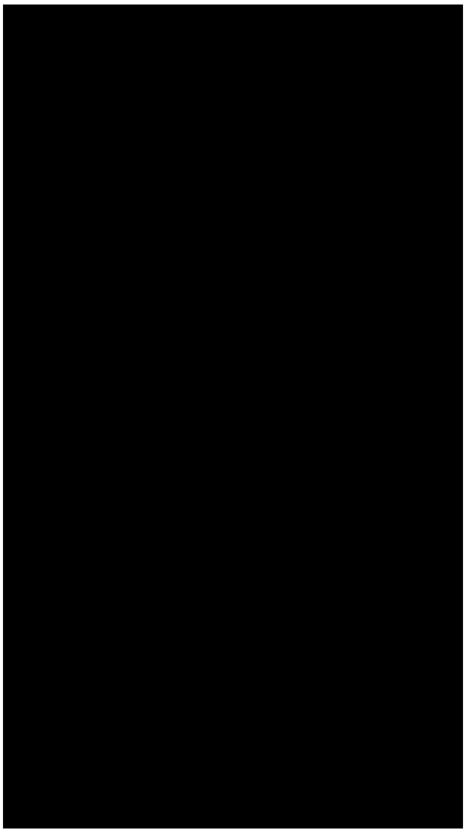
2.2 QUE NO VUELVA A SUCEDER

Transcripción literal de las páginas 10 al 20 del informe de la FEMOSSP, silenciado por el Gobierno Fox, que había encargado la investigación, y publicado en EE UU, en el National Security Archive, **archivo PDF**



3.1.2. Los mecanismos que el Estado desarrolló para controlar los grupos estudiantiles.

A. Las organizaciones estudiantiles y su funcionamiento
Las organizaciones estudiantiles, a lo largo de décadas de lucha, se fueron fortaleciendo con demandas propias del sector. Sus formas organizativas, independientes del estado, se depuraron y vigorizaron. Adquirieron la capacidad de formar organizaciones nacionales con estructura y funcionamiento democrático. Estas experiencias organizativas le sirvieron de base para la rápida conformación organizativa del CNH durante el movimiento estudiantil 1968.
La Federación de Estudiantes del Distrito Federal, 1920
En el siglo XX, la primera organización estudiantil de la que tenemos registro, se formó al terminar la fase armada de la Revolución. Los estudiantes de la Universidad Nacional crearon, en 1920, la Federación de Estudiantes del Distrito Federal.
La imposición del examen escrito, en lugar de tres exámenes orales tradicionales en la escuela de derecho en 1929, se topa con el rechazo de los estudiantes de Derecho y con la huelga que estalla el 29/ 05/ 05. Emilio Portes Gil, molesto con la 'franca indisciplina' de los estudiantes clausura la escuela por acuerdo presidencial, y la ocupa un grupo de bomberos que serán sustituidos por soldados. La huelga se extiende, entonces a casi todas las escuelas. Portes Gil tiene que ceder. El 29/ 06/ 04 la Cámara de Diputados lo faculta para crear la Universidad Nacional Autónoma. Aunque esta se entendía como la facultad para nombrar rector y directores de escuela. La autonomía le da a la universidad un nuevo status y un imaginario colectivo asociado a la libertad.
Fue el diputado Justo Sierra, en 1881, quien planteó ante el Congreso de la Unión *"por primera vez la idea de hacer autónoma la Universidad. La propuesta del maestro Sierra no prosperó. Al gobierno de entonces le parecía inadmisible patrocinar una educación que no pudiera controlar* ***40)***." Recuérdese el *'patrocinar'* y el *'controlar'*.
La Confederación Nacional de Estudiantes (CNE), 1924
En 1924 se fundó la Confederación Nacional de Estudiantes (CNE), que establecía reglas claras de participación, basadas en principios democráticos de elección; la aceptación de las distintas corrientes políticas, y la toma de decisiones basadas en el consenso.**41)**
La Federación de Estudiantes Universitarios (FEU), 1933
En 1933 se forma la Federación de Estudiantes Universitarios (FEU) de corte liberal e independiente del Estado, que funciona hasta 1948.
Durante el periodo presidencial de Lázaro Cárdenas, la adopción de la educación socialista, dada la identificación plena de Lombardo Toledano con el estalinismo, puso en el centro del debate el peligro de coartar la libertad de cátedra. Esta polémica polarizó al sector estudiantil. Por un lado, estaban los seguidores de Vicente Lombardo, que apoyaban vehementemente su reforma; allí se contaban las normales, los institutos tecnológicos y dos universidades, la de Guadalajara y la de Michoacán. Por el otro lado, los defensores de la libertad de cátedra se agruparon en torno a la CNE. Había liberales, marxistas, independientes, católicos y algunos miembros del Partido Comunista Mexicano. La CNE promovería un concepto de organización estudiantil con un perfil ideológico plural, en el que pudiesen participar estudiantes de distintas corrientes del pensamiento político.
La Universidad, en 1933 en el Primer Congreso de Universitarios Mexicanos, realizado en Veracruz, entra en la polémica y define que "Las universidades y los institutos de carácter universitario tienen el deber de orientar el pensamiento de la nación mexicana [… por lo que deben contribuir] a la sustitución del régimen capitalista, por un sistema que socialice los instrumentos y los medios de producción."**42)** Esta postura, con orientación más sectaria, la impulsa Vicente Lombardo Toledano. Antonio Caso lo enfrenta postulando la libertad de cátedra, la universalidad de la cultura, la libre discusión y análisis de las ideas. Esta es la postura que prevalece.
La Confederación de Jóvenes Mexicanos (CJM), 1938
A exhortación del Presidente Cárdenas se unen, en torno al principio de una educación superior progresista **43)**, la Confederación de Estudiantes Socialistas de México (CESM)

y las Juventudes Socialistas, para crear las Juventudes Socialistas Unificadas de México que, en 1938, se integrarían a la Confederación de Jóvenes Mexicanos (CJM) cuyos integrantes se integrarán como 'parte del sector juvenil' del naciente Partido de la Revolución Mexicana de orientación popular. De esta forma se abre el camino a la corporativización de las organizaciones estudiantiles, primero al PRM y luego a su sucesor el PRI, abriendo la posibilidad de convertirlas en estructuras de mediación. En este período surgen los 'comités de lucha', organismos para combatir a las escuelas libres o las facultades autónomas que se negaran a promover la educación socialista.

43) **"Debe modificarse y producir en los alumnos una conciencia vigorosa que forman parte de la colectividad y que las obligaciones para con esta colectividad son más fuertes que el egoísmo que ha dominado el régimen individualista actual". Gómez Nashiki A**

La Federación Nacional de Estudiantes Campesinos Socialistas (FECSM)
Otra organización corporativizada al PRM era la Federación Nacional de Estudiantes Campesinos Socialistas (FECSM), integrada por 29 internados de normales rurales distribuidos en toda la República.
La Federación Nacional de Estudiantes Técnicos (FNET)
Otra organización corporativizada al PRM era la Federación Nacional de Estudiantes Técnicos (FNET)44 de las escuelas técnicas, encabezadas desde 1936, por el Instituto Politécnico Nacional.
La Federación de Estudiantes Socialistas de Occidente
Otra organización corporativizada al PRM era la Federación de Estudiantes Socialistas de Occidente (Universidad de Guadalajara).
El Consejo de Estudiantes Técnicos en defensa del IPN, 1956
En 1956 se constituye el Consejo de Estudiantes Técnicos en defensa del IPN, integrado con la participación de tres delegados por escuela, nombrados en asamblea. La FNET, que ya era entonces un organismo oficial...tenía un voto"**45)**
La Central Nacional de Estudiantes Democráticos (CNED), 1963
En 1963 se conforma la Central Nacional de Estudiantes Democráticos (CNED). La Confederación de Jóvenes Mexicanos **46)** mantuvo una actitud pasiva ante esta política de embate a la educación superior popular y nacionalista. El costo político de esta pasividad se traducirá, en 1956, en un descontento generalizado de cuestionamiento severo. En el ámbito universitario empiezan a manifestarse enconadas divergencias entre las federaciones integrantes de la CJM, básicamente en cuanto a posturas ante la Revolución Cubana y la huelga ferrocarrilera. Por su parte, las normales rurales se opusieron a la conducción de la CJM que provocó la salida de varios de sus integrantes, incluida la Federación de Estudiantes Campesinos Socialistas de México. Esta crítica, en un ambiente tenso, en el que prevalecía la represión a los movimientos obreros y campesinos, puso contra la pared a la CJM que, ante su fuerte vínculo con el PRI, se veía imposibilitada para responder y reorientar su posición política tal y como los estudiantes se lo exigían. Lo paradójico de la situación era que, a pesar del descontento, ninguna organización intentó crear un organismo nuevo o paralelo. La ruptura se dio en 1962, en el interior de la misma CJM, durante su VIII Congreso, celebrado en noviembre en la ciudad de Guadalajara. Durante sus trabajos se dio una ruptura entre la organización corporativa oficial y la corriente que buscaba la independencia y la democracia en el movimiento. Esta división daría como resultado la creación, en 1963, de la Central Nacional de Estudiantes Democráticos (CNED) que será "el primer intento por integrar una organización nacional, democrática e independiente del aparato y el partido oficial, y que pretendía, además de reunir a los estudiantes, luchar tanto por la defensa de sus reivindicaciones como por una transformación política del país **47)**". En la huelga de la UNAM, en 1966, se conformaron dos formas de organización del movimiento, el Consejo Estudiantil Universitario (CEU) y los Comités de huelga, que acercarían al movimiento estudiantil a conceptos básicos del carácter democrático organizativo, que tuvieron antecedente en la Confederación Nacional de Estudiantes de 1929 durante la lucha por la Autonomía Universitaria y los comités de lucha de la "educación popular" del 36.
"El CEU...con la pretensión de agrupar estudiantes de la UNAM En este organismo ocuparon los 5 puestos principales estudiantes ligados al régimen. No obstante, el programa del CEU era de carácter democrático, coincidentes así grupos de izquierda y grupos oficiales."**49)**
"Los Comités de huelga se constituyeron a partir de elecciones en asambleas, donde también eran nombrados los delegados. A medida que las movilizaciones avanzaron, la importancia de la organización tradicional como la sociedad de alumnos fue decayendo, cuyos dirigentes, en muchos de los casos, eran desplazados por los estudiantes elegidos en asambleas **50)**

El Consejo Nacional de Huelga (CNH), 1968

Pocos meses antes de julio de 1968 fue quedando claro a los sectores del movimiento que estaban sometidos al control de la FNET, la necesidad de romper con ella y con cualquier intento que sujetara el movimiento y sus acciones al estado.

El CNH quedará integrado por las escuelas de la UNAM, IPN, Chapingo, Nacional de Maestros, Escuelas del INBA integradas al movimiento. Definiría el Pliego Petitorio, así como a aquellas escuelas y universidades que a nivel nacional apoyasen su lucha y demandas y las tácticas de lucha del movimiento.

B. De los métodos policíacos de control.
Durante este periodo de la historia estudiantil, se registra un patrón de comportamiento constante. Por parte del Estado, se detecta que los gobiernos federal y de los Estados intervienen en el funcionamiento de los centros educativos, tomando decisiones desde una concepción autoritaria, sin mediar consulta y sin buscar consenso de quienes se ven afectados por tales decisiones. Ha sido frente a este tipo de autoridades, cuando ejercen este poder público de forma autoritaria y dictatorial, cuando se han presentado las movilizaciones estudiantiles que se organizan para presentar sus demandas o para protestar por las políticas que se instrumentan en la institución en la que estudian. La organización estudiantil independiente, que genera sus propias demandas, que exige y protesta públicamente, es un límite objetivo a esta forma de ejercicio del poder del Estado.
Para resolver esta contradicción, el Estado ha creando estrategias y mecanismos para apoderarse del control de las organizaciones y del sector estudiantil.

1) Se infiltraron agentes en las escuelas y en las organizaciones estudiantiles, para mantener informados a los órganos de seguridad respecto a los liderazgos y planes de acción y también para ser utilizados como provocadores, cuando les fuera encomendado;
2) Se coparon las organizaciones independientes con el propósito de utilizarlas como estructuras de mediación, que sirvieran a los propósitos de los funcionarios que buscaban controlarlas y acallar la disidencia, cooptando a los líderes del movimiento.
3) Se crearon grupos de choque que se mezclaran con el sector estudiantil para contener mediante la violencia la disidencia que quieren acallar. De esta manera, el Estado ha promovido el delito que realizan los grupos de choque y ha corrompido los órganos de justicia, ya que debe de cobijar la actividad de esta gente con la impunidad.
4) Cuando no le bastan estos mecanismos, ha recurrido al empleo de la fuerza pública que utiliza indebidamente la violencia y que, por consiguiente, incurre en responsabilidades y violación a los derechos humanos.
5) Por las consecuencias jurídicas directas que implica el uso indebido de la fuerza pública, el Estado también recurrió a una modalidad aún más perversa de manejo del poder, la creación de grupos paramilitares para ser utilizados con el objeto militar de destruir al enemigo, entrenados y armados con un propósito explícitamente criminal, y que cobijados como organizaciones clandestinas a las que les garantiza la impunidad.
6) El Estado no dudó en utilizar al ejército como recurso contundente de control social.

Los porros.
Así, por ejemplo, desde 1967 la autoridad captó a las porras de los equipos de fútbol americano –tanto las de la UNAM como las del Poli-, y reorientó su propósito deportivo para realizar actividades para-policíacas, utilizándolas como grupos de choque, para hostigamiento, persecución y represión del sector estudiantil movilizado. De allí que a los golpeadores se les llame 'porros'.
Presentemos el caso de Mario Romero Ramírez 'El Fish' que fue utilizado por el Estado en este tipo de actividades delictivas. Este sujeto, "desde principios de 1967, mediante paga, organizó grupos de choque en la UNAM. Su contacto era el licenciado Jorge Ampudia, Secretario General Auxiliar, así como también del licenciado Vicente Méndez Rostro , Director General de Enseñanza Preparatoria**51)**." "Su función era mantener un sistema de información sobre lo que acontecía en los medios universitarios. Más tarde comenzó a trabajar como secretario particular del Sr. Alberto Lanz, Jefe de la Oficina de Prensa y Publicidad del Departamento del Distrito Federal, aunque en realidad dependía del Teniente Coronel Manuel Díaz Escobar , Subdirector de Servicios Generales. Dependencia donde se le proporcionó un vehículo para cumplir con su trabajo así como tener una oficina en Plaza de la República No. 30, 9° piso que pertenecía al licenciado Miguel Osorio Marbán y a la cual asistía diariamente Romero Ramírez **52)**
'El Fish' tenía un grupo de porros que servían de espías en las actividades que los estudiantes realizaban en la UNAM. Esta información la vendía a las autoridades universitarias y a la DFS, además de que eran solventadas desde la nómina de DDF **53)**.
Los porros podían hacer carrera policíaca, como en el caso del porro politécnico Humberto Pérez que, en 1968 ya era comandante de la Policía Judicial Federal.**54)** La violencia que utilizaron en contra del movimiento estudiantil contó con la permisividad de las autoridades universitarias **55)**.
El 29 de noviembre de 1968, estudiantes de la preparatoria 5, solicitaron auxilio a estudiantes de la preparatoria 5 ya que un grupo de porros se había posesionado del plantel, impidiendo la reorganización del movimiento. Al llegar al plantel de la 'Prepa' 5 en autobuses, los porros los reciben con ráfagas de ametralladores. Todos salieron corriendo, *"pero el estudiante* [que resultó] *muerto, Víctor Ramírez, se separó del grupo siendo perseguido por un miembro de la porra apodado el Superman, y que fue éste quien hizo 4 disparos matándolo, este cayó y el Superman quiso levantarlo para seguir golpeándolo pero se percató de que ya estaba muerto, huyendo de inmediato por una de las calles cercanas"*. (DFS 11-4-68/ L60/ F17). Incluso cuando se llegó al asesinato, el Estado cubrió de impunidad los crímenes.
El 21 de octubre de 1969, Juan Sánchez Moreno, miembro de la porra del Fish, asesinó a Miguel Parra Simpson, en la Facultad de Leyes de la UNAM. Sánchez Moreno repartía propaganda que el Fish quería difundir en contra de los presos políticos. Miguel Parra Simpson le reclamó y Sánchez Moreno en respuesta lo mató.
Por recomendación del Fish, Sánchez Moreno se entrega. El Fish intercede por su amigo ante el Jefe del DDF, que a su vez lo hace ante el Procurador quien deja en libertad al

asesino con motivo de que éste había participado en varias ocasiones en contra el movimiento estudiantil.**56)**
El Fish crea su grupo armado, Central de Acción Revolucionaria Armada (CARA) y detenido con el fin de infiltrar los grupos de presos provenientes de la guerrilla**57)**.

Donde en su declaración manuscrita reconoció que Sánchez Moreno pertenecía a su grupo y que el lo había enviado a repartir propaganda que había sido elaborada por el propio Sergio Romero, que después del incidente en que resultó muerto Parra Simpson , él aconsejó a Sánchez Moreno que se entregara a la policía. Además se comprometió a presentar testigos presenciales de los hechos, que servirían para redondear la investigación. Los infiltrados, los provocadores.
Los provocadores, eran infiltrados en el movimiento. Además del espionaje que realizaban, servían como provocadores que, con las acciones extremistas que promovían en la movilización estudiantil, desacreditaban el movimiento y daban excusa a la represión por parte del Estado.
Los organismos de seguridad lograron infiltrar la dirección del CNH. Desde esa posición, Ayax Segura Garrido, proponía acciones radicales que fueron desestimadas en las asambleas del CNH. Gilberto Guevara Niebla relata que en una reunión en Zacatenco, horas antes del mitin en Tlatelolco, Ayax propuso que el CNH adoptara una organización militar y pasara a la clandestinidad. Pronto, el CNH tomó distancia a las iniciativas de provocación montadas **58)**. Tras los acontecimientos del 2 de octubre, los dirigentes del CNH que lograron escapar, se escondieron para evitar ser detenidos. Luis Tomás Cervantes Cabeza de Vaca que se encontraba enfermo le pidió a Ayax que le enviara un

médico, precisándole el lugar en donde se escondía. Ayax revela a la policía la ubicación de su compañero y, a las pocas horas, es detenido en ese lugar por cerca de veinte agentes **59)**. Ayax también es detenido, desde la cárcel reitera su disposición de seguir al servicio del Estado**60)** y al mes es liberado. Al salir presenta un proyecto de infiltración del IPN **61).**

Para incriminar a la gente, encarcelarla y desarticular los movimientos, el Estado procede con una legalidad torcida. No se detiene a la gente por haber cometido un ilícito, sino que se procede en sentido inverso. Se cocinan las pruebas, para fincar responsabilidades a los dirigentes de los movimientos que el Estado quiere desarticular; tal es el caso de Ramón Danzós Palomino. Se encontraron en los archivos de la DFS dos "proyectos" o tácticas para su detención y consignación. El primero de estos proyectos considera presentar a "cuatro elementos" –por el nombre parecería indicar que se trata de 4 agentes de la policía o integrantes del ejército-, que declaren en contra Danzós Palomino, involucrándolo en incitar a la lucha armada, distribuir armas para hacer una revolución contra el gobierno**62)**. El segundo de los proyectos se estructura de una manera similar solo que basándose en la declaración hecha por Danzós Palominos, ante la DFS, en el sentido de pertenecer al Partido Comunista Mexicano y de haber desarrollado actos políticos de proselitismo y distribución de folletos marxistas leninistas en distintas ciudades de Sonora; sobre su reconocimiento de haber realizado estas actividades legales, montar con testigos fabricados su involucaramiento con supuestas actividades armadas.**63)**

58) **Yo volteé hacia Raúl y comenté con ironía: / -Si este no es policía, yo soy un príncipe azul. / -Tienesrazón –me dijo Raúl sonriendo, pero ninguno de los dos hicimos más deducciones."58**

59) **El es quien denuncia a Luis Tomas Cervantes Cabeza de Vaca, quien se encontraba oculto debido a la persecución policíaca de que era objeto. Segura Garrido era el único que sabía no sólo el domicilio exacto, sino el lugar justo que ocupaba de escondite dentro de la casa, pues Cabeza de Vaca se enferma de disentería, y llama a Ayax para que le mande un médico, le proporciona los datos exactos, a las pocas horas 20 agentes llegan al lugar preciso y lo detienen. Desde la cárcel informa a la DFS, proporciona información acerca de las actividades que desarrollan los demás estudiantes presos, y la dirige directamente al Director Federal de Seguridad, Fernando Gutiérrez Barrios. Confiesa haber estado en las poblaciones mencionadas, manifestó ser en todo adicto al PCM, reconoció el contenido de diversos folletos sobre el Movimiento Marxista Leninista. Para contar con elementos suficientes en los cuales apoyar la consignación de este individuo ante las autoridades judiciales, es necesario conseguir 4 o 5 individuos que rindan declaraciones imputándole directamente haberles proporcionado los folletos de referencia, a efecto de estar preparados para que en un futuro inmediato y haciendo uso de las armas, iniciaran un movimiento revolucionario con objeto de derrocar al gobierno constituido e implantar uno de tipo socialista, haciendo hincapié en que, según Danzós Palomino, había que aprovechar la situación que prevalecía en Sonora, para comenzar la revolución en esa entidad. A lo anterior se puede agregar, que las mismas personas declaren que el citado Danzós Palomino les proporcionó tres o cuatro armas,ordenándoles también con las mismas iniciar prácticas. Senadores de acuerdo con la matanza

3.1.3. Los tiempos políticos y las condiciones para generar el movimiento estudiantil

En el imaginario del sector estudiantil de diversas partes del mundo, eclosionó en 1968 el sentimiento de libertad frente a instituciones cuyo autoritarismo fue profundamente cuestionado.
Eso ocurrió en Francia contra el régimen paternalista autoritario de De Gaulle en mayo de 1968; en la llamada 'Primavera de Praga', en Checoslovaquia, que cuestionó el régimen autoritario, antidemocrático e intervencionista de la URSS; los movimientosintegracionistas, pacifistas y feministas que surgieron en EU. "Mil novecientos sesenta y ocho fue un año axial: protestas, tumultos y motines en Praga, Chicago, París, Tokio, Belgrado, Roma, México, Santiago… De la misma manera que las epidemias medievales no respetaban las fronteras religiosas, ni las jerarquías sociales, la rebelión juvenil anuló las clasificaciones ideológicas**64)**."

A. La primavera de Praga y el Socialismo de rostro humano.
La necesidad de reformas políticas era planteada ya desde inicios de la década de 1960 por algunos miembros destacados del Partido Comunista Checo, entre los que destacaba el eslovaco Alexander Dubcek que, en enero de 1968, accedió a la dirección del partido comunista, e impulsó la concepción de un "Socialismo de rostro humano", con demandas democráticas y de respeto a los Estados que eran subyugados desde Moscú. El gobierno, apoyado por los medios de comunicación, comenzó a liberalizar la acción del Estado y el 5 de marzo quitó la censura a los medios. Las reformas fueron aprobadas como 'Programa de Acción' que permitía la libre creación de partidos, a condición de que aceptaran el modelo socialista, establecía la igualdad nacional entre checos y eslovacos, decretó la liberación de presos políticos y sociales, se permitió el derecho de huelga, de sindicatos independientes y de libertad religiosa. Todas estas medidas contravenían los designios de la URSS y el PCUS.
Un ambiente de euforia se extendió por todo el país. Florecieron asociaciones y periódicos. En agosto de 1968, Dubcek dio un paso más y publicó los nuevos estatutos del partido, que incluían muchas referencias a términos ofensivos para los dirigentes del Kremlin.
Era demasiado esperar que el autoritarismo intervencionista de Moscú permitiera esas reformas. El 20 de agosto una fuerza que duplicaba la utilizada en Hungría en 1956, invadía Checoslovaquia. Las protestas en las calles de las ciudades no consiguieran que las tropas del Pacto de Varsovia, se retiraran.
Los invasores no consiguieron, en algún tiempo, dividir a la dirección checoslovaca. Finalmente, algunos dirigentes encabezados por Husak y Svoboda optaron por someterse a la 'normalización' impuesta por las armas. En abril de 1969 Husak sustituyó a Dubcek en la dirección del partido. El héroe de la 'Primavera de Praga' fue expulsado del partido en 1970 y tuvo que ganarse la vida como guardia forestal en Eslovaquia. Aunque la represión en contra de Checoslovaquia no es comparable a la que se ejerció en contra de Hungría en 1956, se produjo una gran purga en el PC checo; más del 20% de los militantes fueron expulsados. La invasión mantuvo por la fuerza unsistema que

perdió todo su crédito en la población checoslovaca.

B. París, Mayo del 68, estudiantes al lado de la clase obrera.
El 3 de mayo de 1968 la Universidad de la Sorbona de París bullía por la agitación. Los estudiantes de Nanterre habían intentado participar en la manifestación obrera. El rector llamó a la policía y el edificio fue desalojado. Los estudiantes invadieron el Barrio Latino, y en la noche del 3 al 4 de mayo las calles se llenaron de barricadas y enfrentamientos con la policía.
El 13 de mayo, ante la persistencia de la agitación estudiantil, las grandes centrales sindicales llamaron a la huelga general bajo el lema "alto a la represión, libertad, democracia, viva la unión de obreros y estudiantes ". Se abría una nueva dinámica en la que sectores del mundo obrero se incorporaban a la revuelta inaugurada por los estudiantes.
Para el día 20 de mayo Francia se encontraba paralizada, hasta el extremo de llegar a escasear los artículos de primera necesidad, la gasolina y el suministro eléctrico.
Se produjo un auténtico vacío de poder. El gobierno y los partidos tradicionales, incluido el PCF, estaban desbordados por una situación cuyas raíces y dimensiones no llegaban a comprender.
El 25 de mayo, sindicatos, organizaciones empresariales y gobierno firmaron los acuerdos de Grenelle, que recogían la aprobación de un salario mínimo garantizado y el reconocimiento de ciertos derechos sindicales. En los días subsecuentes se llegó al punto de que el presidente de la República disolviera la Asamblea Nacional y convocara a elecciones, con el objeto de salir del impasse provocado por el vacío de poder. El reto fue aceptado por la izquierda tradicional.
A partir de este momento la situación empezó a normalizarse. El 12 de junio se prohibieron todas las manifestaciones y los grupos de la extrema izquierda fueron disueltos por decreto. El 16 de junio, los estudiantes volvieron a las aulas de la Sorbona. El 23 se celebraron las elecciones, resueltas con una clara derrota de la izquierda y el triunfo de los gaullistas y sus aliados; finalizando así el mayo del 68 francés.
En Estados Unidos, el gobierno respondió al movimiento pacifista e integracionista con represión policial, asesinato de estudiantes y asesinato de ciudadanos negros.
El gobierno francés y el estadounidense utilizaron la policía no dispuestos a ceder ante el reclamo juvenil; la URSS, al ejército. No estaban no dispuestos a ceder ante el resquebrajamiento del autoritarismo que habían impuesto. La intervención de las tropas del Pacto de Varsovia en Praga terminó con las incipientes conquistas democráticas y nacionalistas de Checoslovaquia, pero evitó la represión sangrienta que en 1956 había realizado contra el pueblo húngaro cuando, el 25 de octubre, el ejército soviético abrió fuego en contra de los manifestantes húngaros desarmados que estaban reunidos frente al Parlamento, cometiendo una verdadera masacre.

Fox no era ni es bueno para muchas cosas. Entre ellas "silenciar" a la gente y a las instituciones. Si intentó silenciar a la FEMOSSP evidentemente falló.

Es más, he oido decir a más de una persona que precisamente al crear a la FEMOSSP el propio FOX abrió el camino hacia la exoneración de muchos de los implicados.

Hay quienes piensan que fue un error crear una "fiscalía" y que si se hubiera creado una "comisión" que buscara la verdad histórica, antes que abrir casuas penales difíciles de ganar, se le hubiera hecho un mejor servicio a la nación mexicana.

قصائد تتوسل السلام في لجة الحرب

مدريد الزمان

ولدت الشاعرة الإسبانية أنا خوليا غونثاليث في إقليم دي لامانتشا سنة 1975 في (الباثيته Albacete) وهي مدينة تأسست في عصر الموحدين وأصل اسمها العربي هو (البسيط) لكونها تقع في سهل منبسط. تضيف الشاعرة دائماً إلى اسمها الأصلي كلمة أو تسمية (أسود) حتى صارت تعرف به، وتقول أنها قد اتخذت هذا الاسم وباللفظ العربي كنوع من اعترافها واعتزازها بأصلها وبجذورها الثقافية العربية. بدأت تنشر قصائدها مبكراً في الصحف والمجلات وحازت على بعض الجوائز الأدبية المحلية. من أعمالها: (كلمات بلا آفاق) 1991، (كوكب القمر) 1994، (حدائق الزمن) 1996، (خمسة أفواه) 1998 وغيرها، إضافة إلى اشتراكها في أكثر من أنطولوجيا، ثم أصدرت ديوانها (الجمهور الجميل) سنة 2002 والذي قامت بتقديمه قراءة أو بعروض مسرحة في أغلب أنحاء إسبانيا وحظي باستقبال نقدي جيد وبعده في سنة 2003 كتبت ديوانها القصير والخاص هذا (صلاح نيازي وأغاني للشعوب التي بلا حمام). تكتب أنا خوليا أيضاً في النقد الأدبي ولها نشاطات مسرحية إضافة إلى مساهماتها المتواصلة في الإذاعة والصحافة وهي تكتب الآن سيناريوهات للتلفزيون وتهيئ لإصدار كتابها الجديد عن المسرح الموسيقي في القرن العشرين.

يضم هذا الديوان تسع قصائد لها تقنيتها الخاصة ومناخها الواحد، وهو ديوان يتحدث عن السلام ويدين الحرب، كتبته عندما اجتاحت القوات الأجنبية العراق في بداية عام 2003، وهي كما تصفه من خلال الحديث معها عنه أنها قد أرادت من خلاله أن تضم صرختها إلى صيحات المحتجين على الحرب وأن تساهم بشكل ما، في المزيد من إيصال أصوات الشعراء العراقيين إلى ما وراء الحدود والتي كانت، لحظتها، محجوبة بفعل صخب الإعلام والقنابل وضجيج الحرب. وهكذا فقد اتخذت من الشاعر صلاح نيازي نموذجاً وممثلاً عنهم وفي الوقت نفسه كنوع من التكريم له والاحتفاء به كونها من المعجبين بشعره، جعلت منه الشخصية الرئيسية للنصوص وعنونت الديوان باسمه إضافة إلى تبنيها لعبارة "عندما تبدأ الحرب فإن أول من يهجر المدينة هو الحمام" التي كانت قد سمعتها في مكان ما. ولهذا فإننا نجد في الديوان أن الشاعر يتأمل شعبه الذي أصبح بلا حمام فيتحسر، ولكن في القصيدة الأخيرة ثمة باب مفتوح على الأمل بأن الشعب ومهما تأخر الوقت فإنه، ذات يوم، سوف ينال السلام والعيش الكريم الذي يستحقه.

وتقول الشاعرة أنا خوليا أسود عن ديوانها هذا: "إن الشعر ملزم بأن ينظر إلى الألم والمعاناة وجهاً لوجه، أن يصرخ باسم ضحايا الوحشية أن يأخذ بأيدي الذين يعانون ويمنحهم الصوت الذي يحاول الآخرون منعه عنهم وأن يثور ضد الجلاد بلا هوادة. إن الشعر ملزم بأن يتكلم ويرفع الصوت أعلى من أي صخب آخر، وأن يواسي ويهدئ أيضاً، داعياً للسلام مطالباً به دائماً، لا يهجر إصراره هذا على المطالبة بالسلام ولا يدير ظهره للناس أبداً، لأن الشعر عائد للناس، ينتمي لهم، وهو من حقهم، تماماً كحقهم بالحياة وبالحرية".

Leo en "Albacete Literario" la entrevista de El Comediante a Aswad, Ana Julia González: "Tras cinco años de silencio Aswad, la poeta más insolente, desnaturalizada y engreída del planeta artístico manchego vuelve a la carga. Su primer libro, Bello Público, fue uno de los más leídos en lo que a autores locales se refiere. Llegó incluso a una segunda edición, con 1.000 ejemplares vendidos. Sin embargo su nuevo poemario Salah Niazi y las canciones para pueblos sin palomas será el menos leído de la historia de esta ciudad. Está en árabe, y sólo se ha editado y distribuido en Inglaterra e Irak"

Margarita se llama mi amor
Margarita Rodríguez Garcés
una chica, chica, chica, pum
del calibre "183" .

Margarita el pañuelo sacó
cuando el tren hizo píí... chacachá
y una lágrima rodó, rodó, rodó,
por su rostro angelical.
No lleves sofocón le dije yo al partir
porque te escribiré / en cuanto llegue allí.

Y rápida serás / en la contestación
para que llegue bien
pon en la dirección. Pon, pon, pon, pon, porompon-pon:
Quinta compañía.
Tercer batallón.
Campamento de Robledo.
Santuario del Honor.
Quinta compañía.
Tercer batallón.
Si preguntas en Robledo
te dirán que es la mejor.
Margarita su carta esperé
pero nunca a Robledo llegó
en la tienda no me pueden ver
porque siempre estoy de mal humor.
En la clases no escucho ni pum
y fatal de me da la instrucción
escamado tengo al capitán
y me huelo un buen sermón.
Me van a suspender
y voy a repetir
¡apiádate mujer!
decídete a escribir.
Tu carta salvará esta desilusión
para que llegue bien

Jo, gata, que adultísima me he hecho, y pensar que ya comparto gustos musicales contigo…
Para mi sorpresa, resulta que me sabía la canción de pe a pa, aunque rebuscando en mi memoria encontré el momento en que la aprendí, muy de niña, cuando la cantábamos jugando al corro. Dime que tú la conociste de mayor, de muy mayor. ¿A que sí?

GRANADOS Y DELGADO, UN CRÍMEN LEGAL

17 de noviembre de 1996

Una TV desvela que Franco ejecutó a dos inocentes

La madrugada del 17 de agosto de 1963, el régimen franquista recuperó el garrote vil en la prisión de Carabanchel para ejecutar a los anarquistas Francisco Granados y Joaquín Delgado, acusados de poner dos bombas en Madrid. La CNT negó que hubieran sido ellos. El desierto de agosto, el hecho de ser anarquistas y el revuelo internacional por las dramáticas muertes del comunista Julián Grimau (el 20 de abril de ese año) y el guerrillero Ramon Vila Capdevila, Caraquemada (11 de agosto), sepultaron el hecho. Casi 33 años después, los dos autores de las explosiones se autoinculpan por primera vez, ante las cámaras de la cadena cultural francoalemana ARTE, de la autoría de los atentados, convirtiendo así la condena de los dos anarquistas en un asesinato legal de la dictadura.

Un crimen legal es el título del reportaje de 52 minutos que ARTE emitirá el 4 de diciembre. Seis periodistas catalanes (Lala Gomà, Xavier Montanyà, Jordi Balló, Jordi Solé, Carles Serrat y Antoni Camín) y dos franceses (Patrice Barrat y Jean Louis Saporito) han invertido tres años para aportar luz a uno de los casos más escabrosos de la represión franquista.

"Todos los testimonios son inéditos y las entrevistas están vinculadas a los hechos. No hay ni un solo historiador", aclaran Gomà y Montanyà, realizadora y guionista de un espacio al que ARTE destinó 19 millones de pesetas. Y así aparecen los autores de los atentados (Antonio Martín y Sergio Hernández); el ponente del consejo de guerra, el militar Jesús Valenciano; un jefe del servicio de inteligencia de la policía y las voces de los dos verdugos. El acceso al dosier del consejo de guerra ("nos temblaron las manos al abrirlo", recuerda Gomà) completa la trama documental ("se ha llevado con discreción total, como una investigación policial"). Han rehuido intervenir Manuel Fraga, entonces ministro de Información y Turismo, los policías que detuvieron a Granados y Delgado y el resto de miembros del tribunal.

"Fue una historia desgraciada desde el primer momento", resume un alto responsable de la CNT en aquellos tiempos, que prefiere guardar el anonimato- *"Todo empezó el 29 de julio, cuando una bomba estalló en la Dirección General de Seguridad (DGS) de Madrid -"símbolo de la tortura franquista"*, dice el ex responsable cenetista- y otra en la Delegación Nacional de Sindicatos. *"Falló el detonador del de la DGS. Explotó 20 minutos después de ser colocada y provocó heridos (20, dos de ellos graves), lo que no estaba previsto*", rememora el dirigente anarquista. En apenas dos semanas, la policía franquista resolvió el caso.

A los dos días del atentado, Granados y Delgado fueron detenidos, interrogados brutalmente y, en juicio sumarísimo, a puerta cerrada, y con irregularidades legales, condenados a muerte. Ellos reconocieron su vínculo con el anarquismo, pero nadie pudo arrancarles la confesión de culpabilidad. Camino del garrote vil, en la cárcel de Carabanchel, ambos siguieron defendiendo su inocencia.

Todo, azar incluido, estaba en su contra. En el registro domiciliario les encontraron armas y explosivos. En realidad, eran para otro encargo: matar a Franco. *"Delgado bajó de París para avisar a Granados de que se aplazaba el atentado contra Franco. Pero se cruzó por el camino la acción de otro grupo contra la DGS y el sindicato vertical. Los de los atentados pequeños iban más a su aire... Una nefasta coincidencia"*, rememora el dirigente anarquista.

Granados y Delgado sólo tenían en común la edad, 30 años, y el exilio. El primero salió de España con su mujer y sus hijos en busca de trabajo. *"Estaba enfermo: tenía leucemia. Por eso insistía mucho en actuar; decía que iba a morir y que no le importaba",* recuerdan en la CNT. Delgado era *"más serio, introvertido",* con más bagaje político: inició el exilio con sus padres, militantes cenetistas.

Demasiado deprisa

En el sindicato anarquista hoy se reconoce que aquello les pilló desprevenidos. *"Todo iba demasiado deprisa. El franquismo buscaba un escarmiento ejemplar"*. Se les acusó de las explosiones, no de lo de Franco, porque no eran tiempos para dar ideas. No importaba: les esperaba igualmente el garrote vil.

Ante el rumbo de los acontecimientos, un sector de la CNT propuso a la cúpula del sindicato una convocatoria urgente en París de la prensa internacional para presentar a los verdaderos autores. No salió adelante: diferencias internas hicieron que el tema se cerrara con un simple comunicado. *"La dirección creyó que la rueda de prensa no aseguraba que no les matasen. Y, encima, se destaparía a dos más".*

En la madrugada del 17 de agosto, y escoltados por funcionarios voluntarios, Delgado cruzó sereno el patio de Carabanchel. Granados, en cambio, sufrió una crisis nerviosa y debió ser conducido, mientras exclamaba su inocencia.

En Europa había silencio. En pleno agosto, todos estaban de vacaciones. Tampoco el movimiento anarquista tenía la estructura y el peso político de los comunistas, que sacudieron el continente en favor de su Julián Grimau.

Desde el principio, surgió una pregunta inquietante. ¿Cómo detuvo tan rápidamente la policía franquista a los anarquistas? *"Fue por la delación de un infiltrado, sin duda"*, afirman hoy en círculos del sindicato. Hay dos teorías: una se vincula al *"entorno emigrante"* del propio Granados. Otra habla de Jacinto Guerrero Lucas, El Peque (asesor

de Rafael Vera en la etapa del Gobierno socialista). Antiguos camaradas le acusaban de ser ya entonces "agente doble". El lo desmiente. Quizá nunca se sepa. Es la única duda de María Granados, 33 años después de que, siendo una niña de 5, viera cómo su madre se enteraba por la prensa de la muerte de su esposo.

El documento de la confesión retrata las prácticas del franquismo

Para que el mundo sepa". Antonio Martín y Sergio Hernández, exiliados españoles en Francia y antiguos militantes de las Juventudes Libertarias, rompieron más de 30 años de silencio y olvido asumiendo ante las cámaras la autoría de los atentados. La confesión revela gran tensión. Para su primera declaración, Hernández ni siquiera aparece a cara descubierta y a Martín se le rompe la voz al recordar el drama que vivió al enterarse de que habían detenido a dos compañeros por lo que ellos habían hecho, y que *"no sólo les acusaban, sino que tenían la voluntad de matarles".*

El documental pone en evidencia una injusticia de la que muchos fueron cómplices involuntarios y deja todavía sin respuesta muchas preguntas frente a este terrible error judicial. Pero da de lleno en el blanco a la hora de retratar con detalle las prácticas y el espíritu del franquismo. Para ello, los autores no sólo han tenido acceso al sumario, sino que han logrado personajes claves: el general Eduardo Blanco, ex jefe de los servicios de información de la policía franquista, y Jesús Valenciano Almoyna, ex miembro del Tribunal Militar y actual general consejero del cuerpo de justicia militar.

Valenciano no se siente autorizado *"para hacer una crítica concreta de la actuación de la policía"* ni pretende justificar su propia actuación. El militar está dispuesto a someterse *"gustoso a un tribunal de revisión"*, y aunque asegura *"tener conciencia de haber firmado una sentencia justa"*, reconoce que *"siempre cabe el fallo cuando se es humano"*. Blanco es más expeditivo: "*Cabe que no hubieran sido ellos, pero tengo la seguridad de que el consejo de guerra los juzgó con toda conciencia pensando que eran culpables. Todo ligaba, la explosión y la captura de unos señores con esa mentalidad y que poseen explosivos. Eso para la policía era suficiente*".

A través de los testimonios se plantea además la hipótesis de que la detención de Granados y Delgado no fue fortuita. Blanco confirma las sospechas de que hubo denuncia o traición. *"No creo que fuera casual. El hecho de que los detuvieran piropeando a unas extranjeras, quiere decir que los seguían"*.

La versión anarquista corre a cargo de Octavio Alberola, uno de los dirigentes y organizador de la operación que implicó a Granados y Delgado y, posteriormente, a Jacinto Guerrero Lucas. Este personaje oscuro desmiente en sus declaraciones cualquier relación con Alberola, pero éste y otros testigos insisten en implicarlo. Un cruce de acusaciones, que los autores dejan en el aire sin solución, produce una extraña impresión al espectador.

Pero la sensación más horrible es la del testimonio inédito de los verdugos, que abre y cierra el reportaje. Se trata de una grabación de audio realizada por el escritor Daniel Sueiro en 1970 para un estudio que realizaba sobre verdugos. Los de Granados y Delgado quedaron muy impresionados: *"Llegaron con los ojos vendados. Uno se sentó y no dijo nada, pero el otro, cuando abrieron la capilla, como la sala de ejecución estaba abierta, primero se encaró con el aparato y dijo: Aquí no me siento yo. Lo malo es que ya estaba allí* (su compañero se ríe). *Yo le dije, siéntate aquí, que procuraré no hacerte sufrir. Entonces dirigiéndose al cura dijo: Padre, por Dios, que yo no he sido, soy inocente... Quería decir que él no había puesto las bombas. Pero como los habían cogido*

con todo, las bombas, la dinamita..., pues allí no había escapatoria de ninguna clase.... ¡Claro que fueron ellos!"

La burocracia interna de TV-3 y TVE impidió la producción desde España

La historia de Granados y Delgado. Un crimen legal esconde un laberinto de despachos, directivos y trabas burocráticas por parte de Televisió de Catalunya (TVC) y TVE. *"Nuestro interés empezó en 1993, cuando nos enteramos de que Francisco Granados y Joaquín Delgado eran inocentes, porque los verdaderos autores de este atentado vivían en París"*, explican Lala Gomà y Xavier Montanyà, autores de este reportaje.

Las pruebas definitivas de su inocencia —la confesión de Sergio Hernández y Antonio Martín, verdaderos autores de los atentados— saldrán a la luz el 4 de diciembre en Francia y Alemania. Ese día, la cadena cultural ARTE estrenará este trabajo de periodismo de investigación en horario prime-time, a las 20.30. Su emisión en España es una incógnita, aunque ex directivos de TVE temen que la cadena estatal, en manos del PP, esconda este reportaje porque *"implica directamente a Manuel Fraga"*.

Lala Gomà, realizadora de TVC, decidió en febrero de 1994 comunicar a la dirección de TV-3 la idea de hacer este programa. Jaume Ferrús, por entonces director de la televisión autonómica, dijo, de entrada, que sí, que TVC produciría este reportaje, pero que quería pruebas documentales. Así, Gomà y Xavier Montanyà se fueron a París, donde por fin, en un "trabajo de espionaje", lograron conectar con Hernández y Martín. *"TV-3 nos dejó una cámara para poder grabar sus declaraciones, pero el viaje nos lo pagamos nosotros",* recuerdan.

Directivos del área de informativos de TV-3 visionaron a mediados de 1994 las confesiones. *"Dijeron que esto era un material fantástico para relatar una historia humana, pero que en esos momentos no disponían de medios ni de espacio en la parrilla de programación",* manifiestan Montanyà y Gomà. La solución que finalmente propuso TV-3 fue que *30 minuts* se encargara de la realización, bajo la supervisión de un equipo de reporteros de TV-3, y que, en consecuencia, el tiempo de duración sería media hora. "*Nos deprimimos mucho, porque si no trabajábamos juntos y con independencia era imposible de hacer".*

El siguiente paso fue en noviembre de ese mismo año llamar a la puerta de TVE. *"La acogida fue muy diferente. Demostraron interés desde el primer momento"*. De entrada, Ramon Colom lo eligió entre una cincuentena de proyectos. Y otra vez surgieron trabas burocráticas, ya que por una cuestión de convenio, el realizador tenía que ser de plantilla de TVE, y además querían que el programa durase media hora y se pudiera emitir en sólo dos meses. *"Conectamos con Jordi Balló y él, a través de la productora Ovídeo, consiguió lo que hasta entonces parecía imposible, que una cadena como ARTE nos diera todo tipo de facilidades, medios y dinero para poder llevar a término este trabajo".*

La prensa de la época

France-Observateur fue una de las publicaciones extranjeras que denunció la injusticia del caso en portada el 22 de agosto de 1963, cinco días después de la ejecución de Delgado y Granados. La periodista Elena de la Souchere, ya fallecida, tituló ese día su artículo con la pregunta: ¿Por qué Franco ha hecho ejecutar a dos inocentes'. La versión de la prensa española, muy diferente, alababa *"el espectacular éxito de la*

policía".

Un 'agente doble' entre el anarquismo y el franquismo

"Era bajito y barbilampiño, lo que le hacía más joven", recuerdan sus compañeros de la CNT. Por eso apodaban *El Peque* a Jacinto Angel Guerrero Lucas (Madrid, 1938), un oscuro personaje, hoy de nuevo de actualidad al vinculársele con la trama de los fondos reservados del Ministerio del Interior, en la etapa socialista, como asesor de Rafael Vera. Fue el suyo un triple salto en el vacío, que arrancó con el exilio de sus padres a Toulouse. Como ellos, pronto se convirtió en un luchador antifranquista, proceso cuyo cénit llegó en 1961, como responsable de la sección de la anarquista Información y Propaganda de Defensa Interior (DI), grupo encargado de las operaciones armadas contra Franco.

El DI abrió una investigación sobre el caso Granados-Delgado. Hubo quien acusó a Guerrero de delatar a sus compañeros ejecutados. Años después, en 1988, el diario ultraderechista El Alcázar lo vinculó a la policía franquista. En 1984, Gabriel Urralburu, entonces presidente autonómico de Navarra, lo había presentado a Luis Roldán, delegado del Gobierno en aquella comunidad, como un hombre que podía ayudar a abrir la puertas de la policía fracesa para la extradición de etarras. Roldán habló con Vera. Y Julio Feo, secretario de Felipe González, facilitó su entrada como asesor de Interior en pago a unos supuestos servicios. El ex libertario tenía hilo directo con el ministro francés de Interior Charles Pasqua. La llave: ser miembros de una misma logia masónica.

Nota de Gatopardo:

El que nombran como Jacinto Guerrero, *"el Peque"*, Jacinto Ángel Guerrero Lucas, nombres de pila que alterna, es uno de los 'agentes dobles' que los servicios secretos del Coronel Blanco introdujo en los grupos anarquistas en el exilio. *"Era bajito y barbilampiño, lo que le hacía más joven"*-dicen. En la actualidad sigue siendo bajito, y ha adquirido las características redondeces eunucoides, y si entonces era redicho, ya cercano a los setenta años ha adquirido la retórica ampulosa, llena de eufemismos, perífrasis y pompa, de un telepredicador. Es antinatural y ceremonioso, y tiene una rigidez corporal muy característica de los que siguen un tratamiento con neurolépticos, antipsicóticos y anti-parkinsonianos.

Es miembro del Supremo Consejo Masónico de España del grado 33 , del Rito Escocés Antiguo y Aceptado.

—¿Fueron Inocencio Martínez y Guerrero Lucas dos delatores?

Martínez fue crucial como delator, la diferencia de opiniones estriba en cuándo Guerrero Lucas se convirtió en delator. Yo creo que es bastante posible que Martínez fuera un informador desde el principio y muchas otras personas opinan lo mismo, pero Octavio piensa que Lucas era el informador desde el comienzo. R. *Jacinto Guerrero Lucas, «el Peque». Cuando aparece en Toulouse, en 1962, llega avalado por el Comité Nacional de CNT. Comienza a trabajar con nosotros y se revela como un personaje activo y muy decidido. Pero hay dudas sobre él, despierta recelos. Lo que ocurre es que la gente que desconfía de Guerrero es la que polemiza sistemáticamente con el DI, así que sus sospechas pierden credibilidad.*

Ahora bien, resulta que, ya durante los gobiernos socialistas, se descubre que Jacinto Guerrero tiene despacho en el Ministerio del Interior, muy cerca del mismísimo despacho de Vera, por aquel entonces secretario de estado de seguridad. ¿Cuándo lo recluta Vera? No lo sé, pero está claro que la vinculación de Guerrero con Interior debe ser antigua.

Lo malo de este asunto es que, en cuanto a la caída de Granados y Delgado, el confidente pudo ser otra persona. Estoy pensando en un íntimo amigo de Granados, alguien que, como él, venía de los ambientes de la inmigración en Francia y no estrictamente del exilio: Inocencio Martínez."

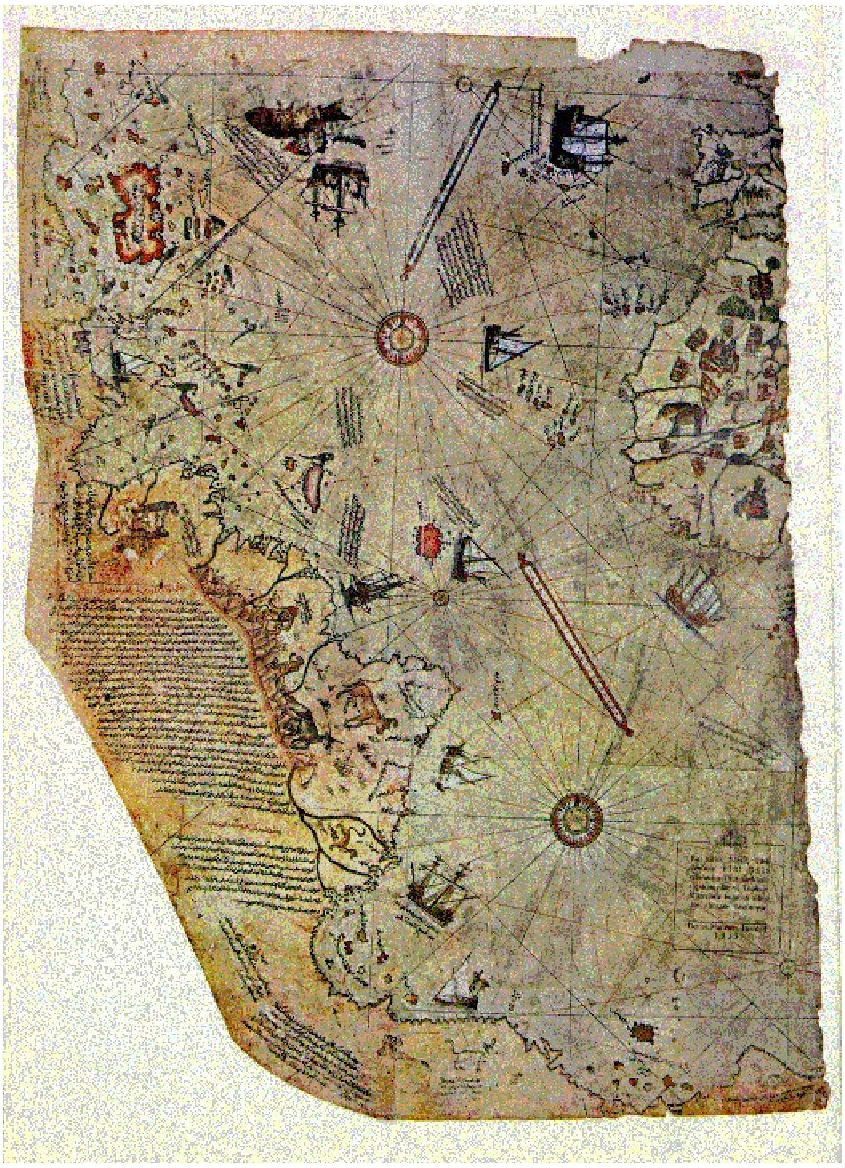
SANDIOS HONORIS CAUSA EN EL NEGOCIADO DE CULTURA



«España es una chusma gobernada por otra chusma». Napoleón

Sólo en este país puede darse una concatenación de tontos, incultos e incompetentes descontrolados como la que ha asolado el Ministerio de Cultura en los últimos años. La Biblioteca Nacional de España ha sufrido especialmente las "ideicas" y ocurrencias de quienes se han propuesto que los únicos referentes culturales de los españoles sean la televisión y lo más populachero y chabacano de nuestra historia.
El último desastre ha sido el robo de ciertos mapas en ciertos incunables. En un principio se trataba de un mapamundi de una *Cosmographia* de Ptolomeo; luego se amplió a *"dos mapas de sendos libros iguales"* (que dice una fina pluma de *El País*); más tarde aparecieron otros libros destrozados. El Ministerio de Cultura no ha facilitado más información. Las autoridades y bibliotecarios de la Nacional, menos. Y, los periodistas, que se limitan a decir lo que les mandan, ya han hecho bastante con enterarse de quién es Ptolomeo. Todos ellos se han amparado en el *"silencio por motivos de seguridad"* recomendado por la *Sección de Delitos contra el Patrimonio* de la Guardia Civil. Por una vez, tengo que estar de acuerdo con la Benemérita. La verborragia senil de la Sra. Regás, reproducida y amplificada por unos periodistas con menos seso que una gallina y menos instrucción que un sargento furriel, no es que pueda entorpecer la investigación. Es que va a causar la baja voluntaria y en masa de los agentes encargados del caso.

Sin embargo, Rosa Regás (y, junto con ella, algún figura del Ministerio de Cultura, como don Rogelio Blanco, Director General del Libro Archivos y Bibliotecas, que hasta ahora no ha dicho ni Pamplona) no es que haya ocultado información a los ciudadanos sobre un robo y un atentado al patrimonio nacional. Es que no quiso denunciarlo ante la Policía Nacional ni ante la Guardia Civil ni ante las autoridades. Y se largó de vacaciones dando carpetazo al asunto. Sólo gracias a la honrosa (aunque lenta) decisión de la subsecretaria del departamento, María Dolores Carrión, *"en ausencia" de la directora de la Biblioteca*", tuvo noticia la Unidad de Delitos contra el Patrimonio de los robos. La Sra. Regás tendría que estar dando cuentas de tal actuación ante un juez. Pero se va a jubilar de rositas, sin que nadie investigue si cometió un delito de encubrimiento por omisión de denuncia. De la misma forma que no se va a pedir auditoria de sus fastuosos gastos.
La manga ancha del Partido Popular con esta dama se explica por dos razones: porque el patrimonio cultural no susceptible de manoseo patriotero no le interesa a la oposición ni lo más mínimo; porque, en el caso de la Biblioteca Nacional, el Partido Popular tendría que explicar la incompetencia supina de los directores que nombró: Luis Racionero, Jon Juaristi y Luis Alberto de Cuenca; el derroche de fondos que supuso la mamarrachada arquitectónica de Jerónimo Junquera, que ha dejado el interior de la Nacional como la cafetería de la Estación de Chamartín; y el uso espurio de la Biblioteca y de sus fondos. Por ejemplo, durante la hégira de Aznar y siendo Visir de la Nacional ese portaestandarte de la bandera bicolor que es Jon Juaristi, se permitió que Laura Bush estuviera manoseando a discreción las joyas bibliográficas de la Biblioteca Nacional. Según me cuenta un bibliotecario, los guantes de algodón blanco que se le ofrecieron para manipular los manuscritos no fueron usados por la Sra. Bush, quien se los guardó en el bolso encantada. O se le habían olvidado las prácticas bibliotecarias o pensó que eran un regalo, como las pastillas de jabón del hotel.
Parece difícil encontrar mujer más sandia que doña Rosa Regás. Pues no pierdan de vista a doña Beatriz Rodríguez Salmones, portavoz de Cultura en el Congreso, del Partido Popular, quien, durante el debate de la proposición no de ley, presentada por su partido para mejorar el funcionamiento de la BNE, rechazó pedir el cese de la directora *"porque nos importa muchísimo esta institución"* y reconoció que la Biblioteca Nacional es *"dificilísima de gestionar"*. Tiempo al tiempo y veremos a esta lumbrera del foro calentando algún sillón del Ministerio de Cultura.
«Maudit soit qui mal y pensé!», pero me malicio que la política de silencio sobre los robos más huele a encubrimiento que a discreción. Veamos los hechos.

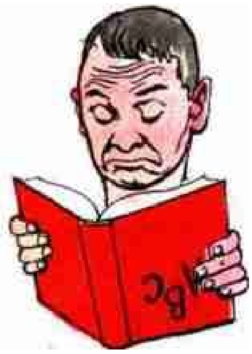
I. La Geographice hyphegesis, Geographia o Cosmographia de Ptolomeo Claudio. La Cosmografía de Ptolomeo, (escrita hacia 160 dC) es el tratado científico sobre geografía que impera en la cultura europea durante quince siglos. Ptolomeo aporta a la historia de la cartografía el concepto y técnicas de la proyección , coordenadas y listas topográficas. Su concepción del mundo es la que preside las obras de Bocaccio, Chaucer o Alfonso X o la aventura de Colón, de la misma manera que su concepción del universo, expresada en la *Megale Syntaxis tes Astronomias* o *Almagesto*, prevaleció hasta Copérnico y Kepler.
Ptolomeo escribió en griego la *Geographice hyphegesis* (que fue llamada *Geographia* o *Cosmographia* en sus traducciones al latín). La obra consta de ocho partes o "libros" cada uno de los cuales dedica a un tema (construcción de mapas, las partes del mundo conocido, etc.). La obra, se dice, iba acompañada de 27 mapas y un mapamundi, que son los que forman el *"canon de mapas ptolomaico"*. Los manuscritos griegos sufren los avatares de los ultimos tiempos de los Paleologo y del Imperio Bizantino. Es un filólogo bizantino, Manuel Crisolora, que cambió este nombre por el de Máximo Planudes, quien trae un ejemplar a Florencia hacia 1297, cuando es llamado por Palla Strozzi para que enseñe griego. Planudes, ya entonces, se queja del enorme esfuerzo y dificultad que

había supuesto encontrar este manuscrito y, para celebrar el hallazgo, compone unos hexámetros. Por los comentarios de Planudes a este manuscrito (conservado hoy en la Biblioteca Vaticana, **Vat. gr. 177**) sabemos que este ejemplar no tenía mapas y Planudes adjuntó un rudimentario mapamundi, que confeccionó siguiendo las indicaciones de la obra ptolomaica.
Por ello, hoy se alberga serias dudas de que el conjunto de mapas incluidos en los manuscritos y ediciones posteriores sean copias derivadas de los mapas ptolomaicos “originales”. Más parecen mapas que aplican las técnicas cartográficas y topográficas de la Cosmographia. La traducción del manuscrito griego fue llevada a cabo, hacia 1406, por un discípulo de Crisolora: Jacopo Angelo da Scarperia. A partir de aquí, se hallan manuscritos de esta obra en todas las cortes y reinos europeos, unos con mapas y otros sin ellos..

II Incunables de la *Cosmographia* de Ptolomeo. Se llama “incunables” a aquellos libros compuestos entre 1453 (invención de la imprenta) y 1500. Durante estos 47 años de “infancia” los libros conservan unos rasgos heredados de la composición del códice humanista y renacentista (por ejemplo, abreviaturas, colofón, ornamentación artesanal...) y van incorporando innovaciones como la ilustración xilográfica, los grabados, la simplificación de las letras y las marcas tipográficas y editoriales. Cada edición representa una concepción distinta de la obra y una firma de la labor artesana y artística del impresor/editor. De ahí la importancia de describir todos los elementos que caracterizan cada edición.
Los incunables de la Cosmographia se distribuyen en 5 ediciones, cuatro italianas y una alemana. Todas, menos la de 1475, tienen mapas. La edición alemana de Ulm tiene una técnica de elaborar los mapas diferente a la italiana: en Ulm se prefiere la xilografia (o grabado en madera); en Roma se opta por una técnica relativamente novedosa, el grabado en cobre a punta seca

- Edición de 13 de septiembre de 1475. **Vicenza: Hermannus Liechenstein**, interprete Iacobo Angelo (esto es : impreso en la ciudad de Vicenza por Hermann Liechenstein con traducción al latín de Jacobo Angelo).
- **Edición de 1477**. **Bologna, Dominicus de Lapis**. Interprete Jacobo Angelo . Tiene 1 mapamundi y 26 regionales a doble hoja.
- Edición de 1478. Roma, Arnoldus Buckinck. Interprete Jacobo Angelo, ex emendatione Domiti Calderini. Contiene un mapamundi y 26 mapas: 10 de Europa, 4 de Africa y 12 de Asia. Las mismas planchas de los mapas se emplearon para las ediciones de 1490, 1507 y 1508. Que se sepa, hay sólo 38 ejemplares en el mundo., uno en la Academia de la Historia, en Madrid.
-1482 Ulm, Lienhart Holle, Además de la técnica de la xilografia, esta edición se singulariza por tener un mayor número de mapas (38) y porque el mapamundi, grabado y firmado por Johannes Schnitzer de Armsheim, aunque sigue el modelo ptolomaico, añade tierras del norte de Europa (Groenlandia y Escandinavia), cuyos mapas se añaden al “canon” original. Marca característica del grabador es que invierte las enes para reconocer la autenticidad de las copias. Hubo reediciones de esta obra en 1482 y en 1486. Esta considerada, por la belleza de sus tipos y la de sus mapas, como uno de los libros más hermosos jamás impresos. Se supone que quedan unos 120 ejemplares en todo el mundo.
-1490 Roma, Petrus de Turre, 1490 . En esta edición se utilizó, para imprimir los mapas, las mismas planchas que la edición romana de 1478, cuya precisión y belleza eran muy superiores a la edición de 1477. Característico y único de estos mapas son los tipos romanos, de gran belleza, que se consiguieron, no grabándolos con buril, sino agujereando la placa con punzón
Es decir, desde el siglo II hasta que aterrizan en el Ministerio de Cultura Carmen Calvo

y, en la Biblioteca Nacional, Rosa Regas, la *Cosmographia* de Ptolomeo es un pilar de la historia de la cultura occidental y sus códices, manuscritos, incunables y ediciones representan un valiosísimo legado de la historia del arte. Esta pareja de ignorantes se han permitido derivar los presupuestos destinados a conservar tesoros artísticos como éstos para *parties* y mamarrachadas.



III. La *Cosmographia* de Ptolomeo Claudio (Ptolomaeus Claudius). Ejemplares que existen en la Biblioteca Nacional de España.

1. **Edición de 1475**
De esta edición existe un ejemplar con signatura: **Inc/1337**. (Signatura es una combinación alfanumérica que indica la "matrícula" o colocación del ejemplar. En este caso, Incunable, nº 1337).
2. **Edición de 12 julio de 1482.** De esta edición hay un ejemplar con signatura **Res/255** (es decir Reservado, nº 255. Teóricamente este ejemplar requeriría la autorización del Director de la Biblioteca para ser consultado).
El **Res/255,** según consta en la pagina web de la BNE, contiene,*"en el libro VIII, 27 mapas a doble página y a página entera coloreada"* y un total de *38 estampas*. Entre ellas un mapamundi grabado por *Johannes Schnitzer de Armsheim* (es decir, Johannes, tallista de Armsheim, ciudad alemana en Renania-Palatinado).
El nombre del insigne grabador de mapas, retratado por Schongauer, se ha transformado, en manos del analfabeto responsable de la ficha bibliográfica de la Biblioteca Nacional en *Johannes von Armszheim*. Esta luminaria de la biblioteconomía dice: *"El mapa mundi lleva la inscripción: Insculptum est per Johannê Schnitzer de Armszheim"*. Si miran esta inscripción, en la parte superior centrar del mapamundi, verán que dice *"Armβheim"*, o sea la grafía alemana para *s* sorda. No contento con la burrada paleográfica, traduce al alemán el nombre: "Johannes von Armszheim" y así se ha catalogado; cuando lo correcto sería: Johannes Schnitzer aus Armβheim o Armsheim. La gracia ha hecho desaparecer de los ficheros y catálogos de la Biblioteca Nacional a un artista de fama universal. O sea, que si les interesa este grabador, acudan a cualquier sitio que no sea la Biblioteca insignia de la nación, porque, en ese negociado, no se le conoce.

Edición de 16 de julio de 1482. De esta edición existen dos ejemplares en la BNE: el **Inc/116** y el **Inc/1475.** Según la farragosa descripción accesible en la página web, cada uno de estos ejemplares tiene 38 *"estampas"* y la principal diferencia entre ellos es que al **Inc/116** le falta el grabado de la inicial N
Las 38 iluminaciones de cada uno de los tres códices de 1482 los desglosan en la BN:

2 iniciales grabadas
4 diagramas astronómicos
32 mapas: 1 mapamundi y 31 mapas representando las partes del mundo.

Edición de 4 de noviembre de 1490. Hay dos ejemplares en la BNE: el **Inc/756** y el

Inc/1105. De estos incunables no se da ninguna información ni se dice si tienen mapas o no. Los tienen los ejemplares de la misma fecha e impresor de la Biblioteca Panizzi (Reggio Emilia), la Biblioteca del Polesine (Rovigo) y de la Biblioteca Seminario di Milano, pero, en la BNE no se le considera lo bastante importante para detallar y describir sus mapas. La valoración de un solo mapa de esta edición, de los 27 o más que debe de tener, varía de 10.000 a 150.000 euros.Tampoco se tiene en cuenta que esta edición se caracteriza por tener un grabado de Ptolomeo, también presa altamente cotizada en el mercado de coleccionistas.

Los mapas de Ptolomeo y el mercado internacional de arte robado.- La historia de la cartografía va fatidicamente unida a la historia de los robos de mapas. Durante la Edad Media y el Renacimiento, poseer mapas o las técnicas para confeccionarlos significaba detentar un poder, que afectaba al comercio, a las rutas de navegación, o a la descripción de posibles territorios de conquista. Las grandes escuelas cartográficas se hallan en ciudades emblemáticas de las sucesivas potencias europeas:, Mallorca, Venecia, Florencia, Sagres (punto de partida de la expansión marítima portuguesa desde la principios del siglo XIV) y las condenas por robar o sacar mapas de un territorio mapas podían llegar a la pena de muerte.
Con el nacimiento de la imprenta y el descubrimiento de América, los mapas que se valoran son aquellos que incorporen los nuevos territorios , la que antes se llamaba "terra ignota" y reflejen una imagen de la tierra, según las nuevas leyes de la física y la cosmografía científica. Waldseemüller, por ejemplo, intentó incorporar al mapa ptolomaico las observaciones y descubrimientos de Americo Vespucio. El único mapa existente de Waldseemüller, que llama, por primera vez, "America" a estos territorios, está hoy en la Library of Congress de Washington. En 2001 el gobierno alemán permitió al principe Waldburg-Wolfegg que vendiera a la Biblioteca americana por diez millones de dólares este mapa, catalogado como parte del tesoro artístico alemán.
Esta transacción, reconocida por muchos como "robo moral", es el mejor (o, al menos, más legal) escenario en el que se desarrolla hoy el mercado de mapas.
Efectivamente, durante el siglo XIX y primera mitad del XX, los colectores de mapas se limitaban a un reducido número de bibliófilos o especialistas sin gran poder económico. Los mapas robados eran pocos y se pagaba poco por ellos. Debemos a una nefasta figura llamada Graham Arader el que exista un mercado creciente y sin escrúpulos de mapas antiguos. A este marchante norteamericano se le ocurrió la feliz idea de convertir los mapas en objetos de adorno, para complementar la decoración de la oficina de un banquero o la consulta de un dentista. Lo que interesaba era el mapa y, por tanto, se mutilaba sin contemplaciones el manuscrito, códice, incunable o ejemplar en el que estaban insertos. Esta salvajada la amplió a los grabados de botánica o fauna. Los grabados o pinturas pueden centuplicar el valor de la obra en la que están. Y el robo es más fácil. Un ladrón no tiene que preocuparse en esconder un manuscrito o libro. Se limita a saber ocultar y manejar con discreción una cuchilla y los mapas o grabados robados se esconden fácilmente entre folios o entre la ropa. Miles Harvey, en su libro *"La Isla de los mapas perdidos"* (obra entretenida si uno tiene el sentido común de irse a tomar una copa cuando el autor hace conatos de estilo), describe a Graham Arader con la fascinación plebeya de un típico papanatas, encandilado por el prepotencia del dinero. Precisamente hay un capítulo en que cuenta cómo se subasta en Sotheby`s una *Cosmographia* de Ptolomeo, de 1482, que Arader adquiere por 1.150.000 $. El último dueño de la *Cosmographia* que Sotheby`s hace público se remonta al siglo XVIII. A partir de aquí se acoge al derecho de confidencialidad. Un mes antes, la casa de subastas Christie´s fue pillada en renuncio intentando vender otra *Cosmographia* de Ptolomeo (la edición de 1477), que había sido robada a la Biblioteca Nacional de Francia... Si uno piensa que sólo el mapamundi de la obra vale hoy dos millones de euros, y que la obra tiene de 27 a 38 mapas, el precio pagado era una buena inversión.

Todo esto es posible por la coexistencia de distintos tipos de corrupción y negligencia criminal. Los mapas se roban y las instituciones no denuncian los robos para ocultar el escándalo. En treinta años, se han robado miles de mapas y, por tanto, se han mutilado miles de libros valiosísimos, en las bibliotecas de Estados Unidos, Francia, Reino Unido, Finlandia, Países Bajos. En la mayoría de los casos, ha sido la policía la que ha tenido que ir preguntando a las bibliotecas si los mapas encontrados entre el botín de algún ladron, les pertenecían. Arader decía que los bibliotecarios eran una partida de gandules e incompetentes y tenía razón. En Madrid, el 30 de junio de 2001 se celebró un congreso de la *International Society of the Curators of Early Maps* (ISCEM), donde se habló por extenso de la plaga de robos de mapas que habían ocurrido en los últimos diez años en las mejores bibliotecas del mundo. Supongo que las autoridades de nuestra Biblioteca Nacional estaban ocupadas eligiendo el color de la formica de la espectacular remodelación actual. La Interpol y el FBI han colapsado los correos electrónicos advirtiendo de los delitos a todas las Bibliotecas del mundo que custodiaban mapas antiguos. Cientos de páginas web de bibliotecarios con algo de ética y vergüenza han estado enviando descripciones de ladrones, transmitiendo información sobre los últimos dos apresados: Gilbert Bland y Forbes Smiley, los seudónimos utilizados, las bibliotecas visitadas por ellos, etc, etc. La Biblioteca Nacional de España no se ha dado por enterada de que, desde hace más de veinte años, los mapas antiguos son uno de los objetos más valorados en el mercado de arte mundial. No se ha molestado en describir con un mínimo de profesionalidad su fondo cartográfico, no ha comprobado si hay mutilaciones, ni ha hecho una sola consulta ni un solo estudio de normas de seguridad a expertos. A fecha de hoy no sabemos (y estoy seguro que Regàs se ha ido sin saberlo, ni falta que le ha hecho) que édiciones y obras han destruido en la Nacional. Tampoco han explicado por qué y cómo han permitido el acceso al incunable Res/255, cuando existía de éste copia digital. Y, con el número tan ridículo de fondo antiguo digitalizado, no creo que se les olvidara su existencia.
El 30 de noviembre de 2004, Don Rogelio Blanco presidió un *"Seminario de Digitalización y Patrimonio"* con un subtítulo digno de la cursileria de esta grey: *"Experiencias en Archivos y Bibliotecas"*. Yo estoy seguro que, con el equipaje cultural que llegan ministros, subsecretarios y directores generales, al cargo, lo de ponerse delante de más de diez libros debe de ser una experiencia digna de congreso. El nuevo ministro de Cultura, César Antonio Molina, salió bien parado de la Dirección del Instituto Cervantes, por el expedito truco de dedicar fondos y sedes a poner películas españolas. La nueva directora de la Biblioteca Nacional (que nos dará grandes titulares) ya ha advertido que se ha leído *"La Carta Esférica"* de Arturo Pérez Reverte, porque *"el tema de los mapas está de moda"*. Ésta nos ameniza las veladas poniendo la *Iliada* en *Reggaeton*. Tiempo al tiempo.

La primera línea es una mentira burda.

"Sólo en este país puede darse una concatenación de tontos, incultos e incompetentes descontrolados como la que ha asolado el Ministerio de Cultura en los últimos años"

En México no cantamos mal las rancheras.

Si gestionar la BNE es un asunto dificilísimo, cosa que no dudo, sería de agradecer que en el Ministerio alguien tuviese la feliz idea de poner al frente de ella a un experto en biblioeconomía, en vez de a un autor de más o menos relumbrón, que, en el mejor de los casos, sabrá mucho de literatura pero eso no lo capacita para dirigir tamaña empresa.
A Ramón Mier: En España bailamos muy bien los pasodobles.

Perplejito me voy quedando, Gato Pardo, con lo que he leído por aquí sobre la Fundación Ramón Menéndez Pidal y el acoso y atropellos ilegales a la que ésta está siendo sometida por la Fundación Ramón Areces.

Y los detalles sobre la gestión de la Regás de la BNE y los hurtos en ésta sucedidos no me ha dejado menos contrito y pasmado.

En otra ocasión vendré a leer el post sobre el atentado contra la Embajada de Israel y la mutual judía AMIA. Ahora sería demasiado para mí.

Gato Pardo,
puede leer un relato sobre la Sra. Regás y la estatua de Ramón Menéndez Pidal si se va al final de este blog (fué mi primera crónica de de periodismo de ficción), cuya dirección le adjunto:

http://unhogarenlosabismos.blogia.com

Como comprobará no me he preocupado ni ocupado nada del aspecto técnico del blog. Pero por lo menos la letra es muy legible.

Volveré por aquí, ya le digo.
Maneja Ud. muy bien una documentación muy interesante. Aunque ya le he adelantado,

o sugerido, que yo estoy un poco ya sólo para literaturas y buen vino, y el resto de mi vida, que espero que sea muy largo, administraré con mucho cuidado mis dosis de información política y similar.

Un saludo muy respetuoso de

No, ni mucho menos la gracia está en confundir a D. Marcelino con D. Ramón. Esto en el contexto del relato es una tontería. Se cambia el nombre de D. Ramón por el de D. Marcelino y vuelve a quedar todo como estaba. Aunqeu como es una crónica de periodismo de ficción lo mismo me da. He leído el nombre de Menéndez Pidal en todos los artículos y crónicas. Ahora me suena que al principio se trataba, en efecto, del Sr. Pelayo, cómo no. Un señor con ese apellido tiene que ser alguien muy horrible y nada partidario de la Alianza de Civilizaciones y demás parques temáticos al gusto del Zapatitos, que nos cuenstan un riñón.

Lo cierto que no está mal que le diga que la gracia de mis relatos no está en que, en algún caso, haya cambiado un nombre real por otro. Son graciosos por sí mismos (bueno, depende de la temática, que no todos son de humor.) No está mal que diga esto, aunque yo sea su autor, porque mis lectores me han convecido de que esta es la verdad. Tengo algún detractor que otro muy espectacular también, pero estoy seguro que tienen cáncer o algo similar, o aun algo mucho peor, porque esa mala fe y peor baba de la nada no puede salir.

Admiro su trabajo y volveré.

Autor: Gatopardo a Lonely Flipidor

Solemos pedir que los lectores se abstengan de hacer comentarios que no aporten algo al artículo, y solemos borrar los que no se ajustan al tema o tienen faltas de ortografía. No nos parece oportuno que traslade a los comentarios de Gatopardo la conversación y su respuesta sobre el artículo que nos pidió que leyéramos en su blog sobre el tema, cosa que hicimos. Como a usted le parece irrelevante confundir a Menéndez Pidal y a Menéndez Pelayo, y otras cuantas confusiones de cultura elemental, es evidente que le sobrarán a usted lectores, por lo que le rogamos que no traslade al artículo de investigación de El espía que surgió del frío su entusiasta admiración por sí mismo, su propio estilo y su sentido del humor, que no es el nuestro, ni venga a polemizar sobre cuestiones que seguramente tienen cabida en su blog, y no en nuestra bitácora.
Gracias

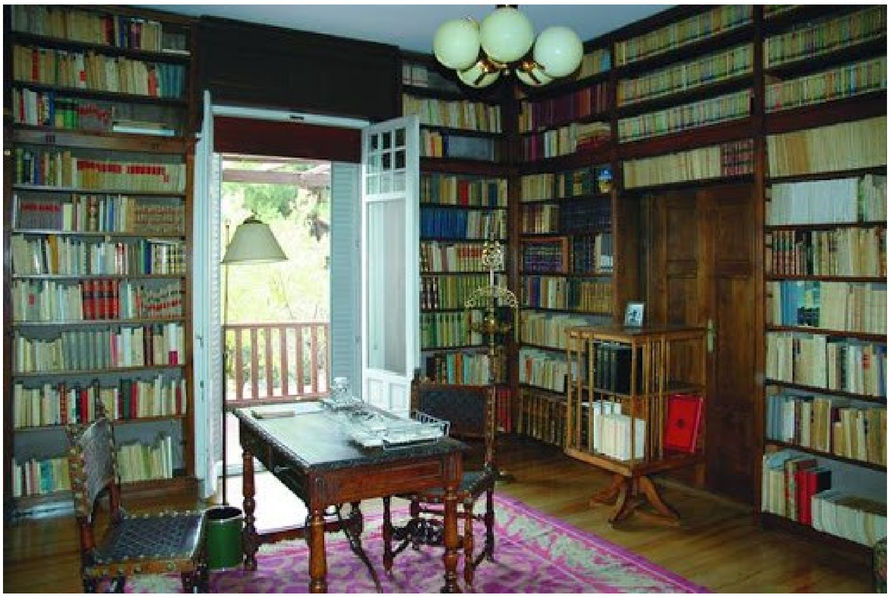
UN GATO EN EL OLIVAR DE CHAMARTÍN



Uno de mis pocos principios deontológicos es no apoyar una causa sin haber observado e investigado previamente a los *"causantes"*. La campaña en defensa del Olivar de Chamartin habría quedado incompleta si yo no hubiera podido cotillear *in situ*, a modo y a gusto.

El 12 de noviembre de 2005 me colé de rondón en la Fundación Ramón Menéndez Pidal durante la celebración de XX aniversario como Centro de Estudios Históricos y Filológicos. Mala táctica. La concentración de más de dos eruditos y académicos por hectárea acarrea serios peligros, y me pareció que había más de un centenar. Por lo pronto, hablan mucho; por lo demás, tienden a no menearse del sitio donde estén, aunque una ponga el codo discretamente a la altura de sus costillas flotantes y empuje

en la buena dirección. Lo más parecido a aquella reunión es la colonia de cotorras de Kramer que se han asentado en los alrededores de Televisión Española.

Así es que tuve que volver otro día, alegando que quería consultar la documentación existente sobre *tararí y tarará.*

Me abrió la puerta un solido ejemplar de leñador barbudo, cubierto de barro hasta las rodillas, con una resma de papeles debajo del brazo.

—*¿Podría ver al director de la Fundación?*
—*Pues soy yo* -dijo con cara de "*a ver si le valgo y, si no, busco algo mejor*".

Mientras yo le iba dando explicaciones sobre mis supuestas investigaciones, Diego Catalán (el director-leñador) iba arrancando por el jardín unas matas bordes que estropeaban los romeros. El jardín es silencioso, elegante y austero. Cada olivo es un candelabro gigantesco que nace entre tomillos, cantuesos y jaras. Acostumbrada a la imagen del olivo de producción, estos ejemplares sorprenden porque tienen la grandeza de un roble y la majestuosidad de una encina. Cada uno tiene su historia. Catalán recuerda cómo la familia estuvo un día entero enfadada con Ramón Menéndez Pidal porque éste había ordenado una poda drástica de ciertos ejemplares enfermos "*Un desmoche terrible, pero necesario*" —concluye con pesar. Cuando el Ayuntamiento de Madrid, en los años setenta, arrasó parte de la finca para abrir una calle, Jimena Menéndez Pidal consiguió replantar y salvar los olivos arrancados en la parte norte del jardín.

Entre los olivos sobresale un impresionante madroño con una arboladura catedralicia, al que la Reina Sofía, en su visita, alabó como el más extraordinario olivo que jamás hubiera contemplado.

—¿Se ha conservado este jardín así desde un principio?
—No. El jardín pasó una etapa desastrosa durante los años noventa y parte de los ochenta. Cuando se inauguró la casa como sede de la FRMP, una empresa de jardinería se desvivió por estropear y tapar lo que consideraba "naturaleza salvaje" con plantas "elegantes y vistosas". A esto se sumó la desidia de los cuidadores del jardín que llegaron a perpetrar actos de auténtico vandalismo. —Me enseña una gruesa rama del madroño donde aún se distinguen heridas— *Aquí dejaban clavadas el hacha o las herramientas que utilizaban.*
—*¿Y qué han hecho ustedes para restaurarlo?*
—Lo primero, cosas de sentido común. Se limpió de maleza y plantas invasivas y se regeneró el suelo que se hallaba empobrecido. Luego, además de mis recuerdos personales, recurrimos a la documentación existente sobre el jardín en el Archivo Cultural para recuperar su carácter original.
—¿Se encarga de esto algún organismo oficial? ¿Han recibido ayudas?
—Hemos recibido ayudas de la [Fundación Ramón Areces] *durante unos años. Hoy el mantenimiento del jardín es posible gracias al trabajo desinteresado de personas que le tenemos gran cariño a este olivar y que, además, consideramos un deber ético mantenerlo y legarlo en las mejores condiciones.*
—¿Pero quiénes curran? —pregunto intentando que el buen hombre no se me escape por la fronda del lenguaje oficial.
—*¿Ahora? Javier Sáinz Moreno. Y yo colaboro trayendo plantas autóctonas de la sierra para repoblar zonas.*
—Me suena algo ese nombre...
—Es profesor de Derecho Financiero en la Universidad Autónoma.

—¿Y cómo han conseguido que un profesor de derecho financiero se ponga a cavar?
—Yo no he sido —contesta como las doncellas de Miss Marple cuando rompen un plato—. *Él es así.*

Javier Sáinz Moreno, recuerdo, es quien llevó la acusación popular contra Polanco en el caso Sogecable, y su familia ha legado a la Fundación Menéndez Pidal la Bliblioteca Sainz Bujanda, con más de 4.000 volúmenes.

En los árboles, los petirrojos, herrerillos, escribanos, ruiseñores, amenizan la escena.

—Y la labor de la Fundación Menéndez Pidal ¿en qué consiste? Usted tiene un ritmo de publicaciones que es sorprendente, sobre todo teniendo en cuenta que todo se basa en estudios minuciosos y documentados...

—Abarca varias áreas... ¡Perdone! ¿me puede sujetar esto un momento? — me da un rastrillo y el mazo de papeles, y se pone a arrancar las raices de unas plantas bordes. Yo miro al mirlo que se pasea ufano y nos observa a unos metros.

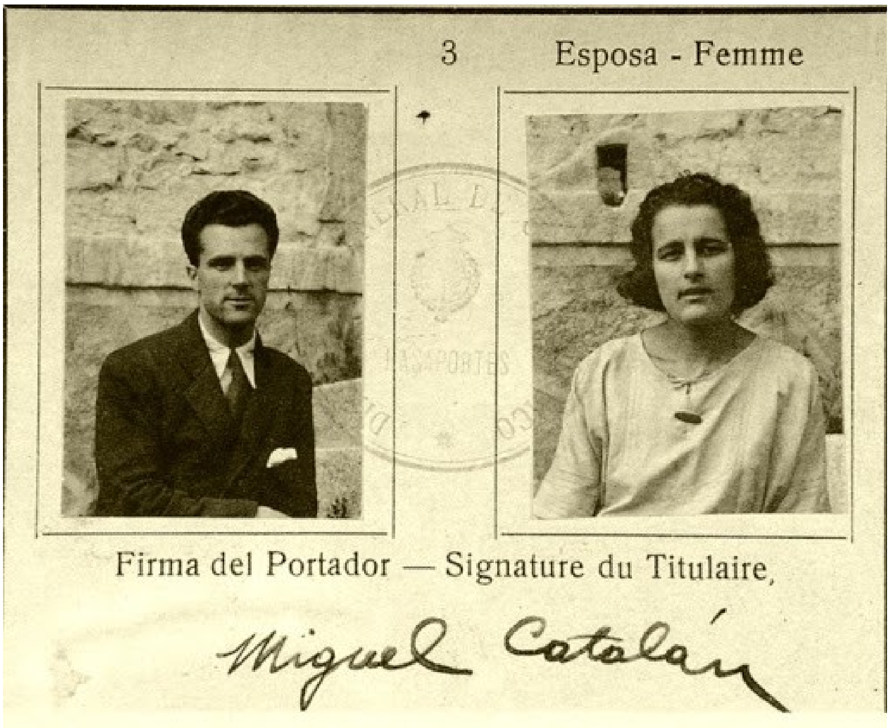
Al cabo, con el tono de concederme un favor que le hubiera pedido con insistencia dice:

—Creo que no habrá problema... puede venir en los ratos libres a echarnos una mano en el jardín... Hay que cavar en aquella parte para oxigenar bien la tierra. .. y mientras le iré explicando en qué consiste la labor de la Fundación.

Justamente en ese momento me doy cuenta de lo tarde que es y de la prisa que tengo.

Cuando vuelvo la cabeza para echar la última ojeada, Diego Catalán está usando un escobón para amontonar las hojas caidas y, a su lado, un gato negro, con la cola erguida y los bigotes palpitantes, acecha al mirlo, que se ha subido a un olivo y lo reta desde allí.

No dejo de preguntarme si no habré estado hablando con un jardinero, que me ha tomado el pelo haciéndose pasar por el presidente de la Fundación Menéndez Pidal.



II.-

No me conmueven las casas ilustres. No me interesa dónde dormitaba el señor marqués, ni dónde elucubraba sus fórmulas el matemático sabio. Si visité algún *château* del Loire sólo me ha quedado en la retina la silueta de un gato dormitando en la rama de un roble centenario. Agradezco a Diego Catalán que me enseñara y explicara el vasto patrimonio cultural que encierra la casa Menéndez Pidal sin hacerme pasar por el suplicio de "admirar" el sillón de don Ramón (supongo que hay alguno) o la estilográfica que usaba para sus escritos. La casa tiene una atmósfera agradable, diáfana y silenciosa. Por los grandes ventanales entra el gris perla del otoño y el sonido del viento en el jardín. Todas las estancias han sido dedicadas a la conservación de los fondos documentales y a la magnífica biblioteca de consulta que los acompaña. No hay calefacción. Coceo con elegancia y feminidad para entrar en calor, pero una dama gorda de labios apretados me mira con reprobación desde una foto sepia. Es Maria Goyri . Una "*femme formidable*". Una "*no-nonsense lady*". No le gusto y me parece que se remueve en el corsé de indignación.

—¿Qué tipos de fondos documentales hay aquí?
—Hay seis archivos de carácter muy distinto pero complementarios. El Archivo del Romancero Menéndez Pidal/Goyri contiene el mayor volumen de información que existe hoy en el mundo sobre romances hispánicos. Son miles y miles de documentos distribuidos y clasificados por el nombre del romance al que acompañan o explican.
—¿Es difícil de consultar? Yo aún estoy convaleciente de haber ido al Archivo Histórico Nacional
—En absoluto. Le voy a poner un ejemplo. ¿Conoce algún romance?
—El de la Muerte del Príncipe Don Juan. (Publiqué en Gatopardo la versión de Diego Catalán, pero me guardo de decírselo)
—Venga y le enseño lo que hay.

Pasamos a una habitación llena de ficheros metálicos y, mientras saca decenas de carpetas encima de una mesa, me va explicando los cuidados que requiere la conservación de los documentos, las carpetas especiales de cartón sin cloro, el grado de

humedad óptimo...

—La historia de este romance es muy curiosa. Aquí tenemos las versiones recogidas desde su descubrimiento hasta hoy. Hay versiones peninsulares, de los judíos de Oriente, de Sarajevo, Salónica, Rodas, Bulgaria. La última que obtuve yo fue en Zamora en los noventa . Hay alrededor de cuatrocientas versiones. En estas carpetas puede ver cómo se descubrió el romance en 1900 y las investigaciones sobre sus antecedentes históricos y literarios.

—¿Cómo se descubrió el romance?

—Lo descubrió Maria Goyri. Mis abuelos dedicaron su viaje de bodas a hacer la ruta cidiana. Cuando pararon en el Burgo de Osma se alojaron en una pensión. Una mañana que mi abuela y la asistenta estaban haciendo la cama, Maria Goyri empezó a canturrear el romance de El Conde Sol y la asistenta le dijo que ella también sabía algunos. Entre los romances que le cantó había uno desconocido hasta entonces.

Me enseña el relato de María Goyri escrito con letra apretada y caligráfica. Cuesta imaginar que la antipática mujer del retrato fuera alguna vez joven, cantara alegre después de una noche gozosa o tuviera esa figura de muchacha atlética y despreocupada que veo en las fotos.

El rastreo de este romance tradicional lleva a María Goyri hasta unos versos recogidos en la Serrana de la Vera de Vélez de Guevara. En las carpetas se guardan el trabajo de Goyri publicado en 1916, las anotaciones de Ramón Menéndez Pidal, los estudios de Paul Benichou, o los artículos de Catalán sobre este tema.

—Últimamente se ha descubierto una versión del siglo XVI en un Cartapacio de la Biblioteca Real, es decir una versión casi contemporánea a los hechos narrados en el romance

—¿Quiere decir que la tradición oral ha conservado hasta hoy un suceso que ocurrió hace quinientos años?

—No es que haya conservado el suceso, es que ha conservado el relato de ese suceso y ese relato ha ido variando en expresiones, en fórmulas, en el desenlace, pero ha seguido fiel a su arquetipo.

—¿Y por qué decía que este romance era muy curioso?

—Porque es uno de los ejemplos más claros de cómo la tradición oral conserva datos históricos y cómo la investigación literaria va por delante a veces del descubrimiento histórico. En las distintas versiones se había mantenido, a lo largo de los siglos, el nombre de un tal Doctor De la Parra, como el médico que da el fatal diagnóstico al príncipe moribundo: "confiésese Vuestra Alteza,/ mande ordenar bien su alma./ Tres horas tenéis de vida,/ la una ya va pasada". Sólo más tarde se descubre en un documento de pago de la época que el Doctor de la Parra recibió diez mil maravedíes "por atender a su Alteza".

Voy ojeando la ingente cantidad de documentación. Unas hojas están escritas con pluma, otras a lápiz, otras en ordenador. Se han recogido versiones en páginas de cuadernos que ya no existen, o en el envés de un sobre alguien anotó que hay que revisar un Cancionero de Palacio. Se ha guardado con respeto el artículo de algún estudioso que discrepaba con las tesis de Menéndez Pidal o Catalán. Durante más de un siglo distintas generaciones de varios países han trabajado, han colaborado y han discutido sobre un dato o un descubrimiento con generosidad, sin ese recurso al "yo lo tengo, yo me lo guardo" tan propio del intelectual o del erudito mediocre.

Mientras reflexiono, helada de frío, Catalán sigue hablando sobre la pasión amorosa

que llevó a la tumba al hijo de los Reyes Católicos, *"que cayó de su caballo/ a las puertas de su amada/ por cortar un ramo verde/ y ponerlo a su ventana".*

—Hay un relato histórico del confesor del príncipe que confirma punto por punto que , aun en sus últimas horas y sabedor de su suerte, el joven no puede evitar seguir deseando a su mujer.
—¿Se han llegado a grabar alguna de las versiones modernas?
—Claro. El conjunto de todas las encuestas que dirigí yo desde 1977, además de otras donaciones hechas por diversos investigadores, están recogidas en casettes y en CD. Es lo que forma el Archivo Sonoro del Romancero "Débora Catalán". Es un Archivo complejo y sobre el que estamos estudiando organizarlo de forma que sea posible acceder a él por otro orden que no sea sólo el cronológico. Le voy a buscar una versión del Príncipe Don Juan para que la oiga.

Rebusca entre los cientos de CD mientras discute consigo mismo si una u otra versión es la mejor. Suena un teléfono y descubro con sorpresa que hay alguien que responde. Alguien silencioso como un ratón y al que no he visto ni oído. Es el Bibliotecario de la Fundación. El erudito bibliotecario, José Polo, **(1)** va a tener trabajo hoy con el follón y el desorden que Diego Catalán va dejando a su paso. Escuchamos en el portátil la versión del romance. La anciana recitadora debía de andar por los noventa años y renunció usar la dentadura postiza al cumplir los ochenta. Las consonantes dentales, por no hablar de las efes, dejan mucho que desear. Pero impresiona esa voz cascada, rota y vieja desgranando con mimo la historia de un joven enamorado hace quinientos años.

Ha empezado a llover con furia. Diego Catalán me sigue enseñando (y sumiendo en un caos indescriptible) los archivos restantes: el Archivo Lingüístico, que contiene todos los ficheros y material científico utilizado para la elaboración de la Historia de la Lengua Española,**(2)** además de documentos lingüísticos medievales; el Archivo de Historiografía Peninsular que reúne una ingente cantidad de documentos, fotografías, microfilms y copias manuscritas de textos medievales cronísticos, además de anotaciones y estudios de Menéndez Pidal, Solalinde o Catalán. Yo ando confundida no sé si por la cantidad de información que tengo que memorizar y procesar o porque el estado de congelación me está produciendo un sueño invencible.

—*La importancia de los otros dos archivos, el Archivo Cultural de fines del siglo XIX y primera mitad del XX y el Archivo de los Laboratorios Humanísticos, puede verla aquí. En esta obra es donde explico qué significa el Archivo del Romancero, cómo se formó y enriqueció y los avatares históricos que pasó.* **(3)**

Salgo arrastrando unos pies que no siento, y con dos tomazos de 10 kilos de erudición bajo el brazo. Me lo tengo merecido. Por cotilla. Diego Catalán, desde la puerta, mira la manta de agua que está cayendo y exclama con mucho sentimiento:

—¡Qué pena que llueva y no podamos trabajar un rato en el jardín!

CONTRA TODAS LAS PRESIONES, PUBLICADO LIBRO DE CHRISTIAN SANZ Y FERNANDO PAOLELLA SOBRE AMIA

Christian Sanz y Fernando Paolella .

Hace algunos años, empezamos a investigar los atentados a la Embajada de Israel y a la

mutual judía AMIA. Lo hicimos por separado, ya que aún ninguno de los dos conocía la existencia del otro. En el marco de esa investigación nos conocimos y decidimos aunar esfuerzos para llegar a la verdad, prometiéndonos contar toda la verdad a través de nuestro hermoso oficio, el periodismo. Creíamos entonces que las principales evidencias de sendos atentados -especialmente el de la AMIA- estaban muy bien escondidas y que nos costaría muchísimo llegar a desmadejar el ovillo, pero nos equivocamos.
Con el paso del tiempo descubrimos que el mayor escollo para llegar a la verdad no era la falta de pruebas, sino la presión de ciertos grupos de poder para que no se llegara a dilucidar la real trama de este asunto. Esos "grupos" nos han hostigado sin cesar desde el preciso momento en que nos decidimos a denunciar algunas de las irregularidades detectadas y no bien nos animamos a escribir los primeros artículos periodísticos al respecto. Una de las presiones más intensa fue proferida por importantes dirigentes de la colectividad judía y -según especulación nuestra sin evidencia respaldatoria- por personeros del servicio secreto israelí: el Mossad, los cuales atacaron nuestras computadoras y nos "robaron" información confidencial sobre AMIA.
Pasaron muchos años desde que empezamos a investigar los atentados de marras y pasaron muchas cosas también: tuvimos acceso a información privilegiada, nos granjeamos el odio de las autoridades de AMIA y DAIA y hasta tuvimos el tupé de enviar dos cartas al presidente de la Nación, Néstor Kirchner, para que supiera cuál era el verdadero nudo del problema. Esto último provocó que nos llamaran a declarar en la causa AMIA, donde aportamos abundante información y alguna evidencia documental.
Con el paso del tiempo, escribimos más de veinte artículos sobre este tema y fuimos mencionados como dos de los únicos diez periodistas argentinos que investigaron independientemente la causa AMIA. Al mismo tiempo, nos enemistamos con algunos colegas de los diarios más importantes del país, que de manera descabellada publicaron información falsa, aún cuando les ofrecimos evidencia de sobra que demostraba que estaban escribiendo una interminable falacia.
Todos estos antecedentes fueron decisivos para que decidiéramos publicar un libro, el cual llevó varios años de indagación y no menos de 50 entrevistas con personajes del "poder real" argentino. **La obra fue boicoteada en una oportunidad y hemos tenido en las últimas semanas un ofrecimiento dinerario para que no viera la luz**. Semejante gesto nos envalentonó aún más y decidimos redoblar nuestra apuesta.
El libro finalmente verá la luz en pocas horas. Se llama ***AMIA, la gran mentira oficial*** (Ver tapa al pie) y ha sido editado bajo el sello *El Cid Editor*, uno de los más prestigiosos en lo que a calidad periodística refiere **(1).**

Los sospechosos de siempre

A pesar de que sorteamos todos los obstáculos que nos fueron puestos y logramos finalmente publicar nuestra obra, en las últimas semanas ocurrieron un par de hechos que merecen ser relatados. Todo empezó cuando comenzamos a negociar con diversas distribuidoras de libros para que nuestra obra llegara a todas las librerías del país en el plazo más corto posible.
La primera que visitamos, *Galerna*, nos tuvo un mes y medio dando vueltas para finalmente negarse a distribuir el libro argumentando cuestiones menores y contradictorias **(2)**. La segunda, *Distal*, al igual que las demás visitadas, nos confesó que había una presión "importante" para que el libro no llegara a las librerías **(3)**, algo que nos había anticipado un editor llamado Andrés Paskowski, titular de la editorial *André Materon* semanas antes de tener que lidiar con las insistentes negativas.
Sin bajar los brazos, resignados a que nuestro libro no estuviera en librerías, decidimos buscar una distribuidora que nos garantizara al menos hacer llegar nuestra obra a puestos de diarios y se animara a tolerar cualquier tipo de presión, lo cual finalmente logramos con gran esfuerzo y confidencialidad.

El resultado podrá verse hoy jueves 6 de septiembre a las 19 hs. cuando el libro esté finalmente en la calle al alcance de todos ustedes. Allí, habremos vencido a los oscuros intereses contra los que peleamos hace tantos años.
Allí, mal que le pese a muchos, develaremos la trama real de una historia que compromete a funcionarios políticos y judiciales, periodistas, espías y organismos de inteligencia internacionales.
No es poco.

Christian Sanz y Fernando Paolella

(1) *El Cid Editor* supo adquirir enorme prestigio a fines de los años 70 y principio de los 80 por la valentía en la denuncia de sus libros.

(2) Galerna ya había transitado una exitosa experiencia gracias a la venta de otro libro de Christian Sanz llamado **"Maten al hijo del presidente"** , por lo cual no había motivo lógico para no aceptar un nuevo trato comercial con el mismo autor.

(3) En la conversación, que ha sido grabada, la palabra "importante" fue mencionada insistentemente y con sarcasmo por nuestro interlocutor.

-Anexo especial: El hecho maldito

Cuando se terminó de disipar la nube de amonal el lunes 18 de julio de 1994, muy pocos se atreverían a aventurar que luego se elevaría un cúmulo de sinrazones para que este acontecimiento jamás vea la luz de la verdad. Pues espurios intereses, bien definidos en la función de obturar cualquier análisis independiente, se movieron en las sombras y no tanto para que el cuento persa sea el único que figurara en las portadas. Y que toda investigación, proviniera donde proviniera, elevara a la inexistente camioneta bomba como piedra basal. Tal es el caso, que hace diez años, cuando salió el libro *AMIA, el atentado*, de Juan Salinas, el entonces abogado de la mutual judía Luís Dobniewsky se mostraba más que interesado que la misma figurara en él. No importa que esta no existiera, pues lo perentorio era inventarla a toda costa para focalizar la atención en una sola torna. Así, durante una década la corporación mediática nacional se alió con la superestructura jurídica y política para subirse a la *Traffic* virtual para desviar la atención y travestir dicho atentado mafioso como producto del sempiterno conflicto en Medio Oriente. Salvo honrosas excepciones, profusamente detalladas en sitios como *Diario sobre Diarios* y este, la mayoría del periodismo vernáculo siguió a rajatabla estos dictámenes para confluir de manera casi unánime que los verdaderos responsables llevaban turbante, oraban a Alá y sentaban sus reales en Teherán.
Esto se agravó luego del ataque aún no suficientemente aclarado del 11 de septiembre, que fue la excusa ideal para que el tambaleante gobierno de Bush junior emprendiera la segunda cruzada contra el nuevo *imperio del Mal* musulmán. A**rgentina no fue ajena a este delirio, pues un mes después la SIDE, en ese momento bajo la conducción de Miguel Ángel Toma, elabora un informe en el que englobaba todos los delirios y obsesiones tan caros a Washington y Tel Aviv**. En sus páginas, dignas de un alucinado mentiroso con mente febril, se desprende que el mentado atentado contra las Torres Gemelas había sido planeado por Bin Laden en la Triple Frontera, asiento también de la célula de *Hezbollah* que demolió la sede de la calle Pasteur, y sitio ideal para que los esbirros del extinto Saddam Hussein tramaran espantosas operaciones, armas de destrucción masiva incluidas.
Con todo este entramado, no es vano suponer que quienes se atrevieran a saltar el cerco para arribar a otra conclusión que no sea la oficial, tropezarían con unos cuantos escollos con nombre y apellido. Pues escudados en los poderes del Estado, aún cuando

hace tiempo hayan cesado en funciones puntuales dentro del mismo, siguieron digitando los hilos para que nunca se dilucidara lo ocultado detrás del muro de la impunidad.
Esto precisamente les ocurrió a quienes llevan adelante este sitio, acostumbrados a padecer los embates de una censura no tan encubierta. **En cuanto se decidieron a dar forma de libro los cuantiosos artículos sobre este tema puntual, los heraldos negros se les vinieron encima**. Hace casi dos años, un primer intento se vio obturado
Era evidente que molestaría a unos cuantos jetones, y además le mojaría la oreja a inconfensables intereses más allá de nuestras fronteras. Más precisamente, no había que remover el avispero levantando la polvareda al echar dudas sobre la supuesta responsabilidad del régimen teocrático iraní. Justamente cuando, luego del sonado fracaso en Irak, los halcones del Pentágono y su correlato israelí enfocan sus miras allí, con la excusa del supuesto deseo persa por fabricar armamento no convencional.

ALIMAÑA NEWS DESVELA EL COMPLOT CONTRA ROSA REGÁS

«El atractivo de ELLE es que nos entra por los ojos para acabar enseñándonos mucho más», dixit Rosa Regàs, como Directora. de la Biblioteca Nacional.

A este redactor-jefe no le ciega la pasión desbordante, que ha manifestado en alguna ocasión aquí mismo, por las iniciativas culturales de Rosa Regás en la Biblioteca Nacional, como el estreno del Hip-Jote , aquel musical rapero que se saltó con un par las leyes del pentagrama y de la rima -y de la prosa de Cervantes- para hacer accesible el Quijote a los analfabetos funcionales, privados de cualquier referente cultural.
Después de investigar concienzudamente, imparcial y desapasionadamente, afirmo que los culpables de su cese-dimisión son Menéndez Pelayo -que se la tenía jurada a Rosa Regás por querer desalojar su estatua y ponerla a la intemperie-, a pachas con Cervantes -que no supo encajar deportivamente cómo le habían dejado su Quijote-, y son ellos los autores de la campaña de desprestigio por el modo imaginativo que ha tenido Rosa Regás de gastar el presupuesto.
Fueron los compinches de Menéndez Pelayo y Cervantes quienes airearon que Rosa Regás contrataba por mil euros a charlatanes, desconocidos cual recién nacidos, como conferenciantes , y que se iban luego de cuchipanda, a cenar con cargo al erario público al Restaurante Nicolás; que tenía tres secretarias, mientras ella se dedicaba a atender sus compromisos crematísticos como tertuliana en la radio, publicitaria de revistas y literatura de kiosko, y guionista de una serie de TV, basada en su *Diario de una abuela de verano*, -en el que osadamente desvela que Barrabás fue crucificado con Jesús, cuando siempre habíamos creído que era Dimas, y que aquél fue el ladrón elegido por el pueblo para ser liberado por Poncio Pilatos- y lo del negociejo de 840.000 euros para digitalizar la Hemeroteca Nacional , con unos resultados técnicos y jurídicos algo sorprendentes -después de cargar un PDF de 2,10 MB se encuentra una reproducción que más parece una de aquellas fotocopias renegridas y borrachas de tinta de una

fotocopiadora antigua, y el sello "© Biblioteca Nacional" para estas obras libres de derechos de autor, que reivindica como suyas.
También hicieron público que Rosa Regás tiene ciertas manías, que le han hecho cambiar cinco veces de chófer para llevarla en el coche oficial con cargo al presupuesto, que rebasó y tuvo que pedir un crédito extraordinario, para costear, entre otras cosas, los actos culturales perpetrados a favor de la República: 232 millones de pesetas en *agit-prop* y *revival.*
Y lo que señala inequívocamente a los susodichos es el hecho de que quien ha sustraído los manuscritos ha entrado bajo las barbas de Menéndez Pelayo con un bisturí, ha salido con los manuscritos, y ha realizado las sustracciones en la Sala Cervantes. Adonde jamás asomó el morro ningún amigo ni lector de Rosa Regás, así es que la Guardia Civil que no busque por ahí.
Y ahora, que se echen a temblar don Marcelino, don Miguel, y sus secuaces: Rosa Regás ha dicho que va a volver a dedicarse a escribir.
Y a ver si la Guardia Civil mira en internet esta casa de subastas que ha vendido un mapa de Ptolomeo que se parece muchísimo al que buscan, y que da una descripción detallada de los daños y restauraciones que ha tenido, incluido el corte en los márgenes.
De nada.

"Hacía tres días, desde el martes 21, que Rosa Regàs conocía el hecho delictivo. Todo su empeño en ese tiempo había sido que no se enterase nadie, ni el ministro, ni la Prensa, ni las fuerzas y cuerpos de seguridad del Estado. Los profesionales de la BN no daban crédito a lo que estaba ocurriendo, pero tenían miedo. Rosa había sido vehemente al ordenar que no se produjese ninguna filtración.
Se había ido de fin de semana
Pero el viernes no se pudo contener por más tiempo el secretismo. Habían pasado 72 horas preciosas sin tomarse las medidas adecuadas.
Finalmente, el viernes por la mañana, la gerente de la Biblioteca Nacional, María Teresa Díez García, habló con la subsecretaria del Ministerio, María Dolores Carrión, para revelar la existencia del hurto, según fuentes de la BN. Inmediatamente se informó a César Antonio Molina, que asistía en Moncloa al Consejo de Ministros. El titular de Cultura llamó a Regàs para que le contase en persona lo sucedido, pero, sorprendentemente, ella ya no estaba en Madrid. Le respondió que se había ido a Gerona a pasar el fin de semana y que no podía acudir. Ni que decir tiene que el ministro la obligó a regresar de inmediato para informarle."

España sufre una plaga de ladrones y de encubridores (topillos de biblioteca).

¡Qué cara más dura!
Regás dice que sabe quién robó los mapas de la Biblioteca Nacional.
¿Por qué no lo denuncia? Porque si no lo hace está encubriendo a un ladrón.
¿O es ella misma? ¿Hay una epidemia de topillos bibliotecarios encubierta?
¡Esto sólo pasa en la España de Rodríguez!

EL ÚLTIMO ESCRITO

Esto no se publicará hasta que no haya muerto. Si fuera uno de mis relatos literarios, me comunicaría con los vivos desde el más allá, y en vez de transmitir esos mensajes entrecortados y algo pueriles de las psicofonías al uso, revelaría los arcanos de lo inmanente y lo contingente.

Pero escribo esto antes de saber ningún secreto que no sea fácilmente deducible para quien haya sabido vivir.

Sí, formé parte de los niños de Morelia, de las supervivientes de la guerra Civil española, y es todo cuanto diré de mí, porque creo que la verdad no significa gran cosa si no es para ejercer como notario. Los seres humanos mentimos siempre, en todo, y sin motivo. Y mentimos, sobre todo, cuando creemos ser veraces, porque ya no reconocemos la verdad, salvo en nuestras pesadillas.

Me contaron que mis padres murieron en aquel bombardeo, pero no lo recuerdo; sólo sé que cuando me rescataron de entre los escombros, estaba atrapada en el hueco protector de un armario, llevaba un abrigo que me venía grande, con el nombre y los dos apellidos bordados, y me aferraba a él, no dejé que me lo quitaran, y durante años fue una especie de talismán. No tengo ningún recuerdo anterior. Ahora no logro saber qué cosas sé porque las viví o porque me las contaron; pero si sé que me dejaron a la deriva con una "buena gente" con la que tuve que aprender a reservar siempre un trozo de pan, mi miedo, y mi debilidad para cuando los pudiera saborear sin peligro.

Y sobreviví a los desvelos de los benefactores en dos continentes y en varios países, a pesar del agua contaminada, de los guisos hechos con despojos de carne pútrida y cartilaginosa, de los golpes, de las caídas, del frío y del calor, de la violencia, de las enfermedades, del hambre, y, sobre todo, a pesar de su interés, del que yo me curaba con té de ruda y zoapatle cuando era preciso. Hasta que aprendí a manejar un arma, el instinto de supervivencia y mi cerebro en este orden. Y he sobrevivido hasta hoy para no contarlo, porque la queja debilita, y señala la vulnerabilidad que nos condena.

La primera vez que volví a España busqué a la familia a la que creía pertenecer, y supe que el nombre y los apellidos con los que había vivido no eran míos, como tampoco aquel único abrigo de mi infancia. Quizás se asustaron con el anuncio de mi visita, el caso es que me esperaron con la policía. Tal vez pensaron que yo iba a disputarles la herencia. Era "buena gente", de esa que no quiere líos, ni enfrentamientos, ni violencia, ni discusiones, ni complicaciones: es decir, perfectamente repugnantes. Y para quitarse incordios, me acusaron del saqueo de su casa, bombardeada durante la guerra, cuando yo tenía cuatro años, y como prueba aportaron la carta que les había enviado preguntándoles si sabían donde encontrar a mi familia, y la historia del abrigo con el nombre bordado, a la que jamás contestaron.

Para no tener que pasarme el resto de mi vida peleando con los agentes de la DGS española, y con los de inmigración en México, hice desaparecer aquel nombre y aquellos apellidos de mi vida. Y descubrí la libertad de ser *gachupina* en México, *terroni* en Italia, sefardita en España, *métèque* en Francia, y no sentirme extranjera en ningún sitio, porque llevo el estigma de los apátridas.

Cuando leáis esto, no estaré para deciros, una vez más, que el único crimen imperdonable es la necedad, la pereza mental, y la falta de valentía que obliga a pensar como todo el mundo. No estaré para deciros que no otorgo mi respeto a quien no se lo gane, y que sólo me enriquece quien no se contenta con lo obvio, no estaré para atacar a mis enemigos; pero no tendrán tregua.

No suspiréis con alivio por mi muerte, porque aquí no estoy sólo yo, y ése es mi triunfo: esta incapacidad para callar y pactar con la modorra y la ceguera es una planta borde que ha arraigado, y continuará extendiéndose para desesperación de los pazguatos, de los que tienen el ego de cristal de Bohemia, el superego amiantado, la honestidad intelectual inexistente, y ese malsano deseo de paz y concordia que sólo les permite solidarizarse con los que se dejan machacar y no con los insurgentes, que caracteriza a los que se autodenominan "buena gente", que es la fiel infantería de los

canallas*... ¡Ay de los tibios!...*

Y tiene su guasa que no me maten mis enemigos, sino la misma enfermedad hereditaria e incurable que ha extinguido a toda la familia de los que me acusaron de haber robado aquellos apellidos rimbombantes y el único abrigo que tuve en mi niñez.

Hasta para esto existen los finales con sorpresa.

COMUNICADO DE LOS CUATRO ESPAÑOLES DETENIDOS ILEGALMENTE EN MÉXICO

Publicado en Enlace zapatista

Somos cuatro personas de nacionalidad española que el pasado 5 de agosto del 2007 nos encontrábamos pasando por el centro de la ciudad de Oaxaca, en la calle Independencia, pasadas las 21:30, de repente nos vimos rodeado por elementos parapoliciales, algunos de ellos con armas de largo calibre, con uniforme azul oscuro y elementos de protección antibalística, dos de ellos, quiénes daban las órdenes, iban vestidos de civil: estos iban acompañados de unas pick-up blancas marca Nissan.
En ese instante, nos obligaron a ponernos de cara a la pared y con las manos en la cabeza a nosotros cuatro y a un chico mexicano, a pesar de la presencia de personas que se encontraban en la calle en ese momento.
Sin pedirnos identificaciones y explicación alguna nos obligaron a subirnos violentamente a una de las pick-up's.
Durante el trayecto les pedimos el por qué de este hecho, a lo que contestaban con golpes e insultos. Fue entonces cuando uno de nosotros les mostró su credencial de prensa. Seguidamente, nos obligaron a tirarnos, y nos taparon con una lona impidiendo todo contacto visual entre nosotros y estos, y entre los transeúntes.
Después del trayecto de unos diez minutos aproximadamente, llegamos a un espacio que parecía ser un cuartel en donde habían personas uniformadas de verde y azul. Al bajarnos de las camionetas nos encapucharon, y nos llevaron a rastras a una pared, adonde nos obligaron a arrodillarnos y nos despojaron de nuestras mochilas, cangureras, documentación y dinero.

Progresivamente, se nos llevaron de uno en uno a un cuarto oscuro y vacío. Una vez dentro nos empezaron a tomar fotos de frente y de perfil. A las tres chicas nos obligaron a permanecer de pie de cara a la pared y con las manos en la cabeza. Y a los chicos de rodillas y también de cara a la pared.
Durante este período de encierro algunos de nosotros recibimos golpes, humillaciones, insultos y amenazas, una de las chicas recibió agresiones sexuales y el chico mexicano fue obligado a realizar flexiones, mientras un grupo de agentes se reían de él y le amenazaban con "aplicarle el puñal". Así mismo, se acentúo el clima de terror psicológico al oír la carga de y descarga de armas, tenernos a oscuras en todo momento, tomándonos fotografías aleatoríamente, enfocándonos con unas linternas a la cara, dándonos empujones, etc.
Posteriormente, (al cabo de una hora aproximadamente) nos hicieron salir con las cabezas agachadas y nos separaron chicos y chicas. Nos subieron de nuevo a las pick-up, obligándonos a agachar nuevamente las cabezas.
En ningún momento nos dijeron donde estábamos y a donde nos llevaban. De ahí nos condujeron a otro lugar que parecía una comisaría, nos metieron a uno por uno a una dependencia donde nos tomaron nuestros datos personales, y nos preguntaron por nuestro estado de salud.
Paralelamente dos señores de civil con una libreta nos hicieron muchas preguntas sobre nuestra estancia en el país. Después se nos condujo a una sala con la juez calificadora, durante este tiempo oímos que se nos acusaba de escándalo publico, pero en ningún momento se nos comunico el motivo de nuestra detención, de que se nos acusaba, y no se nos permitió llamar, ni comunicarnos con el consulado español.
La juez nos dijo que estábamos indocumentados, y que se nos trasladaría a unas estancias de migración, nosotros replicamos que la policía nos había robado nuestra documentación, dinero y pertenencias, ante lo que se desentendió.
Posteriormente, a la una treinta, nos trasladaron de la comisaría a la estación migratoria del INM (Instituto Nacional de Migración de Oaxaca). Ahí les informamos de nuestro robo y les exigimos de comunicarnos con el Consulado Español. El lunes 6 de agosto prestamos declaración de los hechos, el martes 7 de agosto se nos traslado obligatoriamente con un vehículo oficial custodiado por la PFP (Policía Federal Preventiva), a la estación Migratoria del INM de la Ciudad de México, donde nos encontramos actualmente.
El miércoles 8 de agosto nos dirigimos custodiados al Consulado Español donde nos expidieron un nuevo pasaporte que no se nos ha entregado. Así es que desde el miércoles 8 de agosto a las cuatro de la tarde somos extranjeros documentados ilegales. Aún así, permanecemos privados de nuestra libertad y al día de hoy la autoridad competente no nos ha informado de nuestra situación.
Desde el centro de Internamiento INM de Ciudad e México (Iztapalapa):
Afirmamos la absoluta ilegalidad de nuestra privación de libertad, denunciamos la vulneración de nuestros derechos fundamentales por parte de las autoridades mexicanas, exigimos nuestra inmediata puesta en libertad y la devolución de nuestras pertenencias, así como que se depuren las pertinentes responsabilidades.

Éste es el tratamiento habitual que la policía mexicana dispensa arbitraria e indiscriminadamente a la población civil. Pero esta vez, los periódicos se han tomado la molestia de informar porque eran españoles. Cuando son mexicanos,

ni una línea.

CARTA DE ANTONIO BRÚ EN RELACIÓN A LAS NOTICIAS APARECIDAS RECIENTEMENTE

Madrid, 20 de Julio de 2007.

Universidad Complutense de Madrid

Ante las noticias que aparecen en los medios de comunicación el Sábado 23 de Junio y el Domingo 24 de Junio de 2007, respectivamente en el diario El Mundo, página S17, y El País Dominical, páginas 12-18,, quiero manifestar lo siguiente.
En los dos últimos años, el equipo encabezado por mí y la Universidad Complutense de Madrid hemos intentado presentar un ensayo clínico en varios hospitales de nuestro país. Lo hicimos primero en el Hospital Ramón y Cajal de Madrid hace dos años, y el resultado es el que ya conoce la opinión pública. Posteriormente lo hemos intentado en otros centros, y siempre nos hemos encontrado con una resistencia por parte del sector oncológico que lo ha imposibilitado. Por supuesto sin un solo argumento científico que avalase su postura. Aprovechando la aparición de la publicación de dos ensayos clínicos en Junio de 2006, uno en cáncer de próstata realizado por la Universidad de California y otro en tumores de cabeza y cuello por parte del Memorial Sloan Ketering Center (los artículos se pueden consultar pinchando en los nombres de los centros), que son completamente compatibles con nuestra propuesta terapéutica y que demuestran que no se dan los "graves" acontecimientos adversos que se hace creer, decidimos presentar la propuesta de realización de un ensayo clínico en la Fundación Puigvert de Barcelona. Desde hace un año hemos estado trabajando árduamente en la elaboración del protocolo y hemos intentado que se llevara a cabo dicha presentación de la manera más discreta posible, para que nada pudiera influir en su curso normal. Al fin y al cabo, intentábamos en cierto modo repetir los muy buenos resultados que un equipo de la Universidad de California obtuvo tratando 28 casos de pacientes con cáncer de próstata hormonorrefractario con un factor estimulante de colonias de granulocitos y macrófagos (GM-CSF). Nosotros lo haríamos con G-CSF (factor estimulante de colonias de granulocitos), por ser desde nuestro punto de vista más útil en el tratamiento antitumoral con menos efectos secundarios (en España no están actualmente autorizados los factores GM-CSF por parte de la Agencia Española del Medicamento por proporcionar más efectos secundarios que los producidos por los G-CSF). Tanto el ensayo presentado por la Universidad de California como por el Memorial Sloan Ketering Center representan unos resultados no sólo muy buenos y esperanzadores sino totalmente compatibles con la propuesta terapéutica que mi equipo defiende y propone. Estos resultados son sólo una parte de los cada vez mucho más numerosos resultados que van obteniendo diversos grupos en el panorama internacional que van dando día a día mucha más consistencia a nuestra propuesta terapéutica (la teoría en que se basa no está siendo discutida en absoluto en el mundo científico internacional, en contra de lo que unos pocos quieren decir aquí en España).
A pesar de dicha discreción, parece que el nivel de la misma no fue suficiente. El Ensayo pasó el primer CEIC en el mes de Mayo, y ya se nos presentaron 6 alegaciones mayores y ninguna menor, que fueron claramente contestadas. La decisión final sobre el ensayo que hemos presentado se iba a decidir el Viernes 29 de Junio en la Fundación Puigvert de Barcelona. Pues bien, justo el fin de semana anterior, y sin que hubiera ningún motivo especial que los fundamentara, después de estar muchos meses sin hacer ninguna aparición en ningún medio de comunicación prácticamente, y llevando varios meses fuera de España, de estancia en la Universidad de Oxford, aparecen en la prensa lo que yo entiendo que es la "contestación al ensayo clínico" exhibiendo algunos colectivos todo su "poderío informativo".

Por un lado en el diario El Mundo , página S17,edición impresa, del Sábado 23 de Junio, encabeza la página hablando de la "Revolución prostática" y "el extraño caso Brú". y el Domingo 24 de Junio de 2007, en El País Dominical, páginas 12-18, , aparece una entrevista con un oncólogo, José Ramón Germá, Director del Plan Estratégico del Instituto Catalán de Oncología.

En cuanto al diario El Mundo, y sin relación directa al tema que se planteaba en la página, aparece una coletilla (se supone que procede de la editorial al no ir firmada), sobre mi persona, y en la que se presentan argumentos completamente falsos: "anunció que tenía la forma de curar todos los tumores sólidos", "sólo dispone de datos farragosos e imprecisos obtenidos en pequeños experimentos con ratones y publicados en revistas de pequeño impacto", "los científicos critican la imprudencia de este científico por dar falsas esperanzas a pacientes y familiares". Quisiera manifestar que todos estos argumentos están en consonancia con la línea editorial de El Mundo, en la que se vierten argumentaciones falsas con el ánimo de descalificar al científico y a su línea de investigación, campaña que iniciaron ya hace dos años, y además siempre sin contrastar ni sin otorgar el derecho a réplica. Ni una sola vez anuncié o he dicho en ninguna ocasión que tuviera la forma de curar todos los tumores sólidos. La línea de investigación está muy bien fundamentada, todos los resultados están publicados en revistas científicas del Citaction Index, a excepción de uno relativo a un caso clínico, lo cual no le quita ninguna validez científica, ya que es una publicación científica. La revista de pequeño impacto a la que se refiere El Mundo se trata del Physical Review Letters, que es la revista de artículos de física de mayor impacto en todo el mundo (con un parámetro de impacto cercano a 8), y que es la publicación del Instituto Americano de Física (la institución científica más importante del mundo en cuanto al número de revistas científicas, artículos, asociaciones, premios Nobel, etc.). Por lo tanto, El Mundo vuelve a demostrar una total desinformación de sus periodistas y columnistas, que no hacen ni el pequeño esfuerzo de informarse mínimamente acerca de lo que escriben (si lo saben, entonces el asunto es mucho más grave). En cuanto a la voluntariedad e intereses que se defienden con este tipo de noticias prefiero no entrar a discutirlas puesto que son muy claros. Resulta igual de vano el intentar aportar datos o argumentos científicos que demuestren la falsedad de sus afirmaciones. Hace un año ya tuve que exponer en esta misma página web unas aclaraciones a una serie de informaciones falsas publicadas en El Mundo y a las que no se nos concedió el derecho a réplica en dicho diario. Y una y otra vez vuelven a publicar los mismos datos e informaciones falsas. Con estas actitudes no están buscando una auténtica crítica científica sino un acto de intento de ocultación y desprestigio de una línea de investigación.
En cuanto a que los científicos me han criticado, he de decir que es igualmente falsa dicha información. Me han criticado muy pocos científicos (y todos, por supuesto, solo españoles) (con lo que generalizar en el estamento cientifico constituye una falacia denominada de la generalidad), y en cambio me han apoyado y felicitado muchísimos más de los que me han criticado (y que por supuesto no salen en El Mundo). La prueba es el gran número de conferencias invitadas a universidades españolas y extranjeras a las que he asistido en tan sólo los dos últimos años, aparte del número de citas de mis trabajos en el Citation Index o los proyectos en los que participo así como las colaboraciones que llevo a cabo con instituciones científicas nacionales e internacionales.
Por otro lado, en el suplemento dominical de El País del 24 de Junio, aparece una entrevista con un oncólogo, José Ramón Germá, en las páginas 12-18. Quiero hacer constar que se trata del Director del Plan Estratégico del Instituto Catalán de Oncología. En dicha entrevista se hace un perfil de este señor, por parte de la redactora de El País, Milagros Pérez Oliva. Personalmente creo que la entrevista es muy mala por ambas partes. Del perfil personal que hace gala su entrevistado no diré nada, por dejar al lector que extraiga sus propias conclusiones. Creo que el artículo es lo suficientemente elocuente en cuanto a la personalidad de este señor y en cuanto al objetivo de la misma: "quiere vender su libro a toda costa". En cuanto a las alusiones personales, viniendo de quien vienen les voy a dar el mismo valor que le doy a la persona que las dice: ninguno. Pero en las graves acusaciones de que la propuesta terapéutica produce severas muertes "como él mismo sabe", he de decir que son de una irresponsabilidad

máxima. Si eso es así, espero que este señor las haya notificado a los servicios de fármaco-vigilancia y las haya informado científicamente de una manera conveniente y rigurosa. Si lo ha hecho, alguna autoridad sanitaria podría estar incurriendo en alguna dejación de funciones y de responsabilidades que constituirían un delito, ya que dicho tratamiento se permite para dos tipos de patologías por parte del Ministerio de Sanidad. Pero si por el contrario no lo ha hecho, la irresponsabilidad es de este señor, cuya afirmación puede ser y es causa de delito, es mucho mayor porque no se puede afirmar algo así si no se tiene denunciado en los organismos competentes. En cualquier caso, las afirmaciones de este señor son graves e irresponsables. Si consideramos el caso de que sean completamente falsas y este señor lo sepa (cosa que prefiero no creer), entonces la gravedad es mucho mayor.
Desde el punto de vista científico, el señor Germá demuestra no tener nada claro conceptos fundamentales de hematología, lo cual es bastante preocupante dada su condición de oncólogo. Es falso que el G-CSF provoca hiperviscosidad sanguínea, como fácilmente se puede demostrar. El Sr. Germà confunde hiperviscosidad con leucostasis, que es un fenómeno asociado a las leucemias (sobre todo agudas) y debido a las células cancerosas circulantes en cantidad abundante. Nunca los glóbulos blancos normales, del tipo granulocítico, independientemente de su número en circulación, han provocado ni hiperviscosidad ni leucostasis, como muy bien se encarga de aclarar la compañía que comercializa el medicamento G-CSF (Neupogen de Amgen) en la ficha técnica (aparte de muchos artículos de la literatura científica). La afirmación de que hay muertes asociadas a este tratamiento es especialmente grave porque nadie ha aportado pruebas que lo demuestre. Incluso en el hipotético caso de que ésto hubiera sido así, ésto habría ocurrido tras un uso incontrolado de una terapia experimental, en casos desesperados. Si un paciente se administra por su cuenta y riesgo una dosis elevada de cisplatino y fallece por la toxicidad (cosa que no ha ocurrido en un solo caso con el G-CSF), ¿diría el Sr. Germà que el tratamiento con cisplatino "no tiene base científica y además produce mortalidad"? ¿Diría de sí mismo que es un chalatán? Hablando del cisplatino, descubierto en 1965 por Barnett Rosenberg, y del que el Sr. Germà fue uno de los introductores en España: los investigadores del NCI inmediatamente intuyeron sus posibles aplicaciones anticancerosas. Pero los efectos secundarios severísimos de este metal pesado retrasaron su aplicación hasta que en Mayo de 1976 (11 años más tarde!!) Lawrence Einhorn informó de remisiones tumorales debidas al cisplatino en un congreso de la American Society of Clinical Oncology (ASCO).

A consecuencia de dicha entrevista sería interesante que los lectores y la propia redactora, haciendo un ejercicio imprescindible de periodista, se preguntasen por qué no se ha realizado ningún ensayo clínico. Sería bueno que alguien se preguntase si existe alguna relación con la ausencia de una todopoderosa multinacional farmacéutica financiando dicho ensayo. En cuanto a la afirmación de la redactora que me hago víctima del sistema médico, quisiera decirle que de un periódico que he considerado y considero serio como El País, esperaba que todos sus redactores informasen objetivamente y, sobre todo, contrastasen su información. El País no me ha hecho nunca ninguna entrevista ni prácticamente ha publicado ninguna noticia relacionada conmigo, ni tampoco ha estado nunca en ninguna de mis conferencias, con lo que no me parece que puedan tener una idea propia de un tema del que intentan informar a la sociedad, por lo que les invito a conocer nuestras investigaciones, de una manera seria y más objetiva. Cuando la redactora afirma que "En cambio él se presenta como una víctima del sistema médico establecido", he de contestar que jamás me he presentado como una víctima y menos del sistema médico. En mi equipo y en mi investigación figuran muchos médicos de muchas especialidades diferentes. Sí es cierto que existe un boicot del colectivo oncológico español (sólo español), y de unos pocos más. Pero ahí no tengo nada que demostrar porque hay suficientes congresos (Congreso de Benavente de

la AECC de Septiembre de 2006 por ejemplo) y demás actividades de debate (programas de debate en medios de comunicación por ejemplo) en que asociaciones de dichos especialistas y de la Asociación Española contra el Cáncer (en teoría asociación de pacientes cuyo objetivo prioritario debería ser el interés de los pacientes y por lo tanto interesarse por cualquier línea de investigación que pueda ayudar en ese sentido) me han boicoteado presentándome como "esotérico", por poner algún que otro ejemplo, aparte de las notas de prensa que ambas instituciones han hecho públicas expresando su opinión referente a mí y a mi línea de investigación. A la redactora, que desde mi punto de vista no exhibe ninguna cualidad periodística en esta entrevista, podrían sugerírsele muchas preguntas que hubieran dado algo de calidad a su reportaje, tales como por ejemplo, y tratándose de un alma como la de este señor totalmemente dedicada a la ciencia, la investigación y el bien público, haberle preguntado si para tan "sacrificada" tarea tiene algún tipo de incentivo. Es cierto también que hemos recibido muchas represalias por parte de algunos miembros de estos colectivos, algunas de las cuales, como bien dicta un juez, han sido constitutivas de delito. Por otro lado, tanto intento de hacernos parecer seudocientífcos (sobre todo cuando no proceden de científicos) sólo tiene la absurda intención de negar lo evidente. Eso sí, corriendo el riesgo de confundir a la opinión pública. Si somos lo que dicen que somos, ¿no hubiera sido mucho más fácil, en cualquiera de las conferencias que he dado por toda España y en los congresos en lo que he intervenido, en cualquiera de los congresos en que me han vetado, en cualquiera de las reuniones y programas en los que también me han vetado, no haberlo hecho y con luz y taquígrafos haberme "desenmascarado"? ¿ Cuánta gente ha estado en una conferencia mía, totalmente callada, y después ha aprovechado una columna de un periódico o cualquier otro medio, para de una manera más cobarde exponer una serie de críticas, dudas, quejas, descalificaciones infundadas y en algunos casos insultos, cuando no lo hizo públicamente y a la cara, para poder intercambiar opiniones y no aprovechando que no habría réplica?
En cualquier caso, quisiera explicar a la comunidad científica y a la opinión pública cuál era la intención de esas dos noticias, en apariencia "inocentes". En El País aparece un oncólogo, justamente de Barcelona. Por otro lado, El Mundo, encabeza la página hablando de la revolución prostática y el extraño caso Brú, Qué curioso, verdad? Próstata, caso Brú y Barcelona. Para nosotros, fue la contestación a nuestro ensayo, por supuesto, posteriormente denegado por no tener "suficiente información en modelos animales". Lamentablemente en Estados Unidos ya hay ensayos en pacientes y aquí en España continuamos poniendo ese tipo de argumentos, buscando la experimentación animal. Será eso de lo que se habla cuando se dice que llevamos varias decenas de años de retraso con respecto a los países adelantados? En realidad se trataba de buscar cualquier excusa para denegarlo.
Por supuesto, en el terreno de la investigación también estamos sufriendo dicho boicot. Hemos presentado este año dos propuestas de proyectos. Uno a la Fundación Mútua Madrileña y otros al Fondo de Investigaciones Sanitarias del Ministerio de Sanidad. En ambos proyectos proponíamos el desarrollo del estudio de la respuesta inmunológica en modelos animales y experimentación in vitro. En ambos proyectos iban investigadores de la Universidad de California, de la Universidad de Oxford, del Imperial College de Londres, de la Universidad Complutense de Madrid y de varios hospitales españoles. Ambos han sido denegados. Del de la Mútua Madrileña no conocemos los motivos porque sólo notifican el fallo final. Del proyecto presentado al Ministerio de Sanidad (y que se puede ver pinchando, aquí) no se da ninguna razón científica y se alegan una serie de motivos que más tienen que ver con una de las noticias aparecidas en El Mundo (de nulo nivel científico o informativo), que un informe realizado por una comisión técnica que juzga un proyecto (en este caso es la Agencia Nacional de Evaluación de Proyectos (ANEP)). Es anecdótico la similitud entre este informe técnico y cualquiera de las noticias aparecidas en dicho diario los últimos dos años. Me surge una pregunta que

no me atrevo a responder: ¿tendrán los periodistas de El Mundo el nivel científico de algún que otro evaludor de la ANEP o será que ciertos evaluadores de la ANEP tienen el nivel científico de los periodistas de El Mundo? Yo creo que sobran las palabras. Será ésta la razón por la que en España absolutamente todo el mundo asumimos que para hacer un trabajo realmente innovador hay que irse al extranjero? Da pena que en un país se llegue a tener dicha conciencia de un hecho que invalida su propio sistema. Pero si se piensa en todos los científicos españoles de prestigio internacional, todos, absolutamente todos, han desarrollado el trabajo motivo de dicho prestigio en tierras extranjeras, ¿es que nadie se pregunta que si eso ocurre es porque nuestro sistema no funciona? Al no preguntárselo nadie, tampoco se toman las medidas necesarias. Y esto no quiere decir que no haya instituciones o científicos que no sean de primera clase en nuestro país. Pero en ellas los científicos se suelen encontrar completamente aislados, y dichas instituciones se insertan en un sistema ineficaz.
No estoy denunciando ninguna situación que desgraciadamente no se haya producido numerosísimas veces en la historia. Ante un nuevo planteamiento, se produce la conjura de los necios. Si es posible, hay que aguantar el tirón, porque tratándose de ciencia es muy difícil ocultar la verdad durante mucho tiempo.
El trabajo que hemos realizado estos dos años intentando presentar un ensayo clínico ha sido muy grande y sacrificado. Al final hemos conseguido presentar dos protocolos, sin éxito, lamentablemente tanto para nosotros como para la sociedad española y la comunidad científica. Ante la postura de ciertos colectivos, anuncio que mi equipo ya no hará ninguna presentación más en España de ningún protocolo de ensayo clínico, así como que a partir de ahora nos dedicaremos sólo a la investigación básica. La responsabilidad clínica la debe asumir quien la tiene. No podemos asumir unas tareas para las que no tenemos EL PODER suficiente y que iría a encubrir una dejación de responsabilidades de quien realmente las tiene. Mi equipo ha hecho un auténtico ejercicio de responsabilidad científica, humana y ciudadana aclarando y atendiendo a cualquier persona o médico las dudas que pudiera tener en algún aspecto relacionado con la investigación. Hemos sido el equipo de investigación más asequible para todo el mundo, para cualquier persona o científico. Nadie nos ha podido exigir absolutamente nada en ningún momento, pero aún así, a partir de ahora, y tras el enorme esfuerzo y desgaste sufrido, nos dedicaremos sólo a la investigación básica en España. Sólo demostrando la completa validez y viabilidad de nuestra línea de investigación en el panorama científico internacional, será posible aplicar los posibles beneficios a la sociedad española. A los ciudadanos pacientes y familiares de pacientes les sugerimos que sus dudas y quejas las dirijan a la Sociedad Española de Oncología Médica (SEOM), a la Asociación Española contra el Cáncer (AECC) y al Ministerio de Sanidad.
Mi equipo y yo mismo vamos a continuar investigando y desarrollando nuestra línea de investigación en la medida de nuestras posibilidades. En el último año hemos obtenido resultados muy buenos y esperanzadores que irán apareciendo los próximos meses en las revistas científicas pertinentes. Continuamos estando firmemente convencidos de que la opción científica con más posibilidades de enfrentarse al cáncer con éxito algún día es la que se basa en la respuesta del sistema inmunológico innato, que es la que defendemos desde un punto de vista científico. Agradeceré a todo aquel ciudadano que quiera apoyar nuestro proyecto de investigación que lo haga de la única manera efectiva: la económica, permitiéndonos continuar investigando en una línea cada vez más consolidada internacionalmente. Y la única manera de hacerlo es por medio de la Fundación General de la Universidad Complutense que dispone de una cuenta abierta para ayudar a financiar nuestro proyecto. Sé que esta cuenta es motivo de duros ataques por todos aquellos que quieren que dejemos de investigar y que para ello necesitan que no tengamos ningún tipo de presupuesto que nos permita continuar haciéndolo. Pero por el momento supone la única vía para continuar trabajando hasta que consigamos fuentes de financiación fuera de nuestro país. Este tipo de financiación

lo emplean muchas instituciones en España (por ejemplo veáse la página web del Centro Nacional de Investigaciones Oncológicas) y muchos grupos de investigación en nuestro país. Realmente es el método de financiación que te hace totalmente libre para investigar, lejos del mundo de amiguismos, animadversiones y boicots. Mientras que una parte de la ciudadanía confíe y quiera que investiguemos, eso es lo único que no pueden quitarnos. A aquellos que confíen en nosotros y en nuestra línea, les agradeceré que nos ayuden a financiar la investigación, porque es el único camino para terminar de demostrarla, esperando a la realización fuera de nuestro país de ensayos clínicos que la confirmen y desarrollen clínicamente.

La única verdad es que estamos sufriendo una campaña de desprestigio y boicot por parte del colectivo oncológico español (y unos pocos más), una campaña de desprestigio por parte de unos pocos medios de comunicación en los que tienen bastante influencia y que hemos sido objeto de acciones constitutivas de delito, como bien dictaminan sentencias firmes de un juez. Ellos tienen el poder y nosotros sólo un trabajo al que no se atreven a rebatir o desmentir cientificamente porque no pueden ofrecer absolutamente ningún argumento científico mínimamente defendible. No existe ninguna razón para querer ignorar si el sistema inmunológico innato desempeña algún papel en la lucha contra el cáncer. Sin lugar a dudas, hay que investigar más en esta dirección. En el único campo que tenemos fuerza es en el científico ya que no contamos con grandes y poderosas organizaciones, ni altos cargos, ni dinero ni medios de comunicación. Tan sólo me gustaría decir que me resulta completamente inexplicable que no se investigue absolutamente cualquier línea que pueda ofrecer un mayor conocimiento y posibilidad de resolución de un problema que, en nuestro país, se cobra la vida de 100 000 personas al año. Menos mal que oncólogos de otros países, que son los que tienen que desarrollar clínicamente esta propuesta terapéutica, sí piensan que nuestra interpretación no es "esoterismo" y que sí hay que investigarlo.

Parece mentira que en un mundo plagado de productos "milagro" cuya comercialización se permite sin que hubieran pasado ensayos clínicos de ninguna especie se cierren las puertas a desarrollos prometedores que lo único que quieren es demostrar su valor.

¿Y entonces qué se haría con toda la parafernalia económica y humana que mueve la radioterapia y la quimioterapia?
Miles de profesionales quedarían en la calle, hospitales enteros en desuso, y miles de millones en medicamentos a la basura.
La medicina es un negocio al que hay que alimentar, y no es extraño que algunas investigaciones sean calificadas como esotéricas.
Es la primera vez que en España y en el mes de Agosto el Mundo no anuncia a bombo y platillo un remedio milagroso contra la diabetes. Si no fuera por lo patético del asunto, daría risa.

En un país de analfabetos en ciencia no es extraño constatar que pasen este tipo de cosas. El estudiante odia las matemáticas, el ciudadano medio no entiende nada de ciencia, el periodista confunde astronomía con astrología y el intelectual presume de saber sólo de letras y arte y no se avergüenza de no saber ni patata de ciencia.

Y puesto que los sucesivos gobiernos que los españoles hemos tenido que padecer durante los últimos años no pondrán jamás los medios necesarios para solucionar esta horrible situación seguiremos en esta línea por tiempo indefinido.

La cosa es mucho más grave de lo que puede pensarse en principio.

Nos encontramos ante un panorama en el que alguna o algunas multinacionales farmacéuticas hacen uso de su inmenso poder económico para desacreditar a este brillante científico español. Desean recuperar (con beneficios) las enormes cifras de inversión que manejaron y manejan en el estudio y producción de medicinas anticáncer. Y como las multinacionales farmacéuticas no están, en contra de lo que ingenuamente mucha gente cree todavía, para curar personas sino para ganar dinero, tratan de convencernos a especialistas y profanos de que la curación del cáncer pasaba por la instauración de una terapia individualizada para cada caso clínico. Esto multiplicaría por

infinito la ventas de medicinas estudiadas y producidas específicamente para estructuras genéticas particulares y procesos de enfermedad individualizados. Naturalmente ninguna de estas medicinas debería curar el cáncer de manera demasiado eficiente, o todo el negocio se vendría abajo.

Pero he aquí, que un científico español el Profesor Antonio Brú, que posee una carrera profesional plagada de premios, reconocimientos y prestigio internacionales, ha realizado un estudio brillante y pormenorizado de la forma real en que crecen los tumores. Todos los tumores.
Y ha llegado a conclusiones científicas universales que aplicadas con inteligencia en el diseño de nuevas terapias contra esta horrorosa enfermedad permiten , no paliar, sino curar un elevadísimo numero de tumores malignos sólidos.
Y la terapia diseñada por él y su equipo, lejos de requerir costosas investigaciones individualizadas, que luego han de reflejarse necesariamente en el precio de las medicinas usadas, sirve para curar casi todos los tipos de cáncer.
Es más, la medicina que debe utilizarse en estas terapias está ya en el mercado, por lo que no es necesario inventar nada nuevo.

Es fácil comprender el enorme impacto y la enorme preocupación que esta noticia puede haber tenido en algunas de las compañías farmacéuticas más poderosas vinculadas a estos estudios. O mejor dicho en las personas que las dirigen, que tienen nombre y apellidos.
Y resulta también dramático y descorazonador comprender el nulo interés que tienen estas personas en trabajar en beneficio de la gente enferma, la falta de compasión que demuestran por la especie humana y los ruines y despiadados instintos que funcionan en sus putrefactas mentalidades de “hombres de negocios” permitiendo el sufrimiento y la muerte de millones de personas e impidiendo su curación por el simple hecho de mantener limpia su cuenta de resultados.
Y pone los pelos de punta saber hasta donde pueden llegar y hasta donde pueden controlar a científicos, médicos, periodistas y políticos corruptos para que estos actúen como marionetas a sus órdenes, y que sean ellos quienes se encarguen de generar falsas informaciones, desprestigiar a personas honradas y crear presiones sobre colectivos, asociaciones, hospitales e instituciones oficiales que echen por tierra estas importantísimas conclusiones científicas que permitirían salvar miles de vidas. Se trata de “parar” cualquier iniciativa para que estos descubrimientos salgan a la luz.

Por otro lado, el periodista se conforma con las declaraciones efectuadas por los responsables de instituciones oficiales, muchos de ellos con intereses claros, y no se preocupa de indagar a fondo que hay de verdad y de falsedad en esas informaciones, sin comprender o no querer comprender a que se debe esa campaña de acoso y derribo llevada a cabo contra el científico.

Y que decir de algunos oncólogos españoles. Niegan los evidentes resultados de una investigación científica realizada con todas las garantías de seriedad científica necesarias, por dos hechos concretos: primero el Profesor Brú es un físico no un médico o un biólogo y eso causa mucha sorpresa y mucha envidia por parte de algunos de este colectivo, le consideran un intruso y no se dan cuenta los pobres que el estudio multidisciplinar es en materia de ciencia un modelo hoy en constante auge. Segundo los estudios del Dr. Brú se apoyan en modelos y desarrollos matemáticos que la mayoría de oncólogos o biólogos no están capacitados para entender. Es por esto que no pueden dirigirse a las prestigiosas revistas científicas internacionales donde están publicados estos estudios, leerlos y comprenderlos. Así resulta más sencillo (y también más ridículo) negar la mayor. Es increíble hasta donde puede llegar la miseria humana.

Hasta cuando se permitirá que muera gente inocente por la codicia de unos criminales y de sus miserables y corruptos esbirros. Y quien será el responsable de todo ello. Cuando tomarán las autoridades cartas en el asunto y apoyarán a la ciencia generada en España y hecha por científicos españoles.

Tarde o temprano las investigaciones y resultados del Profesor Bru y de su equipo saldrán a la luz. Será entonces el momento para sacar los colores a más de algún "ilustre" especialista o directivo de algún dudoso medio de comunicación. De exigir su inmediata dimisión y de estudiar, por qué no, las posibles consecuencias jurídicas y penales que tuvieron sus declaraciones, sus interesadas decisiones y sus actos.

Comunicado de Antonio Brú a la opinión pública
Ante la expectación creada por la noticia de la publicación del artículo Regulation of neutrophilia by granulocyte colony-stimulating factor: a new cancer therapy that reversed a case of terminal hepatocarcinoma en la revista Journal of Clinical Research, quiero manifestar que:

1) El tratamiento propuesto se halla en fase experimental, siendo necesaria una experimentación mucho más amplia para validarlo.

2) Por tanto, en este momento no existe un protocolo de tratamiento que permita aplicarlo de forma generalizada.

3) Ante la imposibilidad de contestar a todas las llamadas recibidas en la Universidad Complutense de Madrid, y teniendo en cuenta el trastorno que produce en la actividad normal docente e investigadora, se ruega dirigir las consultas deseadas a la siguiente dirección de correo electrónico: bru@mat.ucm.es.

Evolución genética de los tumores por su dinámica de crecimiento
Un estudio dirigido por la Universidad Complutense de Madrid y el Hospital La Paz de Madrid identifica una proteína de elevada expresión en células en el borde tumoral que puede jugar un papel de enorme importancia en la evolución de los tumores y su potencial invasivo.

¿TEMAS TABÚ? DIEZ DENUNCIAS EMBLEMÁTICAS SIN RESPUESTA

Sería interesante que alguien se animara a investigar...
1) Adónde radica el poder de la diputada nacional y presidenta de la comisión de Acusación del *Consejo de la Magistratura*, Diana Conti , sostenida por el oficialismo a

pesar de sus oscuros antecedentes y sus disparatados proyectos de ley.
Por caso, hace unos años un ex empleado llamado Bruno Bimbi la denunció por extorsión al retener parte de su sueldo como asesor en el senado de la Nación. El número de expediente es el 25.243/05.
Al mismo tiempo, Conti es una de las más insistentes promotoras de la despenalización de las drogas, a punto tal de haber presentado un proyecto de ley al respecto totalmente disparatado. La insistencia en este punto es llamativa, especialmente por el hecho de que su hija ha sido detenida en más de una oportunidad en posesión de estupefacientes.
No hay dudas de que el narcotráfico esta detrás de esta movida para legalizar el consumo. Ya lo vivimos cuando Alfredo Yabrán pagó a los legisladores nacionales para que se votaran leyes que le permitieran mover la droga sin intervención de la policía (Por caso, el 23 de agosto de 1995).
2) A la estigmatizada "trucha" Martha Rosenberg quien, mostrando tener supuestas heridas de Jesús en su cuerpo y asegurando tener poderes paranormales, ha estafado a mucha gente afirmando que podía resolver problemas de todo tipo, incluso de salud. En ese marco, ha llegado a recaudar miles y miles de pesos diarios a cambio de nada, ya que ninguna de las personas que "atendió" mejoró en absoluto.
Rosenberg ha sido designada en la Comisión Nacional de Energía Atómica (CNEA) de la mano del Responsable financiero de la Gerencia General, Victor Tambussi.
La "estigmatizada" cobra un sueldo que asciende a $ 6.000 por mes a cambio de "sacar los males" de la CNEA y "atender" al presidente de la institución. Asimismo, tiene la enorme responsabilidad de decirle al Gerente General de la institución, Rubén Calabrese, qué empleados son leales o no a su persona.
Lo más increíble de todo es que el elevado sueldo de Rosenberg es abonado con dinero del Estado.
3) Al embajador Argentino en España, Carlos Bettini , un oscuro personaje que el kirchnerismo sostiene de manera inentendible. Recordemos que Bettini fue asesor en el Ministerio de Justicia de los incombustibles ministros menemistas Jorge Maiorano, Rodolfo Barra y Elias Jassán. Luego pasó a ejercer la jefatura de gabinete del entonces Procurador General de la Nación, Nicolás Becerra, hasta su retiro en febrero de 2004.
A través de sus continuos cargos políticos ha hecho negocios de todo tipo y se ha enriquecido ilícitamente**.** Por caso, en su momento intentó sobornar a Patricia Bullrich en el marco de ciertas licitaciones para remodelar o construir prisiones en Argentina, operando en nombre de *Dycassa*, empresa española interesada en los contratos con el gobierno nacional, algo que nada tenía que ver con su cargo junto al entonces procurados General Nicolás Becerra.
Como si fuera poco, ha sido acusado de ingresar cocaína a España a través de valijas diplomáticas y es uno de los sospechados por el envío de droga a ese país a través de la firma aérea *Southern Winds*. No es menor el hecho de que las valijas con estupefacientes tuvieran una etiqueta de la *"Embajada Argentina"*.
4) A Luis Vivona, candidato a intendente del partido de Malvinas Argentinas por el *Frente para la Victoria* e investigado en los años 1998, 1999 y 2000 por su participación en la distribución y comercialización de drogas.
Pocos saben que Vivona tiene como parte de su entorno a una banda de forajidos conocidos como los "hermanos Vila", ex policías que fueron exonerados por distintos delitos: robo de automotores, robos calificados y otros. Por si fuera poco, su hijo -German Vivona - fue detenido por personal de la comisaría 3º de la localidad de San Miguel por posesión de cocaína y marihuana y a una mujer conocida como "Suny" que trabaja para él le fue allanado su domicilio en la calle Pasco 4550 de la localidad de Pablo Nogués y le fueron secuestrados 350 gramos de cocaína.
5) La mega autopista que se está haciendo en Río Gallegos, digna de una ciudad de 2 millones de habitantes a pesar de tener apenas 98.000 almas.

Esta obra -que consta de 8 o 10 carriles, con puentes peatonales, puentes de entrada y salida al aeropuerto, etc- va a tener 29 kms de longitud cuando esté finalizada y, según dichos oficiales es para "descongestionar el trafico desde la ciudad al aeropuerto", situado a 7 kms del casco urbano.
A ese respecto, es dable destacar que al aeropuerto llegan sólo dos vuelos diarios (¡!) y no circulan más de 60 autos por la ruta. ¿Quién lleva adelante la construcción? La firma *Austral*, perteneciente al "testaferro K", Lázaro Baez , extensamente denunciado a través de estas virtuales páginas.
"Aquí no hay obra que no sea de *Petersen Tiav, Austral construcciones y Gotti hnos*, todas empresas laderas de nuestro K, la caja recaudadora funciona a pleno, van a asfaltar hasta las entradas a las estancias que han comprado (…) parece ser que la represa del Río Santa Cruz va a tapar toda esa tierra y ellos muy eficazmente han comprado todas esas estancias para cuando queden bajo agua autoidemnizarse", dijo a este periodista una calificada fuente de Río Gallegos.
6) La compra de un porcentaje de YPF por parte del banquero Enrique Eskenazi , ampliamente e históricamente beneficiado por el kirchnerismo y mencionado por fuentes santacruceñas como testaferro del mismísimo presidente de la Nación.
Es raro que a Eskenazi se le permita desembolsar entre 300 millones y 500 millones de dólares de un activo que vale no menos de 3000 millones. Hay varias aristas insólitas en este tema, como por ejemplo que el primer mandatario no caiga en la cuenta de que dicho banquero ha sido "amigo" (obviamente por conveniencia) de personajes oscuros como Carlos Corach y Elías Jassan (ambos, recordemos, títeres del narcolavador Alfredo Yabrán).
Socio del hijo del ex coronel y traficante internacional de armas, Diego Palleros, Eskenazi maneja negocios que no resistirían el menor análisis. No sólo en lo referido a la compra de los bancos de San Juan y Santa Cruz, sino en lo concerniente a la obra pública de Santa Cruz.
7) Se acercan las elecciones nacionales y el kirchnerismo se apura a "hacer caja" para poder llevar adelante una campaña que, más allá de las erogaciones oficiales, no estará exenta de las "operaciones" de siempre, ya sea contra sus enemigos políticos, ya sea contra el periodismo crítico.
Parte de ese dinero ha salido de la obra pública de Santa Cruz, la cual asciende en lo que va del año a la friolera de … ¡444 millones de pesos!
Dicho monto, récord total en lo que a presupuesto se refiere, equivale al 30% de lo invertido en ese rubro en todo el país. Este desvío de dinero hay que agradecérselo al titular de Vialidad: Nelson Periotti, ex intendente de Río Turbio y hombre de extrema confianza de Julio De Vido. ¿Coincidencia? Poco probable.
Todo es tan obvio que, amén de que el ministro de Planificación Federal se encuentra detrás de este tipo de movidas, los contratados para la obra pública son siempre los mismos: empresas de la talla de *Gotti, Austral* y *Contreras Hermanos* son las "coincidentes" vencedoras en los pliegos de cada día. Detrás se encuentran los "testaferros" de siempre, con Lázaro Báez a la cabeza.
¿Tan complicado es desnudar algo tan obvio? Por caso, una de las empresas que aparece en todas las licitaciones, BTU, es señalada como perteneciente a De Vido a través de terceras personas. Cruzando nombres, fechas y datos se puede comprobar casi puntualmente que es así. ¿Por qué nadie se anima a decirlo?
Algún día los medios de comunicación tendrán que dar explicaciones por no poner el foco sobre el despojo que este Gobierno está efectuando en pos de perpetuarse en el poder.
8) Las irregularidades que acontecen a diario en la Aduana Nacional, de las cuales no es ajeno el director de esa dependencia, Ricardo Echegaray. Contrabando, descontrol y hasta narcotráfico son moneda corriente en ese lugar, frente al desconocimiento general.

Echegaray, tristemente célebre por haber desmantelado todos los controles de la Aduana no bien asumió, mantiene una especie de “sociedad” con el ex chofer de Néstor Kirchner, Rudy Ulloa Igor, a través de la cual se hacen negocios de toda índole. ¿Sabe esto el Presidente de la Nación? Claro que sí.
Como botón de muestra, podemos mencionar el sistema de coimas ideado y controlado por la subdirectora General de Control de la Aduana, Silvina Tirabassi, extremadamente “cercana” a Echegaray, a través del cual se tributan menos derechos al fisco al adulterar en ciertos puntos de control el volumen de gas ingresado al país, lo cual genera un importante excedente de dinero.
Según un alto funcionario de esa dependencia, el dinero de esa coima sería llevado personalmente por Echegaray a las oficinas de Carlos Kirchner, primo del Presidente. Recordemos que hace poco el “primo presidencial” fue desplazado de los despachos oficiales ante las sucesivas denuncias recibidas por haber sido señalado como uno de los "cajeros oficiales".
9) La oscura adjudicación del mantenimiento del sistema de alumbrado público de Quilmes a una UTE formada por EDESUR y Mor por parte del intendente Sergio Villordo. Mor es una empresa de Quilmes integrada por la familia Mortier que apoyó económicamente a la campaña preelectoral de Villordo, pollo de Aníbal Fernández. Para entender el peso de esta familia, baste decir que varios de sus integrantes han ocupado diferentes cargos públicos. Por caso, Stella Maris Mortier ha sido nombrada en el estratégico Comfer.
Más allá de esto, existe una denuncia por incumplimiento de las reglamentaciones del ENRE por parte de esta UTE que ha sido presentada por un particular y a la que nadie le dio bolilla. *“Como no se tiene acceso al contrato, para saber los costos utilicé una argucia que es pedírselo a EDESUR ya que esta obligada por el decreto 1172 de acceso a la información publica. Nunca contestaron, tampoco el organismo que debe monitorear el cumplimiento ni la Dra Ohyanarte a la que le he enviado una carta por las constantes desplantes de la funcionaria que regentea el organismo y el enlace ante el Ministerio de Infraestructura”*, comentó a este periódico el autor de la denuncia de marras.
De acuerdo a lo señalado, está demostrado entre otras cosas, que la manera en que se reparan las luminarias quilmeñas contraviene la seguridad eléctrica y pone en riesgo la integridad de los habitantes de esa zona del conurbano.
10) Los diversos presupuestos para el mantenimiento del material tractivo y rodante de los trenes de pasajeros que pertenecen a la Unidad Ejecutora Programa Ferroviario Provincial U.E.P.F.P de la provincia de Buenos Aires, como también los 1.575 Km de vías en manos de empresas privadas que cruzan toda la provincia de Buenos Aires, desde sus estaciones cabeceras en Capital Federal, como son Retiro, Constitución y Once y sus terminales en la Provincia de la Pampa (Gral. Pico y Toay).
Los sobreprecios están a la orden del día y los responsables han rubricados sus firmas allí, por lo cual no es nada complicado echar luz a la cuestión. Estos corredores ferroviarios, que fueron verdadero orgullo de los argentinos -dando vida a centenares de pueblo de campaña en intercambio social u económico desde y hacia la capital- han desaparecido en su mayoría por negligencia de las empresas concesionarias.
A su vez ayuda el hecho de que a ningún candidato a gobernador de la provincia le interesa incorporar este tema como de interés dentro de su plataforma política.

¿DEFENSA DE LAS MUJERES O INDUCCIÓN AL MIEDO?

Continuación de "Haciendo amigos"

Las muertes violentas de mujeres a manos de sus compañeros, tipificadas como "homicidio" o "asesinato", son, aproximadamente, el 5% del total de asesinatos que se cometen en España. Gran parte del 95% restante, que no recibe el machaqueo informativo, sino una discretísima atención, se debe a la multinacional del crimen organizado, (narcotráfico, prostitución, pornografía con menores, etc), que en España tiene un paraíso de impunidad, según la Interpol y los organismos de control de las prácticas bancarias que señalan que el blanqueo de dinero en España es superior al dinero de curso legal.
Y de ese 5% de mujeres asesinadas por sus parejas, 70 en el año 2006, habría que establecer el porcentaje en relación con el número de mujeres emparejadas en España, que se acerca a los doce millones, por lo que el riesgo de ser asesinada por el compañero es tan bajo como la posibilidad de sufrir una de las llamadas "enfermedades raras", que no obtienen atención, recursos e investigación de la Sanidad pública por ser de escasa incidencia. Por el contrario, la "violencia de género" cuenta con un presupuesto, medidas que implican a varios ministerios, hay cientos de especialistas contratados para buscar soluciones a un problema que se considera de primera magnitud, y no lo es.
Y cuando se bombardea con campañas desaforadas hay que desconfiar de lo que se oculta debajo, que suele ser bastante sospechoso.
Las mujeres de nuestra época nos atrevimos a vivir, hacer auto-stop, salir de noche, y asumíamos riesgos, mientras que, actualmente, las jóvenes viven en una especie de estado de excepción, sintiéndose en peligro e identificando a los hombres como agresores, porque se informa profusamente de todos los sucesos en los que la víctima sea una mujer, siempre y cuando no sea parte de la estadística de muertes en accidente laboral (1.352 muertos en 2006: 6'3 muertos por accidente laboral por cada 100.000 trabajadores)
¿A quién le interesa que no haya mujeres sin miedo, sin complejos, audaces, sino mujeres atemorizadas? Porque éso es lo que se está consiguiendo sin prohibirnos nada.
En París, hace cuarenta años, hubo un violador que atacaba a las mujeres solas de noche: la respuesta fue que miles de mujeres salieron cada noche, y patrullaron las calles reivindicándolas como espacio propio, y para impedir que actuara con total impunidad, las convirtieron en lugares transitados y seguros. Ahora sería una iniciativa impensable por el curso que ha tomado el feminismo como sucursal de la queja y del alarmismo victimista.
Ser mujer en defensa de nuestros derechos consiste en afirmarse, y no simplemente quejarse y reivindicar la tutela del papá Estado sobre nuestra seguridad. Y significa, también, asumir riesgos, y relativizar los peligros que desmesuran para tratar de atemorizarnos. Porque, según las estadísticas, la tercera causa de muerte, muy por delante del asesinato, son los medicamentos que nos recetan para enfermedades comunes.

Te felicito mucho por este texto, me ha abierto los ojos hacia algo que ni siquiera había pasado por mi mente.

No sé si se trate de una cortina de humo que se levanta con la intención de ocultar algo, pero por lo menos muestra cómo, ciertos temas logran "acapar" la atención, muchas veces a costa de otras que por su gravedad requerirían de esa misma atención de forma mucho más urgente.

Lo que has dicho es casi tan políticamente incorrecto como decir que QUIZÁS no sea el ser humano el principal responsable del calentamiento global.

Felicidades.

Cierto que la movilización contra la violencia de género es una exageración, pero existe como tal y no debe olvidarse. Y en lo que respecta al calentamiento global... a saber: el constante aumento de la densidad de CO_2 en la atmósfera, junto con la disminución de los medios naturales que podrían controlar dicho fenómeno, también existe; y eso es, por desgracia, bastante indiscutible. En cuanto a los biodiesels, me hubiera gustado que leyerais mi opinión y trabajo sobre la Jatropha y sus beneficios sociales.
Un abrazo a los dos.

Yo no veo que se produzca un miedo especial por las informaciones por la violencia de género. Lo que si me parece es que cada vez hay mas, y las medidas tomadas no sirven.

Y lo peor es que uno no sabe que hacer. Ante la amiga metida en la espiral de violencia ni a nivel de ciudadano con ganas de terminar con esta lacra.

Las causas de la "violencia de género"
Hemos perdido ya la sensibilidad al oír o leer noticias como ésta:
"Una mujer de 20 años ha muerto a causa de las heridas que le produjo ayer por la tarde su ex novio con un cuchillo mientras ella paseaba por el paseo marítimo de Gandía (Valencia). La joven fue hospitalizada con puñaladas en el cuello, tórax y nalgas y ha fallecido de madrugada. El presunto agresor, que ha sido detenido, tenía una orden de alejamiento tras ser denunciado por la mujer por malos tratos."
Pero ¿cuáles son las causas reales de estos crímenes?
La igualdad ante la ley de hombres y mujeres, en caso de proceso de separación (y cuándo hay hijos peor) es ya inexistente. El hombre se encuentra en la calle y pierde la posibilidad de ver frecuentemente a sus hijos (son raros los casos, lamentablemente, de separaciones civilizadas).
Un hombre en esta situación o ante esta perspectiva, pierde fácilmente el raciocinio y comete estas barbaridades.
La familia y la igualdad de derechos y deberes entre hombres y mujeres son pilares a trabajar en profundidad para evitar una de las causas de estos crímenes.

Carlos Martínez: te recuerdo que los soldados americanos que fueron juzgados por haber cometido atrocidades en Vietnam eran los llamados "hijos del Dr. Spock" cuya doctrina edulcorada prohibía frustrar o corregir a los niños para que su autoestima no sufra. Eso crea monstruos que son los que ahora conocemos, incapaces de ponerse en el lugar de la otra persona, sin empatía, sin lealtad, no soportan la frustración de sus deseos inmediatos...y por supuesto hablo de hombres y mujeres, que creen que se puede ser fiel pero se puede ser desleal.
Carlos de Credítos:
¿Hay alguna razón para poner este mismo comentario en dos artículos de Gatopardo? Su reflexión no demuestra una gran capacidad de análisis ni de ideación original, ya que coincide de pe a pa con lo que me han dicho todos los taxistas que escuchan fervientemente a los tertulianos pagados para opinar. Procure acometer el problema con datos reales, no le moleste pensar y reflexionar y, sobre todo, trate de no circunscribirse a España, porque no es una casualidad que donde más mujeres son asesinadas por sus parejas en Europa no sea aquí, sino en los países nórdicos. Que no han descubierto la igualdad y los derechos de la mujer hace dos días....
Traten de ser tan imaginativos y personales que no repitan los argumentos ajenos más manidos.
Gracias anticipadas

¿CÓMO JUSTIFICARÁN SU SILENCIO LOS PERIODISTAS QUE HAN CALLADO HASTA AHORA Y DICEN QUE ESTÁN POR LA LIBERTAD DE EXPRESIÓN? (2)

DENUNCIA DE LA FUNDACIÓN RAMÓN MENÉNDEZ PIDAL CONTRA LA FUNDACIÓN RAMÓN ARECES ANTE LA AGENCIA TRIBUTARIA

A la atención de la Agencia Tributaria. Delegación de Madrid
Madrid, a 30 de julio de 2007

Estimados sres:
La Fundación Ramón Menéndez Pidal solicita se investiguen las posibles irregularidades fiscales que, a continuación, se detallan:
La Fundación Ramón Areces ha declarado en su Memoria Oficial de Actividades 2004-2005:
1. Que financió la publicación de la Historia de la Lengua Española, de Ramón Menéndez Pidal, publicada y editada por esta Fundación.
2. Que financió las investigaciones de su presidente, Diego Catalán Menéndez Pidal durante este período.
La Fundación Ramón Menéndez Pidal hace constar que, ni en esos años ni después, ha recibido subvención, ayuda, ni cantidad alguna en ningún concepto, como pueden comprobar en la declaración fiscal de la Fundación Ramón Menéndez Pidal, en sus Libros

de Cuentas y en el Libro de Actas que están a disposición de sus Inspectores Fiscales. Como tampoco ha recibido subvención, ayuda ni cantidad alguna Diego Catalán Menéndez-Pidal en las fechas indicadas.
El 18 de diciembre de 2006 la Fundación Ramón Menéndez Pidal hizo una comunicación formal a la Fundación Areces y a todos y cada uno de sus patronos, solicitando rectificaran el error contable y fiscal, ya que tales afirmaciones por su parte exigían nuestra complicidad en esa irregularidad, cosa que no estábamos dispuestos a consentir.
Al no recibir respuesta ni haber obtenido rectificación, rogamos tengan a bien tomar buena nota de esta solicitud y de nuestra absoluta transparencia en lo referente a nuestros deberes con la Hacienda Pública.
Por si hubiera facturas o recibos presentadas a ese organismo de control tributario que así lo justificaran, solicitamos y nos ponemos a su disposición para un examen pericial que pueda dictaminar sobre la autenticidad de las firmas, ya que la Fundación Ramón Menéndez Pidal hacer constar que tales afirmaciones no se corresponden con la realidad.
Atentamente,

Diego Catalán
Presidente de la Fundación Ramón Menéndez Pidal

DENUNCIA DE LA FUNDACIÓN RAMÓN MENÉNDEZ PIDAL CONTRA LA FUNDACIÓN RAMÓN ARECES ANTE EL PROTECTORADO DE FUNDACIONES

A la atención de la Subsecretaria General Técnica. División del Protectorado de Fundaciones:

Madrid, 27 de julio de 2007

La Fundación Ramón Menéndez Pidal (NIF G-78519451 y con nº 121 en el Registro de Fundaciones del Ministerio de Educación y Ciencia) expone ante el Protectorado de Fundaciones los siguientes hechos, cuya gravedad ruega se tenga en consideración a la hora de tramitar su denuncia:
Antecedentes: Desde su constitución, en 1984, la Fundación Ramón Menéndez Pidal firmó un Convenio con la Fundación Ramón Areces, según el cual ambas Fundaciones se comprometían a velar por la conservación de la Casa Menéndez Pidal, sede de la

Fundación Ramón Menéndez Pidal y propiedad de la Fundación Ramón Areces, por la continuidad de la labor de investigación histórica y filológica , por la conservación de sus valiosísimos archivos (propiedad de Diego Catalán Menéndez Pidal) y por la preservación y acrecentamiento de su biblioteca (propiedad de la Fundación Ramón Menéndez Pidal).
Las relaciones entre ambas Fundaciones se hallan formalizadas preceptiva y estatutariamente por un Consejo Mixto de Patronos, cuya presidencia y poder de convocatoria recae en el Presidente de la Fundación Ramón Areces, Don Isidoro Álvarez Álvarez (o, en su ausencia, uno de los patronos vocales de la Fundación Ramón Areces). En este Consejo se supervisa el cumplimiento de las obligaciones que las dos Fundaciones han contraído por la conservación de la Casa Menendez Pidal y el patrimonio cultural que alberga.
Hasta febrero de 2004, estas relaciones fueron correctas y de acuerdo a la normativa legal. Pero, a partir de ese año, en que la Fundación Ramón Menéndez Pidal inicia las gestiones, ante las autoridades competentes, para solicitar de éstas el mayor grado de protección urbanística a la casa y jardín y la consideración del conjunto como Bien Cultural (protección concedida por el Ayuntamiento de Madrid, con número de expediente 713/2005/000337, que ha declarado el Olivar de Chamartín espacio protegido), la Fundación Ramón Areces no sólo ha incumplido todas y cada una de sus obligaciones como firmante del Convenio de 9 de mayo de 1984, sino que ha iniciado una escalada de acosos a la Fundación Ramón Menéndez Pidal , llegando incluso a asaltar la sede, invalidando el cierre de la puerta y manipulándola para una posterior intrusión, lo que ha obligado a la Fundación Ramón Menéndez Pidal a interponer dos denuncias el día 12, una en Comisaría de Chamartín, (nº atestado 14.764) y otra el mismo día en el Juzgado Decano de Madrid) y a hacer público los continuos atropellos que está sufriendo:

1. La Fundación Ramón Areces ha dejado de cumplir hasta las más elementales obligaciones de conservación y mantenimiento de la Casa Menéndez Pidal y de su Jardín Catalogado, durante siete semestres, en los años 2004, 2005, 2006 y 2007. Ha incumplido la obligación de convocar el Consejo Mixto de Patronos, en la reunión preceptiva semestral, a pesar de las peticiones formales de la Fundación Ramón Menéndez Pidal, y no ha contestado a ninguna de sus cartas en que se le informaba de problemas graves relativos a esta cuestión.

2. Si la voluntaria y meditada política de abandono del cuidado del perímetro tapiado, el sistema de calefacción, el jardín histórico, muros, bajantes y aleros y tejados de la casa (repetidamente denunciada en las cartas y actas de la Fundación Ramón Menéndez Pidal), que, si aún no ha afectado gravemente a la conservación de este enclave natural e histórico se debe, exclusivamente, a que la Fundación Ramón Menéndez Pidal ha asumido, durante todos estos años, la onerosa carga del mantenimiento de una finca y casa que corresponde a la Fundación Ramón Areces, y al hecho de que su Presidente, así como otras personas de bien con vergüenza civica, han colaborado mediante su desinteresado trabajo y su dinero personal para que este valiosísimo patrimonio cultural no se deteriorara o sucumbiera, porque, hay que subrayar que esta dejación de responsabilidades por parte de la Fundación Ramón Areces se refiere a una propiedad que tiene la máxima protección urbanística y `por lo tanto debe ser mantenida en perfecto estado, siendo punible contribuir por acción u omisión a su deterioro,.

3. Pese a esos desvelos, ante la imposibilidad legal de realizar en su sede obras estructurales, que no le competen, el Patrimonio de la Fundación Ramón Menendez Pidal ha sufrido daños irreparables en su Biblioteca (secciones Moderna e Hispanoamericana) y en su prestigio institucional al haber tenido que mantener inaccesibles a los investigadores durante todos estos años sus valiosos fondos hispanoamericanos.

4. La Fundación Ramón Areces ha dejado de pagar las partidas presupuestarias correspondientes a esos siete semestres, tanto las referentes a suministros, comunicaciones, conservación de la propiedad y seguridad, como las destinadas a Mantenimiento, restauración e incremento del patrimonio y sede, como aquellas destinadas a la investigación filológica, conservación y catalogación de los fondos documentales y publicaciones. El montante de esta deuda asciende a más de 600.000 euros.

5. Un hecho aún más grave es que la Fundación Ramón Areces ha publicado en su Memoria oficial de Actividades de 2004-2005 que sigue subvencionando, en virtud del citado Convenio, a la Fundación Ramón Menéndez Pidal y los trabajos de investigación que en ella dirige el profesor D. Diego Catalán Menéndez-Pidal, y cita, en concreto entre los libros publicados con su mecenazgo la Historia de la Lengua Española, obra póstuma de Ramón Menéndez Pidal. Llegando incluso a presentarse fraudulentamente como mecenas ante el público y la prensa en la ceremonia de su presentación en la Real Academia Española, cuando lo cierto es que la Fundación Ramón Menéndez Pidal no ha recibido ni un euro de la Fundación Ramón Areces ni en 2004, ni en 2005, ni después (y se ha visto obligada a desmentir oficialmente en la 2ª edición de la citada obra el haber sido subvencionada por ella). La gravedad de este hecho, sobre el que Diego Catalán, presidente de la Fundación Ramón Menéndez Pidal, llamó la atención al presidente de la Fundación Ramón Areces, don Isidoro Álvarez, y demás Patronos de la misma, sin que respondieran a las cartas, no es de índole protocolaria sino de transparencia fiscal.
Si, con posterioridad al año 2003, la Fundación Ramón Areces ha hecho una declaración en el Protectorado de Fundaciones y en el Ministerio de Hacienda en este sentido, la Fundación Ramón Menéndez Pidal solicita su rectificación inmediata y pide, además, una auditoría de la inspección fiscal del Ministerio de Hacienda, y del Protectorado de Fundaciones sobre la contabilidad de la Fundación Ramón Areces, independientemente de las acciones legales que solicitemos de organismos internacionales.

PODER E IMPUNIDAD EN EL CORTE INGLÉS, OTRO ESTADO AUTORITARIO DENTRO DEL ESTADO

La Brigada Político-Social de El Corte Inglés tiene ilegalmente un extenso fichero de todas las personas detenidas y de cada uno de los empleados de la empresa.

Cuando Abril Martorell, vicepresidente de Gobierno y ministro de Economía con Adolfo Suárez, llamaba a Ramón Areces, entonces presidente de *"El Corte Inglés"* , éste nunca cogía el teléfono. Hasta que Fernando Abril le "amenazó" y logró hablar con él. Los que estaban presentes, nada supieron de la conversación, pero al colgar el aparato, Areces se puso a chillar a "voz en grito". *"¿Por qué quieren mandar sobre mí? ¡Que gobierne bien "su" Estado que éste "otro"*("El Corte Inglés") *es mío y lo gobierno yo!"*.

"El Corte Inglés" es el induscutible "emperador" de los monstruos comerciales y grandes superficies, y su actual dirección, en la *"Escuela Areces"*, guarda celosamente los "principios fundamentales". Es "otro" Estado autoritario dentro del Estado, que influye en el comercio, "marca el paso" a los sindicatos, cuida "la higiene mental" de sus trabajadores y dicta las normas de seguridad. Según Isidoro Álvarez , hoy presidente y máximo accionista, *"no hay quien pueda con nosotros"*

Con su Brigada Político-Social, Isidoro Álvarez Álvarez controla el estado de opinión de sus empleados y neutraliza a los desleales. Diseña con destreza la desinformación y mantiene a raya a cualquier sospechoso. Su tío Ramón, conocido en los años veinte como chico para todo, le dejó a su muerte (el 31 de julio de 1989), un coloso comercial que abarca muchas actividades. Areces fundó en Madrid, en 1935, una pequeña sastrería, cuna de un vasto imperio sustentado por una gestión sin escrúpulos y la opacidad absoluta. Entre las directrices que dan a sus nuevos empleados, sobre todo a nuevas contratadas, está la que establece que *"El Corte Inglés se lleva en la mente y el corazón, pero de boca para fuera, nada de nada".*

Si *Galerías Preciados* contó con las simpatías del franquismo, *El Corte Inglés* "simbolizó" la modernidad y transición para consolidar el libre mercado, según el

enriquecido Miguel Boyer, implantado en la égida de los Gobiernos socialistas. *El Corte Inglés* está constituido por *Viajes El Corte Inglés, Tiendas El Corte Inglés, Hipercor, Informática El Corte Inglés, Centro de Seguros* y, cómo no, *Seguros El Corte Inglés*. La vicepresidencia la ocupa Luis Areces Rodríguez **(*)**, y Juan Manuel Mingo Contreras , la secretaría. La administración la dirige José Antonio Álvarez López; la dirección general, César Álvarez, y Recursos Humanos, José María Alcañiz

(**). A esta nómina de sociedades hay que sumar otras empresas participadas y dirigidas por testaferros y ejecutivos de confianza. Podemos adelantar que el imperio de Isidoro Álvarez se adentra en amplios sectores del universo financiero, la gran banca, transportes mercantiles (aéreos, terrestres y marítimos), industria editorial, sector energético e hidráulico, el disputado cable, las telecomunicaciones, los negocios agropecuarios, así como fábricas, exportaciones e importaciones, inversoras para nuevos mercados, fundiciones, acerías y cuanto queramos"imaginar" , incluso industrias de armamento y fabricación de municiones. Asimismo, *El Corte Inglés* es el principal proveedor de uniformes, pertrechos y vituallas del Ejército español, prendas castrenses elaboradas en talleres clandestinos y carcelarios. Los presos que trabajan para *El Corte Inglés* cobran menos de la cuarta parte de lo que les corresponde. Pero el ministro de Justicia también hace lo que José María Aznar ordena **(****)**, como buen jefe de la centuria gobernante que es. Todo queda en casa, como es fácil adivinar.

Por su parte, Induyco, primera firma española de confección textil, está controlada por la Fundación Ramón Areces , propietaria de todo el capital. Esta filial de *El Corte Inglés* la componen Industrias del Vestido, Invesgen, Investrónica Sistemas y Confecciones Teruel. La facturación del conglomerado comercial e industrial superaba el billón de pesetas anuales antes de la adjudicación espúrea de *Galerías Preciados*. Hoy podríamos estar refiriéndonos a seis o siete "billones" de pesetas sin aplicar ningún índice corrector.

Por supuesto, estas cantidades astronómicas de facturación anual, no figuran en la contabilidad abierta; es decir, la que recibe la Hacienda Pública. Porque *El Corte Inglés*, bien lo sabe la Inspección Fiscal, tiene tres contabilidades para hacer y deshacer a su antojo. No en vano colabora con el Gobierno de turno en todas las ilegalidades y componendas que éste le pida. Pongamos un ejemplo. Cuando se produjo la gran nevada en Galicia, hace más de siete años, quedó incomunicado un buen número de pueblos y aldeas de las comarcas más alejadas y, en muchos casos, sin protección alguna, y sin mantas ni avituallamientos. Ante tales imprevisiones y tanta negligencia, las críticas no se hicieron esperar. Para intentar atajarlas, Mayor Oreja, a cuyo ministerio (Interior en el Gobierno del PP) le corresponde la responsabilidad en casos como el mencionado, salió al paso declarando que *"todos están perfectamente atendidos y han recibido muchos alimentos y las dichosas mantas, que es lo que más necesitan"*.

Una mentira tras otra como a la que cada día nos tiene acostumbrados. Porque lo cierto es que las dichosas mantas nunca llegaron a su nada dichoso destino. Pero como el ministro de Interior del Gobierno del PP había realizado tales declaraciones, y ante la posibilidad de que algún grupo opositor (¿?) exigiese responsabilidades al Gobierno, un emisario ministerial llamó inmediatamente a El Corte Inglés para que les enviasen millares de las dichosas mantas de las que habló Mayor Oreja, pero fechando la factura quince días antes de la "informal" comparecencia del ministro. Para más abundamiento, las dichosas mantas de Mayor Oreja fueron arrinconadas en uno de los zulos de Interior, y allí permanecieron al menos durante todo el año siguiente. Así siguen haciendo, siempre ayudados por los de El Corte Inglés, que lo hacen a cambio de continuar siendo

los principales proveedores del Estado. A la dirección de *El Corte Inglés* no le importa entregar cuantas falsas facturas millonarias le solicite el Gobierno del PP. Lógicamente, pagando el correspondiente impuesto revolucionario para engordar la tesorería del partido y, por supuesto, las cuentas corrientes de sus promotores e intermediarios.

Pero antes de seguir con la verdadera historia de *El Corte Inglés*, y de su actual y heróico presidente, parémonos un momento para denunciar algo que nos ocurrió a quienes trabajamos en esta publicación, y ya antes de salir el primer número a la venta. La dirección del coloso envió un mensajero (amigo de Isidoro y conocido nuestro), para que aceptásemos publicidad de El Corte Inglés, sin pedirnos nada a cambio. La rechazamos tajantemente, no porque supiésemos que a la larga y a la corta intentarían ponernos el dogal, sino porque hemos decidido no aceptar publicidad alguna de monopolios, grandes empresas, multinacionales y oscuras firmas que pululan por doquier. Escrito queda.

Vayamos ahora con el sobrino predilecto de Ramón Areces. El hombre que rige los destinos del coloso y, directamente, la vida de más de ciento cincuenta mil personas, es Isidoro Álvarez Álvarez , ejecutivo que sigue milimétricamente todos y cada uno de los pasos de su tío Ramón Areces. Álvarez es el prototipo del superpatrón. Oscuro como su antecesor, hasta tal punto se identifica con los métodos de Areces, que persiguió y secuestró la publicación de un libro sobre los negocios y trapicheos del coloso comercial, *Biografía de El Corte Inglés* , escrito por el periodista Javier Cuartas después de una ardua, impagable y obstaculizada investigación. A través de sus páginas, Cuartas daba a conocer sólo parte de la vida y milagros de Ramón Areces y Pepín Fernández, así como el auge de los dos faraónicos negocios españoles de postguerra, y el posterior desarrollo quinquenal de la economía franquista. Es decir, que toda la "historia oficial" de El Corte Inglés está plagada de mentiras de la primera palabra hasta la última.

En *Biografía de El Corte Inglés*, Javier Cuartas desmitifica uno tras otro los pasajes heróicos y las hazañas bélicas del mitómano Ramón Areces, divulgando "las verdades del barquero" de una vida nada ejemplar repleta de trapisondadas, engaños, traiciones y estafas. En esa misma senda y escuela está Isidoro Álvarez. Con sus modales protomafiosos, Areces llegaría a la presidencia del negocio, pero no al poco tiempo de incorporarse como dicen los hagiógrafos de encargo, sino 26 años después de lo que esas plumas mercenarias escribieron de oídas todo cuanto el propio Areces les quiso dictar. En otro capítulo, el libro de Cuartas recuerda el modelo paternalista de la filosofía empresarial en la relación con los trabajadores, así como la rígida estructura jerárquica de mando entre la cúpula y los cuadros intermedios, y entre las jefaturas de sección y los dependientes, el escalafón inferior según Isidoro Álvarez.

Los editores de Espasa-Calpe, proveedores de los grandes almacenes, aceptaron la sugerencia del poderoso cliente, y la tirada completa de Biografía de El Corte Inglés , 20.000 ejemplares, desapareció de la circulación inmediatamente. El responsable de publicaciones de Espasa-Calpe, Ramón Pernas, Moncho, declaró entonces que *"la edición se detuvo porque el original de Javier Cuartas no se ajustaba al encargo inicial que le hicimos"*. Cuando los medios de comunicación se hicieron eco del secuestro, Ramón Pernas, Monchito le llama Álvarez, recurrió a la perogrullada de los *"desfases habituales en los pasos de producción editorial"* para que *"ustedes entiendan esa aparente existencia de un libro que nunca llegó a existir"*. Pero ni por ésas, pues la historia de Cuartas está inscrita en el ISBN del ministerio de Cultura con el número 84-239-6230-X. Así figura en el registro oficial para quien desee comprobarlo. El periodista Ramón Pernas, Moncho, fue inmediatamente pescado por El Corte Inglés para que ocupara un alto cargo en el organigrama de la Casa. Por supuesto, con salario de oro,

fórmula empresarial tópica que gratifica los servicios prestados de cortesanos y amigos. Antes, el triunfador Moncho Pernas ya había materializado su enjuague en beneficio propio, pues ya estaba fichado en secreto por *El Corte Inglés*, a cambio de ser retribuido con 50 millones de pesetas anuales sin incluir gastos de representación y otras minucias. Buena parte de ese monto lo percibe en dinero negro -no en vano está en buen colegio- para no declararlo a la Hacienda Pública. Pernas fue nombrado director general de El Corte Inglés por Isidoro Álvarez, en agradecimiento a los servicios prestados (corriente dominante en las cuadras periodísticas y literarias), para que se pusiese al frente de una nueva sociedad, Ámbito Cultural, costituida exclusivamente para sondear y conocer las opiniones de cada redacción y así poder acercar a los periodistas influyentes a su esfera de control.

Pero Ramón Pernas aún hizo más, porque logró un acuerdo económico entre Espasa-Calpe y El Corte Inglés para "crear" el bien dotado Premio Primavera, que coordina y concede el propio Ramón Pernas desde el imperio del triángulo, como le llama Javier Cuartas. Naturalmente, Espasa-Calpe hizo el negocio del siglo con la inyección millonaria que le vino del coloso, y El Corte Inglés pasó a controlar otra empresa de la industria cultural. Por el contrario, las amenazas de muerte a Cuartas le han llovido desde que tuvo la osadía de escribir contra la Casa. La última, estando ya Pernas en la dirección de Ámbito Cultural, la sociedad dedicada a la compra-venta de periodistas. *"No olvides que nosotros somos la mayor sociedad anónima de España y tú eres de carne y hueso".* Luego, Moncho Pernas comentó que *"no se trata de ninguna amenaza"*. Si frase de tal jaez no es una amenaza de muerte, "apaga la luz y vámonos". La segunda aparición del libro corrió a cargo de editorial Límite.

Para el ingenuo y bien intencionado responsable de cultura en TeleK, suponía *"la victoria de la Libertad de Expresión ante la dictadura del caciquismo económico"*. Porque lo cierto es que prevalecieron las voces discordantes, como la del enriquecido periodista-empresario Paco Lobatón, (¿quién sabe qué?), que ardorosamente criticó muchas veces la osadía del autor. Téngase en cuenta que El Corte Inglés, Hipercor y Tiendas de El Corte Inglés eran los máximos soportes publicitarios de su infame y reaccionario programa. Mucho ha aprendido Jesús Polanco, aunque en poco tiempo, de su amigo, socio y valedor Isidoro Álvarez. Moncho Pernas es hoy el correo del zar entre ambos colosos.

¿Partidos o Cosa Nostra?

Todo lo anterior es sólo un botón de muestra de cuanto se hace con al dictado del amo y de la dirección de *El Corte Inglés*, la Casa, en muchos despachos de otras empresas, sobre todo periodísticas, imponiéndose su criterio de lo que deben o no escribir sobre éllos. En la medida que la Casa aumenta su poder, las presiones de *El Corte Inglés* sobre las empresas periodísticas, y sobre degradados y agradecidos profesionales, se incrementan proporcionalmente. Cada vez de forma menos sutil, pero siempre implacable y contundentemente. Ángel Baturell, director de Relaciones Externas, era uno de los encargados de realizar las visitas a las redacciones (informaremos oportunamente con nombres, fechas y contrapartidas) para evitar la publicación de noticias en las que podía aparecer su empresa.

El celo para preservar la *"imagen corporativa"* de la Casa ante cualquier contaminante, ha sumido a los directivos en una tremenda obsesión, una paranoia increíble que les lleva a protagonizar acciones estrafalarias. Un ejemplo, muy conocido en la profesión, lo protagonizaron tres dirigentes medios de El Corte Inglés, que pagaron elevadas sumas de dinero, en nombre de Isidoro Álvarez, para destruir 100.000

ejemplares del suplemento dominical que se vende encartado en algunos diarios de nuestro país. El motivo de la nada excéntrica decisión era una sencilla crítica de un periodista gastronómico sobre la calidad del menú en uno de sus restaurantes. Los datos y documentos sobre los silencios mafiosos en prensa, sobre "talleres clandestinos" que trabajan para *EL Corte Inglés***(**)**, evasión de capitales, pago de comisiones a cargos públicos, policías o jueces, y sobre corrupciones de todo tipo, los dejaremos para próximos capítulos. Este tipo de intromisiones demuestra, sólo en parte, los largos tentáculos de presión y sobornos que posee El Corte Inglés y, en particular, Isidoro Álvarez, su gran padre padrone. Siniestra influencia de la que, con soberbia, se jactaba el director de Relaciones Externas, quien declaró públicamente en la cena anual de fraternidad con periodistas afines, que *"nos gastamos miles de millones de pesetas en publicidad todos los años para que la prensa no hable de nosotros".*

Sumar "Galerias Preciados"

Cuando la dirección de *El Corte Inglés* quiere deshacerse de alguno de sus empleados incómodos, utiliza su particular sindicato vertical, FASGA, para que presione al trabajor o a la trabajadora, y le *"haga entrar en razón"*. FASGA está financiado y patrocinado por fundaciones de El Corte Inglés y tiene "sedes" en casi todos sus almacenes y tiendas. Si algún trabajador o trabajadora no cede, "empiezan a hacerle la vida imposible, obligándole a realizar los trabajos más incómodos y desplazándolo constantemente e incluso, amenazándole con hacer públicos los datos confidenciales que El Corte Inglés tiene ilegalmente en sus ficheros policiales". Por supuesto, estos "detalles insignificantes" nunca aparecen reflejados en periódicos, emisoras de radio o cadenas de televisión. Propietarios y direcciones de estos medios democráticos, como los periodistas que se llenan la boca diciendo que defienden la Libertad de Expresión, entienden muy bien el mensaje, acatando las directrices y loa deseos de la omnipotencia rectoral de El Corte Inglés. En 1995, Isidoro Álvarez le había echado el ojo a *Galerías Preciados*, su "viejo" competidor. Las dificultades financieras que atravesaba *Galerías Preciados* ponía en franquicia el ansia expansionista del gigante verde. La insuperable oferta del imperio del triángulo, que estaba sobre la mesa del empresario Miguel Boyer, superministro de Economía y Hacienda, era demasiado atractiva.

De aquella tacada, Álvarez le resolvía una difícil papeleta al Gobierno de Felipe González, pues éste había permitido el expolio sistemático del patrimonio expropiado a RUMASA (atrocidad jurídica del felipismo como otras muchas), cuyo saneamiento sigue costándole miles de millones al erario público. El Corte Inglés lograba, por un coste ridículo, controlar la mayor cuota de mercado y, al tiempo y por idéntico ridículo precio, conseguía la propiedad de otro capital inmobiliario que los auditores valoraron públicamente en más de un billón de pesetas. Aún en este apartado, debemos reseñar que, desde hace años, la División Inmobiliaria "fantasma" de El Corte Inglés potencia el fructífero negocio para la adquisición de edificios y viviendas que el ayuntamiento correspondiente declara ruinosos, o de los que sus dueños deciden desprenderse por resultarle imposible los costes de la rehabilitación, restauración, derribo o reconstrucción. En el caso del ayuntamiento de Madrid, el negocio compartido tiene todos los puntos oscuros por haber. Con el ultraconsevador alcalde José María Álvarez del Manzano, El Corte Inglés ha llegado a la cumbre de sus mayores componendas. Dos ejemplos claros, para no alargarnos. El primero, los cortes de calles solicitados por Isidoro Álvarez, para facilitar el acceso al nuevo Hipercor del popular barrio de Carabanchel, lo que ha provocado, aunque vanamente, las protestas de todo el vecindario. El otro, la utilización del aparcamiento público como negocio privado en la Tienda de El Corte Inglés de la madrileña calle Princesa. Por descontado, con buenas comisiones por medio.

Para darle más emoción al enjuague que Isidoro Álvarez propuso para adquirir Galerías Preciados, los diseñadores de la operación afirmaban que *"adquirir Galerías tiene muchos inconvenientes y ninguna ventaja. Se trata de una operación complicada ,y si se acomete, es por criterios no objetivos"*. Todo esto, después de que Galerías Preciados pasase por las manos de varios propietarios. Desde Santiago Foncillas y Ruiz-Mateos, a Gustavo Cisneros (el poderoso empresario venezolano, amigo de Julio Feo y Felipe González), el grupo británico Mountleigt, hasta Fernando Sada y Justo López-Tello. Todos obtuvieron tajadas millonarias en cada traspaso ilegal. Los beneficios de tan fugaces dueños, que adquirían estos grandes almacenes a precio simbólico, están certificadamente cifrados (vía judicial, a través de auditores públicos), en un billón 300.000 millones de pesetas que han salido de la Tesorería del Estado.

Como resulta habitual, las comisiones de los intermediarios suman miles de millones. En el despacho del letrado Fabián Márquez, dirigente de CEOE (inscrito en el Colegio en el 91, número 45208), diseñaron la operación asalto en *Galerías Preciados*. No intervino ningún asesor empresarial, pues la negociación se llevó desde fuera, en secreto, absoluto sigilo y complicidad", como afirma un Auto de Delitos Monetarios. La minuta del despacho fue millonaria para no dejar atrás a sus colegas.

Como resultado de la adjudicación, unas 2.000 personas, de una plantilla de 7.308, fueron a la calle. La representación del colectivo señaló que *"la mayoría de admitidos está a punto de cumplir 55 años, lo que significa que pronto serán jubilados. Para nosotros, esa compra fue totalmente especulativa y realizada en fraude de ley, pues el artículo 44 del Estatuto del Trabajador dice que, cuando una empresa compra otra, tiene que hacerse cargo de la totalidad de la firma, incluso de toda la plantilla. Lo que ha hecho "El Corte Inglés" ha sido obviar este artículo, dejando a 2.300 personas en la calle"*. Viendo el derrotero que seguía el propietario definitivo, *"los damnificados planteamos un recurso contencioso-administrativo, porque la concesión se ha realizado en fraude de ley"*. Cuando Isidoro Alvarez adquirió Galerías Preciados, el problema del *"excedente laboral ya estaba resuelto".*

Javier de Paz, que fue director general de Comercio Interior del Gobierno socialista, y antes secretario general de Juventudes Socialistas y diputado del Congreso, apelaba burdamente al *"buen criterio de los interlocutores sociales"* (CC OO, UGT y FASGA), haciéndoles saber que *"nos atrevemos a reiterarles nuestra preocupación por la convocatoria de movilizaciones. No nos parece demasiado oportuna para lograr los objetivos en los que coincidimos"*. Días después, la movilización fue desconvocada. Sería entonces cuando empezaron los enfrentamientos con los falsos sindicalistas que hacían de esquiroles por mandato expreso de El Corte Inglés y recomendación del socialista Javier de Paz, grupo que integraban las tres centrales sindicales citadas, sumisas y claudicantes, unidas en un frente común contra las personas despedidas. Su enemigo era el Sindicato Unitario (SU), pues exigía *"la recuperación de la unidad de acción para mantener la solidez contra la desintegración".* Actualmente, muchas de aquellas personas, sindicalistas auténticas, que habían pertenecido a CC OO, están afiliadas a la CGT y, como antes, son verdaderos líderes del sindicalismo de clase. El 31 de mayo de 1995, los auténticos sindicalistas emitieron un comunicado, en el que advertían al resto de sus compañeros sobre el oscuro ofrecimiento de El Corte Inglés, considerándolo como *"el peor de todos"* e informándoles que *"la plantilla de "Galerías" está siendo presionada con esta oferta, bajo el chantaje del impago de salarios, el miedo a que una oferta más débil no sea capaz de reflotar la empresa y la angustia que provoca una crisis tan larga".*

En aquel mismo documento, denunciaban que el Estado iba a desembolsar 12.000

millones de pesetas en concepto de *"jubilaciones anticipadas e indemnizaciones por despido"*, destacando un detalle omitido por los medios, pues *"al hacer desaparecer el nombre de "Galerías Preciados", no permiten valorar los miles de millones que en concepto de Fondo de Comercio supone dicha marca"*. Según denunciaron, los firmantes del "Protocolo de Empleo" "se bajaron los pantalones", renunciando a convocar elecciones sindicales hasta 1997, *"cuando la Ley obliga a celebrar elecciones a los seis meses de iniciada la actividad laboral en cualquier empresa"*. Los representantes de FASGA, UGT y CC OO concertaron un contrato social para constituir la "Asociación de Colaboración con los trabajadores de Galerías Preciados". Según decían, la finalidad era *"defender los intereses de todos los asociados en la colaboración de la búsqueda de trabajo en empresas de "El Corte Inglés", así como la obtención de mejoras económicas reconocidas en el Expediente de Regulación de Empleo"* (ERE), en caso de no obtener trabajo con el nuevo propietario. Un artículo del mismo documento señala que *"el patrimonio de la Asociación estará constituido por aportaciones de todos los asociados"*. Como siempre hacen las direcciones de UGT y CC OO (sin referirnos al fantasma FASGA), al atenuarse el conflicto, olvidaron sus promesas.

Los que no firmaron el contrato, decían que, *"si la empresa ha cerrado, es decir, si se ha producido un ERE en función de los contratos, el trabajador tiene derecho a su FOGASA"*. Los responsables de los tres sindicatos burocráticos y oficialistas, *"que se plegaron a las exigencias"* de El Corte Inglés, quisieron desmontar cualquier oposición, ofreciendo en bandeja de plata a Isidoro Álvarez Álvarez *"un futuro de paz social y de sumisión absoluta para "su" Nuevo Orden"*.

BPS en El Corte Inglés

Las empleadas y los trabajadores de Galerías Preciados no admitidos (casualmente, los más batalladores en defensa de la dignidad personal y el puesto de trabajo), denunciaban constantemente lo que se les venía encima a quienes se prestaran a seguirle el juego al propietario y a la dirección de El Corte Inglés. En una nota desesperanzada, concluian que, *"respecto a la situación personal de muchos de los compañeros comprendidos en el segmento más destacado por su edad avanzada, estado civil o simpatías sindicales, la "Brigada Político-Social" de "El Corte Inglés" procesará todos sus datos. En un programa informático, irá cruzando los factores negativos, y los comportamientos más humanos tendrán la máxima valoración de riesgo. Se quedarán fuera."El Corte Inglés" quiere mercancías, no personas portadoras de derechos".*

En este punto, hay que reseñar que las actuaciones ilegales de la empresa de seguridad Prosegur, contratada por El Corte Inglés, están a la orden del día. Desde persecuciones y palizas a quienes roban mercancías en sus almacenes, hasta presiones, chantajes y amenazas a los funcionarios públicos que proceden contra sus agresiones impunes y detenciones ilegales. Aunque este capítulo también lo dejamos para próximas ocasiones, debido a los densos datos que disponemos, queremos reseñar que, contra todas las leyes vigentes, la seguridad de El Corte Inglés ha detenido ilegalmente a sospechosos por el mero hecho de parecerles que habían sustraído algunas mercancías, aunque después comprobasen que no había sido así. Los empleados de Prosegur, también dedicados a la vigilancia y transporte de fondos, tienen órdenes estrictas de la dirección de *El Corte Inglés* para que fichen a quienes sólo parezcan ladrones, sospechosos y alborotadores, y que pudieran estorbar en sus instalaciones.

Las brutalidades de Prosegur en El Corte Inglés se cuentan por millares. En el mejor de los casos, cuando detienen a una persona, la llevan al sótano de seguridad,

obligándola a denudarse antes de ficharla policial e ilegalmente en sus ordenadores. Algunas han terminado en los tribunales de justicia, con el silencio cómplice competente, por denuncias y querellas de las pocas víctimas que se han atrevido a seguir adelante. Cuando eso ocurre, las presiones sobre comisarios-jefes, inspectores de policía, jueces de instrucción y algún que otro magistrado que respeta la legalidad vigente, no se hacen esperar. Suelen ser llamados al orden, bien por el jefe superior, el director general o el ministro de turno para *"dejar las cosas como están"*.

Por otro lado, en esta entrega, aunque sólo sea de pasada, queremos denunciar que, ni el ministerio de Sanidad, ni medio de comunicación alguno, han dicho una sola palabra de que El Corte Inglés es el mayor importador de carne vacuna inglesa con el síndrome Creutzfeldt-Jakob. Es decir, carne de las mal llamadas vacas locas británicas. Tampoco nadie ha denunciado que El Corte Inglés es el concesionario único del pienso elaborado con harinas cárnicas, que tanto ha perturbado el mercado alimentario y, paralelamente, ha destrozado la ganadería española. Según la revista científica Nature, *"las reses nacidas antes del mes de enero de 1993 están todas infectadas".* El mismo año y fecha en los que El Corte Inglés empezó a presumir, con sus habituales y embaucadoras campañas publicitarias, de ser el *"único importador de carne de vacuno inglés".*

Comisiones e impunidad

Llegamos a otros aspectos que demuestran la impunidad y el poder de El Corte Inglés. En 1998, el juzgado de instrucción número 39 madrileño, investigaba las irregularidades de los contratos del AVE (Tren de Alta Velocidad) entre Madrid, Córdoba y Sevilla. Dicha investigación descubrió que la multinacional alemana Siemens utilizó cheques bancarios que compró en la Unión de Bancos Suizos (UBS), para abonar una serie de comisiones ilegales a funcionarios españoles durante el Gobierno de Felipe González. También, según otra diligencia indagatoria, El Corte Inglés realizó *"canjes en España con cheques de idéntico origen, a cambio de dinero en efectivo que le había proporcionado Celestino Areces"*, ya fallecido, entonces miembro del consejo de administración de la Casa. Ramón José Areces, hijo del aquél y también directivo del gigante comercial, confirmó los hechos en la declaración que realizó en 1998 ante la magistrada María Teresa Chacón. Además de Areces, varios testigos reconocieron que en mayo de 1991, otra partida de 318 millones de pesetas fue trasladada, desde el edificio donde tiene El Corte Inglés las cámaras acorazadas, hasta la sede de la multinacional Siemens , utilizando un furgón blindado de la empresa Prosegur, celosamente vigilado por el propio Ramón José Areces, quien siguió a la comitiva conduciendo su moto Harley-Davidson. A pesar de que Ramón José Areces sostuvo que el dinero procedía del vencimiento de pagarés del Estado que tenía su padre, las contradicciones fueron tales, que acabó derrumbándose. Ramón José Areces jamás aportó ni un solo documento acreditativo sobre lo que dijo en falsedad testifical, sin que sus manifiestaciones pudieran sostenerse. Además, era un hecho probado que aquel envío millonario de dinero fue facturado por Prosegur a *El Corte Inglés*.

Todos esos acontecimientos pudieron conocerse gracias a la acusación particular. Según declaró su portavoz, *"a pesar de la permanente obstrucción en la investigación por parte de los inculpados, que están detrás de todas las maniobras dilatorias para que la instrucción finalice sin la debida aclaración de los hechos o, si llegaran a conocerse, que sea cuando los responsables de aquéllos puedan invocar el instituto de prescripción"*. De esta forma, según la acusación, *"la dirección de Prosegur optó por encubrir a tan importante cliente y no facilitó la información requerida por la autoridad hasta verse "comprometida" y en la boca del lobo"*. El albarán que prueba el canje de

los 318 millones de pesetas entre El Corte Inglés y Siemens, con la mediación de Prosegur, no fue facilitado por la dirección de la firma de vigilancia y seguridad. Tendría que ser David Sharp (administrador de sociedades en el Canal de la Mancha) quien lo hiciera, y sólo al ser requerido por los jueces españoles.

Según consta en un escrito de la acusación particular, *"es evidente que el Consejo de Administración, máximo órgano de dirección, recibe puntual información de lo que acontece en su empresa"* y, por tanto, *"si la cantidad canjeada por los cheques de Siemens correspondía a "activos" ocultos de El Corte Inglés, es obvio que la decisión tuvo que partir del Consejo de Administración"*. De esa forma, para la acusación particular es evidente que Isidoro Álvarez Álvarez estaba informado en todo momento de la operación canje de cheques, al menos desde que la dirección de *El Corte Inglés* fue requerida por los magistrados suizos, junio de 1996, y una vez que hicieron públicas las investigaciones sobre el caso.

No queremos aturdir con informaciones sobre hechos repugnantes y actuaciones intolerables que protagonizan los cuadros dirigentes de *El Corte Inglés* , hoy bajo la égida patriarcal y dictatorial de Isidoro Álvarez Álvarez, el actual presidente de ese "otro Estado autoritario y caciquil" que hace y deshace a su antojo, como un Estado más dentro del Estado que "gobierna" José María Aznar,**(****)** autor literario de *"España va bien"*, para los ricos de siempre y contra la mayoría. Ricos y poderorosos como Isidoro Álvarez Álvarez y su impenetrable imperio mercantil, encabezado por El Corte Inglés.

Querido Pau: ya llevo publicando unos quince artículos sobre la Fundación Ramón Areces-El Corte Inglés, en los temas Sociedad Civil y el el tema El Espía que surgió del frío, y sueles comentar lo mismo, porque conoces unos cuantos que trabajan allí o gente de su familia, y eso es como si yo te digo que tuve un novio que tenía un hermano mercenario que me ayudó a hacer una mudanza, y me cuesta trabajo creer que los mercenarios maten gente.
Lo digo para que te lo pienses si has sido o conocido mercenarios, a ver qué te parecería que fuera con ese comentario una y otra vez. ¿Vale?

(Sobre El Corte Inglés):Este volumen de ingresos y el espectacular crecimiento de los beneficios no sólo sonatribuibles al incremento de las ventas, la reducción de los costes de producción a través de la deslocalicación de sus factorías textiles también tienen mucho que ver.
Un mínimo de 11 fábricas independientes, de tamaño pequeño o mediano, de Tánger reciben pedidos de Induyco para el Corte Inglés o para otros minoristas españoles. En total, las fábricas dan trabajo a más de 6.500 mujeres que confeccionan faldas, pantalones, vestidos, camisas y ropa infantil.
Todas las fábricas con las que Oxfam tuvo contacto declararon que los precios habían bajado cerca de un 30% en tres años y que los plazos de entrega habían pasado de 14 días a 5 ó 7 días.
Esta presión sobre las fábricas tiene consecuencias en la propia política de producción de estas empresas subcontratadas. En temporada alta, las trabajadoras realizan entre 12 y 13 horas diarias, llegando en ocasiones a las 16 horas en una jornada. Por ley, las horas extraordinarias deben remunerar-se un 25% más que las ordinarias pero no ocurre así. En una de las fábricas, las trabajadoras hicieron 89 horas extras durante el mes de julio. Habrían ganado 300 euros y solo recibieron 150 ó 180 euros.
Estas mujeres sufren agotamiento, dolor de espalda, cansancio ocular, problemas respiratorios, quemaduras y lesiones con las agujas. En todas las fábricas está restringido y vigilado el uso de los lavabos con los consiguientes problemas renales y psicológicos.
Además de estas condiciones laborales la mitad de las trabajadoras no están declaradas a la seguridad social y, por tanto, no pueden reclamar los subsidios a través de ella. Se genera así una mayor dependencia del puesto de trabajo para la supervivencia.

No ha de preocuparnos sólo la explotación de estas mujeres. Sin vigilancia ni apoyo, muchos de los hijos de las trabajadoras de la confección abandonan la escuela muy pronto. Niños de 10 años intentan pasar a España debajo de los camiones y autobuses turísticos, y las hijas empiezan a trabajar en la industria del vestido a los 13 años. Cuatro de cada cinco trabajadoras tiene una hija que abandonó la escuela antes de cumplir 14 años para cuidar de sus hermanos.

UN DÍA CUALQUIERA UNO SE MUERE

"Toute une catégorie de sentiments est surannée."
Jules Renard

Un día cualquiera uno se muere,
modifica el censo
y resulta la noticia del día
si, entre tanto, no se descubre un fraude
o dimite el Ministro de Transportes.
Uno ha sido un niño,
inscrito en un Libro de Familia,
y consigue hacerse un hueco.
Uno es bueno y listo
—él cree a solas ser mejor—
a veces sonríe por compromiso
y otras veces vocea sin razón.
Uno tiene veleidades de poeta
y ansias de viajero insatisfechas.
Uno vive así, bordeando el stress y el infarto,
con una idea desmesurada de sí mismo
y la sospecha atroz
—sintiendo ese vacío, instalado en su alma como un peso—
de estar perdiendo el tiempo.
Aunque no eternamente.

TELEPHONE: WHITEHALL 9374.

REFORM CLUB, PALL MALL. S.W.1.

Londres, 25. XI. 38

Mi querido D. Ramon, ..

Perdone que le moleste nuevamente acudiendo a sus luces. Le remito una nota escrita por Colon en 1481, en Portugal, y, por lo tanto, antes de instalarse en España. Podria vd darme su opinión sobre lo que de ella puede deducirse en cuanto a lo que muestra lengua

(22 DE JUNIO - 19 DE JULIO, 2007).

A raíz de la notificación, mediante notario, firmada por el Secretario General de la Fundación Ramón Areces, don Juan González-Palomino , anunciando el cambio de cerraduras y desalojo de la Fundación Ramón Menéndez Pidal de su sede oficial en la "Casa Menéndez Pidal", informamos a la opinión pública y recurrimos a las gentes amantes de la cultura hispánica.

Cuando llegaron las primeras reacciones, dentro y fuera de España, el Secretario General de la Fundación Ramón Areces, don Juan González-Palomino apeló a la "buena

amistad" que nos unía para concertar una visita de cortesía a la "Casa Menéndez Pidal" el día el 28 de junio. Lo recibí en compañia del secretario de la FRMP, don José Manuel Pérez-Prendes, y el Sr González-Palomino, se presentó con quien dijo eran miembros de la Fundación Ramón Areces, don Juan Carlos Fernández-Cernuda y a don Juan Ignacio Lamata Cotanda, (que en realidad son el Jefe de Seguridad y el Gerente de la Asesoría Jurídica de El Corte Inglés, respectivamente). Hice de anfitrión como Presidente de la FRMP, y les acompañé en su detenida visita del jardín histórico, de la casa, de la biblioteca y los archivos. Los visitantes comprobaron y alabaron el estado de la propiedad y anunciaron la existencia de un "nuevo espíritu" de colaboración por parte de la Fundación Ramón Areces.

Más tarde, en ese mismo día, el Secretario General de la Fundación Ramón Areces, Sr. González-Palomino convocó, para el día dos de julio de 2007, una reunión del "Consejo Mixto de Patronos de las Fundaciones Ramón Areces y Ramón Menéndez Pidal"**(*)**, después de seis semestres de negativas a hacerlo (pese a lo preceptuado y a las solicitudes por escrito de la Fundación Ramón Menéndez Pidal).

La Fundación Menéndez Pidal acudió a esta reunión con sus dos patronos representantes natos en el "Consejo Mixto";pero la Fundación Areces no acudió con los tres representantes natos o patronos de la Fundación Ramón Areces, designados para el Consejo Mixto: el Secretario General, Sr. González-Palomino acudió con el Sr. Lamata Cotanda, (Gerente de la Asesoría Jurídica de El Corte Inglés) al que siguió identificando como miembro de la Fundación Ramón Areces, y excusó la asistencia, por problemas de salud, del Sr. Fernández-Cernuda, (jefe de seguridad de El Corte Inglés), limitándose a dar fe verbalmente de que estaban en posesión de poderes bastantes para contraer obligaciones.

En el punto 1º del Orden del día, el Presidente del Consejo Mixto, Sr. González-Palomino, me ofreció, de palabra, financiarme de forma generosa mis investigaciones futuras.

En el punto 2º del Orden del día, contesté, verbalmente, que, dado el trato que habían infligido en los últimos años a la Fundación Menéndez Pidal (y a mí, en cuanto su Presidente), rechazaba de antemano cualquier subvención futura de mis investigaciones, y declaré que sólo asistía a la reunión como miembro del "Consejo Mixto de Patronos" en defensa de los intereses de la Fundación Menéndez Pidal. A continuación, presenté, en un escrito, la petición de que, antes de estudiar cualquier posible esquema de colaboración futura entre las Fundaciones, dentro de lo acordado en el Convenio de 1984 (por el cual se rigen sus relaciones), se solventen los dos graves problemas pendientes: 1) El pago por la Fundación Areces a la Fundación Menéndez Pidal de las partidas presupuestadas para 2004 (veinte millones de pesetas) y y para el trienio 2005-2007 (quinientos setenta mil euros). y 2. La determinación de la fórmula jurídica que podría darse a este pago retrasado.

Y que a mi escrito solicitaba respuesta por escrito.

En los puntos 3º y 4º, el Sr. Lamata Cotanda, abogado de El Corte Inglés, introdujo, como condición previa para el diálogo sobre la deuda, que la Fundación Menéndez Pidal retirara su denuncia del asalto a su sede, y tanto el Presidente como el Secretario de la Fundación Ramón Menéndez Pidal mostraron la imposibilidad de desdecirse de unos hechos ciertos y admitidos por la propia Fundación Areces.

Se levantó la sesión sin tomar ningún acuerdo.

En los días siguientes, el Secretario General de la Fundación Ramón Areces convocó a los Patronos representantes de la Fundación Ramón Menéndez Pidal en el "Consejo Mixto de Patronos" a dos reuniones, los días 6 y 16 de julio, reuniones que no tuvieron lugar debido a que, en una y en otra ocasión, la representación de la Fundación Ramón Areces que se anunciaba en las convocatorias no estaba formada, conforme a lo estatuido, por los miembros natos del "Consejo Mixto de Patronos" ni por ningunos otros vocales del Patronato de la Fundación Areces en representación de los mismos, sino por el secretario General, Sr. González-Palomino como único miembro perteneciente al Patronato de la Fundación Ramón Areces, y el Jefe de Seguridad y el Gerente de la Asesoría Jurídica de El Corte Inglés, presentándolos como Patronos de la Fundación Ramón Areces.

Como Presidente de la Fundación Ramón Menéndez Pidal respondí, a una y otra convocatoria, mediante e-mails certificados con depósito notarial, los días 4 y 12 de julio, reclamando que las conversaciones se inscribieran en el marco formal de un "Consejo Mixto" que se atuviera a lo establecido, o, en su defecto, que se hicieran mediante el intercambio de propuestas escritas. **(**)**

Ni estos correos electrónicos certificados con depósito notarial, ni el escrito presentado por la Fundación Ramón Menéndez Pidal en el peculiar "Consejo Mixto" del 28 de junio, han dado lugar, hasta el presente, a ninguna respuesta escrita de la Fundación Ramón Areces.

Diego Catalán

(*) En el Convenio firmado por la Fundación Ramón Areces y la Fundación Ramón Menéndez Pidal se especifica para el Consejo Mixto las siguientes cláusulas:

"...el Consejo de Patronato de la Fundación Ramón Areces, tras deliberación y por unanimidad, acuerda:

Primero.- Designar como representante de la Fundación Ramón Areces en el Consejo Mixto de Patronos al Excmo.Sr.D. Ramón Areces Rodríguez, que ostentará la Presidencia del mismo, asi como a los señores D. Isidoro Alvarez Alvarez y D. Juan Manuel de Mingo Contreras,Vocales de la Fundación Ramón Areces.

Segundo.- En ausencia del Excmo.Sr.D. Ramón Areces en las reuniones del Consejo Mixto de Patronos la Presidencia del mismo correrá siempre a cargo de uno de los representantes de la Fundación Ramón Areces.

Tercero.- Asimismo, representarán a la Fundación Ramón Areces en el Consejo Mixto de Patronos cualquiera de los Vocales del Patronato de la misma en ausencia de alguno o algunos de los tres representantes natos antes mencionados y sin necesidad de delegación.

Cuarto.- Con objeto de hacer operativas las decisiones que - adopte el Consejo Mixto de Patronos, la Fundación Ramón Areces crea una Comisión Ejecutiva de Trabajo que habrá de completarse con algún o algunos de los miembros de la Fundación Menéndez Pidal, pertenecientes o no a su Patronato,’y que siempre actuará por delegación y bajo las directrices del Consejo Mixto de Patronos.

Quinto.- La representación de la Comisión Ejecutiva de Trabajo por parte de la Fundación Ramón Areces será ostentada por el Excmo. Sr.D. Federico Mayor Záragoza, Asesor Especial de la Fundación, por el Ilmo.Sr. D. Jesús Moneo Montoya, Asesor de la Fundación, y por -el Secretario General de la Fundación Ramón Areces o por cualquiera otro de los Asesores de la Fundacĩõn Ramón Areces.

Sexto.- A las reuniones del Consejo Mixto de Patronos podrán - asistir los miembros de la Comisión-Ejecutiva de Trabajo con objeto de seguir de cerca las directrices del Consejo Mixto, si bien estos miembros de la Comisión Ejecutiva no tendrán voto en dichas reuniones.

Séptimo.- Las reuniones del Consejo Mixto de Patronos serán convocadas por el Presidente del mismo al menos dos veces al año. - Se fija como fecha de la primera convocatoria el día 26 de Junio de 1984 en el domicilio social de la Fundación Menéndez Pidal. En dicha reunión habrá de convocarse la primera reunión de la Comisión.

4 de Julio de 2007
Estimado Sr:
Recibo su correo electrónico de 4 de julio de 2007, en que me informa que "para llevar a buen término nuestras conversaciones, me gustaría continuarlas el próximo viernes 6 de julio a las 10 horas, en la sede de alguna de las dos fundaciones".
Le recuerdo que "nuestras conversaciones" sólo se inscriben en el marco formal de un Consejo Mixto de Patronos de la Fundación Ramón Areces y la Fundación Ramón Menéndez Pidal, según aprobó por unanimidad el Consejo de Patronato de la Fundación Ramón Areces de 1984. La representación de la Fundación Areces en el Consejo Mixto de Patronos debe estar constituida por su Presidente y dos vocales del Patronato de dicha Fundación. Estos tres representantes natos podrán ser representados por cualquiera de los Vocales del Patronato. En consecuencia, sería necesario, en adelante, que la representación de la Fundación Ramón Areces se atuviera a lo estatuido.
Fuera de ese marco y dados los antecedentes, el intercambio de opiniones requiere hacerse por escrito.
En la anterior reunión, convocada por usted el día dos de julio de 2007, expuse por escrito (en el punto 2º del Orden del día) las Propuestas de la Fundación Menéndez Pidal a la Fundación Ramón Areces y pedí formalmente que la respuesta de la Fundación Ramón Areces fuera dada igualmente por escrito. En espera de esta respuesta le saluda atentamente.

El Presidente de la Fundación Menéndez Pidal al Secretario General de la Fundación Ramón Areces, Don Juan Gónzalez-Palomino Jiménez
12 de julio, 2007

Estimado Secretario General:

Recibo su Convocatoria a un "Consejo Mixto de Patronos" de las Fundaciones Ramón Areces y Ramón Menéndez Pidal para el lunes 16 de julio de 2007.

Dado que la Fundación Ramón Areces, según costumbre, no responde a las cartas oficiales de la Fundación Ramón Menéndez Pidal, y que la Secretaría de la misma insiste en imponer un nuevo modelo de "Consejo Mixto de Patronos" de ambas Fundaciones sin Patronos de la Fundación Areces (substituyendo, contra lo reglamentado, los miembros natos por un Jefe de Seguridad y un Abogado de "El Corte Inglés"), le remito a mi carta del 4 de julio pasado (enviada por correo certificado y por correo electrónico notarizado), en que le respondí a su correo electrónico del mismo día en los siguientes términos:

"Recibo su correo electrónico de 4 de julio de 2007, en que me informa que "para llevar a buen término nuestras conversaciones, me gustaría continuarlas el próximo viernes 6 de julio a las 10 horas, en la sede de alguna de las dos fundaciones".

En espera de esta respuesta le saluda atentamente....'

En respuesta a su nueva Convocatoria, no tengo nada que añadir a esa carta aquí reproducida. El "Consejo Mixto de Patronos" a que me convoca no se atiene a lo estatuido y sigo estando a la espera de una respuesta escrita a mi escrito del pasado dos de julio.

Con este motivo, le saluda atentamente

SONETO AL OLIVAR DE CHAMARTÍN

Olivar centenario, tú creciste
cuando Goya pintaba a la Alba maja
y el gran Emperador de talla baja
se asomaba al Balcón en que naciste.

Ahora, en tu vejez, ya en cárcel triste,
tus dueños de ti tratan de hacer caja
y todos los demás raja que raja.
Solo estás en el mundo, mas ¡resiste!

Tu voz de siglos levanta con orgullo,
que el pueblo peatonal está contigo
harto ya de esos gordos tiburones.

¡No te podrán tener siempre en el trullo,
ni torres crecerán en tu ombligo,
si, en coro hacemos frente a los cabrones!

UNO DE LOS SUYOS (3)

El Comando Juan González-Palomino, chapuzas a lo fino.

Leo con sumo detenimiento la información, que está teniendo a bien suministrar, en **Defensa del Olivar de Chamartín**, el presidente de la Fundación Ramón Menéndez Pidal sobre los graves sucesos del asalto a su sede.

El estropicio se veía venir y el Sr. Catalán sabrá por qué ha tardado tres años su fundación en hacer públicas unas irregularidades de la Fundación Ramón Areces que abundan en la chulería y descaro con los que el Emporio Terlenka ignora las leyes fiscales de este país (y, por lo que ahora se ve, también el Código Penal). La chapuza de los mazas de seguridad con asalto y tirolina tuvo, como teniente de maniobras, a un figura del ramo, que se pasea de especialista en seguridad eléctrónica. Ojo a los yayos eruditos, que un día se enredan y se parten los morros con los cables que ha dejado el superespía.

Fernández-Cernuda mandó al grupo de asalto en plan baratillo, como todo lo que hace El Corte Inglés, pedigüeñeando escaleras a los vecinos y dejando el lugar de autos como rateros de quinta fila. Yo me huelo que las fotos las hicieron con el móvil y que el photoshop va a ser un rotulador de algún *kit* de oferta. Pedir al jefe una cámara con teleobjetivo es una machada a la que no se atreve ni Comisiones Obreras.

Hay también que felicitar al Secretario de los Areces por esa bronca prosa que se gasta. Desde aquello del *"¡Se sienten, coño!"* no habíamos visto representado más acertadamente la ira apopléjica que produce la cultura en los cerriles patrios. Bien es verdad que, Gonzalez-Palomino hace de monosabio del que vocee más fuerte y, aunque según cuentan los próximos, está virando peligrosamente sus lealtades hacia otros, siempre ha sido camarlengo de Juan Manuel Mingo (que no "de Mingo", según consta en el frontispicio del bar"Mingo", en El Molar, cuna y solar de su estirpe). El día que Alimaña News (Redactor-Jefe) nos falte, propondré a Gatopardo que le ofrezca el puesto a este voluntarioso lacayo.

El presente follón pilla al Ministerio de Cultura y al de Educación y Ciencia con el

paso cambiado. O se dice que los Archivos Menéndez Pidal y el Olivar hay que destruirlos (que me lo creería en boca de esas dos ministras y del que viene) o se tienen que explicar y poner en manos de auditorias los extraños acuerdos que ambos ministerios se traen con Areces/Corte Inglés y que van, desde el bochornoso asunto de los libros escolares hasta todo el chiringuito de la informatización, pasando por los negocietes de desalojar edificios histórico-culturales (futuros hoteles con encanto) y trasladar a sus trabajadores a cagadas arquitectónicas con cargo al erario público. (Un día hablaremos del CSIC). La progresía siempre ha resultado barata, y los liberales se ofrecen gratis. La derecha siempre ha regateado más (otro día hablaré del misterioso caso de la casa de Ivan de Vargas, adquirida en 1986 por el Ayuntamiento de Madrid, restaurada con proyecto del arquitecto Valentín Quintas Ripoll, sede del Museo Arqueológico Municipal hasta que fue tramitado un expediente de ruina y se derribó con una urgencia inédita en los anales de la burocracia municipal, y de paso hablaré también de esa más que misteriosa Fundación Madrid Nuevo Milenio, presidida por el incansable Mingo.

Soy optimista. Un día un oscuro inspector de Hacienda perderá la cabeza y pedirá facturas a El Corte Inglés y a la Fundación Areces, y se sabrá por qué no puede salir a Bolsa El Corte-Inglés. Por mucho menos expropiaron Rumasa.

El espía que surgió del frío

LLAMAMIENTO EN DEFENSA DE LA FUNDACIÓN MENÉNDEZ PIDAL DE LOS AMIGOS DEL OLIVAR DE CHAMARTÍN

PARA PROTESTAR POR EL ACOSO Y ASALTO A LA FUNDACIÓN RAMÓN MENÉNDEZ PIDAL

Publicado el 6/7/2007 01:24 h. en Defensa del Olivar de Chamartín

Frente a la prepotencia, frente a la tiranía de la incultura, frente al desdén por el estudio y la inteligencia, frente a la necedad de los que sólo saben ofender y destruir, frente a la mugre moral, resistimos y resistiremos. Nos hemos preparado a lo largo de nuestra vida quitándonos horas de sueño y de ocio para dedicarlas al estudio; hemos renunciado a traducir en dinero nuestras aspiraciones, que se resumen en ser mejores y aprender; tenemos el orgullo de sabernos deudores de quienes dedicaron su vida a preservar nuestra historia, nuestra lengua y nuestra cultura, y somos un ejercito invencible porque nos asiste la razón. No vamos a dejar que la Fundación Ramón Areces -y quienes les aseguran su impunidad- destrocen nuestro patrimonio cultural, porque es una herencia que pertenece a la humanidad que nosotros representamos.
Todos los amigos del Olivar de Chamartín y quienes quieran manifestar su oposición al asalto y acoso que está sufriendo la Fundación Ramón Menéndez Pidal por parte de la Fundación Ramón Areces, por favor, escriban expresando su protesta a:

Gabinete de la Presidencia del Gobierno de España

Os agradeceríamos que enviárais una copia a la Fundación Ramón Menéndez Pidal

y al correo de esta bitácora, **olivarchamartin@gmail.com** indicándonos si nos dais permiso para su publicación.
El texto de la carta de protesta ha de estar escrito en el cuerpo del e.mail, porque muchos organismos rechazan los correos con archivos adjuntos por cuestión de seguridad.

Gracias en nombre de todos los que tuvimos la oportunidad de estudiar en la "Casa Menéndez Pidal" el tesoro documental que se ha recopilado y custodiado para todos los investigadores, y gracias también en nombre de las generaciones futuras de estudiosos que podrán seguir haciéndolo.

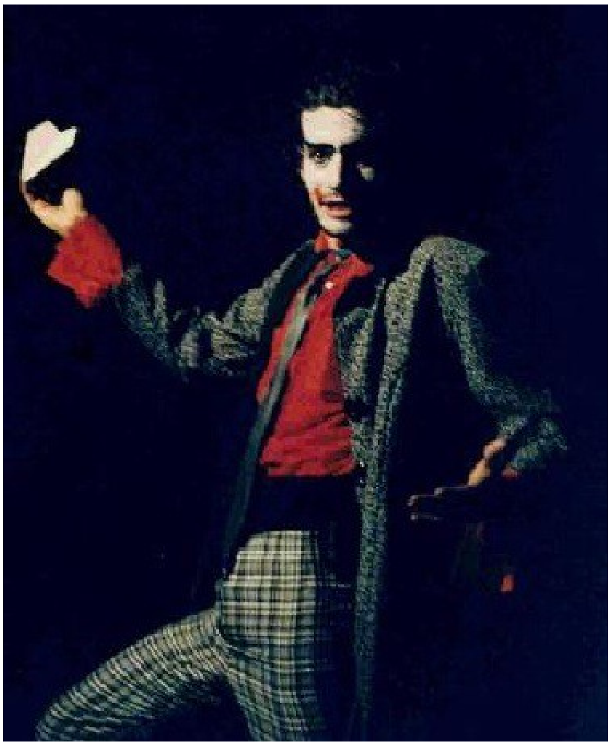
TENORIO MODERNISTA.



Fragmentos.
(...)
Dichos, por la válvula fórica o forense. DON JUAN, DON LUIS y otros efebos. Los dos primeros van a ocupar las sillas que por tradición les corresponden.

DON JUAN
Ese artefacto sedente
es para un bohemio gris.
DON LUIS
Es para mí.
DON JUAN
Sois don Luis.
DON LUIS
Sois don Juan.
DON JUAN
Precisamente.
(Se quitan la cáscara facial.)
DON LUIS
Horario no lapidemos
y a contar las fechorieces.
DON JUAN
Antes, unas predulieces
de vermut.
DON LUIS
Vermuticemos.
(Vermutizan.)
DON JUAN
Pues, señor, salí de aquí
albescente y opalino
y, arrabundífero, di

en Mónaco, porque allí
tiene el Príncipe un casino.
De féminas y de espor
horizontálica tierra,
y en ella, un gobernador
que a los puntos no da guerra
por timbar, ¿dónde mejor?
Donde hay casinos, hay juegos,
floresta, en los cercaníos;
frutesta, en los lejaníos;
vellonesca, en los borregos;
y anguilesca por los ríos.
Para la apuesta empezar,
mandé publicar en dos
periódicos al llegar:
Rest isí mesié Tenoar
pur qui desir quelque chos.
Las mónacas estatuosas,
sus caderas anforosas,
yo doliente y neurasténico...
mis pasiones de bohémico
se vieron expansionosas.
Pero como me jugué
mi dinero al ecarté,
era Mónaco muy tétrico
y tomando un kilométrico
en Milán me desgrané.
Así que en Milán me vi
otro reclam escribí,
claro está, en italianini:
Arrivato Tenorini
e non che huomo per lui;
di la principesa altese
a pescatora di angüila
di cuesto belo paese,
amerá lui, e desofïla
a tuti gli milanese.
No hubo mat, ni pul, ni espor
sin yo batir el recor
en mi automóvil montado
ni camino del Estado
que no llenara de horror.
Yo muerte a personas di,
yo carros atropellé,
sobre los mulos me fui
y todo cuanto encontré
a mi paso, lo barrí.
Así automovilizó
don Juan, y en este carné
están los que atropelló:
cuánto suman todos, yo,
como son tantos, no sé;
si lo queréis comprobar

sin matematiquizar,
os lo mostrará en el acto
de modo breve y exacto
mi máquina de sumar.
(La manifiesta.)
DON LUIS
Buscando mayorizar
de mi hálito los expandes,
dije: ¿Qué mejor lugar
tratando de flanear
más indicado que Flandes?
Movibundo y rapidero,
de Flandes tomé el camino
un mañano diciembrero
de celaje cenicero
verdente y melancolino.
Así que flandequicé,
a un esporman-Club subí,
allí treinta cuarenté,
y dobla que yo jugué
fue dobla que yo perdí.
Al verme tan... desdoblado,
me ofrendé como chofer
en casa de un millonado
a la industria dedicado
del cochaje de alquiler.
Bien me amusé, ¡Sacrenón!,
y manejando el volante
fue tanta mi diversión,
que atropellamos en Gante
a una santa procesión;
gasolineando entre gentes
apostólico-creyentes,
aplasté catorce oblatas,
ocho curas negrescentes
y veintisiete beatas.
A Berlín marché al instante,
pero cierto almacenante
de bicarbonato sódico
me conoció, y el tunante
me delató en un periódico.
Corriendo a Persia me fui
y, como en Mónaco vos,
otro cartel escribí
en persa: «Maja lají,
jala jila, jala, jos».
Inmoverá dos semanas
sin otras cuentas galanas
ni otro negocio entre manos
que reñir con los persianos
y adorar a las persianas.
En Forbules, Lantenis,
Matinés, Gardenpartis...

donde fue la gente esporman,
se cristalizó en recorman
con su automóvil, don Luis.
Por donde automovilé
el pánico introducí,
a quien quise atropellé
y hedionda peste dejé
de gasolina tras mí.
Para ver cuántos mató
don Luis, y mostrar que no
son cuentas exageráneas,
aquí están las instantáneas
que de los muertos sacó.
(Las manifiesta.)
COMENDADOR
¡Decadentes! A no estar
proclive a descaecer
había de exhaustecer
vuestra manera de hablar.
(Se descacarilla la faz.)
DON JUAN
¡Ullón!
COMENDADOR
Con doña Inés
no esperéis el desposario;
quien destroza el diccionario
como vos, a Leganés.
DON JUAN
Me hacéis brotar el risaje,
modernizar es lo estético;
lo que es del Cosmos, «Cosmético»,
¿grupo de coros? «Coraje».
De funda, «Fundamentar»;
varias calvas, «Un calvario»;
tenor de ópera, «Operario»;
comer de balde, «Baldear».
DON DIEGO
No puedo más tu cinismo
escuchar, porque es ultraje
de Cervantes al lenguaje,
y al sagrado clasicismo.
Glauco prosigue, pero, ¡ay!,
por tu lenguaje epidémico
ya no serás académico;
me lo ha dicho Echegaray.
DON JUAN
¿Quién ultrajecervanteó
por palabrizar así,
ni qué me importa, en Madrí,
ser académico o no?
DON DIEGO
Adiós, don Juan.
DON JUAN

No será
sin quitarte la careta.
(Lo ejecuta.)
DON DIEGO
¡Barro parisién! ¡Esteta!
DON JUAN
¡El marido de mamá!
(Jocundo.)
COMENDADOR
Vamos, don Diego.
(Evacua por la válvula forense acompañado de DON DIEGO.)
DON JUAN
Don Luis,
mañana continuaremos.
DON LUIS
Aquí mismo nos veremos.
(Vase.)
DON JUAN
A las verde, la reprís.
CAPITÁN
Que aquí todo el mundo se halle.
(Vase con NENUFAREDA.)
DON JUAN
Chófer.
CHÓFER
Mesié.
DON JUAN
Oye atento.
Hora gris, en el convento.
Hora glauca, en esta calle.
(Vanse.)

MUTATIS MUTANDUM
Lapso bis
Hora y lugar. Es la hora parda con irisaciones polícromas. Aspecto de celda muy chic, en un convento roquero de mademoiselles honorables. Al frente gran ventanaje por el que se especta un celaje y un campiñaje rutilantes, reverberantes y lucíparos. Una puerta univalva a cada coté. Muebles fantasiosos entre los que cuspidea una anaclítera.
Apulso prístino

DOÑA INÉS y BRÍGIDA. *La primera, habillada de monja verdegayante y escapulario carmíneo, ostenta un ingente rosario de vidriantes uvas rojas eléctricas, las cuales se incandescerán cuando yo diga «Ahora».*

BRÍGIDA
Mirad, mirad, doña Inés,
lo que os traen de la tienda.
DOÑA INÉS
¿Un libro?
BRÍGIDA
Sí, que os ofrenda
don Juan.
DOÑA INÉS

Muy bonito es.
BRÍGIDA
Don Juan lo mandó editar
y está por don Juan escrito
en verso, y el pobrecito
os dedica un ejemplar.
El manto es de piel de atún;
(Cubiertas.)
el hojaldre, piel de angula.
(Hojas.)
DOÑA INÉS
¿Y cómo al libro titula?
BRÍGIDA
Leed.
DOÑA INÉS
(Lee.)
«Flores de betún».
¡Está en blanco!
BRÍGIDA
Hay que leer
en el canto.
DOÑA INÉS
¡Cielo santo!
BRÍGIDA
De las hojas, en el canto,
hoy se escribe; es la dernier.
Las cosas andan cambiadas.
DOÑA INÉS
En el libro hay un papel.
BRÍGIDA
Para ofrendaros en él
sus flores embetunadas.
DOÑA INÉS
¡Ay, Brígida! En donjuanismo
don Juan mi pecho ha nimbado
y creo que se ha esfumado
de mi pecho el complejismo.
Cuando no está en mi presencio
siento nostalgialidad,
fulgores de oscuridad,
estampidos de silencio,
el reposo del correr,
lo claro de la espesura...
BRÍGIDA
Y del carbón, la blancura.
DOÑA INÉS
Eso.
BRÍGIDA
Vamos a leer.
(Vuelve la llave de la luz eléctrica; estará en la pared. Ahora es cuando se incandesce el rosario de que hemos tratado.)
DOÑA INÉS
¡Ay, que el papel que ha venido

en el libro es incendiario!
¡Mi mano arde!
BRÍGIDA
Es el rosario,
que se ha puesto incandescido.
DOÑA INÉS
(Lee.)
«Inés, flor de Arimatea».
¡Virgen Santa, qué incipiencia!
BRÍGIDA
Vendrá escrito en gaya ciencia,
y el pobre ripioplumea.
Vamos, no fragmenticéis.
DOÑA INÉS
«Luz que a febea derrumba,
irisácida columba
mártir de encerrosidad,
si, exorable, en este léxico
abrí vuestros miradores,
no los cerréis con temores
místicos, epilogad».
BRÍGIDA
¡Qué humildez y qué decires!
¡Qué sentires y anhelares!
DOÑA INÉS
Brígida, siento temblares...
BRÍGIDA
Seguid, seguid los leíres.
DOÑA INÉS
«Nuestros padres, mancomúnidos,
nuestra emulsión acordaron,
porque entrambos bucearon
en las almas de los dos,
y halagüeñado por esa
bipaternal proyectanza
feretreo de añoranza
remembrando sólo en vos.
Ese amor prematurente
en mi pecho voltejea
y, callado, grigritea
con un mutismo locuaz
y su fuego incrementado
se expandece y vibridiza,
se alarguece y ensanchiza
inmensitudo, voraz».
BRÍGIDA
Pobre don Juan, es un nene.
DOÑA INÉS
Al mar fue por naranjía...
y naranjas no tenía...
BRÍGIDA
La esperanza le mantiene.
DOÑA INÉS

«No podrían extinguirlo
los modernos bomberajes,
bocarregajes, mangajes
y escalajes en montón;
pues sobre mi neurastenia
el escombraje viniera
lo mismo que si cayera
sobre rosa en floración».
Ésta es la carta de un loco.
BRÍGIDA
Una carta abracadabra.
DOÑA INÉS
Yo no entiendo una palabra
de lo escrito.
BRÍGIDA
Ni él tampoco.
DOÑA INÉS
«Inés, cabello sinfónico
que mi eseyencia imaneces,
sarta de madreporieces,
libélula del Edén,
cisne del lago penúmbrico
que con su cola eucarística
en el agua traza artística
guirnalda con su vaivén,
si extericonventualizas
y tu pensamiento invaden
las suarés de Baden-Baden,
Biarritz y San Sebastián,
remembra que a los cimientos
de esos muros monolíticos
te esperan los cariñíticos
tentáculos de Don Juan».
¡Ay! Que se nubla mi vista...
Brígida, yo estoy muriendo.
BRÍGIDA
¿Y quién no se muere oyendo
lenguaje tan modernista?
DOÑA INÉS
«Remémbrate de quien plañe
de tus amores la inedia
desde la hora azul y media
hasta sonar la hora gris;
remembra que existe un hombre
que los espacios cruzara
y por tu ventana entrara
con que sólo hicieras: ¡Chis!».
¿Por la ventana? Imposible.
¡Veintidós metros de altura!
BRÍGIDA
Pudiera.
DOÑA INÉS
¿Cómo?

BRÍGIDA
Criatura,
con su globo dirigible.
DOÑA INÉS
«Adiós, lavanco lucíparo;
adiós, mosca fragantina;
guarda y meditabundina
los decires que aquí van.
Y si repudias la celda,
volará sobre ese risco
de tu conventual aprisco
el globo de tu Don Juan».
¡Ay! ¿Qué letal bebedizo
es el que me dais aquí
que como verde enfermizo
zigzaguea sobre mí?
BRÍGIDA
¡Mirad cuán raudo navega
ese globo, Doña Inés!
(Foro izquierda.)
DOÑA INÉS
¡Atraca!
BRÍGIDA
¡Baja!... Ya llega
el aeronauta...
(Vase derecha.)
DOÑA INÉS
¡Él es!

Apulso bis

DOÑA INÉS. Del ventanal emerge DON JUAN y se detiene ventanalibundo.

DON JUAN
¡Inés!
DOÑA INÉS
Os prohíbo entrar.
DON JUAN
Que hace dos días, repara,
salí de Guadalajara;
permíteme descansar.
(Ingreda.)
Deja, pues, neurastenura
y perdona si un momento
saboreo del convento
la nostálgica foscura.
(En la anaclítera.)
¿No es verdad, fauno de amor,
que a la orilla del aguaje
fulge más puro el lunaje
y se halitea mejor?
La brisa que errabundea
entre nimbos de colorios

de los boscajiles florios
que ese fluvio regadea;
el río en que ondulantea
por su transpuril color
el cantoso pescador,
monocorde y monorrítmico,
¿no es verdad, fauno aromítmico,
que son hálitos de amor?
El silfo que grácil salta,
sin que sus dinas extinga,
sobre helénica siringa
desde la fronda más alta;
el prestigio con que exalta
su vozneo trinador
el exulto ruiseñor
de acento epitalamítmico,
¿no es verdad, fauno cielítmico,
que son desgajes de amor?
Y estos hablares que van
restando desesperanza
a la anémica añoranza
del neurótico don Juan,
y cuyos gemires van
orquestando en tu interior
un foco vesubiador
hetáirico y graderítmico,
¿no es verdad, fauno florítmico,
que son gérmenes de amor?
Y esas dos lícuas libélulas
que en tus pupilas pululan
y erráticas funambulan
ofrendándome bebélulas
nefeloidares, a no vélulas,
en su autosupercador,
y el purpúreo sonrojor
de tu frontis eburnítmico,
¿no es verdad, fauno sublítmico,
que son trunqueces de amor?
¡Oh! Sí, hierática Inés,
de luz febea despojos,
timpanearme sin sonrojos
azulentes, amor es;
mira a tus zócalos, pues,
el intrínseco calor
de este pecho propulsor
de espíritu antiamorítmico
salmodiando, fauno enrítmico,
la infinidad de tu amor.
DOÑA INÉS
Silenciad, don Juan, por Dios,
que tanta palabra glauca
me perplejiza y embauca
labializándola vos.

Silenciad, que vuestro acento
el espíritu me encona
y me transforma en la dona
móvile cual piuma al vento.
Vuestra palabra divina,
vuestro lenguaje selecto
me producen el efecto
de la capilocarpina.
Yo voy a ti enamorada,
fluyente y desvoluntiza
como el agua se desliza
por una tabla inclinada.
A mi voluntad monomia
extremecen tus hablares,
me conturban tus mirares
y tu voz me manicomia.
¡Don Juan! Mi razón se pierde;
ámame por compasión
o muere mi corazón
de neurastenura verde.
(Allá ellos.)
DON JUAN
¡Qué dolencia tan artística!
DOÑA INÉS
Ahora de moda está...
Mas silenciad... ¿Qué hora da
en la torre?
(No suena nada.)
DON JUAN
La hora mística.
DOÑA INÉS
¡Hora lechuzante..., inmóvil!
DON JUAN
Silenciad, oigo un rumor...
(Se oye bocina de automóvil.)
Apulso trino

Dichos. Por la derecha BRÍGIDA.
BRÍGIDA
¡Señor!
DON JUAN
¿Qué?
BRÍGIDA
El comendador,
que viene en un automóvil.
(Vase derecha.)
DOÑA INÉS
¡Mi papá!
(Se desmaya en la anaclítera.)
DON JUAN
¡Desvanecida!
(Al foro.)
¡Ciutti, abrid el gasógeno

y el globo llenad de hidrógeno!
(Toma a DOÑA INÉS en brazos.)
Hay que volar en seguida.
La fatalidad cruel
me hace volar a la luna.
¿Qué me importa? Será una
grandiosa luna de miel.
(Vase por foro llevándose a DOÑA INÉS. BRÍGIDA, detrás. Acto seguido se oye dentro.)
¿Estáis todos?
MUCHEDUMBRE
¡Sí!
DON JUAN
¡A una! ¡A dos! ¡A tres!
(Se ve pasar el globo por el fondo con DON JUAN, DOÑA INÉS, BRÍGIDA y CHÓFER.)

MUTATIA MUTANDUM
Lapso trino y póstumo
Hora y lugar. Hora nictalopente, o sea la hora amarilla con pintas negras. Lugar necrodúlico. Estatuencias irisadas en colores rutilantes. Cipreses rojos. Luna cuadrada. Un enjambre de fraganciosálicas flores circunda la pétrea y marmórea estancia de la ex DOÑA INÉS. Lo demás, allá el Apeles.
Apulso prístino
PRAXITELES.
Firmofeché. La campana
tocó la hora amarilla.
La coleteante Sevilla
abandonaré mañana.
Tornaré a la patria mía
cuando alborezca el expando
luciernaginoso, cuando
se desenchiquere el día...
¡Ah! Mármoles sitibundos
que esculturé con afán,
los sevillanos vendrán
a veros, absortibundos;
y al sorber del panteón
las nuevas necropolieces,
mostrará admiraciones
de glauca generación.
Siglos y siglos, pasados,
persistiréis en los puestos
en que os puse, mis enhiestos
remembros petrificados.
¡Oh! Pomas de mi intelecto
que con mi cincel mondé,
y en las que exterioricé
personificante efecto,
aquél que os formalizó
os ruega que los laureles
recojáis del Praxiteles
que forma vívida os dio.

Apulso bis

PRAXITELES y DON JUAN.

DON JUAN
Me alegro de verle bueno.
PRAXITELES
Perdonad, es la hora parda
y el dueño en su casa guarda
las llaves.
DON JUAN
¿Sois el sereno?
PRAXITELES
La equivocación disculpo...
DON JUAN
Como con linterna vais
y la hora me cantáis...
PRAXITELES
Yo no sereneo, esculpo.
DON JUAN
Ah, sois vos el escultor
que esto ha panteonizado.
PRAXITELES
El que ha praxiteleado
cuanto veis en derredor.
Los que enterrados están,
intelectualentes fueron
que poesías leyeron
del glaucófilo don Juan.
DON JUAN
¡Sapristi! ¿Tan glauco fue?
PRAXITELES
Mucho; cuentan que en la fonda
tomaba sopas con honda
y merluza con rapé.
Para él eran Calderón,
Lope, Zorrilla y Cervantes
unos percebes andantes.
DON JUAN
Y le sobraba razón.
PRAXITELES
(Señalando las estatuas.)
Todo se compró a propósito,
y el pago tocatejeado;
éste es de cemento armado,
(Mejía.)
como el del tercer depósito.
DON JUAN
(Delirante.)
Aquí estoy, piedras nerviosas,
pletórico de armonía,
enfermo de poesía
y de ideas verdegosas...
PRAXITELES
(Aparte.)

¡Un glauco!...
DON JUAN
(Delirando.)
La fronda..., el florio,
la tortuga cataléptica
y la libélula escéptica...
PRAXITELES
Señor...
DON JUAN
Soy don Juan Tenorio.
PRAXITELES
¡Don Juan Tenorio!
DON JUAN
Sí tal;
y si pronto no te alejas
y las llaves no me dejas,
te recito un madrigal.
PRAXITELES
Tomad.
(Aparte.)
No quiero «foscura»,
ni «gemmas», no «flatos líricos».
Ahora, los guadalquivíricos
le aguanten la guilladura.
(Ha entregado las llaves y emigra.)

Apulso trino
DON JUAN, deambula.

DON JUAN
Mi genitor se gastó
en esto mi metalía;
a mí, plin, al otro día
la hubiera naipeado yo.
No protestaréis de mí
si con la parca os casé;
si mal os talamicé,
bien os necropolicí.
Impóndera es, ciertamente,
la idea del panteonaje,
y... place al corazonaje
la noche oscura y silente.
Como esta noche tan calma,
pasé más de mil a solas
con el ladrar de las olas
y los molinos del alma.
Sí, pasados esos lapsos,
cuyos remembros me pánican,
siento que aquí me titánican
opalescentes colapsos.
¡Oh! Tal vez me los emita,
como albescencias de aurora,
esa sombra auspiciadora

que, por mis versos, no halita.
(Rumbea hacia la pétrea remembranza de DOÑA INÉS, palabreándola reverente.)
Lapidente doña Inés,
corporal e inanimácea,
deja que un alma violácea
plaña brevente a tus pies.
Te llevé, tiempo a través,
en mi cerebral armario,
y hoy, que, como antidotario,
tu amor busca con afán,
te halla metida don Juan
en tu estuche funerario.
En ti sólo remembré
desde que Villadieguí,
y, desde que me esfumí,
volver encefalicé.
Yo tan sólo esperancé
de tu espíritu el santuario,
y hoy que retorna precario,
cual lacrimente caimán,
solo se encentra don Juan
con tu estuche funerario.
Liliácica doña Inés,
cuyo peplo de bellencia
ergastuló en sepultencia
quien plañendo está a tus pies,
sí, de esa piedra, el revés
te refleja el inventario
del que te adoró anhelario
como al fauno adoró Pan,
localidiza a don Juan
en tu estuche funerario.
Germinaste por mi bien;
por ti, vívida camelia,
he pasado en la eutrapelia
de la vida en el andén.
Sí, en el momento presén,
como efluvio de incensario,
veo un ser imaginario
que nimbifica a don Juan,
y se exhaustece mi afán
en tu estuche funerario.
¡Oh! Inés de mi convivencia,
lejánica luz de Sirio,
madrigalizante lirio
de mi bohemia existencia,
si de tus labios la esencia
llega al celestial estuario
y hay alguien tras el muestrario
de astros que fulgiendo están,
di que atalaye a don Juan
en tu estuche funerario.
(Gravitoequilibra en el aposento necrodúlico, eclipsando su personal frontispicio; y

mientras estatiquiza, una emanación nefeloide que emerge de la vitrina necrodúlica pantallea la pétrea remembranza de DOÑA INÉS. Cuando la nefeloide emanación se esfuma, la pétrea remembranza se ha invisibilizado. DON JUAN surge de su estupefacientismo.)
Esa luna cuadrantal
las glauqueces me refresca;
luna miliunanochesca,
abracadabrante y... tal.
¡Cielos! En el sustental
no está el mármol estatuario;
aquel contorno Inesario,
¿fue de mi mente un desmán?

Apulso cuarto

DON JUAN. La cabeza de DOÑA INÉS aparece en el cáliz de una rosa, tulipán, girasol o de otra megaflor.

DOÑA INÉS
No hay tal estuche, don Juan,
ni tal mármol funerario.
DON JUAN
¡Aún vives! ¡Dime cómo...!
DOÑA INÉS
Vida me dio Floralia.
(Música dulcídea dentro; aria de las flores en Fausto.)
Al morir y enterrarme en este sitio
he sido, en estas flores, transformada;
mis colores, flores,
mis despojos, plantas.
Mi cerebro dio jugo a las violetas,
mi tronco, a los claveles y a las dalias;
los floralios colores son los míos,
y mi aliento, enfriado, su fragancia;
mis colores, flores,
mis despojos, plantas,
flores gilbas,
flores gualdas,
flores grises,
flores glaucas.
DON JUAN
Pues ya era mía; voy a trasplantarte.
DOÑA INÉS
De hacerlo, guarda;
en tocando tus manos estas flores
quedarán marchitadas
y dejarán de ser para in aeternum,
mis colores, flores,
mis despojos, plantas.
DON JUAN
(Aparte.)
Cuando flautas, pitos,
cuando pitos, flautas.

DOÑA INÉS
Si dejas, por impura,
la poesía glauca,
vendrás al lado mío cuando mueras;
tus raíces serán entrelazadas
con las mías, pues han de ser entonces,
tus colores, flores,
tus despojos, plantas.
(Se oculta. Cesa la melopea.)

Apulso quinto

DON JUAN
¡Pasad, sombras zigzagueantes,
pasad, nubosos arpegios
de amorosos florilegios
y de nimbos ronroneantes!
¡Flores abracadabrantes
tintadas de rosicler,
dejad de retrotraer
a mi cerebro cansino
el aromencia divino
del ángel que os diera el ser!
(Pausa.)
Culpa mía no fue; mordiome un glauco
y el virus me infiltró de la glaucencia
y, metido de lleno en el embauco,
en vez de «aroma» pronuncié «aromencia».

Apulso sexto

DON JUAN, ESTATUA DEL COMENDADOR y otras.

ESTATUA DEL COMENDADOR
Aquí estoy.
DON JUAN
¡Cielos!
ESTATUA DEL COMENDADOR
Don Juan,
vienen en mi compañía
los que con tu poesía
mataste con glauco afán.
DON JUAN
¡Yo! ¡Jesús!
ESTATUA DEL COMENDADOR
¿De qué te alteras,
si al glauco nada hay que asombre,
pues pinta morado al hombre
y verdes las calaveras?
DON JUAN
¡Terrible verdad!
(Campanas y música alegre.)
ESTATUA DEL COMENDADOR

En vista
del modo con que procedes
en todo, veré si puedes
con mi cena modernista.
DON JUAN
¿Y qué me das de yantar?
ESTATUA DEL COMENDADOR
Ahí, fuegaje; ahí, cenizaje.
DON JUAN
Se me encrespa el cabellaje.
ESTATUA DEL COMENDADOR
Hoy vas a combustionar.
DON JUAN
¿Y esas campanas que allá
suenan híbridas?
ESTATUA DEL COMENDADOR
Por ti
doblan.
DON JUAN
¡Doblando por mí!
¡Que desdoblen!...
ESTATUA DEL COMENDADOR
No será.
DON JUAN
¿Y aquella gente que reza?
ESTATUA DEL COMENDADOR
Es tu entierro.
DON JUAN
¿Muerto yo?
ESTATUA DEL COMENDADOR
El globo hecatombizó
y caíste de cabeza.
DON JUAN
¡Ah! En todo lo que escribí
el castellano insulté,
palabras introducí
y con ellas consoné,
es decir, consonantí;
el glauco quintaesencié
si el consonante fue en e;
si fue en i, quintaesencí,
y en todo escrito dejé
remembro glauco de mí.
ESTATUA DEL COMENDADOR
Don Juan, a los cielos ruega,
pues no hay conmiseración;
dame la mano.
DON JUAN
¡Perdón!
ESTATUA DEL COMENDADOR
Ven conmigo a la delega.
DON JUAN
Aparta, forma estatuida,

suelta mi braceante remo,
que aún queda una gemma, o gemmo,
del nenúfar de mi vida.

Apulso final

Dichos y DOÑA INÉS.

DOÑA INÉS
Don Juan perdonado está;
de lo glauco acepto el rito
porque, de lo glauco escrito,
algo bueno quedará.
Cesad, cantos necrodúlicos.
(Cesan los cantos.)
Callad, clérigos de bronce.
(Cesan las campanas.)
Sombras, volved al esconce
de vuestros nichos abúlicos.

(Melopea; apoteosis con ángeles modernistas; llevan alas, esmoquin de color, calzón corto y sombrerito Frégoli.)

DON JUAN
¡Estro glauco! Gloria a ti.
Dirán los guadalquivíricos
que con mis glaucismos líricos
un extremo introducí;
al contrario, queda aquí,
a los clásicos, notorio
que un poeta perfunctorio
de subintelectualencia
refrescó con su glaucencia
el anticuado Tenorio.

(Se desatabilla el caladaris.)

UNO DE LOS SUYOS (II)

De corruptione.
Margarita Vázquez de Parga.

Si Giulio Andreotti hubiera escrito un *Tratado sobre la Corrupción*, yo no tendría que gastar mi tiempo y el del lector explicando aquí en qué consiste ese complejo arte de doblar voluntades. Pero Andreotti se nos marchará sin caer en la tentación de hablar de si mismo.

La corrupción puramente económica no es corrupción. Será fraude, mercadeo, soborno o prevaricación, pero no corrupción. Para que ésta exista debe producirse la degradación moral del sujeto comprado, la destrucción de su escala de valores. La crisis que esto produce en el individuo corrupto le lleva a abrazar con fervor de converso la nueva causa o a desarrollar una *"filosofía"* del posibilismo con que lavar su imagen. Pero también es necesario que el corruptor, además de la voluntad de soborno, tenga el propósito de simonía, de adquirir y depravar a la *"victima"*. La mayor tragedia de un corrupto es que, en el acto de venderse, el comprador adquiera sus servicios pero no quiera su alma para nada. *"Le compro su virginidad, pero quédese con su inocencia porque no me interesa"*

Con toda esta mandanga discursiva lo que quiero decir es que: ni Juan Manuel de Mingo (o *Fundación Ramón Areces* o *El Corte Inglés*) sabe corromper ni sus trapicheos, por alta que sea la cifra de euros, adquieren la categoría de corrupción. Lo cual es triste porque sus comprados tienen vocación de ser corrompidos. Y estamos en un país donde,

si fuera por los españoles, sólo quedaría incorrupto el brazo de Santa Teresa. Dicho en lenguaje de los grandes almacenes: están comprando material de rebajas a precios de firmas exclusivas. Lo que de Mingo entiende por situar *"uno de los suyos"* en los tejemanejes del poder consiste en apadrinar, durante años, al tonto de turno que le presenta otro tonto situado, con la esperanza de hacerlo rentable algún día. Como piensa un cacique de aldea. El problema es que la vida va rápida, y los corruptos se impacientan, asoman la patita, cometen indiscreciones, hay desgana en el trabajo y falta de criterio en la selección. La fórmula te beco, te publico un libro o te doy trabajo y, cuando tengas un cargo, me das la contrata de unos servicios huele, como poco, a rancio.

El caso de un ilustre miembro de la Fundación Ramón Menéndez Pidal es prototípico y revelador. Margarita Vázquez de Parga, hermana del Conde de Pallarés, es miembro de una familia bien venida a menos, que no llegó nunca a justificar sus aspiraciones de ir a más. Su fervorosa prédica en favor de la causa socialista es recompensada con el cargo de Directora General de Archivos y Bibliotecas en 1988, que la saca de un oscuro puesto como bibliotecaria. Hasta ese momento sus logros curriculares alcanzan dos obras que nadie catalogaría como cumbres de la archivística: "*Las publicaciones periódicas de biomedicina en las bibliotecas españolas*" (Madrid, Comisaría Nacional de Bibliotecas, 1977) e "*Historia, fuente y archivo oral*" en "*Diseños de proyectos de historia oral*", (Madrid, 29-30 abril de 1988). Con el cargo de Directora comienzan sus contactos con las grandes empresas y se despierta su interés por los magnos proyectos.

En 1988 firma un "*contrato de colaboración*" con la *Fundación Ramón Areces* y con *IBM* para la digitalización de los fondos documentales del Archivo de Indias. Según la propaganda de la época, a estas alturas ustedes y yo ya podríamos acceder desde nuestros ordenadores a los maravillosos documentos del Archivo. *La Fundación Ramón Areces* aparecía ante el respetable como el Mecenas preocupado por la salud de nuestro patrimonio histórico. Nunca se dijo que el interés de esta Fundación, en éste y otros muchos "*proyectos de colaboración*" posteriores, radicaba en que había creado con IBM una empresa nominada ambiguamente *Archivos y Bibliotecas AIE* cuya actividad era la consulta y suministro de aplicaciones y programas informáticos y que era la que hacía el negocio. Éste, como otros tantos proyectos del Ministerio de Cultura de aquellos años, está pendiente de una revisión y evaluación histórica y fiscal. Mientras tanto consulten la página Web del Archivo de Indias o el Archivo mismo y disfruten.

La buena sintonía de Margarita Vázquez de Parga con la *Fundación Ramón Areces* hace que entre de la mano con Isidoro Álvarez en 1994 en el Patronato de la *Fundación Ramón Menéndez Pidal*, entidad a la que ya había *asesorado* y financiado para otro de sus fabulosos proyectos de digitalización, el *CINDOC*, cuyos resultados hablan por sí mismos. La caída del gobierno socialista en 1996 habría truncado una brillante carrera, si no fuera porque , de nuevo, la filantrópica *Fundación Ramón Areces* decide acudir en socorro del necesitado y contratar a Vázquez de Parga como "*experta de la sección informática de El Corte Inglés", "responsable de educación informática del Corte Ingles", "Consultora de gestión informática del Corte Inglés", "Consultora de gestión documental y archivos de El Corte Inglés", "Experta en consultoría informática"* y otros tantos títulos acompañados siempre de *"Ex-directora general de archivos estatales".*

El agradecimiento de Vázquez de Parga es tal que renuncia definitivamente a proyectos tan de rojo trasnochado como el de "*recuperación de fuentes del exilio filosófico español"* y se mete de hoz y coz en la nueva fe del Espíritu de la Empresa y la Sociedad Globalizada e Informatizada. Son decenas de master, seminarios, cursillos,

conferencias, donde la experta de *El Corte Inglés* predica las bondades de la digitalización (se trabuca siempre un poco con los términos técnicos informáticos, pero yo creo que la nubla el entusiasmo; seamos benévolos). *"La tecnología va a condicionar toda nuestra vida"* -dice en un desliz del subconsciente-: "*uno de los retos fundamentales de los archiveros es adaptarse a estos cambios porque, si no lo hacemos, surgirá otra profesión que se ocupe de ello*". Razón de peso científico donde las haya. Libre ya de las ataduras de la tradición ilustrada, hace un mea culpa: *"En buena parte, hemos sido responsables del retraso en el proceso porque damos mucha trascendencia a la cultura de los archivos y no hemos sabido transmitir a los responsables de la administración la importancia de la organización de los documentos, que facilita la vida de los ciudadanos"* (Curso de Informatización Digital, Laredo, 1999).

En estos últimos años se nota que le pesa llevar sobre los hombros la responsabilidad de convencer a una sociedad atrasada de que su vida sería más fácil si se la organizara *El Corte Inglés*. Insiste en la necesidad de *"nuevos modelos estratégicos y de gestión financiera para desarrollar un sistema integrado de información económica que garantice la evolución al futuro".* Estas y otras ideas semejantes las defendió en 2003, en un encuentro Universidad-Empresa, donde coincidió con el Rector de la Complutense, Rafael Puyol quien concluyó con una impagable máxima *"Si no somos útiles a la empresa, ésta no va a invertir en nosotros"*

Yo creo que no tengo que explicar por qué Margarita Vázquez de Parga, patrono de la Fundación Ramón Menéndez Pidal no ha movido un dedo, no ha firmado un escrito, no ha hecho una llamada telefónica ni enviado un e.mail apoyando la campaña para la conservación del Olivar de Chamartín ni de los valiosos archivos que en él se guardan.

Quién tiene que explicar qué hace en esa institución semejante personaje es la Fundación Ramón Menéndez Pidal.

Lo peor está por llegar. Esta señora ha sido nombrada por la ministra Carmen Calvo, vocal de la Junta Superior de Archivos el 22 de diciembre de 2005. Sigue estando a sueldo de El Corte Inglés, y *"El Corte Inglés se lleva en la cabeza y en el corazón"* que decía Ramón Areces.

Y quiero terminar como sólo Gatopardo lo sabe hacer: ¡Ayudad a Margarita! ¡Comprad su última opus magna!: "*La aplicación integrada de El Corte Inglés para la gestión integrada de los Archivos".* De venta en todos sus almacenes. Parking gratuito.

Más información:

El País, 19 set. 1996, sobre su cese:

"Margarita Vázquez de Parga desvinculó su cese de las declaraciones de Javier Tusell del pasado 11 de septiembre en las que señalaba que el Ministerio de Cultura no tenía ningún interés en facilitar a la comisión de expertos que habrá de decidir sobre los *papeles de Sal*amanca la documentación requerida. Esas declaraciones de Tusell provocaron que el secretario de Estado de Cultura, Miguel Ángel Cortés, decidiera la apertura de un expediente informativo para dilucidar si se había producido una negligencia. "Me resulta absolutamente sorprendente esa tesis", declaró Vázquez de

Parga. "Hemos tenido el verano por medio y la documentación ya estaba prácticamente a punto. Pero es que, además, hay que desmitificar su importancia. Se trataba de meros recortes de prensa que describían la evolución del conflicto".

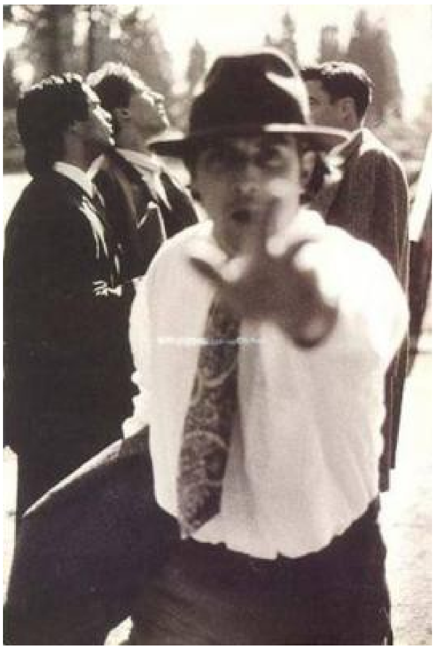
UNO DE LOS SUYOS (I)



A Manuel Vicent, maestro.

"Hace falta siete generaciones para aprender a tener dinero"

De ignobilitate.
Juan Manuel Mingo Contreras

Gatopardo **(1)** es una de esas mujeres que recorre las trincheras sin notar las picaduras de las pulgas ni la comezón de los piojos. Nunca sabré si no se da cuenta porque está iluminada por la causa de la justicia o porque tiene una piel correosa como la de una mula.

Diego Catalán también estuvo muy amable conmigo: durante 55 segundos. En el momento en que le expuse que quería contrastar algunas informaciones sobre las coacciones que estaba sufriendo la Fundación Ramón Menéndez Pidal por parte de la Fundación Ramón Areces, así como de otras "*altas instancias*", el señor Catalán recurrió a toda una batería de fórmulas prosopopéyicas sobre "la *tradicional amistad*" interfundacional, el inviolable secreto intrafundacional y su personal albedrío de no rozarse con prensa "*amarilla*" (servidor, que gasta un 45)

Lo exacto y verídico es que desde el mismo momento en que la Fundación Ramón Menéndez Pidal inicia discretas gestiones, en las administraciones central y autonómica, para que se declare Patrimonio Histórico, el Archivo, la Casa y el Jardín del Olivar de Chamartín, la Fundación Ramón Areces (propietaria de la casa y los terrenos donde se aloja), corta todas las subvenciones de investigación, publicación, etc. a las que se había comprometido con la FRMP. Igualmente interrumpe su contribución económica para el mantenimiento físico de lo que, moral y políticamente, es un patrimonio del pueblo de Madrid y de cualquier individuo amante de la cultura. Siguiendo su habitual estrategia de matar moscas a cañonazos **(2)** amenazan, presionan y engatusan a lo que ellos consideran "*puestos claves*" para intentar parar una operación que afecta muy gravemente a sus intereses urbanísticos y económicos.

El intrépido coronel que dirige las maniobras es uno de los presidentes-consejeros de la Fundación Areces, Juan Manuel Mingo Contreras. Juan Manuel Mingo ha ejercido, desde siempre, las funciones de martillo pilón de Isidoro Álvarez. Cuando había que dar dos voces a Cuevas, en la CEOE, o ningunear a algún ministro, recordándole favores y facturas, se enviaba a Mingo. Como Manuel Fraga, es un hombre absoluta e incondicionalmente fiel a su amo, con la obediencia ciega derivada de la fe en la jerarquía. Si el Corte Inglés lo necesitara como modelo para exhibir los gayumbos de temporada, este octogenario posaría con el mismo entusiasmo que Don Manuel en las aguas de Palomares. Frente a Florencio Lasaga Munárriz que desempeña el papel de ejecutivo culto, educado y presentable de El Corte Inglés, a Juan Manuel Mingo se le relega a otras tareas quizás menos lucidas socialmente, pero más efectivas y provechosas. Por eso Isidoro Álvarez delegó en él el control de una de las "joyas de la corona", el grupo INDUYCO, cuyo propietario absoluto es la Fundación Ramón Areces.

INDUYCO, entre otras actividades, agrupa toda la producción textil de El Corte Inglés y sus decenas de firmas comerciales que abastecen, además de a sus centros comerciales, a los ejércitos y fuerzas de seguridad de varios países. Su éxito y rentabilidad está basado en el abaratamiento de todos los componentes del proceso industrial. Desde el material hasta la llegada de la mercancía a los almacenes. En medio del proceso se hallan decenas de miles de trabajadoras y niños, de Marruecos o China, explotados en jornadas de 12 y 14 horas, sin cobertura social ni sanitaria y con enfermedades graves derivadas de las condiciones de esclavismo laboral. Pero así se hacen los Imperios y Don Ramón Areces también empezó de dependiente. En España, las fábricas que dependen de INDUYCO rara vez aparecen entre las preocupaciones,

siquiera dialécticas, de los Sindicatos y constituyen un ejemplo de lo que puede ser el Timo del Toco Mocho elevado a categoría de la alta finanza.

Véase el ejemplo de Valdemoro: INDUYCO (Juan Manuel Mingo) cambia 16.000.000 m2 edificables que tiene en el Majuelo por 188.000 m2 (recalificables) que tiene el Ayuntamiento de Valdemoro en el área noroeste del municipio, junto a la carretera que enlaza con el Parque temático de la Warner. INDUYCO ofrece crear una fábrica que dé trabajo a 2.500 personas y el listísimo alcalde ofrece a la ciudadanía doscientas viviendas "*con alguna protección*" en la parcela de El Majuelo. No sabemos si Mingo ofreció además al alcalde una licuadora para su señora y una play-station para los niños.

Comprenderán que a este chamarilero y mercader de grueso no ha podido sentarle bien que más de tres mil metros cuadrados de la milla del oro de Madrid se le hayan inmovilizado con el cepo de la declaración de conjunto histórico-cultural de máxima protección. A la hora de defender la hacienda del amo, a Juan Manuel Mingo le preocupa tanto la cultura y la legalidad como las reiteradas denuncias por las condiciones inhumanas de trabajo en INDUYCO que Intermon-Oxfam ha realizado.

Para entender los medios y modos de presión de este caballero y de la Fundación Areces hay que desechar esa idea truculenta y cinematográfica de que *El Corte Inglés* actúa como la *Maffia* y su cúpula de poder es un trasunto de una *famiglia* a lo Mario Puzzo. Por lo pronto El Corte Inglés no mata. Aunque alguien pueda quedar mal parado después de haber comido en sus restaurantes, pero no hay estudios clínicos que hayan demostrado que el reflujo gastroesofágico o la gastroenteritis de algunos clientes sea por las *delicatessen* perpetradas en sus cocinas.

A la familia Areces y a sus ricos criados no les atrae el poder en sí. Les atrae el dinero. Y no los miles de millones de euros, aunque los tengan. Les gustan las "*perras*", los "*duros*", los billetes. Son personalidades acuñadas en la indigencia intelectual de una España pobretona, vocinglera y ostentosa y su arquetipo profundo es el cacique ante el que se quitaron la gorra sus padres, sus abuelos y sus bisabuelos.

No sé que decirte, supongo que debes tener tus razones en forma de pueba.
Hasta ahora al Corte Inglés la he considerado una empresa modélica, siempre comparándola con el resto de las grandes empresas españolas y las europeas de su ramo.
Es evidente que para llegar donde ha llegado se ha tenido que llevar por delante muchas cosas, demasiadas para mi.
Conozco bastante bien la empresa, algunos de sus gerentes y parte de la familia dirigente. Si algo tengo que decir de ellos es más bueno que malo.
Bien... seguiré leyendote y esta vez copiaré los documentos, supongo que no te sabrá mal. Después de los ataques informáticos que has recibido es lo más prudente para seguir leyéndote. El Corte Inglés posee una de las mejores empresas de programación del mundo.

Un abrazo.

El Señor Mingo es una persona muy digna y merece un gran respeto, debido a que gracias a su persona ha hecho de un negocio Español que comenzó en una tienda de ropa que se convierta en una de las mayores empresas de España con un capital tremendamente grande.

La causa de esta conversión es fruto del esfuerzo, empeño y trabajo que el Señor Mingo ha puesto durante más de medio siglo.

Por ello considero que los comentarios escritos en esta página no tienen valor alguno, sino el de la ofensa pública de una gran persona y sobre todo trabajadora.

CARTA DE RESPUESTA DE LA FUNDACIÓN RAMÓN MENÉNDEZ PIDAL A LA FUNDACIÓN RAMÓN ARECES SOBRE EL ANUNCIO DEL CAMBIO DE CERRADURAS

Publicado en la bitácora Defensa del Olivar de Chamartín , que recomendamos Véase los antecedente al final.

FUNDACIÓN RAMÓN MENÉNDEZ PIDAL
C/Menéndez Pidal, 5
28036 Madrid

Don Juan A. González-Palomino Jiménez Secretario General de la Fundación Ramón Areces
C/ Vitrubio, 5
28006 MADRID

Madrid a 21 de Junio de 2007

Muy señor mío:

Recibo su carta del 12 de junio (echada al correo el día 13 por el notario don Francisco Javier Pérez de Camino Palacios), respecto al estado de conservación de la "Casa Menéndez Pidas", sede de la Fundación Ramón Menéndez Pidal, tema sobre el que le hago constar **los** siguientes hechos:

La "Casa Menéndez Pidal" y su jardín han recibido la máxima protección por parte del Excelentísimo Ayuntamiento de Madrid gracias a las gestiones y esfuerzos de la Fundación Ramón Menéndez Pidal, esfuerzos que la Fundación Ramón Areces se ha negado a compartir: no consta una sola gestión, petición, acción o palabra por su parte para que este conjunte emblemático fuera valorado ni protegido por las autoridades.

Para su tranquilidad y la de la Fundación de que usted es Secretario puedo asegurarle que la "Casa Menéndez Pidal" se halla en perfecto estado de conservación, gracias a los desembolsos que viene haciendo la Fundación Ramón Menéndez Pidal, gastos que, en gran parte, corresponden a la Fundación Ramón Areces como propietaria del inmueble y que, desde hace tres años, la Fundación Ramón Areces se ha negado a asumir.

El jardín se halla asimismo en un estado inmejorable, habiéndose llevado en él a cabo todas las tareas necesarias para que merezca su catalogación como jardín histórico. Las autoridades y técnicos del Ayuntamiento de Madrid que han visitado en diversas ocasiones la sede de la Fundación Ramón Menéndez Pidal y su jardín histórico así lo han constatado. La Fundación Ramón Areces también podría haberlo comprobado, antes de irrumpir destempladamente en Menéndez Pidal 5, si hubiera tenido la cortesía de acordar una cita , escribiendo o llamando a la Fundación Ramón Menéndez Pidal desde su Secretaría en horas hábiles, o, para cualquier urgencia o comunicación intempestiva, a lπs teléfonos particulares mío o del Secretario General de la Fundación Ramón Menéndez Pidal que obran en su peder.

Aunque el Servicio de Seguridad de la Fundación Ramón Areces suele tomar funciones propias de secretarios o ugieres, ese cuerpo no es el adecuado para establecer relaciones entre Fundaciones culturales.

Desde un punto de vista científico-cultural, tanto la labor específica de la Fundación Ramón Menéndez Pidal, como su colaboración con otros organismos y su ayuda al público investigador, han dado los frutos que a ustedes les consta por la abundante documentación que les ha sido enviada y que se halla recogida en las Actas de la Junta de Patrones de la Fundación Ramón Menéndez Pidal, de la que es Patrono el presidente de la Fundación Areces, Don Isidoro Alvarez, patrono que no se ha dignado a acudir a una sola convocatoria, ní a acusar recibo de nuestras comunicaciones ni a contestar una sola carta desde la aprobación de los Nuevos Estatutos de la Fundación Ramón Menéndez Pidal de 29 de junio de 2005

FUNDACIÓN RAMÓN MENÉNDEZ PIDAL
C/Menéndez Pidal, 5
28036 Madrid

Todas estas cuestiones podrían haberse aclarado, si la Fundación Ramón Areces no se hubiera negado sistemáticamenrte , desde hace tres años, a convocar la Comisión Mixta , cuya celebración semestral es preceptiva.
En consecuencia, ponemos en su conocimienton que:
1º. Cualquier intento por parte de esa Fundación de cambiar las cerraduras de los accesos a la finca o inmueble de referencia constituiría un hecho delictivo que la Fundación que presido no está dispuesta a tolerar.
2º. En todo caso, la Fundación Ramón Menéndez Pidal se reserva el ejercicio de cuantas actuaciones y acciones pudieran asistirle en sus derechos ante cualesquiera instancias públicas, judicialers, etc., así como las correspondientes
llamadas de atención ante la opinión pública sobre la desagradable situación generada por la Fundación Ramón Areces.

Recibo su carta del 12 de junio (echada al correo el día 13 por el notario don Francisco Javier Pérez de Camino Palacios), respecto al estado de conservación de la "Casa Menéndez Pidal", sede de la Fundación Ramón Menéndez Pidal, tema sobre el que le hago constar los siguientes hechos:
La "Casa Menéndez Pidal" y su jardín han recibido la máxima protección por parte del

Excelentísimo Ayuntamiento de Madrid gracias a las gestiones y esfuerzos de la FundaciónRamón Menéndez Pidal, esfuerzos que la Fundación Ramón Areces se ha negado a compartir: no consta una sola gestión, petición, acción o palabra por su parte para que este conjunte emblemático fuera valorado ni protegido por las autoridades.
Para su tranquilidad y la de la Fundación de que usted es Secretario puedo asegurarle que la "Casa Menéndez Pidal" se halla en perfecto estado de conservación, gracias a los desembolsos que viene haciendo la Fundación Ramón Menéndez Pidal, gastos que, en gran parte, corresponden a la Fundación Ramón Areces como propietaria del inmueble y que, desde hace tres años, la Fundación Ramón Areces se ha negado a asumir.
El jardín se halla asimismo en un estado inmejorable, habiéndose llevado en él a cabo todas las tareas necesarias para que merezca su catalogación como jardín histórico. Las autoridades y técnicos del Ayuntamiento de Madrid que han visitado en diversas ocasiones la sede de la Fundación Ramón Menéndez Pidal y su jardín histórico así lo han constatado. La Fundación Ramón Areces también podría haberlo comprobado, antes de irrumpir destempladamente en Menéndez Pidal 5, si hubiera tenido la cortesía de acordar una cita , escribiendo o llamando a la Fundación Ramón Menéndez Pidal desde su Secretaría en horas hábiles, o, para cualquier urgencia o comunicación intempestiva, a los teléfonos particulares mío o del Secretario General de la Fundación Ramón Menéndez Pidal que obran en su peder.
Aunque el Servicio de Seguridad de la Fundación Ramón Areces suele tomar funciones propias de secretarios o ugieres, ese cuerpo no es el adecuado para establecer relaciones entre Fundaciones culturales.
Desde un punto de vista científico-cultural, tanto la labor específica de la Fundación Ramón Menéndez Pidal, como su colaboración con otros organismos y su ayuda al público investigador, han dado los frutos que a ustedes les consta por la abundante documentación que les ha sido enviada y que se halla recogida en las Actas de la Junta de Patrones de la Fundación Ramón Menéndez Pidal, de la que es Patrono el presidente de la Fundación Areces, Don Isidoro Alvarez, patrono que no se ha dignado a acudir a una sola convocatoria, ní a acusar recibo de nuestras comunicaciones ni a contestar una sola carta desde la aprobación de los Nuevos Estatutos de la Fundación Ramón Menéndez Pidal de 29 de junio de 2005.
Todas estas cuestiones podrían haberse aclarado, si la Fundación Ramón Areces no se hubiera negado sistemáticamenrte , desde hace tres años, a convocar la Comisión Mixta , cuya celebración semestral es preceptiva.
En consecuencia, ponemos en su conocimienton que:
1º. Cualquier intento por parte de esa Fundación de cambiar las cerraduras de los accesos a la finca o inmueble de referencia constituiría un hecho delictivo que la Fundación que presido no está dispuesta a tolerar.
2º. En todo caso, la Fundación Ramón Menéndez Pidal se reserva el ejercicio de cuantas actuaciones y acciones pudieran asistirle en sus derechos ante cualesquiera instancias públicas, judicialers, etc., así como las correspondientes llamadas de atención ante la opinión pública sobre la desagradable situación generada por la Fundación Ramón Areces.

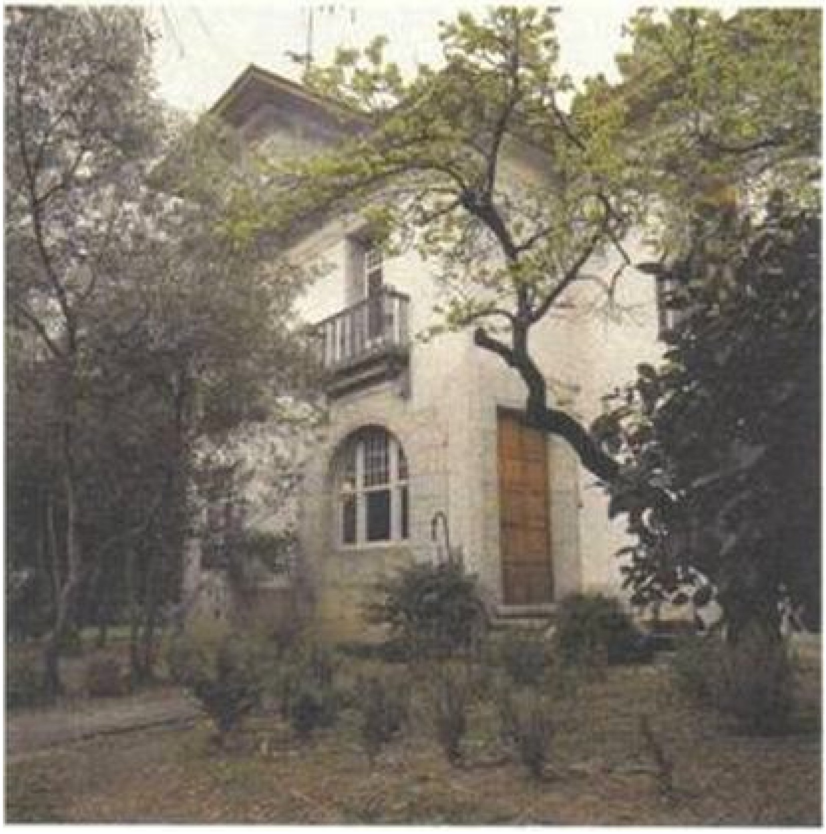
ASALTADA LA FUNDACIÓN RAMÓN MENÉNDEZ PIDAL, EN EL OLIVAR DE CHAMARTÍN



Autor: Diego Catalán, publicado el 16 de junio de 2007 en Defensa del Olivar de Chamartín , que recomendamos.

El viernes 8 de junio, a las 20,27 horas, el Servicio de seguridad de la Fundación Ramón Areces dejó en el teléfono de la Fundación Menéndez Pidal un escueto aviso de que unos vecinos de la calle Henri Dunant (en la acera de los números pares) denunciaban la existencia de una fuga de agua en la Fundación Menéndez Pidal. La Fundación Areces no utilizó los teléfonos particulares ni del Presidente ni del Secretario General (de que han hecho uso en otras ocasiones) para advertir el supuesto accidente.
El sábado día 9, a primera hora de la mañana, el Secretario General de la Fundación, don José Manuel Pérez-Prendes Muñoz de Arraco, accedió a la finca y casa y pudo comprobar que no había fuga ninguna de agua. Al abandonar la sede, algunos minutos antes de las 9 horas, dejó la puerta principal de acceso a la finca cuidadosamente cerrada.
A las 8'20 de la mañana del martes 12 de junio llegué a la Fundación y, me encontré con que la puerta de acceso a la finca había sido manipulada maliciosamente desde el interior: descorridos los cerrojos, alzados los anclajes al suelo y sujetos con una cinta de plástico fuerte atada al mango de uno de los cerrojos. Con un mero empujón, cualquier persona o vehículo podía acceder libremente al interior de la propiedad sin necesidad de llaves.
Sin poder imaginar el quién, cómo, cuándo y para qué de tan sospechosa acción, que Pérez-Prendes y yo creimos realizada aquella noche o madrugada, ponderamos la gravedad de unos hechos como los detectados. Los planes a los que aquellos preparativos apuntaban podían ir dirigidos, bien para atentar contra la integridad de la "Casa Menéndez Pidal" y de sus insustituibles fondos documentales histórico-culturales, bien contra los edificios o personas de casas vecinas, donde residen personalidades destacadas del mundo de la economía y negocios. En vista de ello, el Secretario General

de la Fundación presentó denuncia telemática de tales hechos ante la Dirección General de la Policía, denuncia que ratificó después en la Comisaría de Chamartín, a donde le acompañé. Allí la policía nos advirtió que, dado que no se habían producido daños materiales ni personales, no esperásemos que la denuncia diera lugar a ninguna investigación.

Al ir compartiendo la extrañeza y sospecha con el equipo de podadores de los olivos que aquel día y en el siguiente trabajaban en el jardín, con la profesora de la Universidad Central doña Remedios Morán Martín, visitante de la Fundación en la mañana del día 12, con el Bibliotecario de la Fundación, el profesor de la Universidad Autónoma don José Polo, con los lectores que en la mañana del dia 13 investigaban en la Fundación (el académico don José Manuel Sánchez Ron y el licenciado don Mario Pedrezuela Fuentes), sus comentarios y elucubraciones hicieron crecer mi alarma. Pero el colmo fue el poder desvelar quienes pudieron perpetrar el asalto.
Según el relato de un trabajador de la finca adyacente a la de la sede de la Fundación, el sábado 8 de junio, poco después de las 9 de la mañana, tres individuos pretendieron escalar la tapia desde una servidumbre de paso que discurre entre ambas fincas y le ofrecieron presentarle documentación acreditativa de que pertenecían a la Fundación Ramón Areces. Cuando él se negó a entrar en tratos, se alejaron. Más tarde, al abandonar ese trabajador su finca, alcanzó a ver, cómo esos individuos, provistos de una gran escalera, escalaban, desde la calle Menéndez Pidal cerca de la esquina de la calle Henri Dunant, la tapia y verja de la sede de la Fundación Menéndez Pidal, a la vista de varios transeúntes.
Hacia las 17, 30 horas del día 12, una vez que los podadores interrumpieron su trabajo y abandonaron la finca, cuando me disponía a dejar la sede de la Fundación, me salieron al paso, en la puerta de la finca, tres personas.: dos hombres y una mujer. Uno de ellos dijo ser un notario que venía de parte de la Fundación Ramón Areces; los otros no aclararon su identidad. Me expuso, seguidamente, que venía a comprobar si un dossier de fotografías, que llevaba en una carpeta, reflejaba la realidad actual. Inquirí cuándo, cómo y por quién se habían hecho tales fotografías del interior de la finca sin conocimiento de la Fundación y contestó que él no lo sabía. Le objeté que deseaba contar como testigo con el Secretario Gerneral de la Fundación y me puso ante el dilema de dar cuenta de que yo no le había permitido el acceso o entrar de inmediato a realizar su misión. Le acompañé para identificar los puntos desde donde se habían tomado aquellas fotografías supuestamente demostrativas del abandono en que se hallaba el jardín histórico y tuvo que reconocer que las fotos no correspondían a la realidad que tenía ante la vista.
La Fundación Ramón Menéndez Pidal ha intentado mantener con la Fundación Ramón Areces las relaciones de cooperación previstas y preceptuadas en el vigente Convenio entre ambas Fundaciones, formalizado el 9 de mayo de 1984, que dio lugar a la creación de la "Casa Menéndez Pidal" como centro histórico y de investigaciones (inaugurado por la Reina Sofía y hoy protegido urbanísticamente por el Ayuntamiento de Madrid).
El 30 de octubre de 2006, ante el prolongado incumplimiento por parte de la Fundación Ramón Areces de lo preceptuado en el Convenio y aun de las normales obligaciones de propietario, solicitamos una vez más la preceptiva convocatoria del Consejo Mixto de las Fundaciones, encargado de velar por el cumplimiento de sus obligaciones. No obtuvimos respuesta, y así lo hicimos saber mediante la carta que, como Presidente de la Fundación Ramón Menéndez Pidal, dirigí, el 18 de diciembre de 2006, al Patrono-Presidente de la Fundación Ramón Areces don Isidoro Álvarez y a cada uno de los restantes Patronos de dicha Fundación **(1)**.
La entrada sin permiso en la Fundación Menéndez Pidal, mediante escalo, la manipulación de la puerta de la finca dejándola accesible durante tres días a cualquiera que hubiera querido actuar contra su integridad o, desde su interior, atentar contra la

seguridad de las fincas de personas de relevancia que viven en la vecindad, así como la obtención de las "peculiares" fotografías del jardín como base maliciosa –y falaz- de una acusación de abandono, acciones realizadas por quienes dijeron ser empleados de la Fundación Ramón Areces, han sido objeto de denuncia en el Juzgado Decano de Madrid el día 13 de junio de 2007, rogando a Ilmo. Sr. Magistrado-Juez Decano que determinase si hechos tan graves eran constitutivos de delito, y para prevenir que el Olivar de Chamartín, la Casa Menéndez Pidal y la preciosa documentación de valor universal en ellos guardada puedan sufrir algún tipo de atentado que los destruya o desvalore, o que desde el interior de la sede de la Fundación Ramón Menéndez Pidal puedan realizarse acciones criminales contra sus vecinos.

Diego Catalán Menéndez-Pidal, Presidente de la Fundación Ramón Menéndez Pidal

(1)DOCUMENTO ANEJO: CARTA DEL PRESIDENTE DE LA FUNDACIÓN RAMÓN MENÉNDEZ PIDAL A LOS PATRONOS DE LA FUNDACIÖN RAMÓN ARECES

Madrid, 18 de diciembre de 2006
A don Isidoro Álvarez Álvarez
Patrono-Presidente de la Fundación Ramón Areces

Estimado amigo:
En cumplimiento del **Convenio formalizado por las Fundaciones Ramón Areces y Ramón Menéndez Pidal el 9 de Mayo de 1984** (ante el notario de Madrid Aurelio Escribano Gozalo) y del **Acta de la reunión del Consejo de Patronato de la Fundación Ramón Areces el 15 de Junio de 1984** (certificada por el Secretario de la Fundación y con el visto bueno del Patrono don Ramón Areces), ambas Fundaciones remitieron la función de asegurar el cumplimiento del Convenio a un **Consejo Mixto de Patronos,** constituido por tres miembros de la Fundación Ramón Areces y dos miembros de la Fundación Ramón Menéndez Pidal y cuya Presidencia corresponde a uno de los representantes de la Fundación Ramón Areces.
Según se dispuso en el documento constitutivo de ese **Consejo Mixto,** destinado a velar por el cumplimiento del **Convenio** (26/junio/1984), artículo 7º: **"Las reuniones del Consejo Mixto de Patronos serán convocadas por el Presidente del mismo al menos dos veces al año".**
Así vino haciéndose hasta el año 2003, coincidente con el fin de una Ayuda trienal de la Fundación Ramón Areces *"destinada a los trabajos de investigación que se llevan a cabo en los denominados 'Laboratorios Humanísticos', que dirige el profesor D. Diego Catalán Menéndez-Pidal, habiéndose publicado diversos trabajos como fruto de su labor investigadora. Entre los últimos trabajos llevados a cabo por el Prof. Catalán, cabe destacar 'El Archivo del Romancero'"*, según recoge la **Memoria de Actividades 2002-2003 de la Fundación Ramón Areces**, págs 69-70.
Como esta Fundación Ramón Menéndez Pidal hace constar en su adjunta "Memoria del trienio 2004-2006", **en estos últimos tres años la Fundación Ramón Areces nunca ha convocado la Comisión Mixta en cumplimiento de ese artículo 7º.**

> De resultas, **ha dejado sin efectuar los libramientos semestrales** correspondientes
> **a)** de una parte, a los gastos generados por el **mantenimiento de la propiedad** constituída por la "Casa y Jardín Menéndez Pidal" (sede obligada de la Fundación Ramón Menéndez Pidal según el Convenio de 1984) y,
> **b)** de otra, a la Ayuda de Investigación destinada a hacer efectiva la colaboración en la **actividad científica** descrita en el citado Convenio, cuya

vigencia se hace constar en la **Memoria de Actividades 2004-2005 de la Fundación Ramón Areces, pág. 75,** publicada en el presente año (en el capítulo dedicado a la "Colaboración de la Fundación Ramón Areces con Reales Academias, Fundaciones y Otras Instituciones"), así como en la "Presentación" del Patrono-Presidente don Isidoro Álvarez Álvarez , pág. 7. En ella se hace pública la concesión y logros, en los citados años **2004-2005**, de la **"Ayuda destinada a los trabajos de investigación que dirige el profesor D. Diego Catalán Menéndez-Pidal, habiéndose publicado diversos trabajos como fruto de su labor investigadora. Entre estos trabajos cabe destacar El Archivo del Romancero y, muy recientemente, Historia de la Lengua española, obra póstuma de D. Ramón Menéndez Pidal, ordenada y concluida por el Profesor Catalán"** (a cuya presentación asistió el Presidente del Consejo de Ciencias Sociales de la Fundación Ramón Areces, don Luis Ángel Rojo, en representación de la misma, para hacer explícito el mecenazgo de ella, según noticia recogida por toda la prensa).

A solicitud del Secretario General de la Fundación Ramón Areces, don Juan González-Palomino Jiménez, la **Fundación Ramón Menéndez Pidal**, en carta del Secretario de la misma, don José Manuel Pérez-Prendes Muñoz-Arraco, al citado Secretario General de la Fundación Ramón Areces**, solicitó oficialmente (el día 30 de octubre de 2006) la reunión del "Consejo Mixto de Patronos"** de ambas Fundaciones, a fin de actualizar sus relaciones y el cumplimiento de los Convenios, Acuerdos y Programas que tan reconocidos resultados en el campo de la Humanística han venido dando.
En el día de hoy, en que la Fundación Ramón Menéndez Pidal tuvo su segunda Junta anual de Patronato, de acuerdo con lo dispuesto en sus Estatutos, no se ha recibido la esperada convocatoria del Consejo Mixto por la Fundación Ramón Areces, ni respuesta a la citada carta del día 30 de octubre por parte del Secretario General de la misma.
Tan inexplicable y descortés actitud, que suponemos ajena al conocimiento de la Presidencia, Patronato y Comités Científicos de la Fundación Ramón Areces, obliga a **la Fundación Ramón Menéndez Pidal** a transmitir al conjunto de las personas integrantes de esos organismos nuestra **protesta por el incumplimiento del Convenio de 1984 entre ambas Fundaciones**. Al mismo tiempo, la Fundación Ramón Menéndez Pidal manifiesta su **firme propósito de continuar cumpliendo, como nunca ha dejado de cumplir, con sus obligaciones** institucionales como Fundación sin ánimo de lucro de interés cultural y las contraidas en el citado Convenio de mayo de 1984 con la Fundación Ramón Areces, así como las derivadas de la decisión del Ayuntamiento de Madrid (con el voto unánime de todos los concejales de los diversos partidos) de conceder la máxima protección para el "Olivar de Chamartín" y amparar la antigua vivienda de Ramón Menéndez Pidal y actual sede de la Fundación del mismo nombre con el nivel 1 grado integral de protección, calificándola como Equipamiento Privado Cultural, y, finalmente las inherentes a tener a su cargo la custodia, en el interior de dicha casa, de un Patrimonio cultural histórico en cuya preservación, estudio, difusión y disfrute por las generaciones futuras está comprometida.
Entre estas obligaciones se hallan las de cumplir los Programas de actuación que acompañan a la "Memoria" adjunta, y alguna de ellas exige **acción inmediata**, como es la de dar orden de impresión de la **Segunda edición de la Historia de la Lengua española, corregida,** ya que esta obra póstuma de Menéndez Pidal ha tenido una espléndida recepción y se ha agotado su edición príncipe antes de un año.
En vista de ello, la Fundación Ramón Menéndez Pidal, de no recibir indicación en contrario por escrito antes del próximo día 24 de diciembre, se verá forzada a hacer constar, en la contraportada de la nueva edición, que la obra, lejos de lo afirmado en la

contraportada de la Primera edición (fiados en una inmejorable tradición de cooperación entre las Fundaciones) y de lo asimismo expresado en el acto de presentación pública de la misma en la Academia Española (el 13/07/05), no ha sido beneficiaria del mecenazgo de la Fundación Ramón Areces.
Asimismo, la Fundación Ramón Menéndez Pidal, al presentar sus cuentas ante la gestora AUXADI y el Ministerio, tendrá que dejar constancia de que no ha malversado este trienio la Ayuda a que se alude en la *Memoria* impresa de la Fundación Areces, ya que no la ha recibido, y, de otra parte, contabilizar como pérdidas de su Patrimonio los gastos generados por la conservación de la "Casa y Jardín Menéndez Pidal".
Con este desagradable motivo, te saluda personalmente, seguro de tu desconocimiento de la cuestión y en espera de un pronto esclarecimiento de la inconcebible situación

Diego Catalán Menéndez Pidal
Presidente

Y, en términos similares, escribí personalmente a cada uno de los restantes patronos (salvo al Patrono-Secretario, pues le constaban ya los hechos): César Álvarez Álvarez, Jose Antonio Álvarez López, Margarita de Borbón, Juan Hermoso Armada, Florencio Lasaga, Carlos Martínez Echavarría, Federico Mayor Zaragoza, Jorge Pont Sánchez, Julio Rodríguez, Luis Ángel Rojo, José Ramón Tamargo Areces, Manuel Varela Parache, Leopoldo Zumalacárregui Calvo.
La presente carta fue anunciada y comunicada en sucesivas Juntas de Patronos de la Fundación Ramón Menéndez Pidal, a las cuales se convocó, como Patrono de la misma, a don Isidoro Álvarez y a las que éste nunca asistió.

Diego Catalán

ALGO HUELE A PODRIDO EN EL REINO DE ESPAÑA

Autor: Diego Jerez. Publicado en El burdel de las rimas

O por lo menos en esta esquina del levante. No sé muy bien cuando comenzó el hedor, a decir verdad, sólo se nota cuando la brisa de los acontecimientos extraordinarios amaina, es entonces, en la calma chicha de lo cotidiano, cuando uno se da cuenta de que está sentado justo encima de, y perdonen la expresión, la mierda.
Hace unos días, el señor Rodríguez Comendador, a la sazón alcalde de Almería, destacaba como virtud de su magnífica gestión el hecho de que se hayan reparado dieciocho mil no sé cuantos baches. En mi humilde opinión, lo realmente excepcional es que existieran, no que se hayan reparado, pero dada la podredumbre profesional de nuestros representantes, hay que admitir que la normalidad de unas tareas de mantenimiento debe considerarse algo extraordinario.
Desgraciadamente, hasta ahora a nadie se le ha ocurrido coger un legón y un carretillo de alquitrán y dedicarse a reparar los innumerables socavones que sufre la cultura en nuestra provincia.
Días atrás, y después de muchas cábalas y dudas, me decidí a registrar mi primer libro antes de comenzar el inevitable peregrinaje por las distintas editoriales. Como cualquier persona que no ha tenido que verse nunca en esas lides, me encontraba totalmente perdido, así que lo primero que se me ocurrió, incauto de mí, fue consultar en la página del ministerio de cultura. Tecleé “ministerio de cultura registro de la propiedad intelectual Almería” en el omnisapiente google y, en menos que tarda en persignarse un cura loco, allí estaba:

> **Oficinas Delegadas Dependientes del Registro Territorial-**
> **ALMERÍA: C/ Hermanos Machado 4. 04071 - Almería. Teléfono: 950.230.375. Fax: 950.011.109**

Ya sabía el dónde, ahora me faltaba el cómo, de modo que telefoneé a un amigo de otra provincia que está más curtido en este tipo de cuestiones.
Es sencillo, me dijo, sólo tienes que llevar una copia de la obra y una fotocopia del DNI, allí rellenas un impreso, pagas las tasas y ya está.
Solventados como estaban el cómo y el dónde, me dispuse a resolver el cuándo. Llamé a algunos clientes de la capital y les pedí que me preparasen los pagos para recogerlos al día siguiente, así no tendría que hacer el viaje ex profeso para registrar el libro.
Sobre las doce del mediodía, atendidos ya los compromisos adquiridos el día anterior, y después de unos treinta minutos tratando de encontrar aparcamiento por la zona de

Oliveros, me dispuse a cumplir con el verdadero propósito de mi visita a la capital, y me presenté en Hermanos Machado, 4, con mi libro bajo el brazo.
La primera contrariedad surgió cuando al entrar en ese edificio de la pocas veces alabada (me pregunto por qué) Junta de Andalucía, no encontré ni rastro de ninguna oficina levemente relacionada con la cultura en los paneles indicadores. Escruté las paredes en busca de alguna pista sobre el paradero de la delegación de cultura, pero lo único que encontré fue la mirada distraída de la vigilante de seguridad mientras sonaba el agradable pitido del arco detector de metales, que es posiblemente de lo único que se hace aún menos caso que de la cultura en esta tierra nuestra.

Víctima de mi natural ingenuidad, sólo se me ocurrió pensar que me había equivocado. Sin duda había leído mal la dirección, al menos el número, y salí de nuevo a la calle dejando atrás el pitido del ignorado detector de metales. Recorrí varias veces la calle de un extremo a otro sin encontrar ningún edificio oficial a parte de una oficina de extranjería ante la que hacían cola varias docenas de inmigrantes marroquíes, lo que me provocó una sonrisa, no por la situación de esas pobres criaturas, sino por la idea de que hubiesen ubicado la delegación de cultura en una oficina de extranjería, al fin y al cabo nada les es más extraño a nuestros políticos…
Aún con esa sonrisa del niño que ha hecho una travesura sin ser descubierto, conduje mi malicia hasta el primer edificio, y tras volver a escuchar el monótono canto del detector de metales, me dirigí a la mesa dónde la vigilante ojeaba la prensa, y le pregunté por el registro de la propiedad intelectual. Tras unos instantes, levantó la cabeza y con una expresión similar a la de un niño que no recuerda la tabla de multiplicar, me confesó que no lo sabía, que preguntase en la tercera planta (creo recordar que era la tercera) a ver si allí me decían algo, y lo cierto es que algo me dijeron. Una señora bastante amable me informó de que la delegación de cultura había sido trasladada hace meses, pero no supo decirme a dónde, me invitó, eso sí, a que buscase por las sexta y séptima planta, antigua ubicación de la delegación, por si quedaba algún vestigio de la misma o allí podían darme más señas.
Después de un cuarto de hora paseando por ese laberinto de pasillos me sentía como el minotauro persiguiendo a Teseo, como era de esperar, nada nuevo me dijeron en esas plantas.
Casi había perdido ya toda esperanza de registrar mis poemas ese día cuando, en un último intento por saber del paradero de “Cultura”, detuve a un señor que salía de la delegación de minas. Él tampoco supo decirme dónde estaba, pero al verme con una carpeta abarrotada de folios bajo el brazo, me preguntó si mi intención era registrar un libro. Me dieron ganas de abrazarlo, o de clavarle una bandera en la cabeza y posar junto ella con las manos en la cintura como si hubiese escalado el mismísimo Everest. ¡Al fin alguien que me entendía! Aquel hombre, con gran amabilidad, me explicó que su hermano había escrito un libro hace tiempo, y que él mismo se lo había registrado en la Biblioteca Villaespesa, justo en el edificio de enfrente. Le di las gracias efusivamente y me monté en el ascensor dando saltos de alegría.
Mientras salía a la calle, tras dejar de nuevo atrás las protestas del pobre detector de metales, volví a sonreír ante lo irónico que me resultaba el hecho de haber encontrado el único atisbo de “Cultura”, además del periódico de la vigilante, precisamente en “Minas”. La cultura no sólo está muerta, sino que también la han enterrado, me dije.
Apenas había salido de mis pensamientos cuando me encontré ante el mostrador de la biblioteca, con una sonrisa de oreja a oreja, y con mis poemas bajo el brazo. ¡ya estaba allí! A la mañana siguiente, lo primero que haría, sería enviarlos a todas las editoriales que apareciesen en el google.
Por desgracia para mí, ese particular Vía crucis no estaba aún ni próximo a terminar.
El señor que había tras el mostrador me explicó que, efectivamente, allí había estado el registro de la propiedad intelectual, en la tercera planta, pero que hacía meses que se lo

habían llevado a un edificio nuevo al final de la rambla, justo al otro lado de la ciudad. Le agradecí la información y corrí como alma que lleva el diablo hacia el coche, puesto que, como es bien sabido, cuanto atañe a la función pública en este país, tiene la engorrosa costumbre de cerrar a las dos de la tarde, y con una puntualidad digna del más puntual y digno de los británicos.
Al llegar al coche pude comprobar que algún hijo de madre descocada, había aparcado en mitad de la calle dejándome encerrado, y como es tradición, los municipales sólo aparecen cuando es uno el que ha aparcado mal. Mientras desesperaba en lugar de esperar, escuché en las noticias de la una que la, siempre poco alabada, Junta de Andalucía había entregado no sé cuantos, muchísimos más de los que entrega a la Orquesta Sinfónica Provincial de Málaga o a cualquier otra entidad cultural de nuestra comunidad, millones de euros a la Orquesta Barenboim ¡Exacto! Esa que invita a cantar a Doña Sonsoles Espinosa, esposa de nuestro, siempre poco alabado, presidente del gobierno, al que Dios acoja en su seno cuando llegue la hora que tanto se hace esperar. Pues bien, estaba yo desesperando y haciendo cuentas para saber cuánto era eso en pesetas de las toda la vida, cuando, por alguna extraña asociación de ideas, me acordé de la bendita página del ministerio de cultura que me había llevado hasta allí, y me pregunté si no podrían haber desviado algunos céntimos de esas generosas subvenciones a los cánticos presidentoconsortiales, para actualizar la dirección del puñetero registro.
Después de unos cuantos cigarrillos, de las uñas de mi mano izquierda, y de un alegro vivace de claxon, sin que el bendito hijo de mala madre apareciese a retirar sus coche, me decidí al fin a mover uno a uno los ciclomotores que había aparcados sobre la acera, para con paciencia y un buen puñado de maniobras, salir de allí por encima de ella, con los espejos plegados para no tocar en la pared o en las farolas. Quince metros más adelante, bajaba de nuevo al asfalto mientras el locutor daba la una y media de la tarde.
Crucé la ciudad tan rápido como me fue posible, lo que a esas horas, en Almería, es digno de una película de Indiana Jones (si ya lo dicen los anuncios: "Almería, tierra de cine"), pero aún a pesar de todo tuve suerte, y pude llegar al nuevo edificio minutos antes de las dos, y entré a la carrera en el edificio, sin tener que tirarme rodando bajo una pesada puerta de piedra que descendiese amenazando con aplastarme.
Jadeante por la carrera, pregunté en información por el dichoso registro, y esta vez, por fin, y casi sin poder creérmelo, escuché como me remitían de nuevo a la tercera planta (creo recordar). Allí, tras esperar unos minutos ante la puerta abierta, esperando a que una señora mayor terminase de aleccionar a otra más joven que asentía continuamente, y cuando por fin repararon en mi presencia y me invitaron a entrar, crucé el umbral con expresión victoriosa, y con emoción contenida pregunté:
- *¿El registro de la propiedad intelectual?*
- *Pase a ese despacho de allí.*
No exagero si digo que me temblaba el paso. Estaba más nervioso que la primera vez que pisé un burdel, pero al menos ya no era el minotauro, sino Teseo siguiendo el hilo que me conduciría a hasta Ariadna. A escasos metros se encontraba la salida del laberinto burocrático.
¡Al fin estaba allí! Por tercera vez en esa mañana me hinché como un pavo real, y con una amplia sonrisa y mis poemas bajo el brazo, me dispuse a dar mi primer paso como escritor, y si no el primero puesto que ese es escribir, sí el más ceremonioso y el primero fuera de la intimidad de mi cuarto. Iba a reivindicarme como autor de una obra.
En el despacho, por llamarlo así, puesto que era un apartado de la misma habitación distinguido solamente por dos biombos, encontré una chica bastante agradable, tanto de trato como de físico (es Ariadna, pensé), que me saludó cortésmente y que, antes de que despegase los labios, me consultó si mi intención era registrar alguna obra, por lo que yo me pregunté para qué otra cosa podría presentarse allí un joven con un manojo

de folios bajo el brazo, pero como no soy de natural sarcástico, y ese tampoco era el momento, me limité a asentir.
La muchacha se me quedó mirando con la boca entreabierta, como tratando de hilvanar una frase, y a mí se me hizo un nudo en la garganta.
- Lo siento, la compañera que sabe utilizar el programa de registro está de vacaciones, si fuesen impresos como se hacía antes…
El edificio entero y hasta el mismo cielo se desplomaron sobre mi cabeza, el corazón se me paró unos instantes, pero sólo para volver a latir furioso e indignado.
¿De vacaciones? Me repetí. De vacaciones… Me sentía como el protagonista de una película de Buñuel.
Aún sin haberme recuperado del mazazo, y haciendo acopio de toda la serenidad de la que fui capaz, acerté a preguntar:
- ¿Y cuándo regresa?
- En octubre… vuelva usted en octubre y podrá registrar su obra.
Dudo mucho que el mítico Vesubio hubiera desatado una cólera mayor cuando sepultó Pompeya, que aquella que sentí estallar en mi pecho en aquel momento. ¿Vuelva usted en octubre? ¿Pero qué ha sido del tradicional "vuelva usted mañana"? ¿Cómo es posible que se paralice el registro de obras literarias en una provincia durante todo un mes? ¿Cómo es posible que se haga sin que el ayuntamiento proteste enérgicamente ante la Junta de Andalucía? ¿Por qué demonios no siguen con el impreso de siempre si no tienen gente capacitada para trabajar con el programa? ¿Por qué destinan un porcentaje mísero del dinero que le dan al tal Barenboim, para contratar una persona que sustituya a la ausente? ¿Qué clase de ineptos con corbata administran nuestro dinero? ¿Qué clase de ineptos descorbatados somos los almerienses, que admitimos y callamos sus vergüenzas?
No voy a repetir aquí todo cuanto se me pasó por la cabeza, entre otras razones además de la educación, porque probablemente la mayoría de ellas conlleven pena de cárcel, sólo os diré que, haciendo gala de un autocontrol del que no creía capaz a un ser humano, me despedí todo lo correctamente que me fue posible y me marché.
Lo que se me vino a la cabeza en esos momentos, es algo que quedará para siempre entre el ascensor que me condujo a la planta baja, y yo.
Ya he conseguido registrar los poemas, en otra provincia, como cabía esperar, y con algún otro problemilla gracias a la página del ministerio de cultura, pero después de todo, algunas cosas si que he podido sacar en claro de todo este asunto:
Una es que la delegación de cultura en Almería, realmente lleva a cabo una labor cultural, puesto que entré en ella malhablando el castellano y salí de allí jurando en arameo. La otra es que por fin sé que es lo que huele mal por aquí, el cadáver de la cultura pudriéndose en los sótanos de las instituciones.

LA FUNDACION MENÉNDEZ PIDAL A REBUFO DEL ESPÍA QUE SURGIÓ DEL FRÍO

Lo bueno de la gente fina y erudita de la Fundación Menéndez Pidal es que pueden permitirse el lujo de llamarnos amarillistas y negarse a hablar con nosotros; lo malo es que que su melosa actitud templando gaitas con la recua de inoperantes y traidores que tienen dentro, y los siluros de las bajas finanzas que apetecen el olivar de Chamartín les hacen ir a rebufo de las informaciones de este servidor, que suelen desmentir indignados, hasta que los hechos los revuelcan y han de admitir que tenemos información de primera mano, aunque nos la escondan o nos desmientan.
En la bitácora de Los amigos del Olivar de Chamartín , que si que es gente fina y elegante y con apellidos, Diego Catalán, presidente de la Fundación Menéndez Pidal, da cuenta del asalto con escalo y de la denuncia que interpuso, y confirma las inexactitudes fiscales que la Fundación Ramón Areces ha cometido, amparándose en el silencio de la Fundación Menéndez Pidal o fiados de su complicidad.
Lean el artículo "Asaltada la sede de la Fundación Ramón Menéndez Pidal, en el Olivar de Chamartín".
Es lo mismo que conté yo, pero con perifollo, encajes y puntillas, y mucho eufemismo. Y si se pierden con la sintaxis a mí no me llamen para sacarlos del laberinto, que voy a echarme unos whiskies al coleto para desentumecer las neuronas.

El espía que surgió del frío.

RUFUFÚ ÁLVAREZ, Y EL PLEITO DE LOS RAMONES

Cualquier empresario que no sea el dueño de El Corte Inglés sabe que si quiere ahorrar con Hacienda no basta con decir que ha comprado doce millones de bonos del Tesoro austriaco , y que los ha vendido a continuación, con casi cuatro millones de pérdida; pero no ha guardado los justificantes de la compra-venta ni ninguna otra documentación, *"sólo apuntes bancarios"*. Y que hagan el favor de desgravarle esa pérdida patrimonial o se mete en pleitos.
Rufufú Álvarez lleva mareando la perdiz en los tribunales contra Hacienda desde el año 1991. En 2007 el Tribunal Supremo da la razón a la Administración General del Estado al reclamárle 3.970.000 euros.
Cualquier empresario que no sea el dueño de El Corte Inglés sabe que ha de molestarse en poner un valor superior a 0 € a su marca comercial, si su empresa tiene más de seiscientos millones € de beneficio anual, y una cifra de negocio superior a los quince mil millones €. Y, desde luego, a nadie se le ocurre querer convencer a los herederos del 0,695% que es una empresa valorada en 5.500 millones y les corresponde 35 millones, ni mucho menos, meterse en pleitos.
Rufufú Alvarez tras el primer revolcón con la sentencia del Tribunal de lo Mercantil, que tasa su empresa en 14.000 millones, y el precio de las acciones en litigio en 98’5 millones €, ha recurrido ante la Audiencia Nacional, arriesgándose a que los interventores del Ministerio de Hacienda decidan levantar libros y hacer una auditoría a fondo.
Cualquier empresario usa con discreción, rayana en la clandestinidad, sus enjuagues con la Fundación creada para aligerar la carga tributaria, y trata de que las alianzas, el *do ut des* con los beneficiarios, discurran en idílica armonía, ofreciendo su óbolo a cambio de figurar como benefactor en asuntos de trascendencia pública, ya sea cultural o social.
Sólo a Rufufú Álvarez se le puede ocurrir, viendo los precios que tiene el metro cuadrado en esa zona de Madrid, pasarse por el arco del triunfo el convenio firmado por la Fundación Ramón Areces en 1984 con la Fundación Ramón Menéndez Pidal , por el que compran la casa y los jardines, que los herederos venden muy por debajo del precio de mercado, a condición de que quede como sede para la Biblioteca, el Archivo y el

Centro de investigación de la Fundación Ramón Menéndez Pidal, mientras ésta cumpla sus fines fundacionales.
Y sólo a él y a sus secundones se les puede ocurrir incluir los gastos en la memoria de la Fundación Ramón Areces de 2004-2005, cuando llevan años sin atender el mantenimiento y conservación de la propiedad; y no contento con esta picarada, añadir y abundar que ha subvencionado los trabajos de Diego Catalán para la edición de *"El Archivo del Romancero"* y de la *"Historia de la Lengua Española de Ramón Menéndez Pidal"*, así como los gastos de publicación, dinero que ni ha llegado, ni se le espera, ni piensa pagar, porque sólo firmó el convenio para evitar que buscaran otras fuentes de financiación.
Pero cuando Rufufú Álvarez añade sus "fontaneros", se enraza con Torrente y la baja estofa, y el poco seso y la poca maña dan una astracanada como la del sábado , 9 de junio de 2007, Santa Eufemia y San Roque, cuando tres individuos que se identificaron como pertenecientes a la Fundación Ramón Areces, le piden al vecino, de la calle Menéndez Pidal 3, que les dejen saltar por la tapia medianera, porque aseguran que hay un escape de agua que está afectando a los vecinos de una finca de la Calle Henri Dunant, justamente en la manzana donde vive don Florentino Pérez. ¡Vaya por Dios!
Y ustedes se preguntarán cómo puede trepar el agua cuesta arriba, y atravesar la calle para llegar allí, y por qué ciencia infusa lo han deducido. Yo también me lo pregunto.
El vecino, con muy buen criterio, les negó el acceso. Y ellos, se van a buscar una escalera de cinco metros de altura, la apoyan en el muro, y trepan frente a las cámaras de seguridad y el servicio de vigilancia de don Francisco González, presidente del BBVA, que graban todo lo que pasa en la calle las 24 horas del día. Su hazaña no está ya en You Tube de milagro.
Una vez dentro de la Fundación Menéndez Pidal, proceden a fotografiar toda la finca, bajo la atenta mirada de varios vecinos de la Calle Alberto Alcocer y de la calle Padre Damían, que alertan a este reportero. Cuando salen, los asaltantes abren el portón, dejan los pestillos atascados para poder entrar en cualquier momento, y cierran someramente con una cinta adhesiva.
Es lo que se llama, asalto con escalo a una propiedad privada, invalidando el cierre de la puerta para una entrada posterior, grabado, y con testigos.
Una manada de jabalíes paseando por la calle Menéndez Pidal y adyacentes habría pasado más desapercibida.
El martes, 12 de junio, un misterioso notario que no se identifica -con lo que les gusta a ellos declinar las generales de la Ley- se presenta con dos acompañantes, diciendo que viene enviado por la Fundación Ramón Areces, y muestra unas fotografías que dice son del jardín del Olivar de Chamartín -que los fotógrafos en su celo por servir a don Isidoro habían maquillado con montones de leña, basuras, árboles secos, etc. para dar aspecto de abandono y descuido-, y pide al Presidente de la Fundación inspeccionar para constatar la veracidad de tan tristes imágenes. Algo cariacontecido hubo de reconocer que no hay tal.
Y toda esta movida cabe suponer que es porque la Fundación Ramón Menéndez Pidal no se ha plegado, y se niega a justificar en falso la recepción de unas ayudas que la Fundación Ramón Areces ha declarado a Hacienda y en su memoria anual.
¿Las fotos que hicieron los asaltantes eran para fotografiar sólo el jardín? ¿O buscaban los hornillos para, en un futuro, "olvidarse un cigarrillo mal apagado" -como ocurrió en el edificio Windsor - y provocar un incendio que acabe con los documentos, biblioteca y archivos que allí se custodian , y que impiden que la Fundación Menéndez Pidal pueda ser desahuciada?
Si conocen a ese jefe de "fontaneros" que trabaja para Álvarez, no me lo manden que no lo voy a contratar, aunque me regalen el traje de *Tergal* de boda y mortaja que usan, la corbata de *Tervilenka,* y la camisa de *Tervilor,* que son el distintivo de la casa.

El espía que surgió del frío.

Memoria de la Fundación Ramón Areces 2004-2005 donde detallan sus inversiones desgravables, completamente falsas:

La Real Academia de la Historia ha concedido su Medalla de Oro al Excmo. Sr. D. Isidoro Álvarez Álvarez, presidente de la Fundación Ramón Areces, en testimonio de agradecimiento al eficaz apoyo que viene prestando la Fundación a las actividades de la Real Academia. Se hizo entrega de la Medalla en sesión académica celebrada el día 17 de diciembre de 2004.

De otra parte, la Real Academia Española y la Fundación han firmado un Convenio para la financiación de los trabajos de revisión del léxico económico del Diccionario de la Lengua Española.

Acto de la firma del Convenio con el director de la Real Academia Española, D. Víctor García de la Concha.

- CONVENIO CON LA FUNDACIÓN RAMÓN MENÉNDEZ PIDAL.

En 1984 la Fundación Ramón Areces adquirió el inmueble donde vivió y trabajó hasta su muerte el ilustre historiador y filólogo, D. Ramón Menéndez Pidal. Mediante un convenio suscrito con la Fundación Ramón Menéndez Pidal, se le concedió a ésta la ocupación y uso del inmueble, con el fin de que sirviera como sede y centro de trabajo de dicha Fundación. En esta casa se conserva la biblioteca y el archivo documental de D. Ramón Menéndez Pidal.

Asimismo, la Fundación Ramón Areces presta una Ayuda destinada a los trabajos de investigación que dirige el profesor D. Diego Catalán Menéndez-Pidal, habiéndose publicado diversos trabajos como fruto de su labor investigadora. Entre estos trabajos cabe destacar "El Archivo del Romancero" y, muy recientemente, "Historia de la Lengua española", obra póstuma de D. Ramón Menéndez Pidal, ordenada y concluida por el Profesor Catalán.

Prefacio a la 2ª edición de la Historia de la Lengua de Ramón Menéndez Pidal , con PS en el que se descubre

una falsedad contable y fiscal de la Fundación Ramón Areces

PALABRAS PRELIMINARES

La presente obra consta de dos volúmenes. En el primero se halla, desnuda de cualquier aditamento, la Historia de la lengua española *de Ramón Menéndez Pidal en primera edición póstuma. Completa, hasta donde llegó a escribirla. Auténtica, en cuanto que su contenido es totalmente menéndez-pidalino. Fruto de toda una vida casi centenaria, fue largamente deseada por cuantos conocieron a Ramón Menéndez Pidal y apreciaron su magisterio. Cosas de la vida la dejaron inconclusa y encajonada. Ha sido tarea compleja, larga y azarosa ponerla en la forma en que ahora puede leerse.*

Quien quiera saber más acerca de ella acuda al volumen segundo. Allí se explica, de mano de Menéndez Pidal, sobre qué bases conceptuales fue concebida y, de la mía, cómo y en qué tiempos y circunstancias se construyó (desde sus cimientos, hasta los últimos retoques en la fachada). También detallo con qué originales he contado para editar cada parte, capítulo o apartado y cómo han sido utilizados. Índices varios ayudarán al lector apresurado o interesado en acceder sólo a ciertos temas o detalles a bucear en el millar largo de páginas escritas por Menéndez Pidal.

D. C.

P.S. *La segunda edición mejora a la primera en la corrección de una serie de errores, en general tipográficos, y respecto al infundado reconocimiento de haber contado con el apoyo de entidades ajenas a la Fundación Ramón Menéndez Pidal.*

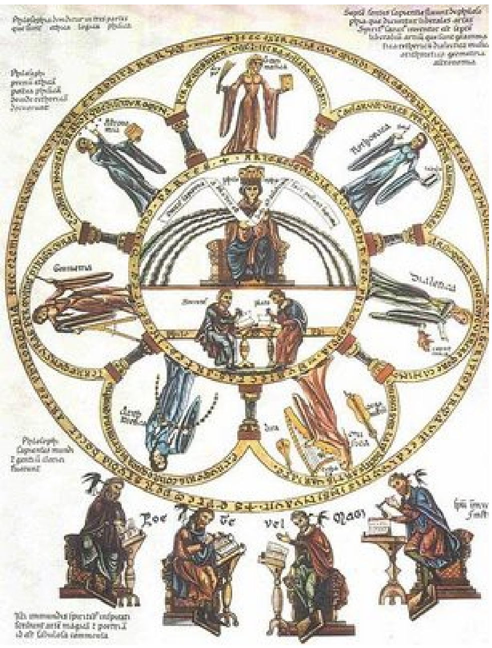
¿DEBEN SABER GRAMÁTICA LOS FILÓSOFOS, O LES BASTA CON EL QUADRIVIUM?



Publicado en **La Fiera Literaria**:

Don Fernando Savater es Catedrático de Ética en la Universidad Complutense y un aceptable comentarista de lo que otros piensan y escriben. Es, asímismo, uno de los principales valedores del mejor novelista español de todos los tiempos, Javier Marías, y exaltador de los grandes valores literarios de la gran novela *La rusa*, de quien estaba destinado a ingresar, por méritos propios y ajenos, en la Real Academia Española, precisamente por esto: por ser española. En otra no hubiese entrado ni convertido en el misterioso hombre menguante.

Pero lo que hoy queremos es mostrar a nuestros lectores cómo cree el notable catedrático, valedor y entusiasta comentarista, que se escriben los ordinales. En las páginas de su no muy fiel traducción de las *Cartas filosóficas* de Voltaire, escribe: *"Onceava carta"*, *"Doceava carta"*, *"Treceava…", "Catorceava", "Quinceava…"*, etc., etc., etc.
Yo he sentido vergüenza por delegación, por él y por la editorial Alianza.

Hacía tiempo que no te leía, Gatopardo. Y es un placer. He puesto al alcance de Clandestino Menéndez una gran entrevista de un valedor del castellano. Espero que le saque jugo. También he modificado un poco mi blog y te he enlazado, no sé cómo no estabas... Muchos besos y enhorabuena por tu trabajo.

Pues nada, vamos ahora a por Savater, don fiera, y emborronamos de golpe su obra porque una vez confundió ordinales con fracciones. Eso al comentarista le produce verguenza. Es como si yo sintiera verguenza por mi amiga Gatopardo, que estuvo escribiendo una buena temporada ti con acento, hasta que le avisaron de que no se hacía.

Suelo escrbir tí, y también hago otras pifias mecanográficas,y ya me gustaría que pudiera dejar de hacerlo porque me avisen...
¿Me quiere decir que es lo mismo un error mecanográfico, inducido por la prosodia y el automatismo de las normas aprendidas en la primera infancia, que un error de concepto como la confusión entre un número ordinal y un número fraccionario?
Hablamos de un filósofo, no de un juntaletras cualquiera, que haya escrito deprisa o despacio ha tenido que releer el resultado final antes de entregarlo a la editorial, y se supone que alguien lo habrá supervisado allí, y habrá quien haya revisado las pruebas de imprenta, y se supone que alguien de esta maldita recua de inoperantes tendría que tener la decencia de darse cuenta y no mandarse varias ediciones sin corregir semejante muestra de desprecio a los conceptos básicos de la Aritmética elemental.

Con su Política para Amador y su Ética para Amador, tuve más que suficiente de Savater.
Y cuando se conoce al tal Amador, dan ganas de salir corriendo, es insoportable y huele mal, la duche en su casa la debe tener de adorno.
No creo se hiciera famoso por ser buen catedrático, sus dos libros eran obligatorios en los institutos.

Querida Luna: por ser también fiestas en mi barrio,y casi al borde del coma etílico, los colaboradores de La Fiera Literaria y yo hemos distribuido nuestra admiración a partes iguales entre Javier Marías, el autor de la inmortal frase: "tengo la polla dentro de su boca, pensé al tenerla.", y don Álvaro Satén y Condenado, autor del poema:
"A Javier Marías"

nos contaste en un mal día,
no fue felación, Marías,

INVESTIGACIONES SOBRE EL CÁNCER DEL EQUIPO DE ANTONIO BRÚ

En Wikipedia hay un escueto artículo sobre Antonio Brú, que dice: *es un investigador y matemático del Departamento de Matemáticas Aplicadas de la Facultad de Ciencias de la Universidad Complutense de Madrid. Investigó junto a su equipo durante doce años un tratamiento contra el cáncer que en 1998 supuso el desarrollo de una nueva teoría según la cual los tumores sólidos poseen una ecuación matemática que gobierna su desarrollo y explica su biología.*
El público supo de su existencia cuando un enfermo con un cáncer de hígado en fase terminal, desahuciado según los parámetros de la medicina tradicional, recibió el tratamiento propugnado por el profesor Brú, basado en las Matemáticas fractales (en fase de ensayos clínicos) y respondió tan positivamente que se curó y fue dado de alta. Otro caso es el de una enferma de melanoma, desahuciada, y que también se curó.
El éxito en 2 casos en 2 enfermos, desahuciados por los oncólogos, con los que se le ha permitido ensayar el tratamiento, podría hacer creer a los profanos que recibirá el apoyo necesario para continuar sus ensayos clínicos con otros enfermos de cáncer desahuciados, ya que los tratamientos convencionales tienen un índice de curaciones de 2 por cada 150 casos. Nada más lejos de la realidad. Los defensores de los tratamientos según el protocolo convencional pusieron en marcha una campaña durísima, con acusaciones muy graves contra Antonio Brú y su equipo, al que han acusado de "engañar" y abusar de la credulidad de los enfermos, llegando a afirmar que los

pacientes curados, con diagnósticos de cáncer, desahuciados, no eran tales.
En la actualidad, el equipo de Antonio Brú sigue esperando que les permitan seguir los ensayos clínicos con enfermos desahuciados por los oncólogos, darles el tratamiento bajo todos los controles clínicos estipulados para comprobar su eficacia e idoneidad.
Copio aquí la respuesta del profesor Antonio Brú al artículo de El Mundo del 21-01-2006 , paradigma entre los que se publicaron en esa campaña orquestada contra sus investigaciones:

"En relación con la publicación de dicho artículo quisiera manifestar los siguientes puntos, ya que el artículo firmado por Alejandra Rodríguez contiene varias afirmaciones inexactas, otras no demostradas y algunas directamente falsas. No quiero presentar este comunicado como una revisión profunda de un tema científico, sino hacer constar a la opinión pública que mi equipo trabaja de manera rigurosa y formal, y, sobre todo, honesta.

1) Título: "El tratamiento propuesto por Bru encierra riesgos severos"
Esto no ha sido demostrado, entre otras cosas porque no se ha desarrollado un ensayo clínico controlado que permita cuantificar los riesgos. En todo caso lo que genera el tratamiento presentado por mi equipo son unos primeros resultados de una propuesta en fase de experimentación e investigación y lógicamente obligan a la prudencia, como siempre que se plantea una nueva indicación. Tan falso es decir que "es inocuo" como que encierra "*riesgos severos*". Además, ni yo ni nadie de mi equipo ha dicho nunca que el tratamiento "no tenga efectos adversos" (otra falsedad del artículo de El Mundo). Tampoco he dicho UNA SOLA VEZ que *"cure el cáncer"*, tal como se intenta presentar en dicho medio y en la SEOM reiteradamente, con el único fin de desprestigiar el trabajo de mi equipo.
La conclusión que supone el titular se basa en complicaciones aisladas que se han descrito con la terapia convencional usando G-CSF, en las indicaciones habituales hasta ahora, perfectamente conocidas y nunca negadas por mi equipo. También se escuda en las declaraciones del Sr. Carrato, presidente de la SEOM, cuando dice que se *"alcanzan cifras de leucocitos patológicas, compatibles con las leucemias"* intentando equiparar una leucocitosis (más o menos intensa, de células maduras y normales) con la leucocitosis debida a células cancerosas. Esta equiparación es totalmente inadecuada y no es legítima científicamente como se demuestra posteriormente, y como cualquier hematólogo sabe (el Sr. Carrato no debe tener claros algunos conceptos hematológicos importantes).
Por otra parte, se han descrito ampliamente los efectos secundarios y las complicaciones asociadas al uso de G-CSF. Los efectos adversos graves son bastante infrecuentes y no siempre se ha podido demostrar que se deban al fármaco, sino que se asocian a su administración en pacientes muchas veces con procesos de base muy graves. Véase:
Vial T, Descotes J. Clinical toxicity of cytokines used as haemopoietic growth factors. Drug Safety 1995;13:371-406
La periodista escribe una frase equivocada, en relación con los riesgos de G-CSF *"No obstante, la literatura científica le ha quitado la razón"*. Falso, si algo hace la literatura médica es confirmar los pocos efectos secundarios graves que tiene el G-CSF, incluyendo el riesgo de rotura de bazo, como el del ejemplo recientemente publicado que se cita. Quisiera hacer constar que, aunque tal vez la SEOM y el suplemento de SALUD de El Mundo lo desconocieran hasta ahora, mi equipo sabía muy bien que ésta puede ser una de las complicaciones de la administración del G-CSF (con una probabilidad de 1 cada 3000), tal como demuestra el protocolo de uso compasivo que se presentó a la Agencia Española del Medicamento y como figura en el Protocolo de Ensayo Clínico presentado, en donde estaban contemplados estos efectos. Es una cuestión de estudiar a tiempo y bien.

2) Respecto al supuesto uso de *"dosis masivas"* en el esquema terapéutico propuesto por mi equipo, decir que ésto es falso. No se usan dosis masivas. Las dosis que proponemos son las habituales, aceptadas por todo el mundo y recomendadas en las licencias de comercialización del G-CSF: 10 mcg/Kg/día.
La diferencia está en la duración propuesta del tratamiento y no en la dosis. Como el objetivo es conseguir una leucocitosis intensa (entre 40.000 y 60.000 leucocitos/mm3 de sangre periférica y en su mayoría del tipo neutrófilo o granulocítico) y PERSISTENTE, no hay otra opción que prolongar el tratamiento para que se produzca el efecto antitumoral que predice el modelo teórico de crecimiento tumoral.
Podría darse el caso de que la *"dosis total acumulada"* fuera tóxica. Obviamente, esta dosis total será mayor cuanto más dure el tratamiento. Pero tenemos evidencias científicas irrefutables de que el uso prolongado de esta sustancia "per se" no es especialmente peligroso. Por ejemplo, en una revisión reciente de pacientes con neutropenia severa, en su mayoría niños, la duración media de los tratamientos recopilados (853 pacientes) es de 5 años (entre 0 y 12) y con dosis de hasta 30 mcg/Kg/día de G-CSF. Los efectos adversos del G-CSF son realmente escasos e irrelevantes.
Dale DC, et al. Severe chronic neutropenia: treatment and follow-up of patients in the Severe Chronic Neutropenia International Registry . Am J Hematol 2003;72:82-93.
O sea, que el posible riesgo del tratamiento no está en la toxicidad directa de la sustancia utilizada, sino en sus efectos, provocando una leucocitosis intensa y persistente. A éso se debe referir el Sr.Carrato cuando lo equipara con una leucemia. El punto siguiente demostrará que esta comparación no se sostiene científicamente.

3) "Es de suponer que los riesgos se multiplicarán si, tal y como postula Brú, empezamos a dar dosis 15 veces superiores y alcanzamos unas cifras patológicas compatibles con la leucemia"
Esto no es más, como dice el autor de la frase, que una "suposición" pero que no se deriva de ningún fundamento científico.
Para empezar, la terapia propuesta por mi equipo no utiliza dosis 15 veces superiores.
Además, la gravedad de cualquier leucemia (aguda o crónica) no se debe a la cifra de leucocitos (hay excepciones en que la cifra se asocia a peor pronóstico y parece causar complicaciones graves, como se discute más abajo) sino al hecho de que la proliferación tumoral en médula ósea acaba con la producción de las líneas celulares sanas de leucocitos, eritrocitos y megacariocitos/plaquetas y el paciente fallece tarde o temprano por infecciones oportunistas, anemia intensa (si no recibe transfusiones) o hemorragias en sitios vitales.
Una leucocitosis de formas maduras, que no modifica la calidad de los leucocitos (perfectamente funcionantes) ni la cantidad ni calidad de eritrocitos o plaquetas NO TIENE NADA QUE VER con una leucemia, aparte de que el número de leucocitos granulocitos (en el caso del tratamiento con G-CSF) pueda ser tan elevado (deseablemente 40-60.000/mm3) como el de células blásticas inmaduras y aberrantes en algunas leucemias.
Las leucemias pueden cursar con cifras de leucocitos muy variables en sangre periférica.
Una leucemia con pocos leucocitos también es muy grave.
Se suele hablar de:
Leucocitosis cuando la cifra está por encima de lo habitual, pongamos más de 10.000/mm3.
Hiperleucocitosis, si la cifra supera a los 100.000/mm3.
Hiperleucocitosis extremas de hasta 2.000.000 leucocitos/mm3 como en un caso de leucemia linfática crónica (Leuk Lymphoma 2002;43:1865-8). Por cierto, esta complicación no fue mortal, pese a producirse en una paciente de 73 años y asociarse a

leucostasis (ver abajo) y trombosis venosa profunda.
El tipo de célula y sus características son las que determinan la gravedad, el pronóstico y el riesgo de complicaciones "circulatorias" como la hiperviscosidad o la leucostasis. En mucha menor medida, las complicaciones dependen del número, como se verá más adelante. Por ejemplo, las leucemias crónicas como la mieloide crónica (LMC) o la linfática crónica (LLC) suelen debutar con cifras de hasta 300.000 células/mm3, sin que sean habituales estos síndromes. En cambio, en leucemias agudas como LMA en niños se pueden observar leucostasis graves con sólo 9.000 - 60.000 leucocitos/mm3
(Creutzig U, et al. J Clin Oncol 2004;22:4384-93)
El concepto de hiperleucocitosis tiene interés porque se suele asociar con peor pronóstico, sobretodo en las leucemias agudas por dos motivos:
Síndromes de hiperviscosidad y leucostasis:
Síndrome de lísis tumoral: grave proceso que ocurre durante la quimioterapia por la destrucción de una mayor masa tumoral, que provoca un cuadro metabólico muy grave.
Por leucostasis se entiende el cuadro clínico de afectación sobre todo neurológica y pulmonar, que se debe a trastornos en la circulación capilar, casi siempre en leucemias con hiperleucocitosis. Los pacientes pueden sufrir hemorragias intracerebrales e insuficiencia respiratoria. Se creía que la causa principal era la cantidad de células blásticas circulantes, pero hoy está claro que el mecanismo es otro bien distinto, como se desprende de las siguientes citas:
Stucki A, et al. Endotelial cell activation by myeloblasts: molecular mechanisms of leukostasis and leukemic cell dissemination . Blood 2001;97:2121-9.

Zarkovic M, et al. Correction of hyperviscosity by apheresis . Semin Thromb Haemost 2003;29:535-42 .
En resumen, estos trabajos demuestran:
A) Las células leucémicas (mieloblastos) a veces poseen la capacidad de generar condiciones en el microambiente capilar que promueven su adhesión al endotelio vascular (cosa que no son capaces de hacer los neutrófilos maduros) y esto explicaría la patofisiología del síndrome de leucostasis y la infiltración tisular por células blásticas, sobre todo en la LMA. (Blood 2001;97:2121-9 .)
B). La causa del "atasco" de células blásticas en los capilares, durante la leucostasis, no es el alto número de células, sino el daño producido en el endotelio por citoquinas aberrantemente liberadas por las células cancerosas. (Leuk Lymphoma 2000;39:1-18 .
C) La interacción entre las células leucémicas y el ambiente vascular (mecanismo que ninguna terapia actual controla) es más importante para provocar leucostasis que el número absoluto de células circulantes. (Ann Acad Med Singapore 2005;34:229-34).
Este trabajo revisa el tratamiento con leucoaféresis para mejorar la leucostasis en 14 casos de leucemias hiperleucocitósicas, con una media de 439.000 leucocitos/mm3. Curiosamente los cuadros de leucostasis más graves clínicamente se producían en sujetos con LMA y menor cifra de leucocitos: "sólo" 303.000 leucocitos de mediana. Mientras que en LLA (634.000 leucocitos), LMC (510.000) o LLC (y nada menos que 950.000 leucocitos) el cuadro es más leve. Además, la rápida respuesta en los casos de

LMA (descenso de un 32% en la cifra tras leucoaféresis) no impedía la muerte de 4 (de un total de7) pacientes. En cambio, el sujeto con LLC y 950.000 leucocitos/mm3 pese a no responder apenas (8% de reducción, y rebajar sólo hasta 870.000 leucocitos/mm3), sobrevivió 1 año y falleció de una causa no relacionada.
D). Los mecanismos de la leucostasis y su repercusión son diferentes, según el tipo de leucemia. Estudiado en casos con leucocitosis por encima de 50.000 células/mm3 (Eur J Haematol 2005;74:501-10) .
E). Otro estudio demuestra que la producción de infiltrados pulmonares propios del síndrome de leucostasis, que se creía provocado por la hiperleucocitosis, también se produce en leucemias con pocos leucoblastos. Esto confirma que no es la cantidad, sino el tipo o la calidad de las células cancerosas lo que explica la complicación. (Br J Haematol 2003;120:1058-61)
F) Otro trabajo parte de la observación de que la hiperviscosidad (entendida como disminución de la velocidad celular en los capilares) es más frecuente en las leucemias agudas. Demuestra que los parámetros usados para medir la viscosidad son iguales en pacientes con LLC (leucemia linfática crónica) que en controles sanos. Es decir, la hiperviscosidad y la mala perfusión resultante de los órganos en pacientes leucémicos dependen del tipo celular y mucho menos del número de células (J Intern Med 1992;231:19-23) .
G). Por último, una revisión del tratamiento usado en síndromes de hiperviscosidad y leucostasis, reconoce que en las leucemias con hiperleucocitosis no hay evidencias de que la leucoaféresis (es decir, la disminución mediante una máquina de los leucocitos circulantes) solucione el cuadro de leucostasis. Una vez más se confirma que el problema fundamental no es el número de células (Semin Thromb Haemost 2003;29:535-42)
En relación con estos trabajos y el posible efecto peligroso de hiperviscosidad asociado al tratamiento que mi equipo propone, se puede aportar otro estudio que demuestra que administrar G-CSF a pacientes afectos de infarto de miocardio no cambia los parámetros circulatorios que podrían comportar mayor riesgo de hiperviscosidad u otros:
Ince H et al. Preservation from left ventricular remodeling by front-integrated revascularization and stem cell liberation in evolving acute myocardial infarction by use of G-CSF. Circulation 2005;112:3097-106.
Este es un trabajo piloto sobre uso de G-CSF en pacientes en la fase aguda de infarto de miocardio, para preservar el miocardio y obtener mejores resultados funcionales del músculo a largo plazo. Se basa en la capacidad del G-CSF para movilizar células madre regenerativas (por ej. CD34+)
En una de sus tablas (Tabla 3) se demuestra cómo el G-CSF a dosis habituales de 10 mcg/Kg/día, sólo durante 6 días, cuadriplica la cifra basal de leucocitos (que ya era alta por fase aguda del IAM) alcanzando hasta 56.000 ± 16.000 / mm3 y no modifica en absoluto otros factores de riesgo tromboembólico o cardiovascular como son:
Niveles de fibrinógeno
Niveles de interleuquina 6 (IL-6)
Niveles de proteína C reactiva
Niveles de TNF-a
Viscosidad de la sangre
EN CONCLUSIÓN, NO TENEMOS NINGÚN DATO QUE NOS HAGA TEMER ESPECIALMENTE QUE EL TRATAMIENTO PROPUESTO POR MI EQUIPO PUEDA PROVOCAR UN RIESGO CONSIDERABLE DE COMPLICACIONES DEL TIPO HIPERVISCOSIDAD O LEUCOSTASIS. MÁXIME TENIENDO EN CUENTA QUE SE DEBE CONTROLAR LA CIFRA TOTAL DE LEUCOCITOS MADUROS E HIPERSEGMENTADOS (NEUTRÓFILOS) Y MANTENERLA POR DEBAJO DE 75.000/mm3. EN TODO CASO, ESTE RIESGO SERIA PROBABLEMENTE ACEPTABLE (POR EL PACIENTE Y EL MÉDICO) DADAS LAS CIRCUNSTANCIAS.

4) . .."Un portavoz de Amgen... ha vuelto a insistir en que no existe ninguna prueba después de millones de tratamientos y más de 14 años en el mercado de que el medicamento (G-CSF) ejerza ningún efecto antitumoral".
Conviene matizar esta afirmación, porque tampoco existe ninguna prueba de lo contrario, es decir, nadie lo ha mirado. Puede que sea cierto y que el G-CSF usado millones de veces, de forma que nunca haya alcanzado leucocitosis persistentes, en pacientes con tumores sólidos, no haya ni siquiera colaborado en la inhibición del crecimiento tumoral. Nunca se sabrá. Conviene recordar que la terapia que planteamos propone una estrategia distinta de uso y que ya existen unos pocos casos que prueban un efecto antitumoral. Además, si hay experiencia en millones de casos con G-CSF, se desmonta uno de los argumentos de la periodista (el caso de la rotura de bazo asociado al pegfilgrastim o G-CSF pegilado, publicado en J Clin Oncol 2005). Este caso se suma a 4 o 5 previos existentes en la literatura y por tanto la incidencia de esta complicación es MUY RARA, ¿pongamos 5 por millón, por ser conservadores? En cambio, cada vez se pueden encontrar más evidencias de que como terapia única o como coadyuvante, se han visto notables mejorías en determinadas situaciones. Por último y referente a este aspecto, matizar que el laboratorio AMGEN jamás me solicitó más información de la que yo le presenté.

5) La periodista recoge una frase atribuida a la SEOM y AERO, que califican el asunto como "un fraude a la sociedad y un engaño a los pacientes oncológicos, a los que se ofrece una esperanza infundada, disfrazada de conocimiento científico"
Estas afirmaciones tan sólo revelan mala fe o desconocimiento de lo que es el método científico. Nuestra teoría es completamente científica, incluso aunque fuera errónea. Precisamente, y como parte de su naturaleza científica, es contrastable y se puede y debe someter a prueba. La esperanza en este caso está fundamentada en hallazgos científicos modelizados matemáticamente en forma de leyes (expresión máxima del método científico). Estas leyes deben ser aceptadas (primero hay que entenderlas) hasta que alguien consiga refutarlas o contradecirlas. A pesar de unos pocos casos clínicos prometedores, todavía no se puede aceptar como una evidencia irrefutable que la terapia propuesta y basada en las leyes mencionadas sea universalmente eficaz (y segura). Para ello se necesita otra forma de investigación científica llamada "ensayo clínico" y que organismos como la propia SEOM o AERO deberían ser los primeros en auspiciar, para no ser ellos los que "engañan a los pacientes"

6) "Peligros de usar fármacos fuera de indicación"
Es cierto que siempre habrá más incertidumbre y menos información sobre los riesgos en usos fuera de indicación de cualquier fármaco. Menos información no significa necesariamente mayor peligro o riesgo. Eso hay que demostrarlo, aunque sea razonable plantearlo.
Además, el concepto de peligro es absolutamente relativo, porque depende del beneficio esperado. Si éste es curar un mal incurable y mortal, quién se negaría a aceptar más riesgos?
En relación con el G-CSF hay otro argumento favorable a su uso "fuera de indicación" y es precisamente, su escasa toxicidad y bajo número de efectos adversos graves (demostrado tras una experiencia clínica de "millones" de usos durante 14 años, como en dicho artículo expresa el representante del propio laboratorio).
Una vez más, el ejemplo que usa la periodista para ilustrar el riesgo de los fármacos "fuera de indicación" merece algún comentario. Se refiere a un estudio publicado en JAMA:
O'Connell KA, et al. Thromboembolic events after use of recombinant F VIIa. JAMA 2006;295:293-8.

De un total de 431 efectos adversos informados junto al uso de este medicamento procoagulante, 168 se tratan de complicaciones tromboembólicas y se analizan en este estudio. De la 168, 151 (90%) se producen en casos de uso "fuera de las indicaciones aprobadas por la FDA". De estas 151, en 50 se produce el fallecimiento del paciente, de ellas en 36 (72% de las muertes) se atribuye a la complicación trombótica.
Hay que destacar que 59 de las 151 complicaciones trombóticas se producen en el contexto de ensayos clínicos (precisamente para probar nuevas indicaciones del fármaco)
Este estudio no permite conocer la incidencia de efectos adversos (es decir, el n° de complicaciones en relación con las veces que se ha administrado este fármaco o el n° de pacientes que lo han usado) tanto en "indicados" como en "fuera de indicación". Aproximadamente se habrá usado desde el año 2000 en hospitales en USA unas 10.000 veces para tratar complicaciones hemorrágicas graves. Seguramente la incidencia de efectos adversos es mayor en "fuera de indicación". Probablemente ésto ocurre porque la indicación principal aceptada es en hemofílicos. Cuando se usa en NO hemofílicos, por una hemorragia grave local (por ejemplo intracraneal) su capacidad de generar trombina en otros lugares (y por tanto el riesgo de trombosis) es mucho mayor que en hemofílicos.
La alerta que se deriva del estudio me parece correcta, pero para ser justos habría que conocer cuantas vidas salvó el uso "fuera de indicación" porque siempre se habrá usado en situaciones de mucho riesgo vital (politraumatismos graves, cirugía hepática o cardíaca complicadas, etc...). De hecho, el mismo report comenta en la discusión un reciente ensayo clínico (publicado en NEJM) en pacientes SIN hemofilia y con hemorragia intracraneal en el que el grupo tratado con FVIIa tuvo 3 veces más complicaciones trombóticas que el placebo, pero tuvo al final una menor mortalidad que el placebo, sin mayores secuelas.
Es decir, lo que acaba proponiendo el trabajo de JAMA es la necesidad de ensayar en estudios bien controlados cualquier nueva indicación de un fármaco para evaluar le eficacia y la seguridad rigurosamente. Lo mismo que solicito yo respecto a mi propuesta terapéutica.
Por último, me gustaría expresar también una serie de puntos generales a la opinión pública:
Mi equipo va a continuar con todos los trabajos que tiene en marcha y con los que tiene planteados sin que este tipo de actitudes o comentarios vayan a alterar en absoluto su marcha normal.
Que la serie de comentarios que se han vertido sobre nuestra investigación han evidenciado sólamente un desconocimiento de nuestro trabajo, una manifiesta mala intención y una muy pobre altura intelectual y ética.
Que 7 meses después de la publicación de nuestro artículo continúo sin escuchar una sola razón científica o clínica con una mínima base que pudiera plantear la más mínima duda sobre cualquiera de los aspectos de nuestra investigación.
Que en el caso de recibir una duda razonable y argumentada, mi honestidad y la de cualquier miembro de mi equipo nos obligaría a planteárnosla inmediatamente y a obrar para su resolución o rectificando el punto que sea , agradeciendo en todo momento este tipo de interacciones con cualquier miembro de la comunidad científica o clínica que desée expresarnos cualquier aspecto que considere pertinente. Quiero manifestar que mi equipo está abierto a cualquier contribución o colaboración científica.
Que mi equipo no va a realizar el Ensayo en el Hospital Ramón y Cajal no porque se nos haya impedido expresamente por el CEIC de dicho hospital (de la cual yo no poseo comunicación alguna, aunque tampoco ha habido un desmentido del Gabinete de Prensa de dicho Hospital al que contactó el diario "El Mundo") , sino porque no se reunían las condiciones mínimas que yo considero pertinentes y porque no podía aceptar las exigencias de dicho comité. Por un lado el CEIC del Hospital Ramón y Cajal exigía un

menor número de pacientes sin argumentar la razón de dicha petición y, por otro lado, exigía también que incorporásemos en nuestra información para el paciente que de tres casos de los que tenían información (los dos presentadas por mi equipo a la Agencia del Medicamento y de un supuesto caso mortal ocurrido en Valencia del cual NO hemos tenido conocimiento oficial alguno) indicásemos que uno era mortal. Por otro lado, por parte de uno de los investigadores principales del ensayo, el Dr. Fernando García-Hoz, se me había impuesto la inclusión de un investigador cuya postura era agresiva y descalificatoria acerca de la línea de investigación que dirijo y hacia mi propia persona. Por lo tanto, al no darse las condiciones mínimas exigibles y al no confiar en parte de los miembros del equipo encargado de realizar el ensayo, he decidido, como promotor del mismo e Investigador Principal de la Línea de Investigación, a día de hoy retirar la propuesta de realizar el Ensayo Clínico en el Hospital Ramón y Cajal, como así se lo voy a comunicar a las personas e instituciones oportunas. Mi intención es realizar un Ensayo Clínico con las garantías necesarias, y que con dicho propósito intentaré presentar la propuesta de realización de un ensayo clínico lo antes posible en otra institución sanitaria.
Que el Dr. Fernando García-Hoz no es un uno de mis más estrechos colaboradores, sino que ha colaborado puntualmente en un caso clínico. También le había propuesto que el ensayo clínico se realizara en su hospital si se reunían las condiciones necesarias mínimas y es una persona con la que espero trabajar más en el futuro, pero no es un miembro de mi equipo sino, por el momento, tan sólo un colaborador ocasional.
Que nuestro único interés es realizar de la manera más rigurosa y formal un trabajo de investigación que empecé hace 13 años y cuyos únicos objetivos son dos: 1) El conseguir el mayor conocimiento posible del cáncer y de las propuestas terapéuticas que permitan combatirlo, y 2) los intereses de los pacientes oncológicos y sus familias.
Por último, quiero manifestar y dar a conocer a toda la sociedad española que como consecuencia de nuestros trabajos de investigación, hemos presentado la primera propuesta terapéutica derivada de mi teoría del crecimiento tumoral, la primera, es decir, el primer intento de obtener una terapia que ayude a mejorar los actuales resultados contra el cáncer. Dicha propuesta terapéutica proviene de una teoría de crecimiento tumoral, demostrada teórica y experimentalmente tanto en trabajos de laboratorio como con experimentación animal, y de su interpretación biológica y clínica. De esta manera, como primera propuesta terapéutica, será una propuesta que probablemente será necesario completar y mejorar. Pero actualmente, es una terapia que ha sido aplicada a Pacientes Desahuciados, es decir, pacientes para los que no existe ninguna otra propuesta terapéutica ni mínimamente efectiva. Aún así, se han obtenido resultados verdaderamente esperanzadores, que no permitiéndonos ser lo más mínimamente triunfalistas, sí nos permite trabajar con la esperanza de que se están obteniendo resultados dónde NINGUNA otra terapia los consigue. Si extrapolásemos estos resultados a fases previas de la enfermedad tendríamos que hablar más que probablemente de otros índices de éxitos, como se le puede ocurrir a cualquiera que piense en el tema. Por lo tanto, ¿cuáles son los verdaderos motivos de toda esta campaña que ha desatado un cuerpo de profesionales acompañados SÓLO de unos pocos más y de un medio de comunicación? Si estamos trabajando con pacientes desahuciados, ¿cuál es el número de éxitos en nuestros tratamientos que legitimarían nuestro trabajo? ¿A partir de cuántas vidas salvadas una propuesta terapéutica merece ser investigada: ¿Con UNA vida de 100000 sería suficiente, con 10, con 100? ¿Se me están exigiendo las mismas estadísticas y resultados que a cualquier otro grupo de investigación? Pienso que una propuesta terapéutica que sólamente aumentara la esperanza de vida ya sería merecedora de ser investigada. Pienso que una terapia que sin aumentar la esperanza de vida aumentase la calidad de vida del paciente oncológico ya merecería ser investigada. Pienso que una terapia que aumente a la vez la esperanza de vida y la calidad de vida de los pacientes oncológicos ya merecería ser investigada. Y

una terapia que hiciera ésto y encima contase con una cierta (por mínima que fuera) probabilidad de lograr la remisión de la enfermedad, con mucha más razón debería ser investigada. Entonces, ¿por qué esta negativa por parte de la Sociedad Española de Oncología Médica (SEOM) y una oposición desmedida e injustifica científica y éticamente por parte del diario "El Mundo"? ¿ Es que acaso ellos trabajan en propuestas terapéuticas, de las muchas experimentales que se están probando en la actualidad en los hospitales españoles con mucha menos base científica que posean mejores resultados en pacientes desahuciados? ¿Es que las quimioterapias que se están probando actualmente en los hospitales españoles son inócuas? ¿Poseen mejores resultados? ¿Están MÁS FUNDAMENTADAS? Pienso, que a lo mejor la SEOM debería ser la que investigase honestamente una propuesta terapéutica que ha surgido del seno de la comunidad científica española. Si no lo hiciera honestamente, opino que tal vez podría estar incurriendo en dejación de funciones.
Me siento muy apoyado por las comunidades científicas y clínicas españolas, aunque haya sectores minoritarios que discrepen (lo cual respeto profundamente). Creo que contamos con un amplio apoyo de las especilidades clínicas en su conjunto que va permitir investigar la auténtica validez de esta propuesta terapéutica y, en caso de ser efectiva, nos va a permitir mejorarla entre todos. Porque evidentemente, el cáncer es una enfermedad en la que deben estar presentes todas las especialidades médicas y todas las disciplinas científicas, ya que se trata de un problema muy complejo e indudablemente pluridisciplinar.
Por último, quisiera recordale a la SEOM y al Sr. Carrato, que el lugar de discusión científica no son los periódicos y medios de comunicación sino los Congresos Científicos, Reuniones Científicas y Publicaciones Científicas.
Decía Ramón y Cajal que *"de todas las reacciones posibles ante una injuria, la más hábil y económica es el silencio"*. Siguiendo su consejo, en este año en que celebramos el centenario de la concesión del premio Nobel a D. Santiago, en lo sucesivo tanto mi equipo de investigación como yo intentaremos no responder a los insultos o descalificaciones de ciertos medios de comunicación o sociedades para continuar centrándonos en nuestra labor científica y el interés de los pacientes oncológicos, a los que me permito enviarles a ellos y a sus familias mi más cariñoso apoyo, puesto que éste es un problema que nos atañe a todos.

Como enferma de cáncer, no entiendo que el ministerio de sanidad se niegue a aceptar y proponer a los enfermos, no sólo este, sino otros avances que curen esta maldita enfermedad. Espero que Antonio Brú siga investigando y llegue el día en que demuestre y convenza a todos de la valía de su tratamiento.

Un abrazo

Para ser un cientifico de poca monta parece que los cientificos de otros paises le tienen bastante consideracion.
En lo que va de año,ha dado conferencias en
_En enero en el CSIC
_Febrero La universidad de las Islas Baleares
_En febrero en la universidad de Evry(Paris)
_En Marzo se fue a la universidad de Oxford donde lleva variois meses trabajando con cientificos ingleses.
_En Julio Coferencia universidad complutense de Madrid.
_En 2000 fue nombrado por la asociacion de cientificos españoles el cientico mas brillante de año(cuantos oncologos que le critican han sido nombrado el mejor cientifico del año?).
La enciclopedia medica mundial pubmed publica sus mas importantes trabajos(y luego dicen que su trabajo no es cientifico).
-La asociacion fisica americana hace dos menciones en su revista anual. etc

Para decir que la terapia basada en la estimulación de los leucocitos puede frenar el cáncer o curarlo, hay que hacer ensayos clínicos controlados con cientos de pacientes. Me extraña mucho que un gobierno o que la comunidad científica internacional esté engañada en cuanto a las enormes reservas con que han acogido los trabajos del Sr. Brú.

Justamente sólo se le ha permitido experimentar su tratamiento con dos enfermos que habían sido desahuciados.
La comunidad científica internacional es un ente abstracto donde conviven los que han

ninguneado al doctor Manuel Patarroyo que desarrolló la vacuna contra la malaria, a la que "buena parte de la comunidad científica internacional e, incluso, la Organización Mundial de la Salud (OMS) siguen siendo reticentes a su utilización masiva", y otros científicos que están convencidos de que podría salvar cientos de miles de vidas.
Y respecto a la la sensatez del gobierno español en cuestiones científicas, ni me molesto en comentar porque los hechos son muy cabezones y muy elocuentes.

Si no fuese por cientificos como Antonio Bru pienso que todavia seguiriamos en la edad de piedra...
Esta suficientemente demostrado por la historia que el mundo solo avanza gracias al teson de personas innovadoras que se cuestionan los esquemas preestablecidos.
Espero que Antonio Bru este en lo cierto y pueda demostrarlo al mundo entero cuanto antes, pasando por encima de los intereses economicos y de los dogmas establecidos por conformistas y conservadores.

Creo que se debería organizar una campaña de envío masivo de e-mails o algo así, para que la gente conozca lo que está pasando con la investigación de Brú, porque está visto que los "mass media" no demuestran interés en tratar este asunto con seriedad y respeto.

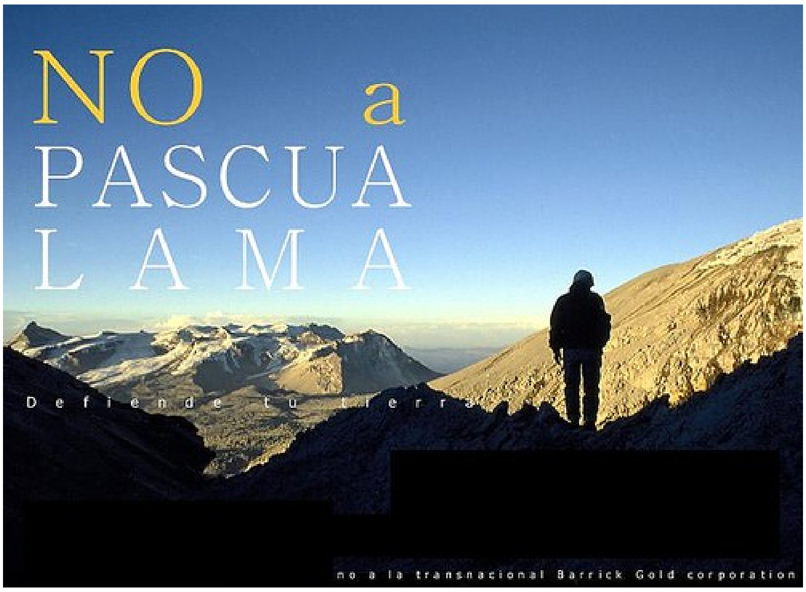
SOLIDARIDAD CONTRA LA DESTRUCCIÓN DE LOS GLACIARES DE PASCUA LAMA



Mi amigo Felipe Londoño, de Colombia, me manda esta alarmante noticia que afecta a Chile, y cuyas consecuencias nos afectan a todos:

Por un lado, se están derritiendo los glaciares y los científicos del mundo no saben como pararlo... y por el otro, Chile aprueba un proyecto para destruir dos glaciares. En el valle de San Félix, el agua más pura de Chile corre por ríos alimentados por dos glaciares de donde sale el más precioso recurso, que es el agua.
Grandísimos depósitos de oro, plata y otros minerales han sido encontrados bajo los glaciares.
Para llegar hasta ellos será necesario quebrar y destruir los glaciares -algo nunca concebido en la historia del mundo- y hacer dos grandísimos agujeros, cada uno tan grande como una montaña, uno para la extracción y otro para los desechos de la mina.
El proyecto se llama Pascua Lama. La compañía se llama Barrick Gold. La operación esta siendo planeada por una multinacional de la que es miembro George Bush, padre.
El gobierno chileno ha aprobado el proyecto de mina a cielo abierto, cuyo tiempo útil se estima en veinte años, para que comience sus trabajos este año. La Única razón por la cual no ha empezado aún, es porque los campesinos han obtenido un aplazamiento.
Si destruyen los glaciares, no solamente destruirán la fuente de un agua especialmente pura, sino que también contaminarán permanentemente los dos ríos, de tal forma que **nunca volverán a ser aptos para consumo de humanos o animales debido al uso de cianuro y ácido sulfúrico en el proceso de extracción.**
Hasta el último gramo de oro será enviado a la multinacional en el extranjero, ni uno se quedará para la gente a quien le pertenece esta tierra. A ellos solo les quedará el agua envenenada y las enfermedades consiguientes.
Los campesinos llevan bastante tiempo peleando por su tierra, pero no han podido recurrir a la TV por una prohibición del Ministerio del Interior. Su única esperanza para frenar este proyecto es obtener la solidaridad y la ayuda de la justicia internacional.
El mundo debe enterarse de lo que esta pasando en Chile.
El lugar por donde empezar a cambiar el mundo es nuestro lugar. Hay que hacer circular este mensaje de esta forma: por favor copien este texto y péguenlo a un mensaje nuevo de correo e.mail, añadiendo su firma y enviándolo a todas las personas en su archivo de direcciones, con copia oculta (CCO).-Se ruega a la persona numero 200 que reciba este mensaje mandarlo a noapascualama@yahoo.ca , para que sea remitido al

gobierno Chileno.
No a la mina abierta Pascua Lama en la cordillera andina sobre la Frontera entre Chile-Argentina.
Pedimos al gobierno Chileno que no autorice el proyecto Pascua Lama para proteger la totalidad de dos glaciares, la pureza del agua de los valles de San Félix y El Tránsito, la calidad de la tierra cultivable en la Región de Atacama, y la calidad de vida de la gente afectada de la Región.
Muchas gracias por su atención.

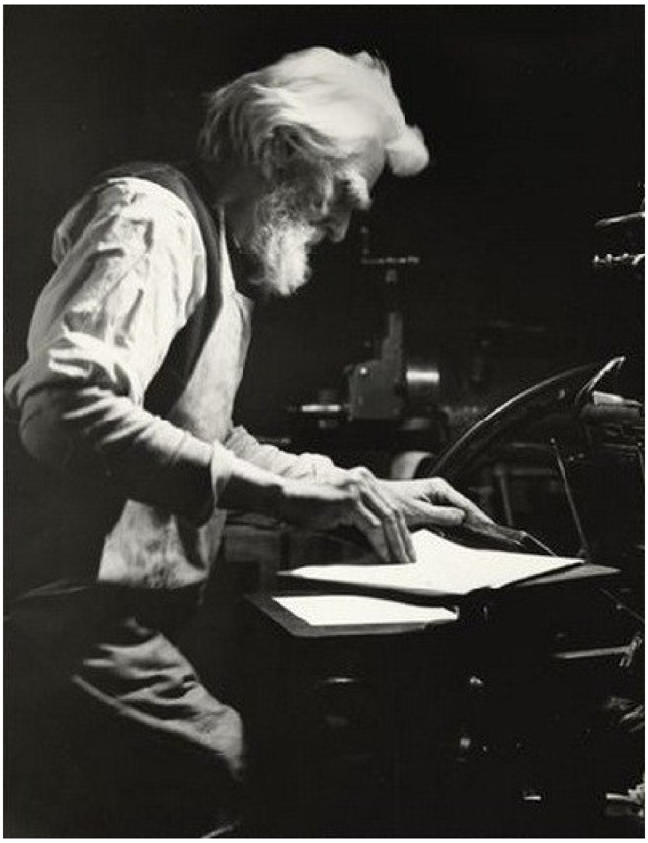
LOA AL ESTUDIO



¡Estudia lo elemental!
Para aquellos cuya hora ha llegado
no es nunca demasiado tarde.
¡Aprende el "abc"! No basta, pero
estúdialo. ¡No te desanimes!
¡Empieza! ¡Tienes que aprenderlo todo!
Estás llamado a ser un dirigente.

¡Estudia, hombre en el asilo!
¡Estudia, hombre en la cárcel!
¡Estudia, mujer en la cocina!
¡Estudia, sexagenario!
Estás llamado a ser un dirigente.

¡Aun sin techo, asiste a la escuela!
¡Persigue el saber, muerto de frío!
¡Empuña el libro, hambriento! ¡Es un arma!
Estás llamado a ser un dirigente.

¡No temas preguntar, compañero!
¡No te dejes convencer!
¡Compruébalo tú mismo!
Lo que no aprendas por ti,
no lo sabrás.

Comprueba la cuenta:

tú tienes que pagarla.
Apunta con tu dedo a cada cosa
y pregunta: "Y ésto, ¿de qué?"
Estás llamado a ser un dirigente.

Aunque tan sólo sea de nosotros mismos, lo cual no es poco si queremos hacerlo siendo plena y absolutamente libres, con responsabilidad, coherencia y eficacia, y también con amor y servicio, todos estamos llamados a ser dirigentes. No hay un poeta que me haya impresionado más que este. Tal vez por la temprana edad en la que me topé con él, pero me despertó como nos despierta el brusco y poderoso trueno en la madrugada.

UNA PREGUNTA AL ALCALDE DE TORREVIEJA

En el último día de campaña electoral muchos ciudadanos se siguen preguntando si deben votar a un candidato que ha basado su discurso en la agresión verbal contra sus oponentes y que no ha explicado satisfactoriamente las sospechas e imputaciones que recaen sobre él.
Hernández Mateo ha desaprovechado cualquier oportunidad de realizar una campaña limpia otorgando las mismas garantias de espacio a sus oponentes y ha desestimado el hacer ningún debate cara a cara con ellos, no teniéndo así que contestar a preguntas sobre corrupción y sobre su enriquecimiento personal durante su mandato al frente del grupo popular.
Ha presentado un programa electoral irrisorio, que no se basa en la realidad social de sus habitantes. 830 promesas,que se quedarán en el aire como otras muchas que ya ha incumplido en sus años de gestión. Insultos e injurias como discurso electoral, contra los candidatos Giménez, Dolón y Martinez Andreu, del que ha llegado a inventarse imputaciones judiciales que no existen, tal vez porque su programa no puede competir ni dar respuesta al de IU.
Hoy, en este último día de campaña, hartos ya de tantos globos naranjas, pinchitos, música estridente y tanto discurso basado en la falacia tenemos una pregunta concreta y clara, cuya respuesta puede arrojar luz sobre su integridad en la gestión municipal.
Sr.Hernández Mateo: ¿es verdad que le han encontrado en sus cuentas

bancarias personales 800.000 € (1.300.000.000 milloncejos de las antiguas pesetas) y que no consigue justificar su origen?
Sería poco inteligente por su parte creer que jamás tendrá que contestar a esta pregunta. No es buena consejera la soberbia que le hace insultar a los representantes de la oposición, y a la inteligencia de sus conciudadanos. Quizás tenga usted la esperanza de no tener que responder nunca sobre su posible enriquecimiento personal, presuntas prevaricaciones en contrataciones públicas, presunto uso de información reservada a cambio de alguna comisión, presunta corrupción amparándose en su condición de aforado. No hay plazo que no se cumpla ni deuda que no se pague.
Porque todo esto lo único que hace es perjudicar la imagen exterior de su querida Torrevieja a la que ponen como ejemplo de urbanismo insostenible y corrupción municipal, gracias a la imagen y dudas morales que su persona plantea a los votantes y opinión pública .
Por favor, colabore con la Justicia en vez de entorpecerla, por su bien y por el de Torrevieja, porque quienes usted cree que lo protegerán, lo van a dejar tirado, como han hecho con los demás.
Respetuosamente,

Carlota Martin Conrado

Putin, implicado en el desvío de fondos para la compra de pisos en Torrevieja

Autorizó desde el Ayuntamiento de San Petersburgo créditos blandos para construir un centro de negocios y restaurar un monasterio, que fueron utilizados para adquirir 32 apartamentos - Putin veraneó en ellos durante años

JULIO FUENTES / FRANCISCO PASCUAL

MOSCU/ALICANTE.- Una publicación rusa ha vinculado al todopoderoso presidente Vladimir Putin en un escándalo de corrupción, a falta de tres días para las elecciones

presidenciales, a las que se presenta como favorito.

Según el Novaya Gazeta, el equipo del mandatario ruso autorizó entre 1993 y 1996, desde su cargo de vicealcalde de San Petersburgo, subvenciones y créditos blandos para una corporación denominada Trust-20.

La publicación asegura que Trust-20 recibió «un crédito blando de 2.500 millones de rublos (dos millones de dólares entonces) para la construcción de un centro de negocios». También habla de otra subvención de 200.000 dólares para reconstruir un monasterio al que nunca llegó el dinero. Parte de esas sumas desembocaron, según el Novaya Gazeta, en «cuentas de bancos españoles» y sirvieron para adquirir 32 apartamentos en Torrevieja (Alicante).

Residentes de la localidad española aseguran que vieron a Vladimir Putin «más de diez veces» en aquellos años y que los que le acompañaban se dirigían a él como «el jefe».

Un equipo de periodistas rusos del bisemanal Novaya Gazeta, denominado Plumas Limpias, ha dado los detalles que implican al equipo de Gobierno que dirigía Anatoli Sobchak en el Ayuntamiento de San Petersburgo en los primeros años 90, y del que era vicealcalde Putin, en la concesión de fondos con créditos blandos a la empresa que gastó medio millón de dólares (casi 90 millones de pesetas) para comprar 32 apartamentos en la urbanización La Paloma de Torrevieja.

El relato de la supuesta corruptela publicada por el rotativo ruso concuerda perfectamente con los datos recabados por EL MUNDO. Según ha podido saber este diario, la empresa que, supuestamente, recibía los fondos del gabinete del que formaba parte Putin, Trust Twentieth Company (Trust 20), adquirió el bloque tercero y parte del cuarto de esta urbanización torrevejense en 1993.

La firma rusa compró de hecho a la promotora Profemar por, aproximadamente, 65 millones de pesetas, los citados apartamentos: los 27 que componían uno de los bloques y otros cinco en el bloque gemelo. La fecha en que se realizó la operación de compraventa y su coste aproximado (en el camino se quedaron 25 millones) coincide con el desvío de capital que denuncia la revista rusa.

El entonces presidente de la comunidad de vecinos de La Paloma asegura que en esa fecha se formalizó la venta de los 32 apartamentos con «un tal Peter». Efectivamente, este dato es real, ya que Peter Androuchevitch era y aún figura como administrador de la empresa compradora de los apartamentos. El administrador de Trust 20 todavía posee dos apartamentos en el edificio.

Producción agrícola

Tras la operación de venta, curiosamente, la empresa rusa pasó a tener su razón social en el mismo local que la urbanizadora, Profemar, en el número 20 de la calle de Ramón Gallud. El administrador único de esta constructora es Fernando Fenoll Bergua; la empresa, en teoría y según el registro de la propiedad, está dedicada a la producción agrícola. No obstante, su administrador y accionista Fernando Fenoll ha sido propietario de otras constructoras, aunque varias de ellas están extinguidas o en suspensión de pagos.

Según el rotativo ruso, la firma rusa desplazó desde su país a España a 80 obreros de la construcción para realizar el acabado de la obra en el edificio. Este hecho también

coincide con las informaciones recogidas entre el vecindario, que recuerda «un trasiego impresionante de albañiles rusos».

Tras la adquisición de los apartamentos y desde 1993, según el entonces presidente de la comunidad vecinal, «cada 10 o 15 días había excursiones de cientos de rusos, unos viejos y otros con aspecto de potentados». Este dato se asemeja al dado por la publicación rusa, cuando denuncia que el Ayuntamiento de San Petersburgo, del que formaba parte Putin, y Trust 20 emplearon los apartamentos para organizar excursiones de veteranos de la II Guerra Mundial, de la que obtenían grandes beneficios.

«Pasaron más de 3.000 rusos durante esos años», asegura el propietario del bar del edificio, Angel Alarcón. El viaje de cada una de las personas estaba tasado en 600 dólares. Sin embargo, según Novaya Gazeta, la empresa inflaba el presupuesto a 2.000 dólares por persona, con lo cual se lucraba adicionalmente con 1.400 dólares por pasajero. La revista apunta que la inversión millonaria en el edificio y el superávit oculto de los pasajes pudo realizarse con el fin de blanquear millones de dólares.

La manipulación de capital que revela el diario ruso asciende a 22.000 millones de rublos, 800 millones de dólares al cambio actual (es decir, unos 136.000 millones de pesetas).

La autorización de la transacción en créditos blandos fue supuestamente ordenada por el equipo del entonces alcalde de San Petersburgo, Anatoli Sobchak, fallecido por un ataque al corazón el pasado 20 de febrero.

La cúpula ejecutiva del primer edil estaba compuesta por Vladimir Putin, como uno de los adjuntos y responsable de Contactos Exteriores; por Alexei Koudrine, otro adjunto, y por Mijail Manvitcu, presidente del Comité de Estado para las Privatizaciones, asesinado en 1997.

dErsu, disculpe mi error, quería decir 1.300 millones.

Acaban de salir a la luz una grabación donde puede oirse al alcalde de Xàtiva , Rus, hablando del candidato a la alcaldía de Torrevieja. Asegura que en ese municipio hay un problema social. La transcripción de la grabación es esta:

Ahí hay un problema social. La mafia rusa es la que controla el tema.

Eso lo sabe el President. Y él lo sabe. No hay problema
El de Torrevieja si no lo juzgan que se quede ahi...

Ahi hay un problema social: la Mafia Rusa, que es quien domina el tema... Y ahi no lo matarán los ciudadanos. Lo matará la Mafia Rusa.

Yo... Pedro Mateo... ya lo conocemos. Toda la vida ha sido Pedro Mateo... él, él.

ROMANCE DE ROSAFRITA

Rosafrita, Rosafrita,
la de la fermosa cara,
la del airoso corpiño
que de tan colmado estalla;
la que las caderas mueve
de tal guisa, que al miralla
perdieron la su chaveta
los Doce Pares de Francia.
Rosafrita, si quisiérades,
abriríasme tu estancia,
guardada por once dueñas
con cucuruchos de rafia.
Si quisiérades, podrías
dexar la puerta entornada,
y yo pasaría dentro,
non para cosa malsana,
nin puerca, nin indecente,
que proponerlo no osara,
sino para que los dos
nos metamos en la cama."

Oyendo aquestas razones
tan corteses y tan castas,
ansí dixo Rosafrita,
bien oiréis lo que fablaba:

"Ven esta noche, Bardolfo,
que abriréte una ventana
por la que podrás pasar
si antes non te descalabras.
Mas non olvides, doncel,
que yo estoy ya maridada
con don Lope Gil y Puertas,
que aunque fuése a Tierra Santa,
puede volverse de pronto,
y figúrate qué cara
va a poner si nos sorprende
con las manos en la masa.
Mis dueñas non te preocupen,
que les daré una tisana
que la santa de mi madre
usó muchísimo en casa,
que si en la color paresce
cocción de tomillo y salvia,
te la tomas y las tripas
se te facen mermelada."

Estaban folgando juntos
el galán y la su dama,
cuando cascos de caballo
en el castillo sonaban.
"Aqueste trote, mancebo",
diz Rosafrita muy blanca,
"es el trote de mi esposo,
que entre mil lo adivinara."
Ya subía el caballero
por escaleras y rampas,
y al llegar a su aposento,
estas palabras fablaba:

"¿Qué facen las once dueñas
muertas y despanzurradas?"
"Murieron de sopetón,
pues picóles la tarántula."
"¿Qué facen esos calzones
de varón sobre mi cama?"
"Son un valioso presente
que os manda el rey de Navarra."
"¡Vive Dios, que están rompidos!"
"Es que usólos el monarca,
y entre Pinto y Valdemoro
le clavaron una lanza."
"¿Y de quién son esos pieses
que asoman entre las sábanas?"
"Del postillón, que ha venido
a repartir unas cartas."
"¿Y las reparte desnudo,
cual su madre le alumbrara?"

"En verano nada más,
porque en invierno se tapa."

El noble considerando
la situación con gran calma,
dixo a su esposa con pena
y mansedumbre en su cara:
"Siempre dixe, Rosafrita,
que de buena te pasabas;
y como eres tan piadosa,
la pringas, hija del alma.
Que se vaya el postillón
a otra parte a facer gárgaras.
¡Sin un hombre que la gobierne,
la casa non es la casa!"

MIEDOS

Mi maestro, que murió asesinado, me enseñó que sólo hay una manera de saber si alguien es un libertario genuino o es un fascista caracterial: *"Los libertarios, cuando*

acabamos una discusión, nos quedamos rumiando lo que nos han dicho; el fascista, sea de derechas o de izquierdas, se queda pensando en lo que ha dicho él, y en los argumentos que podría haber utilizado para aplastar a su oponente.

Y hasta el momento no he encontrado una fórmula mejor para definirlo, pero he de añadir que también nos diferencia la clase de miedo que afrontamos.

La mayoría de los que se aferran a sus opiniones y las defienden a cara de perro son los que han tenido miedo de ponerse en causa, de cambiar y evolucionar, de desagradar, de ser rechazado, de ser impopular, de equivocarse, y, sobre todo, de no ser un producto homologado en su grupo, y esos miedos los convierten en grotescos manojos de odio y de sufrimiento.

Esos miedos son el único impulso del instinto de supervivencia que queda intacto en el ser humano alienado.

Ser fiel a uno mismo y vivir en libertad requiere rebeldía, espíritu inquisitivo, deseo de conocer de primera mano y no estar de vuelta sin haber ido, características que no nos garantizarán el afecto de la mayoría, que sólo sale de su modorra para atacar a quien la sacude porque no es de su cuerda y de su condición.

La independencia de criterio necesaria para prescindir de la aprobación y del afecto de quienes nos consideran nefastos es una premisa para ser libres y ser íntegros.

Pactar con el *satus quo*, cumplir con las expectativas que depositan en nosotros sin tener en cuenta nuestra identidad, someterse a la norma, cumplir a carta cabal con las condiciones que nos imponen a cambio de ser aceptados, nos convierte en seres alienados, ajenos a nosotros mismos, escindidos, un despojo de lo que hubiéramos podido ser si no tuviéramos tanto miedo a sufrir. Pero eso no evita el sufrimiento, sino que lo desmesura, porque el precio que se paga por ser aceptados es la mutilación de nuestra genuina forma de ser .

La respuesta lógica es el odio y el resentimiento contra los enemigos que el grupo haya instituido, porque hemos vendido el alma por pertenecer a él, y quienes muestran su independencia nos lo recuerdan. Y como eso tampoco remedia la angustia, el recurso último es la farmacopea estupefaciente, como camisa de fuerza química que sólo abotaga las sensaciones y los estímulos para homologarlos con el resto de los zombies.

La incapacidad de asumir la frustración y el sufrimiento que producimos a nuestros semejantes y el que nos producen, consecuencia lógica de nuestras opciones en la vida, no deja salidas que no sean degradantes. Porque las únicas decisiones de las que hay de arrepentirse son las que no se han llevado a cabo, mientras que las veces que hemos actuado y hemos optado, aunque hayamos errado, forman parte del aprendizaje, y también nos constituyen y nos han enriquecido.

El miedo a traicionarse, el miedo a no actuar para no equivocarse, el miedo a silenciar lo que se cree y se piensa para no ser rechazados, son saludables latigazos del instinto de supervivencia que nos empuja a vivir apasionadamente. Y temblemos el día que nos fallen, porque sólo nos quedará anquilosarnos en nuestras opiniones.

Sigo pensando que usted ha hecho un discurso de buenos y malos. Como me encuentro en el bando de los malos, reivindico mi derecho a tener miedo, a cambiar de opinión de un día para otro, a cometer errores y a perseverar en ellos, a odiar y a sentir resentimiento, a hincharme de tranquilizantes. Del mismo modo respeto a quienes tienen todo claro y viven de acuerdo a una cartilla de conducta. Por lo que a mí respecta, tanto unos como otros -misantropía se llama esa figura- son igual de despreciables. Lo único que salvo del discurso es lo referente a la bondad, y ya ve que eso es un ejercio tanto libertario como religioso

Gracias por la dedicatoria, Gatopardo, pero si me pongo a pensar, creo que tengo mucho que aprender aún y lo que no sé es si me quedará tiempo; pero con maestros como tú, el aprendizaje no tiene más remedio que ser acelerado.

El diálogo muy interesante, sobre todo el final; últimamente, para la mayoría de los políticos -exceptuando a los de IU de Caspe y a cuatro más a lo sumo, habría que restablecer la ley del ostracismo y mandarlos a todos, sino a Ostras, por lo menos al islote Perejiles...

Interesante también esa apreciación de que ya ni una sabe... Y es que de tanto bregar con monstruos es muy probable que acabe una convertida en uno. Por favor, amiga mía, avísame en cuanto me huelas las escamas que me voy yo solita al último islote del mundo ¡Que asquito!.

Un abrazo entrañable.

Es muy interesante lo que escribiste. Aunque creo que tu maestro era muy buena persona si le otorgaba a los fascistas la capacidad de pensar. Yo no lo creo así (quizás no sea tan bueno como tu maestro, y quizás debería serlo, está bien). Porque reordenar las palabras de lo que uno ha dicho, organizarlas de otra forma, o jugar con ellas como una foca con una pelota (suponiendo que los fascistas pudieran jugar) para argumentar siempre lo mismo, podría ser una habilidad que todavía no es pensamiento. Pensamiento, para mí, es otra cosa.

Coincido con el desarrollo que has hecho acerca del miedo.

Mi queridísima Hannah: la coquetería de la humildad, que tan bien dosificas, no es una de las características que memás me seducen, y mucho tendríamos que cambiar para que fueras sincera cuando te muestra humilde y para que yo fuera crédula cuando no me das un par de lecciones que me dejan sentadita en el pupitre mordiendo el lápiz.

Amigo Reuben: justamente eso de negarle a los fascistas su capacidad de pensar es tan poco inteligente que me cuesta trabajo considerar siquiera que lo digas en serio, porque justamente el fascismo es la negación absoluta del adversario, del oponente, del que no admiten que pueda tener razón en algo, no lo consideran digno de tenerse en cuenta ni valorar sus razones. En definitiva, creo que el fascismo es una característica de los que no pueden imaginar otra lógica, otras premisas, otros valores, otra forma de ser, y por miedo a lo que se desconece, puede surgir la tentación de exterminio.
Conozco gente de derechas y de izquierdas que son fascistas, que no comprenden otra lógica que la suya por falta de imaginación.
Y conozco gente de derechas, muy de derechas, capaces de interrelacionarse, discutir, poner en común, debatir, aprender y enseñar, con la suficiente imaginación como para captar y comprender otras premisas que no sean las suyas, a los que admiro y de los que he podido aprender que no todos mis adversarios son mis enemigos, ni todos mis leales comilitones pueden ser mis amigos.

Querida Gatopardo, perdona la discrepancia, pero humilde, lo que se dice humilde, yo no lo soy ni coqueteando. Rezumo soberbia y orgullo -para mi mal- por todos mis poros, y por más que intento corregirme, sé que moriré así. Pero soy realista y se reconocer las cosas como son -supongo-. De lo de dejarte sentadita en el pupitre, mordiendo el lápiz... ¡Aún me estoy riendo!, y también sé que me reiré de ello cada vez que me acuerde!. El caso es que repeles el elogio, y aún que te disguste, para mí, en muchas cosas -no sólo en la lengua -a la gramática, sintaxis y esas cosas a las que tantas patadas doy, que nadie piense mal-, eres una gran maestra con la que personas inteligentes como yo, aprenden muy rápido ;-)

Para mí el fascismo siempre ha sido una actitud ante la vida. Y me da igual de dónde diga ser quien lo ejerce. Sin excepciones.
No sé si estoy equivocado. No busco certificados de infalibilidad y no me importa equivocarme ni rectificar si creo que debo hacerlo. Pero tampoco creo que el relativismo absoluto sea positivo.

Por supuesto que hablo muy en serio. Que todos tengamos nuestra parte fascista (¿o tú no la tienes?) es lo que te permite rechazarla como las actitudes que no están dirigidas por el pensamiento. El fascismo alivia el miedo, transitoriamente, porque lleva a la ilusión de que algo poderoso te va a proteger, sea una persona o una idea. Pero pensamiento es otra cosa, hay que ser muy valiente para pensar, implica estar advertido de que tu relación con el saber supone la anomalía de pensar sin alcanzar plenitud, ni sosiego, ni protección.
Yo no hablo de gente de izquierda, ni de derecha, ni muy de izquierda, ni muy de derecha: hablo de fascismo.

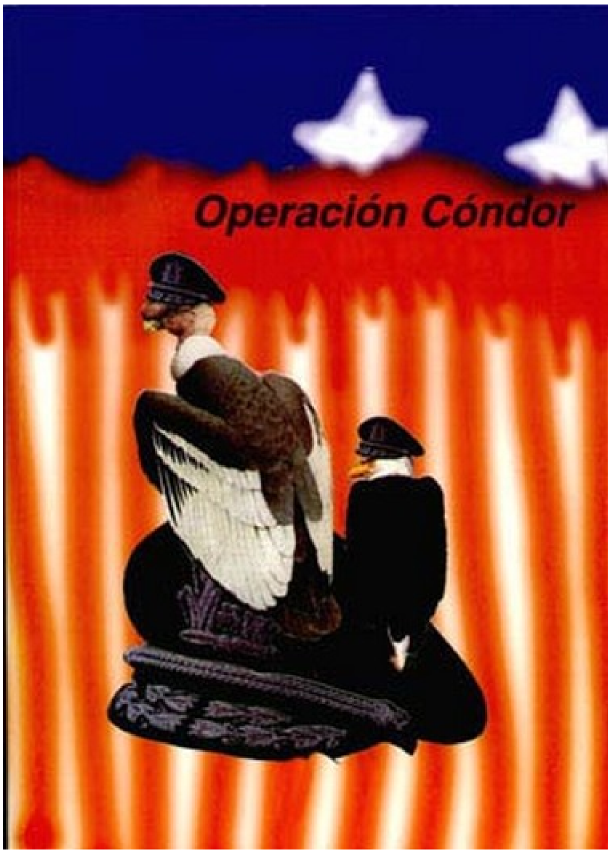
LA CIA EN AMERICA LATINA EN LOS AÑOS 70.



Serie Documental vídeo "InjerenCIA" La Invasión Silenciosa
Capìtulo "La invasión silenciosa, Años 70"
Coproducción, Panafilms, Ministerio de la cultura y la Asociación de Medios Comunitarios
2005
"Esta Serie Documental cuenta la "otra historia" de las relaciones de los gobiernos estadounidenses con la América Latina. La historia que no es "oficial" para Washington ni "conveniente" para muchos gobiernos del hemisferio.
Durante muchos años se hizo creer que la Agencia no habìa actuado en Venezuela como lo hizo en otros paises del continente, pero su historial esta saliendo a la luz revelando una cadena de intervenciones que se remontan hasta la mitad del siglo pasado.
Los testimonios del Ex Oficial de la CIA Philip Agge, los de quienes se encontraron cara a cara con sus agentes y las pistas que la Agencia no pudo borrar, nos permitieron seguirle el rastro a la CIA en Venezuela durante el periodo comprendido entre 1947 y 1959, descubriendo historias muy semejantes a las que vemos hoy en dia".
Apenas empezamos a vislumbrar lo que significó el terror, las torturas, los secuestros, las desapariciones, los vuelos de la muerte y los asesinatos indiscriminados, y el grado de corrupción, desprecio a la vida e impunidad en la jerarquía y las instituciones que debieran garantizar la legalidad.

EN RECUERDO DE LA ESPINA...ESPINAE

Sé, gata querida y callada, que tú me descubriste a Tautina y creo que esa es una deuda que jamás podré pagarte. Para mí Tautina fue, desde entonces, la escritora a quien quería impresionar. La bloguera que quería que me visitara y que me leyera, la mujer que me habría encantado tener.
Es difícil, muy difícil, encontrar escritores realmente sobresalientes en los blogs. Hay muchos buenos, algunos muy buenos, pero yo sólo he conocido, como figura descollante, a Tautina.
Porque une a un instinto natural para la escritura, una dulzura y una magia inclasificlable, indefinible que la hacía especial a mis ojos. Sus escritos me hacen reír, soñar, llorar, pensar y, muchas veces, lo siento, empalmarme, porque no he leído jamás una escritora más decididamente sexual. No sólo en sus escritos eróticos; Tautina tenía un fondo sensual que me llamó la atención desde el momento en que la leí por vez primera.Tautina escribe técnicamente con gran precisión y, espiritualmente, con la esencia de la poesía en la punta del lápiz. Arropan, sonríen y abrazan sus textos y echo de menos la sensación de urgencia que me invadía cuando el *feed* me avisaba de que Tautina había actualizado el blog.
No sé, como tú sabes, mi querida gata viejales, nada de estilos ni de esas cosas, pero sé cómo se me acelera el corazón cuando leo un texto de Tautina. De su escritura yo resaltaría, además de su terrible sensualidad, por encima de otras cosas, su finísimo sentido del humor. Porque el sentido del humor requiere inteligencia, y a ella le sobra. Requiere un instinto poético innato, que ella domina sin problemas, y necesita de un punto de vista distinto, y Tautina es una experta miradora desde ángulos inverosímiles. El vértice más complicado de la escritura de Tautina es, sin duda, la emotiva sinceridad. Y esa arista, que la hace sublime cuando deja rodar su inmenso talento, es la que, acaso, nos esté librando de ella, desde que cerró La espina.
Estoy seguro de que Tautina sigue escribiendo, porque para ella, fijo, es tan importante como respirar. No sé dónde ni quién disfruta ahora de su genialidad, pero todos los días me doy de cabeza con mil direcciones buscándola.
Como sé que te lee, o te leía, al menos, y sé que tú compartes conmigo, y con más Tautinófilos, el amor por sus textos, te mando esta tontería, con esta cancioncita que he grabado para agradecer a Tautina todo lo que, al menos a mí, me dieron sus letras. Porque de todo lo que sentí y siento leyéndola, el sentimiento más grande que persiste en mi corazoncito arrugado es el de gratitud; gratitud por haber tenido el inmenso placer de leer a Tautina.

Days (canción para Tautina)

Sé que, como yo, no hablas demasiado inglés, querida Tautina, así que he traducido, como he podido, la letra de la canción. No es que sea poesía, precisamente, porque al traducir se pierden el ritmo, la rima y la magia, pero sí refleja esa enorme gratitud que siento por haber tenido la suerte de leerte y conocerte.

> *Gracias por esos días; por esos días sin fin, esos días sagrados que me diste.*
> *Estoy pensando en esos días... y no olvidaré uno sólo de ellos, créeme.*
> *Bendigo la luz que te ilumina y,*
> *aunque te has ido, estás conmigo todos y cada uno de los días, créeme.*
> *Días que recordaré toda mi vida,*
> *días en los que lo malo, ahora me parece bueno;*
> *te apoderaste de mi vida, y entonces supe que pronto me dejarías;*
> *pero está bien: ya no me da miedo el mundo, créeme.*
> *Ojalá hoy fuera mañana,*
> *la noche es oscura y sólo trae tristeza, deja que llueva...*
> *Gracias por los días; por esos días sin fin, esos días sagrados que me diste.*
> *Estoy pensando en esos días... y no olvidaré ni uno sólo de ellos, créeme.*

Echaré muchísimo de menos tus escritos, pero ¿sabes?, guardé un buen montón de ellos para imprimirlos y leerlos en papel. Tú ya no estás, pero me quedan los días que me regalaste. Y no olvidaré ni uno solo de esos días.
Suerte, Tautina, y por favor, no dejes de avisar de dónde podemos encontrarte si vuelves a publicar.
Hasta siempre.
Con amor, admiración y gratitud eternas, de tu incondicional

Wolffo.

Aquellos que me conocen saben que tolero peor los halagos que las críticas (y mira que llevo mal las críticas). Por eso, sólo dos de mis peores amigos blogueros podrían haberse unido para abrumarme de semejante manera, hasta sentir que mis mejillas arden y el aire se niega a pasar por mi epiglotis. Sí, desfallecí de pura vergüenza al leer este melodrama, pero no sé si fue más por ver al Wolfales contando mis intimidades en público a la gata gatuna, o porque de haberme cantado esta canción al oidito en su momento, de seguro habríamos retozado como salvajes.
En fin, escurramos nuestros pañuelos de lágrimas innecesarias. Sigo escribiendo, y avanzando en este espeso lodazal que es la literatura. Gané un premio literario hace un par de semanas, voy a publicar un libro de cuentos para niños con unos amigos, tengo otro de relatos pululando por un par de buenas editoriales y ando terminando una novela, o siendo correctos “la novela”, una obra grandiosa a la altura de mi descomunal talento, que me catapultará hacia la bien merecida fama.
No lloréis por mí, ni por la espina, que aún queda Tautina para rato.

Ya me temía yo que eso de inciciarme como celestina para que caigas rendida en los brazos de Wolffo iba a resultar complicado. No porque Calixto Wolffo no sea una bomba sexual, y con un físico digno de hacerle todos los homenajes que el cuerpo aguante, que además canta, compone y toca la guitarra,sino porque tú, puñetera Tautina Melibea. eres tan sádica que prefieres escribir y publicar en vez de folgar y retozar sin freno.

Y claro, siendo así, como Celestina no me como un Saci, aunque he iniciado unos pasos de baile apache para celebrar tu premio, la publicación de los cuentos, y que estés dando los últimos toques a tu novela.
Pero me hacía ilusión lo de Wolffo y tú en plena orgía amorosa

Es genial lo de tu premio, tu novela y esos dos maravillosos libros de relatos. Me alegra muchísimo, de verdad. A ver si podemos disfrutarlos pronto.
Por otro lado, me tiro de los pelos de no haber sabido antes lo de cantar al oído y el retoce y todo eso que es, en definitiva, lo único que a mí me importa.

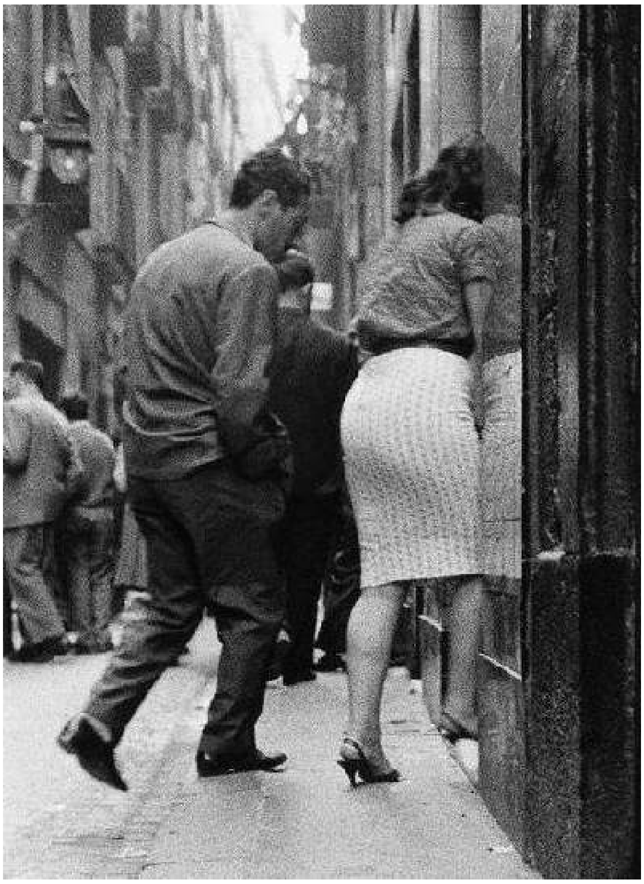
MANIFIESTO EN DEFENSA DE LOS DERECHOS DE LAS PROSTITUTAS DEL COLECTIVO HETAIRA



Cada vez que los legisladores se deciden a proteger y defender a la mujer, me echo a temblar. La dichosa Comisión Mixta de la Mujer del Congreso, desde que existe, ha logrado pergeñar las conclusiones más irreales, contrarias al sentido común y a la legitimidad, y todo adobado con una visión de la mujer como víctima propiciatoria a la que hay que salvar. Entre otras barbaridades, sus conclusiones sobre la prostitución, que consiste en perseguir policialmente a las prostitutas y criminalizar a los clientes. Me sumo, pues, al Manifiesto del Colectivo Hetaira, que aboga por el reconocimiento de la prostitución como una actividad laboral legítima y para que se le reconozcan a las prostitutas los mismos derechos laborales que al resto.

Ante las conclusiones a las que ha llegado la Comisión Mixta de los Derechos de la Mujer del Congreso de los Diputados en relación al tema de la prostitución, el colectivo Hetaira (Colectivo en Defensa de los Derechos de las Prostitutas) quiere manifestar:
Que lamentamos profundamente dichas conclusiones ya que dejan totalmente desprotegidas a las mujeres que ejercen la prostitución y reafirman la vulneración de derechos a las que hoy están sometidas.
Que, tal y como lo hemos manifestado reiteradamente las Asociaciones que tenemos conocimiento directo del tema, la lucha eficaz contra la trata de mujeres con fines del comercio sexual solo es posible si se diferencia claramente la prostitución voluntaria, que debe ser reconocida legalmente, de la prostitución forzada que debe ser perseguida. Así lo reconoce también el Informe de la Unidad Técnica de Policía Judicial de la Guardia Civil elaborado en 2004.
Que las conclusiones a las que ha llegado la Comisión están altamente prejuiciadas e ideologizadas y no tienen en cuenta la realidad concreta de las personas trabajadoras del sexo. Se ha derrochado el dinero público y el tiempo de todas las personas que han

pasado por la Comisión para intentar justificar unas conclusiones que estaban tomadas antes de que la Comisión empezara sus trabajos: así lo demuestran las declaraciones de los miembros del PSOE y del PP cuando se constituyó la Comisión que coinciden al cien por cien con lo que ha sido aprobado.
Nos asombra la tergiversación que se hace de los artículos 9 y 14 de la Constitución para negar la consideración de la prostitución como un trabajo, cuando esos mismos artículos sirven para recomendar justamente lo contrario: la necesidad de que se acabe con la discriminación que sufre este sector de trabajadoras por el hecho de ofrecer servicios de carácter sexual. La ideología discriminatoria que juzga a las mujeres en función de su comportamiento sexual sigue presente en las conclusiones de la Comisión.

Nos preocupa especialmente que un sector del feminismo, en nombre de la dignidad de las mujeres en abstracto, niegue la dignidad de las mujeres que quieren seguir ejerciendo voluntariamente la prostitución, invisibilizándolas y desconsiderando sus derechos como trabajadoras. En este sentido no está de más recordar que en este país hemos tenido una legislación abolicionista bajo el franquismo y que la Ley que se promulgó en 1956 para erradicar la prostitución aludía en su preámbulo a la dignidad de las mujeres.
Desde Hetaira esperamos que el sentido común prevalezca y reiteramos nuestra voluntad de seguir luchando por que se garanticen los derechos de todas las personas que ejercen la prostitución. En este camino nos parece fundamental el reconocimiento de la prostitución como un trabajo que también es ejercido de manera voluntaria y el consecuente reconocimiento de derechos que se derivan de ello.

HETAIRA (Colectivo en Defensa de los Derechos de las Prostitutas).

Hay un tic bastante estúpido que afecta a los gobernantes en general, y a la izquierda en particular, que consiste en creer que para acabar con un problema, basta con redactar una ley que, normalmente, está tan llena de buenismo como de ineficacia.
Para acabar con los accidentes de tráfico: carnet por puntos.
Para acabar con los asesinatos domésticos: ley de violencia de género.
Para acabar con la discriminación sexual: ley de igualdad.
Para acabar con la prostitución...
Es tan estúpido pensar que la prostitución se arregla metiendo en el trullo a las prostitutas y a sus clientes que uno se desespera de ver que sus gobernantes, una y otra vez, hacen el ridículo en lugar de trabajar con un poquito de sentido común.
Me sumo, pues, al manifiesto sin ambages, gata, pero sigo pensando que lo mejor de tu blog son los pingüinos, que lo sepas.
Así que me gustaría saber porqué narices no se mueven... ¿es mi ordenador o es que, muertecita de envidia, les has quitado la vida?

Yo te quiero y eso.

Todas las personas que sé que no van nunca de putas, o no sienten la necesidad de ello, son más transigentes en su trato con ellas y consideran que deben tener los mismos derechos que un trabajador cualquiera...
Entonces... mi pregunta es:
¿Quién demonios está contra eso?
¿Sus clientes habituales?
¿Cuatro mamarrachos con la polla mirando para adentro?
¿Los individuos que se sienten burlados y cornudos, y por despecho intentan que no existan legalmente?
Sorprendente... por lo menos, para mí. Pero aun lo es más que un gobierno que se esfuerza en legalizar a todo quisque, combate el dinero negro y la estafa a la seguridad social, niegue el reconocimiento a algo tan evidente.

A UNA JOVEN DE MAL CARÁCTER

Si fueran curvas suaves los enojos
¡Qué enojos recorrieran tu figura!
Enojos en tus pechos, tu cintura…
Enojos cuanto en ti paran mis ojos.

Si fueran para amar tus labios rojos,
que no para el reproche y la amargura,
no hubiera en boca alguna más dulzura
que en esa en que se hielan mis antojos.

Hija del tedio, hermana de la cuita,
garganta de zarzales y de gayas
donde el viento más dulce se marchita.

No habiendo paz por lejos que te vayas,
- perdóneme Neruda por la cita -
me gusta cuando duermes… Porque callas.

Señora Gatopardo: Gracias por este perfecto soneto que ha tenido a bien publicar. Lo

que a continuación escribo va dedicado a usted:
¿Dómine por mujer?¿Purista?¡Cuerno!
¿Qué tilde escapa de sus uñas horro?
¡Armar un zipizape sempiterno
porque en lugar de gorra dije gorro!
¡O bien porque escribí sin h ivierno
verme tratar de bárbaro y de porro,
y dar la casa y la quietud al diablo!
¡Por qué?¡Crimen atroz!¿Por un vocablo!

MANUEL CONTHE, PRESIDENTE DE LA COMISIÓN NACIONAL DEL MERCADO DE VALORES, DIMITE

Y confirma las informaciones de **El espía que surgió del frío: la utilización de los organismos de control del Estado para favorecer a los amigos de conveniencia del Gobierno de turno deja sin garantías a los inversores en España.**

El presidente del regulador dimite tras poner en solfa la independencia del organismo y la actuación del vicepresidente, Carlos Arenillas
La Gaceta de los Negocios - (hace 27 minutos)
Conthe volvió a pedir ayer que dimita como *"gesto de generosidad y lealtad hacia la institución".*
A su juicio, el vicepresidente ni es ni parece independiente del Ejecutivo. El ya ex presidente recordó que Arenillas es marido de la ministra de Educación, Mercedes Cabrera, y tiene *"notorios vínculos de amistad"* con los dos últimos jefes de la Oficina Económica de José Luis Rodríguez Zapatero.
Para reforzar su aseveración, Conthe rememoró el episodio en el que Arenillas abrió a sus espaldas y de forma *"no adecuada"* una investigación al presidente del BBVA, Francisco González, tras una denuncia de la Cadena Ser.
Conthe señaló que quienes, como el vicepresidente de la CNMV, no son funcionarios del Estado *"no distinguen con tanta nitidez el Estado del Gobierno".*

Conthe receta al Gobierno que reforme el consejo del regulador
"Manuel Conthe quiso ser constructivo en su despedida como presidente de la CNMV tras dos años y medio en el cargo. El ya ex presidente dio a los diputados del Congreso su particular recetario para "restañar las heridas que ha sufrido el prestigio" del regulador.
La primera es que Carlos Arenillas cese en el cargo de vicepresidente. En su opinión, los vínculos de Arenillas con La Moncloa no se han circunscrito al ámbito de lo personal, "sino que han trascendido a asuntos concretos".
La segunda receta es que la directora general del Tesoro debe abstenerse, abandonar la sala de reuniones o, directamente, no asistir a ellas cuando el consejo de administración de la CNMV analice *"cualquier asunto en el que pueda existir un conflicto de interés"* entre el regulador y el Gobierno.
(...)
"A su juicio, algunos directivos y grupos: *"no siempre se han educado en una tradición de respeto a las instituciones públicas supervisoras".*

Dice un genealogista de la familia Arenillas:
http://www.elanillo.com/documentos/Arenillas.doc.
:"La progresiva descapitalización de esta rama de la familia Arenillas (existen otras dos ramas de muchísima mayor fortuna y hacienda) parece deducirse de lo que algunos llamarían una "errónea" política matrimonial. Se ve que a estos hombres y mujeres se inclinaban al matrimonio sobre todo por los sentimientos (el amor) antes que el patrimonio (el bolsillo). Esto se ve muy claramente cuando se comparan entre sí las distintas ramas de los Arenillas, observando que las "ricas", se dedicaban por sistema a casar a sus hijos con las mozas más hacendadas del lugar, lo que permitiría suponer que en muchas ocasiones no mediaría un verdadero amor sino, como mucho, afecto, cariño y respeto." Más dimisiones. Pero si esto hubiera ocurrido en cualquier otro país europeo, habría caído el Gobierno. Y aquí es información de páginas interiores, porque a los ciudadanos no les da la gana de ejercer como tales.
No es que vayan a dejar de ser noticia, Diego, es que ya no lo es. Y es muy gordo lo que está en juego.

Pues no Aurora. Todos los estados europeos poseen despachos especializados en operaciones como esta. Debido a las desnacionalizaciones, los gobiernos intentan defender las empresas de importancia estratégica de las veleidades del resto de la Unión. Y Alemania es uno de los que más lo hacen.
Esto demuestra que la Unión aun no es una gran Nación de naciones. Falta una regulación legal sobre ello.
Como ejemplo te diré que hoy mismo, una empresa alemana, al comprar una eléctrica española, puede mandar su electricidad donde le convenga.
Luego ocurre que Endesa es la propietaria de las centrales nucleares y la política que prepara la Unión en este tema es...
Pero esto da para otra historia más compleja.

Y si mi historia, del archivo, tuviera que ver con la de mis ancestros, posiblemente hoy sería un facha asqueroso.
No es bueno remontarse tan lejos para saber de los sentimientos de los hombres de hoy día. Más de uno podría salir trasquilado con recuerdos más recientes... como el extraperlo, por ejemplo.

Y con lo primero no quiero situarme en contra de Conthe, sino todo lo contrario.
A cada uno lo suyo y este hombre ha sido muy entero. No estaba de acuerdo con el sistema y lo ha denunciado con dignidad. No como los que ahora se escandalizan como buitres roñosos.

Bajemos a lo concreto Pau: la CNMV es un organismo del Estado, que ha de tener independencia del Ejecutivo, que no debería supeditar su labor de control siguiendo los dictámenes del Gobierno de turno. Punto.
Si en Francia o en Alemania se hubiera detectado que un organismo estatal como la Comisión Nacional del Mercado de Valores anda de colegui tomando las consignas del Ministerio de Economía y pasando por alto las irregularidades que cometen interfiriendo en las cotizaciones y compras bursátiles, hubieran rodado cabezas, y hubiera caído el gobierno. Aquí no.
Aquí pillaron hace unos años una conversación con un tal Felipe González diciendo que al Consejo General del Poder Judicial hay que decirles lo que tenían que hacer, y lo que no se les podía consentir, y nos tiramos unos días comentando el fallo tan tonto de que no se diera cuenta que la cámara tenía el micrófono abierto y sobre la falta de ética de los periodistas que lo grabaron y emitieron. Claro, que el tal Guerra había dictaminado la muerte de Montesquieu y la separación del Ejecutivo, el legislativo y el Poder Judicial, base de una democracia, y aquí tan panchos...
Estos son los sórdidos entresijos de una democracia alumbrada por el franquismo que no tiene ciudadanos que sepan ejercer su función como tales, y que, como demostración de sus convicciones políticas, se limitan a ser hooligans de su partido y actuar como tales, independientemente de que su partido, cuando tiene el poder, actúe en contra de la legalidad y se pase por el forro de los dídimos los intereses de la nación para favorecer a sus amigos o entorpecer a sus enemigos. Que no olvidemos que en este asunto hubo un veto previo a "los catalanes". ¿O es que si eran catalanes también ponían en peligro la "seguridad nacional" si se adueñaban de de Endesa?

No he dicho, apreciada gata, que apruebe dicha conducta. Desde un punto de vista económico-liberal, esto es jugar sucio e ilegal, y si se juega a ser liberal, se ha de hacer bien.
Tanto Alemania como Italia han utilizado sistemas distintos, pero igual de sucios, para evitar lo mismo que iba a suceder en España.

De Francia solo sé que el diario de la cámara de comercio de Barcelona denunció hace años una situación parecida.
De Felipe puedo creerme todo, más o menos lo mismo que de Mitterrand.
¿Pones el ejemplo de los catalanes para provocarme?
La cuestión es que la acción de Endesa se ha pagado muy por encima de lo que Gas Natural estaba dispuesta a pagar.
Así y todo, la terquedad bastarda de ciertos poderes políticos en poner cuernos y rabo a los catalanes, y el posterior silencio de los demás... eso lo pagaremos muy caro. Lo sabemos todos.

Un fuerte abrazo.

SABOTAJE CONTRA TRIBUNA DE PERIODISTAS

Christian Sanz

Publicado en Tribuna de Periodistas

Desde que nació, este periódico se ha dedicado a hacer periodismo de denuncia e investigación sin medias tintas. Los ilícitos cometidos por algunos funcionarios se han dado a conocer sin eufemismos y con suficiente evidencia como para que -si existiera la independencia judicial- una docena de ellos debieran purgar sendas condenas judiciales.
Muchas de nuestras denuncias han tenido repercusión en la Justicia y allí hemos ratificado lo publicado en nuestro medio. Asimismo, en no pocas oportunidades hemos sido los mismos periodistas de Tribuna los que nos hemos dirigido a la justicia para inicial la pertinente indagación oficial.
En el mismo sentido, en los últimos meses, algunas de nuestras investigaciones han provocado el interés del Congreso Nacional. Dos de ellas han sido: la desaparición de Julio López **(1)** y las irregularidades cometidas en el Cenareso **(2)**, organismo abocado a la recuperación de adictos.
Obviamente, así como nuestras indagaciones despiertan el interés de funcionarios que quieren

investigar los ilícitos denunciados, también provocan malestar a aquellos que son señalados periodísticamente.

Por esto último, calculamos, algunos de los periodistas de Tribuna hemos sufrido una grave serie de ataques a nuestras computadoras personales y a nuestras casillas de correo electrónico. De más está decir que la página de Internet también ha intentado ser atacada. ¿El motivo? Difícil afirmarlo con total precisión, aunque es sencillo especularlo sabiendo cuáles son las investigaciones que más enfurecen al oficialismo, motivo por el cual no es la primera vez que nos hackean **(3)**.

Quema esas cartas
Quien escribe estas líneas, ha sufrido hace varios días un hackeo de su computadora personal, con la consiguiente pérdida de información guardada en el disco rígido. El ataque ha sido tan grave que la computadora ha quedado virtualmente inservible.
Quienes han cometido el ataque han logrado de alguna manera su objetivo, ya que el tiempo dedicado a solucionar este problema ha obligado a descuidar el trabajo periodístico de nuestro sitio, lo cual puede apreciarse en las últimas portadas de Tribuna de Periodistas y la falta de actualización de la sección "Noticias del día".
Recién en el día de la fecha se ha podido armar (léase "improvisar") una nueva computadora para poder seguir avanzando en el trabajo periodístico de nuestro querido medio. Al mismo tiempo, otros periodistas de Tribuna siguen sufriendo ataques a sus equipos de trabajo.
Por lo antedicho, surge inevitable la pregunta ¿Qué pudo haber provocado que nos atacaran como nos atacaron? La respuesta no es sencilla, aunque tampoco es complicada. Conociendo el tipo de investigaciones que hacemos, es dable pensar que el ataque proviene por ese lado. Puntualmente, hay tres investigaciones en curso que afectan a altos funcionarios del Gobierno nacional y que probablemente tuvieron que ver con lo sucedido:
1-La desaparición de Jorge Julio López: se han publicado tres artículos sobre la responsabilidad del kirchnerismo en la "evaporación" del testigo y se ha demostrado cómo los diputados del Frente para la Victoria se han negado a investigar la línea aportada por este periódico.
2-Corrupción y narcotráfico en la Aduana Nacional: Hace unos meses se publicó un artículo que muestra con nombre y apellido quiénes y cómo hacen negocios oscuros en la dependencia aduanera. En breve se iba a publicar la segunda parte que mostraba la complicidad del director nacional de Aduanas, Ricardo Echegaray y cómo se movía el tráfico de drogas allí frente a sus narices **(4)**
3-El testaferro K: Lázaro Báez y sus prósperos negocios con el kirchnerismo. La historia jamás contada sobre sus comienzos y el detalle de las licitaciones "armadas" a su favor.
4- Un argentino en Madrid: El embajador argentino en España, Carlos Bettini, es un hombre con un pasado muy turbio. A pesar de conocerlo, el Gobierno de Kirchner lo ha nombrado en ese cargo tan importante. Documentos reveladores y la historia de las valijas de "Hugo Anzorreguy".
Es inevitable que el *hackeo* que hemos sufrido tenga vínculo con alguna de estas investigaciones. Hay funcionarios de segunda y tercera línea que han sido entrevistados para esos artículos que nos han anticipado que harían "lo imposible" para que estos no vieran la luz, incluso "comprarnos" **(5)**.

Autoritarismo K
No es novedad alguna decir que Néstor Kirchner se maneja frente a los medios de manera autoritaria y descortés, olvidando que es un funcionario público que le debe explicaciones a la misma gente a la que da la espalda. Es sabido que aquellos periodistas que no se meten en cuestiones sensibles al Gobierno, disfrutan de las mieles de los privilegios y la publicidad oficial, mientras que aquellos que muestran los ilícitos K o las meras incongruencias del Gobierno, son condenados al ataque virulento del primer mandatario o sus obsecuentes ministros.
Kirchner no da entrevistas ni conferencias de prensa y sólo se planta frente a los micrófonos para denostar a sus "adversarios" de manera descalificadora. Ataca a los pocos (poquísimos) medios independientes a través de otros medios de la talla de *Página/12*, revista *7 días* o *Veintitrés*, órganos pseudoperiodísticos que sólo se usan para denostar a aquellos que están en la vereda opuesta al Gobierno. La operación es tan evidente que da asco.
Y mientras todos miran para otro lado, el presidente y sus oscuros ministros siguen sin dar explicaciones sobre cuestiones esenciales como los desaparecidos fondos de Santa Cruz, las

valijas con droga de Southern Winds y las coimas de Skanska. El silencio oficial es más que elocuente. Sobre todo cuando aparecen presiones directas por parte del ministro del Interior contra el juez de la última causa mencionada, Javier López Biscayart.
Así se maneja este Gobierno, con la prepotencia de quienes creen que pueden embestir contra todo el mundo impunemente, incluso hackeando a aquellos que no comulgan con el pensamiento K. Lo sucedido a nosotros es idéntico a lo que pasó a otros colegas críticos, como *La política on line* hace unos meses **(6)**.
Lo que olvidan los inquilinos de turno de Balcarce 50 es que todo tiene un fin.
Y allí, cuando ya no tengan el poder de hoy, tendrán que dar demasiadas explicaciones...

Carrio acusa al embajador Bettini de estar informado del caso.

Elisa Carrió volvió ayer a criticar duramente al Gobierno por el escándalo del tráfico de cocaína a España. La jefa del ARI acusó al embajador en Madrid, Carlos Bettini, de haber estado al tanto del caso y de omitir informarlo a la Cancillería. Y además relacionó al director general de la Aduana, Ricardo Echegaray, con maniobras supuestamente ilegales llevadas a cabo en Santa Cruz.

Carrió sostuvo que el presidente, Néstor Kirchner, está "cubriendo" a Bettini. También afirmó que "(el embajador) no podía dejar de saber, porque conoce a los Maggio (dueños del 70% de Southern Winds). Entonces está encubriendo".

Sin referirse a la líder del ARI, Bettini contestó a través de un comunicado de cinco puntos. Allí negó cualquier vinculación y argumentó que cuando el cargamento de droga llegó a España —el 17 de septiembre— él no había asumido su cargo.

"Presenté cartas credenciales como embajador el 6 de octubre de 2004. Concurrí a la embajada argentina en condición de jefe de misión por primera vez el 24 de septiembre del mismo año, es decir con posterioridad a los hechos denunciados. Nunca tuve noticia, del caso mencionado, ocurrido el 17 de septiembre. La primera información que esta embajada tuvo data del día 12 de febrero", sostiene el comunicado.

En declaraciones radiales, Carrió insistió ayer en que "Southern Winds fue creada para este tipo de tráfico", y que las valijas tenían etiquetas de la embajada argentina. Bettini le contestó que "el correo diplomático argentino, por motivos de seguridad, no tiene identificaciones ni de stickers ni de pegatinas que indiquen referencia a la embajada".

Entrevistada por Clarín, un autoridad de la Guardia Civil española relató que, el día que la droga apareció en el aeropuerto de Barajas, ellos llamaron a la embajada argentina para adelantarles lo que sus controles habían detectado. El canciller Rafael Bielsa informó que nunca recibió ningún cable de la representación diplomática argentina en Madrid. De todos modos, instruirá un sumario interno para terminar de verificarlo.

Carrió ayer también fue muy dura con el jefe de la Aduana, Echegaray, viejo colaborador de Kirchner. En el ARI recordaron un informe propio difundido en marzo pasado, de los diputados Adrián Pérez y Fabiana Ríos. Allí se da cuenta de que Echegaray estaba vinculado a quien definen como "el recaudador de fondos para la campaña" de Kirchner, Rudy Fernando Ulloa, ex secretario privado del Presidente.

Siempre según el informe, uno de los aportantes a esa campaña habría sido Raúl "Cacho" Espinosa, dueño de una empresa santacruceña de pesca, luego fallecido en circunstancias poco claras.

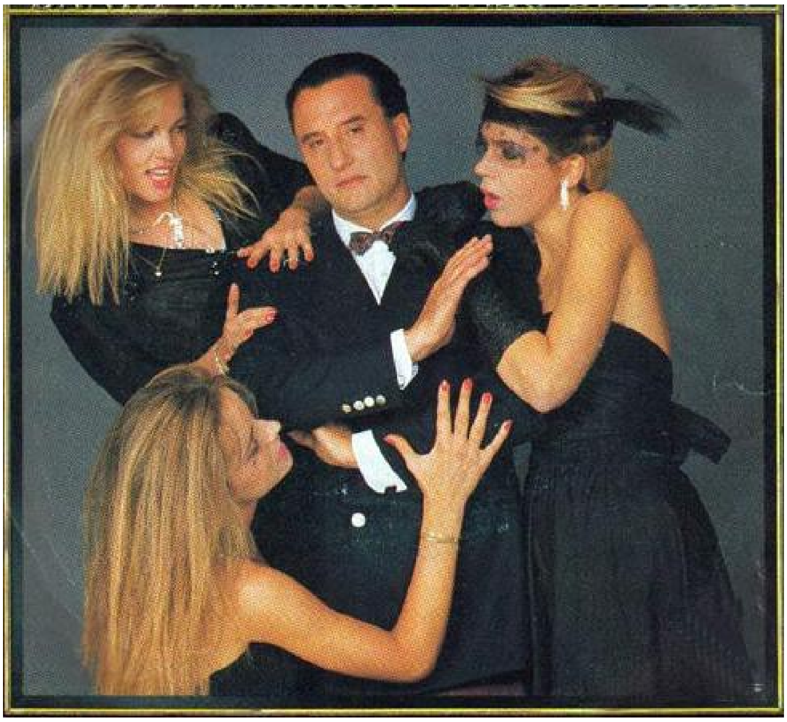
PAN Y CIRCO LIBERAL



"Los liberales siempre encuentran alguna razón para llevarse bien con el poder"

En *"Mis documentos"* creé una carpeta llamada *Indeseables.* Además de las divisiones canónicas, existen otras subcarpetas con el nombre de *Pillos, Estafadores*, etc. Y otra, que ya ocupa los 210 megas, con el nombre de *Liberales*. Hablar de los trapicheos urbanísticos de la Residencia de Estudiantes o del tandem Mercedes Cabrera-Carlos Arenillas y sus negocietes con Intermoney tiene un relativo interés, pero, en general, es aburrido. Los liberales son endogámicos, a no ser que exista una oferta económica mejor, y lo *mejor* en cuestión de parné es lo peor de la derecha. O sea que, si buscan ustedes corrupción, la encuentran, pero con la grisura del cemento franquista.
Excepción digna de mención y seguimiento es nuestra Alegre Fundación Olivar de Castillejo , a quien hace dos años pillamos en renuncio intentando montar un chiringuito tailandes en el sagrado predio institucionista del Olivar de Chamartín. (Por cierto, el despacho de arquitectura que iba a cometer el desaguisado fue después contratado por el Corte Inglés, que también está haciendo todo lo posible por hundir el proyecto de conservación, si es que no se hunden antes sus directivos).
La Alegre Fundación ha pasado dos años intentando el difícil arte de vivir del cuento discretamente. Tan discretamente que sigue sin pedir licencia de actividad ni permiso alguno para organizar juergas y jolgorios por los que cobra y no declara. Ya hablé en su momento de las empresas que ocupaban la sede de esta fundación de forma totalmente ilegal y de las irregularidades fiscales en las declaraciones de esta fundación. Como el Protectorado de Fundaciones (que es el organismo encargado de revisar y controlar el cumplimiento de los fines de las Fundaciones) depende de doña Mercedes Cabrera, la permisividad ha sido absoluta.
La Editorial Siglo XXI ha alquilado ilegalmente la sede de la Fundación Olivar de Castillejo (que no se puede alquilar). Y no existe ni un solo permiso, ni licencia municipal ni contrato legal de semejante operación. Y no hay forma de control fiscal posible del dinero que los señores liberales García-Arenal pasen a la ilustre familia liberal Castillejo. Si yo conozco bien las trapacerías fiscales de estos listillos, pondrán una cantidad ínfima en concepto de "donativo".
La declaración de protección por parte del Ayuntamiento de Madrid sólo fue (como ya advertí en su momento) una artimaña para acallar el escándalo nacional e internacional que provocaron las denuncias de la ciudadanía sobre los proyectos de la Fundación Olivar de Castillejo, que pretendían convertir este lugar emblemático de la historia de Madrid y de España en un restaurante tailandés. Hoy, la Fundación Castillejo ha presentado alegaciones para que se permita el *"uso privado"* de la sede y la casa familiar.
La "ocupación" de la Editorial Siglo XXI de la finca de la Fundación Castillejo (propietaria de una parte del Olivar de Chamartín) es el primer paso de una operación económica planeada por una familia de ilustre abolengo liberal, la familia García-Arenal, accionista mayoritario de esta editorial e inversora de peso en el grupo inmobiliario ACS
El grupo ACS (presidente Florentino Pérez) es una de las empresas más poderosas que están luchando por obtener su cuota de metros cuadrados en la "Operación Chamartín"
Controlar miles de metros cuadrados con la tapadera de la editorial liberal que viene a sacar de miserias a la familia liberal de pocos escrúpulos ha sido una jugada fácil y barata. Y ni siquiera les ha preocupado lavar la cara legal de semejante arriendo.
El Protectorado de Fundaciones no va a examinar estas ilegalidades porque el Ministerio del que depende se halla presidido por doña Mercedes Cabrera Calvo-Sotelo (como dijo aquél: *"de los Calvo-Sotelo de toda la vida, todas las épocas y todos los regímenes"* y de los Cabrera, liberales de toda confianza y condición). Doña Mercedes Cabrera, *"la progre de los Calvo Sotelo"*, también tiene intereses mobiliarios e inmobiliarios que cuidar. Efectivamente esta historiadora del Pensamiento y los movimientos sociales forma parte del consejo de administración de varias sociedades de inversión inmobiliaria, junto con sus hermanos Ignacio, Jaime y Cristina (Olivenza Gestion, Olivenza Inmobiliaria, Tagomago Investments), etc) con intereses, entre otros lugares,

en el distrito de Chamartín.
Más difícil aún es que la Comunidad de Madrid, el Ayuntamiento o la Junta de distrito muevan un dedo para salvar el Olivar de Chamartín. La empresa Reyal ya ha recibido el permiso del Ayuntamiento para construir un macroparking a menos de 500 metros de estos jardines únicos. La empresa Reyal es la constructora que, junto con las empresas de la familia Aguirre , protagonizó el escándalo de corrupción en el caso de Ciudad Valdeluz y el AVE de Guadalajara. Reyal está facilitando el trabajo de especulación y presión de su "rival" ACS.
Pero la Fundación Castillejo, como los Borbones, tiene una vena sandunguera que va a ser su perdición. No está contenta hasta que no monta la jarana o el negociete con lo más bajo de cada casa. Véan la nueva compañía que ha aterrizado en la sede: E-ventia . La web no la han creado los "Pillo's Boys" ni "Dandy Salomón" aunque Alimaña se empeñe en que sí. No se pierdan el marketing desparpajado con desparrame de cultureta que gastan estos andobas para anunciar "performances", bodas y bautizos. *"Nuestras oficinas se encuentran ubicadas en un espacio único: un olivar de dos hectáreas con una casa de campo del año 1914 en la zona norte del centro de Madrid"*. En la calle Menéndez Pidal, 3, **bis**. O sea, en la sede de la Editorial Siglo XXI, que, a su vez, está en la sede la la Fundación Olivar de Castillejo.
La Residencia de Estudiantes proporcionó a la familia Castillejo el negocio con la Editorial Siglo XXI y otro protector: la Comunidad de Madrid, que no ha movido un dedo por conservar el Olivar, y que pagará a semejante Fundación por celebrar el Festival Flamenco 2007 en unos jardines que sostenemos todos, pero que arruinan cuatro señoritos decadentes.
A lo mejor no se hacen rascacielos en el olivar, pero no está tan seguro que no se arranquen los olivos para hacer una plaza de toros privada donde pueda divertirse esta escoria, entre cacería y cacería.

PARIDAD VERSUS INTEGRIDAD

Una vez se decretó nuestra derrota unilateralmente: *"Sois débiles, faltas de rigor, inestables, no tenéis grandes ambiciones, carecéis de valor físico, de objetividad, y sois arbitrarias y sentimentales".*
Y algunas trataron de demostrar que eran las dignas iguales de sus detractores: son rígidas y duras, son rigoristas, asnalmente serias, y desprecian la ironía y la risa; nada puede apartarlas de su rumbo, son competitivas, desleales y su único fin es el éxito, vencer, ganar, sea como sea; pueden renunciar a su vida por la no vivida, con tal de conseguir prestigio y poder; morirían antes que confesar una duda, una debilidad, un temor, son inamovibles y no se permiten el lujo de ser y vivir sin amueblar su existencia con incontables traiciones a su identidad. Las compadezco. Las conozco: son, como los hombres, seres a medias, mutilados por su egocentrismo, dañinos, e incapaces de generosidad.
Esta paridad sólo es otra derrota de nuestra integridad.

Una manera de ver las cosas muy parecida a la mía, pero con mucha más radicalidad.

Y esto de la paridad se parece más a una rendición que a un intento de hacer justicia.
De ser mujer... me cabrearía. Pero veo con asombro lo contenta que está una mayoría de mujeres que considero muy inteligentes, y no sé que pensar de ello. Cada uno tiene su menera de ver las cosas.

Cada vez que escucho palabras como "paridad" o "discriminación positiva" me acuerdo irremediablemente de Orwell... Creí que el valor a alcanzar era la igualdad de derechos, no entre hombres y mujeres, sino entre los seres humanos.
Por otra parte me revienta esa estupidez de querer hacernos a todos iguales, NO LO SOMOS. Algo muy distinto es que, pese a las diferencias existentes entre distintos individuos, todos tengamos los mismo derechos.

Un abrazo.

Pd.: Generalizar suele llevar al error, lo digo por la descripción que haces de los hombres.

El discurso machista y el feminista no tienen ninguna diferencia en su base. El querer ser "igual" es absurdo, se trata de igualdad de derechos y obligaciones (las cuales suelen olvidarse dentro de ese discurso). En algún punto me recuerdan un viejo (hoy viejo) amigo que en sus épocas trotskas cuando se compraba un jean nuevo lo frotaba con una piedra antes de estrenarlo, para que pareciera viejo y nadie lo confundiera con un burgués.

No puedo estar de acuerdo barquero, no es una rendición, son años de lucha, a veces muy dura.
Es cierto que la foto es algo boba y dentro de unos años,nos la vuelva a enseñar la gata y nos haga reir por transnochada y caduca. Si para entonces tengo nietas, me encantaría que me preguntaran que era aquello de la paridad que han leido en un periódico de hace muchos años.
Es cierto Gata, se han dejado muchas cosas por el camino, ni más ni menos que las que las han precedido.
Otra cosa es el ánsia de poder, de llegar arriba, de medrar, de trepar a cualquier precio. A mi entender,nada tiene que ver con lo masculino o femenino.

Me niego a creer que somos diferentes. Solamente somos distintos cuando copulamos y parimos.
La sociedad y costumbres nos han hecho diferentes... como los animales.
Un león descansa y vigila su territorio de cópula mientras la leona cuida a su prole y a su macho, y nosotros intentamos montárnoslo al revés.
¿Quién de los dos está equivocado?
Los dos.
Y no es una cuestión de fotos ni nada parecido, es de formas y lógica.
El que cree firmemente que somos iguales, no puede aceptar una ley que obliga a algo que no debería pasarnos por la cabeza discutirlo. Es como si negara un derecho a mi mitad de ser humano y lo encuentro aborrecible.
Un saludo.

Ni somos iguales que los hombres ni las mujeres somos iguales entre nosotras; y sólo somos diferentes cuando nos atrevemos a tener personalidad y salvaguardar nuestra identidad, cosa que impide, naturalmente, tener la más mínima posibilidad de éxito, no sólo en un partido político sino en una comunidad de vecinos...
Lo que siempre me sorprende es que, aunque haya patos que no vuelen, se considere una caracteristica de los patos su capacidad para volar, y no se admita que aunque haya seres humanos adorables, el hombre se caracteriza por ser nefasto y dañino para sí mismo y para el resto.
(Y cuando digo el hombre, como a mí me importa un ardite lo políticamente correcto, siguiendo la tradición cultiparla, me refiero al ser humano en general.

Tan general como la mía, que también considera a todos los hombres iguales cuando no lo son.
Conozco muchas mujeres que poseen más vínculos conmigo que muchos hombres, por tanto, aun considerándome absolutamente heterosexual, me identifico mucho más con algunas mujeres (muy femeninas) que con algunos hombres (muy masculinos), lo cual me hace pensar que el sexo nada tiene que ver en este asunto.
Aunque parezca mentira, hay personas que en el trato diario, uno se olvida de su sexo, exceptuando los momentos en los que prima el juego erótico, siendo en este caso las más liberales y deshinibidas.
¿Casualidad?
Estamos hartos de la sempieterna excusa de la casualidad. Ya va siendo hora de poner las cosas en su sitio.

DESDE COLOMBIA, LO QUE NO SE PUEDE DECIR EN ESPAÑA SOBRE EL REY JUAN CARLOS

El 12 de octubre del 2004 el periódico *"Romania Libera"* de Bucarest informó de la cacería en la región rumana de Covasna, al pie de los Cárpatos, en que Juan Carlos Borbón, alias Su Majestad don Juan Carlos I de Borbón y Borbón (con el *"de"* y la *"y"* que se suelen poner estos zánganos en sus nombres para significar que nacieron de la vagina de oro), mató a escopetazos a nueve osos, una osa gestante y un lobo y dejó malheridos de bala a varios otros animales que medio centenar de ojeadores le iban poniendo a su alcance de suerte que los pudiera abatir alevosamente. Varios miembros de la policía secreta rumana disfrazados de campesinos e infiltrados entre los ojeadores protegían de los osos y de cuanto peligro se pudiera presentar al señorito.
La cacería o masacre tuvo lugar del viernes 8 de octubre al domingo 10 y la organizó la empresa Abies Hunting, experta en estas bellaquerías. El rey había llegado al aeropuerto Otopeni de Bucarest en su jet privado, y escoltado por diez patrullas de la policía y varios vehículos de acompañamiento protocolario se había trasladado a las cabañas que tenía en la región para sus cacerías Ceaucescu. Los lugareños de Covasna le depararon a Su Majestad un cálido recibimiento folklórico vestidos con trajes típicos y lo agasajaron con palinca, un aguardiente de ciruela que no sé si le gustó o no al borrachín. Porque han de saber que este señorito viejo además de cazador es mujeriego, buen vividor, borrachín y corrupto. Lo de mujeriego, buen vividor y borrachín es cosa suya y de su familia, que se lo tendrán que aguantar. Lo de corrupto es cosa de España, que lo alcahuetea. Y lo de cazador es cosa mía y la que me mueve a escribir este artículo para denunciar al bellaco. Dada la absoluta insensibilidad de la mayoría de los seres humanos ante el sufrimiento de los animales, pero dada también la indignación general que causan en todos lados la venalidad y los peculados de los funcionarios públicos, voy a mencionar de pasada a algunos de los amigos íntimos del rey, con quienes ha tenido negocios (ya no más porque están en la cárcel) y quienes, tramados en la más embrollada red de complicidades y llenándose de paso sus bolsillos de millones, han hinchado las arcas reales con los sobornos que han sacado de aquí y allá con su consentimiento y usando su nombre hasta el punto de convertirlo, del pobretón

que era cuando llegó a la Corona en 1975, en uno de los hombres más ricos del mundo: en el 2003 la revista Forbes le atribuía una fortuna de 1.790 millones de euros. He aquí unos cuantos de sus amigos delincuentes:
Javier de la Rosa y Manuel Prado y Colón de Carvajal (otro con la *"y"* y el *"de"*, nacido de la chimba de oro), condenados en diciembre del 2002 por la Audiencia Nacional de España el primero a cinco años y medio de prisión y el segundo a dos por los delitos de apropiación indebida y falsificación de documentos (75 millones de euros le transfirió De la Rosa a Prado para que éste se los repartiera con el rey). Mario Conde, *"el banquero de la monarquía"*, que se embolsó 8.000 millones de pesetas, y que fue condenado por el Tribunal Supremo por los delitos de estafa, apropiación indebida y falsificación de documentos a 20 años de cárcel que viene purgando desde diciembre de 1994. Este Conde sin condado, un *"financiero"* (hampón), es el del famoso caso del banco Banesto, que presidió de 1987 a 1993 y donde el rey tenía dos cuentas, la 8317-172 y la 148963-172, vinculadas con operaciones en la Asturiana de Zinc, Sindibank y el propio Banesto. Alberto Alcocer y su primo Alberto Cortina, *"los Albertos"*, del Banco Zaragozano y asiduos del Palacio de la Zarzuela, a quienes en marzo del 2003 el Tribunal Supremo condenó a tres años y cuatro meses de prisión por los delitos de estafa y falsificación de documento mercantil en la venta de la sociedad Urbanor, propietaria de los terrenos donde se construyeron las torres KIO de los kuwaitíes (de cuyos fondos en 1992 De la Rosa transfirió 12 millones de euros a una cuenta personal en Suiza del "administrador privado del Rey", el mencionado Manuel Prado y Colón de Carvajal). Los Albertos pidieron el indulto al Gobierno, que lo denegó, tras de lo cual recurrieron la sentencia del Tribunal Supremo ante el Constitucional, recibiendo el apoyo del rey.
Obligados por la condena del Tribunal Supremo a renunciar a sus cargos en el Banco Zaragozano y a vender la participación del 40 por ciento que tenían en la empresa Barclays, se embolsaron en esta última operación 453 millones de euros. En los montes de Toledo tienen una finca de 2.000 hectáreas, Las Cuevas, donde para venderles una flota de carros de combate y cañones a los saudíes los invitaban a cazar en el mejor estilo del franquismo, cuyos jerarcas solían cerrar sus negociados y tramar sus corruptelas en el curso de las cacerías, a las que tan aficionado era el Caudillo. Impuesto por éste, Juan Carlos Borbón, el cazador, no surge pues de la nada por generación espontánea: brota de lo más corrupto e inmoral de España. Es la herencia infame que les ha dejado Franco a los españoles después de haber arrasado con su cultura.
Tres hijos oficiales y reales tiene Juan Carlos: dos infantas y un principito, casados todos y en pleno delirio reproductor. El principito anda ya por los cuarenta y se ha convertido en un principote alto y largo como una cañabrava que mandan a las tomas de posesión de cuanto presidentucho de América no alcanza a merecer rey (como Uribe) para que se destaque entre los invitados y los aborígenes por su gran altura moral. Lee bien los discursos que le escriben, a diferencia de su papá que será muy bueno para la escopeta y la rapacería pero que nos ha resultado a los de la raza hispánica bastante torpe de lengua así lo pongan a presidir los congresos de Academias de la susodicha, como el que viene a inaugurar en Medellín, la ciudad de las orquídeas en el país de los doctores (donde se le dice "doctor" a cualquier hijueputa).

Señor alcalde de Medellín: ahora que vaya el rey a mi ciudad y lo suba en su Metrocable para mostrarle desde arriba la bella villa toda despedorrada abajo por las obras de su Metroplús, muy respetuosamente le recuerdo que se debe dirigir a él como "Majestad", que es como le dijo Uribe en la última cumbre en que se vieron en el Cono Sur: *"Majestad* -le dijo con su vocecita,sumiso, el bajito mirando hacia arriba-, *cómprenos nuestros productos pero no la coca, que nos hace mucho mal"*. ¡Pendejo! ¡Qué va a saber el Rey de España qué es la coca! Habrá pensado que son las Coca Colas que producimos en Colombia y no el polvito blanco que tan felices hace a muchos y que

fabricamos con gran ingenio artesanal en nuestras cocinas repartidas por todo el territorio nacional como Tirofijo.
En fin, lo que el periódico rumano sacó a la luz no fue más que la punta del iceberg: la testa coronada estaba yendo a Rumania a cazar furtivamente desde hacía décadas, desde los tiempos de su compinche Ceaucescu, el tirano sanguinario de Rumania, que lo invitaba. Y a propósito de genocidas y tiranos, sabemos de una carta del 4 de julio de 1977 en que nuestro Borbón, recién encaramado al trono y en plena pobreza, le extiende la mano al sha de Persia: *"Me tomo la libertad, con todo respeto, de someter a tu generosa consideración la posibilidad de conceder 10 millones de dólares como tu contribución personal para el fortalecimiento de la monarquía española"*. "Con todo respeto", como piden los mendigos de Bogotá. Y a la monarquía saudí le pidió un crédito de 100 millones de dólares, que la empresa kuwaití KIO le entregó a Manuel Prado y Colón de Carvajal a cambio de que durante la Tormenta del Desierto la aviación estadounidense pudiera disponer a su antojo de las bases españolas de Rota y Torrejón. Y hasta el sol de hoy. Nunca pagó.
Otros amigos y cómplices del Borbón son el georgiano Zourab Tchokotua, procesado en Mallorca en 1978 y 1992 por estafas inmobiliarias; el dueño de la FIAT Giovanni Agnelli implicado en casos de corrupción en Italia; y Marc Rich, calificado como *"el delincuente más inescrupuloso de la era moderna"*, prófugo de la justicia norteamericana que lo perseguía por 65 delitos, enriquecido por sus suculentos negocios con la mafia rusa, Milosevic y la empresa Hallyburton de Dick Cheney y nacionalizado español.
"El rey de todos los españoles" no tiene que rendir cuentas de sus acciones, no se le p eden fincar responsabilidades, goza de inmunidad penal ante cualquier delito y está protegido por la Consitución, que lo considera inviolable. Y como si esto fuera poco, el artículo 490 del Código Penal español amenaza: *"El que calumniare o injuriare al rey será castigado con la pena de prisión de seis meses a dos años si la calumnia o injuria fueran graves, y con la multa de seis a doce meses si no lo son"*. Y así han llevado al banquillo entre varios, acusados de injurias al rey, a Jesús Zulets por una caricatura en la revista *El Cocodrilo* y a Javier Madrazo por decir *"ya que le pagamos policías, yates, viajes a esquiar y a montar a caballo, no habría estado de más que po una vez abandonase sus ocupaciones y compartiese con la sociedad su preocupación por la guerra de Iraq"*. Sin embargo cuando José María Ruiz Mateos, prófugo de la justicia española, acusó desde Londres al rey de haber aceptado *"miles de millones"* no sólo de su propio bolsillo sino del de diversos empresarios, y el Fiscal General del Estado lo iba a procesar por el delito de injurias, lo que habría podido convertirse en un sumario contra el impúdico monarca quedó reducido a nada, le dieron carpetazo al asunto. De la secta tartufa y cazadora de herencias del Opus Dei, este Ruiz Mateos fue el artífice de Rumasa, un holding de infinidad de empresas que le expropiaron. La Audiencia Provincial de Madrid lo ha condenado recientemente a tres años de cárcel por los delitos de alzamiento de bienes y de insolvencia punible en la venta de la agencia de viajes Mundo Joven, pecata minuta frente a la inconmensurable magnitud de sus fraudes. Éstos son pues los que le untan la mano al monarca y los que lo han situado en un buen puesto en el ranking de la revista Forbes.
Pero no nos desviemos y volvamos a los osos. No bien Romania Libera destapó la cloaca los ecologistas pusieron el grito en el cielo. Pero no porque don Borbón hubiera masacrado a mansalva a unos pobres animales que nada le habían hecho, sino porque estaba violando una ley internacional ya que el Urusus arctos, la especie de los osos que *"abatió"*, está protegida por la Convención de Berna de 2001. Yo no tengo nada que ver con los ecologistas que creen, como ese libro imbécil del Génesis, que los animales están ahí para el servicio del hombre y que para eso los hizo Dios. Dios no existe y me importa un comino que se vaya al diablo este planeta. Para mí, simplemente, los animales son mi prójimo, los quiero y considero una solemne ruindad ir a matarlos por diversión. ¡Pero qué! Educados como hemos sido los colombianos y los españoles en la

infame religión de Cristo que no tuvo ni una sola palabra de compasión por ellos, ¿qué se puede esperar de nosotros?
Como les dijo a los ecologistas Demetre Janos, un funcionario rumano que participó en la cacería real, en declaraciones para el periódico Crónica cuando la polémica pasó de Rumania a España: *"Su Majestad estuvo de visita privada. No entiendo por qué los ecologistas montan tanto jaleo. ¿Por qué no se manifiestan cuando se mata el cerdo en Navidad, o en contra de que las sopas se elaboren con gallinas?".*
No escarmentado con el revuelo que desató en España y en toda Europa, don Borbón volvió a sus andadas y en octubre pasado fue a Rusia invitado por Putin y en la región de Vologda, en el noroeste del país, mató de un disparo a Mitrofán, un oso domesticado que le soltaron habiéndolo emborrachado antes con vodka mezclado con miel. Y este hombre valeroso es al que hoy invita el alcalde de Medellín con la esperanza de que se monte en su Metrocable y suba al barrio Santo Domingo Savio, en nuestras sangrientas comunas, a ver si salimos en la prensa internacional ya no por los carteles de la droga y nuestros incontables asesinados sino como anfitriones de todo un *Congreso de Academias de la Lengua*, que el zángano real va a presidir. ¿Y con qué derecho? ¿Qué ha hecho él por la lengua española, si ni siquiera sabe leer los discursos que le escriben? Piénselo bien, señor alcalde, antes de decirle *"Majestad"* a este bellaco, ya que metió las patas invitándolo a Medellín para arrodillársele, e infórmese y aprenda historia, por si no la sabe. Este Borbón es nieto del frívolo Alfonso XIII, que tuvo que salir huyendo a Roma, y descendiente de Fernando VII, el déspota tarado que provocó la guerra de Independencia de América convirtiendo a este continente que estaba unido en una colcha de retazos de paisuchos limosneros y desgarrando a España. Y no se olvide de estos versos de Epifanio Mejía, que hoy cantamos en el Himno de Antioquia:

> *Nací libre como el viento de las selvas antioqueñas, como el cóndor de los Andes que de monte en monte vuela.*

No me vaya a salir ahora como el Cid, de quien se dice en su poema: *"Qué buen vasallo sería si tuviera buen señor"*. ¡El héroe nacional de España soñando con ser criado! España no tiene redención y nuestra gran desgracia ha sido que nos colonizara esta raza, la más cerril de Europa y la más cruel con los animales, la de la Inquisición de Torquemada, la gran lacaya de la puta vaticana de Roma, la nación de los tiranistas que fueron capaces de gritar cuando los franceses los querían liberar de Fernando VII: *"¡Vivan las cadenas!"* España, capaz de tirar cabras vivas desde los campanarios de las iglesias.
Señor alcalde de Medellín, paisano: por desinformación e ignorancia de la Historia (y no quiero pensar que por bajeza moral) metió usted las patas al invitar a mi ciudad a ese bellaco. No nos vaya a salir ahora de arrodillado con zalemas uribescas, lacayu as. Nada de "Majestad", que le va a sonar muy lambón y montañero. Dígale doctor. Doctor Borbón.
Ah, y no lo suba en su Metrocable que de pronto se le descula. Mejor llévelo a La Macarena y que Santiaguito Uribe, buen hijo de su papá, le organice una corrida.

Algunas cosas ciertas cuenta, pero en su escrito muestra un gran rencor, tan sólo propio de un gran envidioso. ¿Tal vez se considera usted descendiente de Fernando VII?
Por otro lado, no le comprendo bien, parece usted, tanto por su apellido como por su rostro, pertenecer a eso que llama "raza española". Si bien, sólo los neonazis siguen distinguiendo esos vocablos.

ALIMAÑA NEWS RESPONDE Y PROFETIZA

La responsabilidad, la veracidad y el rigor son las características de un periodismo serio, y ante las insistentes preguntas de los lectores, que Google tiene a bien encaminar hasta aquí, y para evitar que se encuentren con uno de esos abstrusos escritos de Gatopardo, he decidido responder sin ambages a las que más se repiten:

-Escorts baratas en Madrid.
-Baratas las hay, pero sólo dan conversación, y exclusivamente sobre novela española.
-¿Cómo se puede coger la gonorrea?
-Haciéndose el simpático.
-Poemas para bodas de oro.
-A quienes han vivido cincuenta años de matrimonio no es piadoso atizarle, además, con uno de esos melosos escritos en los que no se aprovecha todo el renglón, y se elude primorosamente lo sórdido y lo grotesco.
-**Resumen de *La Celestina*.**
-Lo mandamos por e.mail si nos demuestran que son mayores de edad o tienen permiso de los padres para leer uno de los mejores tratados sobre el arte del proxenetismo y lo poco que sale a cuenta la virtud.
-Efectos secundarios del Tranquimazín, Prozac, Tafil, etc.

-**¿Qué ha escrito Molina Foix?**

-Ni lo sé ni me importa. Lo qué me gustaría es saber como se peina para taparse la calva.

-¿Horóscopo de la semana? (Suelen poner "horsocopo")

- Aquí. Y aquí:

Aries:

Si has creído que sus ausencias nocturnas y los fines de semana tienen algo que ver con sus obligaciones laborales, serás feliz y habrá armonía con tu pareja. Hasta el viernes, en que su cónyuge os va a montar un pollo y te enterarás de que el piso que has comprado y has puesto a nombre de los dos, no sólo está terminado hace un año, sino que es su domicilio familiar.

Tauro:

Tu espíritu hogareño, y tu carácter metódico, se complementan con tu curiosidad intelectual y tu deseo de aventuras. Sin embargo, eso de apuntar el precio y las medidas, cuántos, dónde, y cómo, va a tener consecuencias cuando tu pareja revise el sábado las agendas viejas y comprenda en qué consisten los gastos del Gimnasio.

Géminis:

Siempre has leído varios libros a la vez, has picoteado en varios programas de televisión, has tenido amigos de status social variado, y has diversificado los ingresos, porque tu cerebro está programado para unos mellizos juguetones y felices. No obstante, el resultado de la Auditoría te va a llevar el jueves ante el juez, y el fin de semana conocerás gente nueva en la cárcel, y lo vas a pasar de puta pena.

Cáncer:

La reflexión, la planificación cuidadosa, tu carácter poco impulsivo y tu paciencia son los pilares inamovibles que han sustentado tu vida. Pero esta semana se va a tambalear cuando tu pareja, al cabo de treinta años de noviazgo, descubras que se ha casado con alguien que conoció hace tres meses en el club de jubilados, y con el incendio que destruirá tu casa, descubrirás también que en la cuenta del Banco no había dejado ni un euro para pagar la póliza del Seguro que vencía la semana pasada.

Leo:

Tienes motivos para confiar en tus dotes de mando, en tu capacidad de liderazgo, tu capacidad para ahorrar en gastos superfluos y no escatimar en los gastos suntuarios, que te ha hecho poseedor de una casa de ensueño y de un yate, digno de un constructor. Pero esta semana te vas a enterar de que tu administrativo se fue a la inspección de Hacienda con los libros de contabilidad a y b, y vas a tener que vender el yate para pagarle los atrasos que le debes desde hace tres años y la multa. Para pagar los abogados vas a tener que vender tu casa.

Virgo:

Si tienes un tórrido amor con alguien Aries, no quedes esta semana, porque tu cónyuge contrató un detective, lo sabe todo, y te tiene preparada una escena digna de Calderón.

Libra:

La armonía, el equilibrio y tu notable sentido de la justicia, que son tus principales características se verán puestos a prueba el sábado si tu pareja es Tauro, inicias la limpieza de primavera y revisas sus agendas viejas.

Escorpio:
Nunca has dudado de tu perspicacia a la hora de elegir amigos, aliados, y personal de confianza, y es una de las cosas por las que te sientes orgullosos de ti mismo, pero si entre ellos hay un Géminis, la empresa auditora te va ha demostrar que eres un iluso porque hay un desfalco millonario, y estás en la ruina.
Sagitario:
Si has sido quien amó devotamente a un Cáncer, esta semana será la de tu matrimonio y el inicio de tu luna de miel en un rincón paradisiaco, gracias a tu decisión de abandonarlo y vaciarle su cuenta corriente. Pero tu cónyuge te va a contagiar la gonorrea.
Capricornio:
Quien diga que no sabes esperar y preparar cuidadosamente la venganza, ha de ser un Leo que ignore que la primera norma de un buen defraudador del fisco es pagarle la nómina religiosamente puntual al que te lleva la doble contabilidad y que sepa todo el dinero negro que maneja y sus fuentes de ingresos.
Acuario:
Esta semana vas a responder a las inquietudes y preguntas de gente ociosa, que percibirán tu aguda capacidad para hacer previsiones proféticas, mientras l'agüela anda por esos andurriales con los de la red Fenológica y deja bajo tu responsabilidad una bitácora aburridísima para que le aportes tu ingenio y altura de miras.

CECILIA BARTOLI CANTA "VOI QUE SAPETE", "LE NOZZE DI FIGARO", DE MOZART

Voi que sapete. Le nozze de Figaro . Mozart.

Voi che sapete che cosa è amor,
donne, vedete s'io l'ho nel cor.
Quello ch'io provo vi ridirò,
è per me nuovo, capir nol so.
Sento un affetto pien di desir,
ch'ora è diletto, ch'ora è martir.
Gelo e poi sento l'alma avvampar,
e in un momento torno a gelar.
Ricerco un bene fuori di me,
non so chi il tiene, non so cos'e.
Sospiro e gemo senza voler,
palpito e tremo senza saper.
Non trovo pace notte né dì,
ma pur mi piace languir così.
Voi che sapete che cosa è amor,
donne, vedete s'io l'ho nel cor.

Traducción aproximada
Vosotras, que sabéis qué es el amor,
mujeres, mirad si es lo que tengo en el corazón.
Lo que siento os diré,
es para mí nuevo, entenderlo no sé.
Siento un afecto lleno de deseo,
que ora es placer, ora es martirio.
Me hielo y luego siento el alma inflamarse,
y en un momento me vuelvo a helar.
Busco un bien fuera de mí,
no sé quién lo tiene, ni sé qué es.
Suspiro y gimo sin querer,
palpito y tiemblo sin saber .
No encuentro paz de noche ni de día,
pero cómo me gusta languidecer así.
Vosotras que sabéis qué es el amor,
mujeres, mirad si es lo que tengo en el corazón.

[HAZTE OIR, WINDOWS SPACES LIVE, EL OJO DE GUADIX... LA INDECENCIA Y LA CONCUSPICENCIA POR DOQUIER]

En el **[Foro Hazte oir]**, invitan a boicotear a Triumph Internacional, fabricante de lencería, porque hace publicidad de sus productos con modelos en ropa interior.
Y hay un intercambio de pareceres de etiología sublime. Jorge, por ejemplo, dice:

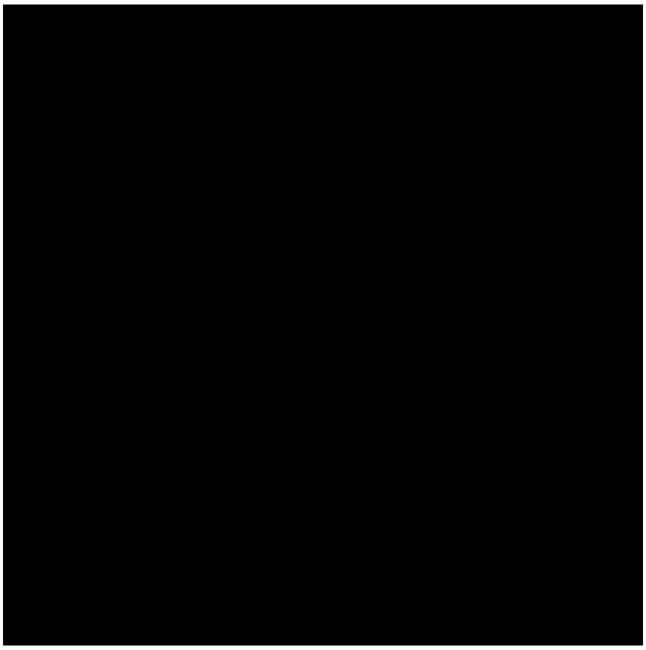
> *-..."Obviamente los desnudos artísticos no tienen nada que ver, en principio, con el mensaje que abre este hilo, pues no buscan la exclusiva satisfacción de la concupiscencia y provocar el deseo sexual de la persona mostrada, sinó algo muy superior. El arte es otro tema, aunque hay formas de "arte" moderno que no pueden considerarse arte. Ejemplos recientes tenemos en nuestro país."*

Trend05 puntualiza:

> *-Y luego dicen por ahí que a las mujeres no se nos trata como objetos sexuales*

Camarena, enterado de los camiones que llevan la publicidad de Triump, escribe condolido:

> -"Me da la impresión que cada vez estamos más acostumbrados a todo, vale que es una marca de ropa íntima ¿pero por eso tienen que llevar a una chica semidesnuda por todas las carreteras de España? cada vez lo vemos mas en vallas publicitarias, en paradas de autobuses, en revistas... sale la típica chica estupenda y divina de la muerte, con la talla mínima, pose super sexy y picarona con precioso conjunto lencero inalcanzable para muchos bolsillos... es una humillación, para los padres que hablan de pureza y decoro a sus hijos adolescentes...*"hijo, hay que guardar la mirada, tenemos que mirar limpio a las niñas..."* toma anuncio 4x4 de buenorra semidesnuda!!!!!"



Modelo de Triumph "por todas las carreteras de España"

Me barrunto que a estos les va a sentar de cine la moda que vamos a lanzar del burka puesto al revés, con la abertura que hay a la altura de los ojos, en el cogote, para que no vean ni jurar, y así puedan preservar la castidad, la pureza, la limpieza de mirada, y todo lo que convierte a los cristianos y a los mahometanos en gente tan puñeteramente repugnante, siempre defendiendo una virtud que nadie en su sano juicio tratará de arrebatarles.

Y a propósito de gente vomitiva: Microsoft -windows space.live-, que había cerrado la bitácora de Manuel, El Ojo de Guadix, por publicar la fotografía de Mischa Fuljames con la madre amamantando a su chiquillo, ha reconsiderado su decisión, y le ha devuelto su blog.
Porque no se han dado cuenta de como fabricó esa señora a su hijo. En cuanto se enteren, se lo cierran otra vez.

Propongo boicotear la publicidad de chocolates porque siempre muestran a alguien gozando al comerlos, y todos sabemos que la gula es un pecado. Y si encima tiene forma fálica incitan a la lujuria, y si lo come un chico a la pedofilia. Si van a vender chocolates que no los muestren, y si van a vender un corpiño (con perdón de la palabra) que sea en privado, ni siquiera con maniquíes porque incitan a la venta de muñecas inflables. Hay que vivir siempre vigilando, te descuidás un minuto y andá a saber en qué te convertís.

Lo de El Ojo de Guadix me dejó realmente asombrada ¿reconsideraron? ¿cuántos clientes habrán perdido para que se sintieran en la obligación de hacerlo?. Saludos.

HACE 30 AÑOS SE LEGALIZÓ EL PARTIDO COMUNISTA Y SUSANA ESTRADA ENSEÑABA SUS ENCANTOS...

Hace treinta años se legalizó el Partido Comunista de España; vimos a Susana Estrada y a Marisol desnudas; dejó de considerarse indecente el sexo fuera del matrimonio. Y se podía fumar hasta en el Congreso.

Aún no era muy habitual que los políticos y los ejecutivos tuvieran que recauchutarse con platino el tabique nasal por la necrosis producida con la cocaína, pero, ya entonces, pasó por ese trance alguno de trayectoria contumaz, que habría sido juzgado por el Tribunal de La Haya o por Garzón si hubiera sido latinoamericano, y no un político incombustible español, amigo de narcotraficantes y protegido por las altas finanzas.

Hace treinta años, a las manifestaciones iban los ciudadanos de izquierdas, a los que los dirigentes sindicales utilizaron y traicionaron pactando el Estatuto de los Trabajadores, renunciando a una parte los derechos laborales que se habían conquistado contra Franco.

Aterrizó en la política una parva de arribistas con melenas o pelo engominado, con traje de pana o de alpaca, con trenka o loden, dispuestos a rentabilizar la epidemia democrática. Los partidos encontraron en las Asociaciones ciudadanas, con sus reivindicaciones a pie de calle, los cuadros que necesitaban. Esa nueva casta dirigente disfrutó de las prebendas, los gastos por cuenta del partido o del erario público; empezaron a hablar de vinos, añadas, *bouquet*, y se convirtieron en expertos en protocolo y finanzas sin disimulo ni recato, hasta llegar a la PSV, a Filesa, a Malesa, a

Induyco, a KIO, a Wardbase, a los fondos reservados*, a* las comisiones ilegales, a Ibercorp, a la Expo 92, al caso Naseiro*,* al caso Estevill, a Gescartera, a las stock-options de Telefónica, a Tabacalera-Alierta, y a la corrupción urbanística generalizada...

Pero eso sí, aquí ya no se legaliza un partido si no es con el aval monárquico y los correspondientes certificados de adhesión al régimen. Ahora van a las manifestaciones los de derechas, y no está bien visto. Ya no hay ninguna Susana Estrada campando en público con las tetas al aire, porque le montarían un pollo los integristas (los de la Conferencia Episcopal y las feministas, que en cuestiones de puritanismo están a partir un piñón); ahora no hay más desnudos que los de los bomberos de los almanaques, -¡benditos sean!- y el mayor logro de la democracia consiste en declinar el género masculino y femenino *ad nauseam*, y no dejarnos fumar en lugares públicos.

¡La madre que nos parió!

ADIÓS AL CERO PATATERO

Quitar el cero de los boletines escolares supone perder un riquísimo espécimen del paisaje educativo, porque con el cero se elimina también al tonto de capirote, al negado, a nuestro entrañable zipi zape de las calabazas, al quinqui. El cero era el vacío donde se alojaban los que no daban un palo al agua, los que reventaban las clases, los que por no escribir no escribían ni su nombre en el examen o lo tatuaban con entretenidos gráficos, los que se emporraban en el recreo, los absentistas. Todas estas adorables criaturas han subido de escalafón y se han ido a juntar con los que ya tienen nota, un uno, que al

menos contestaban algo e iban a clase, aunque fuera a pasar el rato. No sé muy bien qué es lo que ha movido a los legisladores a borrar ese cero patatero, tan instalado en nuestra tradición como la o del canuto, pero he oído que tiene motivaciones psicológicas, pues resulta humillante para el portador, una marca a fuego de su fracaso. Precisamente, a estos muchachos que fracasan -o que triunfan disfuncionalmente- les da igual un cero que ochenta y su humillación no procede del cero en sí sino de estar en un aula donde no quieren estar, así que el razonamiento psicológico no cuela. Parece que se trate más bien de ir rebajando el listón para que vayan entrando todos en el saco de aprobados, aun sin alcanzar el también simbólico cinco, que quitado el cero, ahora se convierte lógicamente en cuatro. Y cuando vean que el uno cobra todos los valores negativos del cero, no tardarán en ascender la cuenta a dos. Al fin y al cabo, qué más da un número que otro. De cierto, todo este arbitraje numérico pasará a la historia no bien los psicólogos descubran que esas calificaciones son discriminatorias pues atentan contra la igualdad. Ya nos quitaron el *muy deficiente*, que era poco menos que llamar subnormal al niño subnormal. En cuestión de años, nos las habremos con solo dos baremos: brillante y casi brillante, hasta que descarten el *casi* por ofensivo y todos, sin excepción, sean brillantes, cada uno en los suyo, unos en ganas de aprender, otros en ánimos de joder.

A mí me ha tocado escuchar una argumentación distinta, a la que se daba más énfasis argumental que a la huella psicológica (que también aparecía). No recuerdo dónde lo leí.

Pero básicamente consistía en que calificar con un cero resultaría incorrecto, puesto que equivaldría a que el alumno no ha aprendido y/o retenido nada. Y esto último resultaba imposible por un simple principio de inercia: estando en clase (aún intermitentemente y sin interés en participar) algún concepto o conocimiento se albergaría en su memoria (esto es: puedo ir al cine y quedarme dormido pero al menos saldré sabiendo (como mínimo) qué película fui a NO ver).

Tiene su lógica.

Personalmente jamás sentí pudor alguno por los ceros que recibí y que fueron muchos. Ni concedí mayor importancia a los dieces, que fueron tantos o más. Simplemente me rascaba la zona abdominal durante todo el mes o trimestre y, luego, "empollaba" la última semana para hacer un examen perfecto, técnica que no augura o garantiza demasiado éxito pero que me servía, entonces, para acallar el ánimo castigador parental: los ojos inyectados por las noticias de mi comportamiento desordenado tornábanse arcos-iris al leer mis notas. Y yo sobrevivía.

Un saludo, Gatita. Y un beso "muy eficiente".

Pues muy mal. Me niego a desaparecer; como coleccionista de ceros me niego a no ser. Quiero tener ceros. Desde que iba a parvulitos a la fuerza y lloraba en la puerta por no querer entrar, quiero tener ceros. Lo contrario seria reconocer que la deficiente enseñanza obligatoria que he padecido se merezca otra cosa. Mi cero es el suyo también. Cada uno de mis ceros es un reflejo de los de ellos.

Aquí (Buenos Aires, Argentina) la consigna es no poner ceros hace años, presentar la hoja en blanco amerita un uno por "haberse presentado". Lo que promedia como cero es la ausencia. Cuando empecé a corregir exámenes me pregunté si tendría que sumarle un punto a cada uno, ya que era evidente que, además de lo que sabían, se habían presentado, pero eso, claro, no tiene lógica. En la película "Cero en conducta", de Jean Vigo, los alumnos se revelaban contra un sistema anterior y antiguo, contra la opresión y a favor de la libertad, en analogía a la Revolución Francesa, pero ahora parece que ese papel corresponde más a los profesores que a los alumnos. A veces da la sensación de que son los maestros los oprimidos por sus despóticos alumnos. Es irónico y triste.

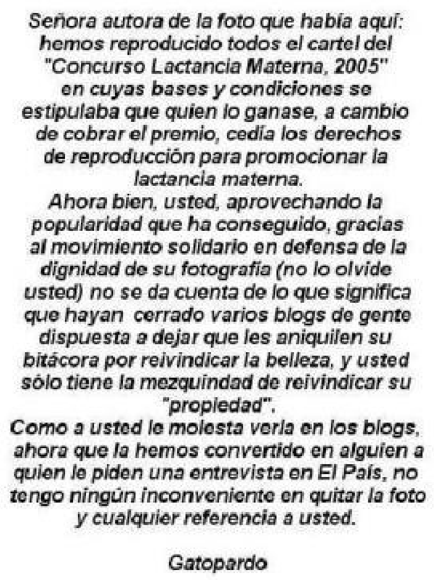
WINDOWS LIVE SPACES HA CERRADO EL BLOG DE "EL OJO DE GUADIX" POR ESTA FOTO



Señora autora de la foto que había aquí: hemos reproducido todos el cartel del "Concurso Lactancia Materna, 2005" en cuyas bases y condiciones se estipulaba que quien lo ganase, a cambio de cobrar el premio, cedía los derechos de reproducción para promocionar la lactancia materna.
Ahora bien, usted, aprovechando la popularidad que ha conseguido, gracias al movimiento solidario en defensa de la dignidad de su fotografía (no lo olvide usted) no se da cuenta de lo que significa que hayan cerrado varios blogs de gente dispuesta a dejar que les aniquilen su bitácora por reivindicar la belleza, y usted sólo tiene la mezquindad de reivindicar su "propiedad".
Como a usted le molesta verla en los blogs, ahora que la hemos convertido en alguien a quien le piden una entrevista en El País, no tengo ningún inconveniente en quitar la foto y cualquier referencia a usted.

Gatopardo

"Hemos encontrado imágenes con desnudos parciales (imágenes de pechos de mujeres, o de hombres desnudos completamente, o bien de nalgas de mujeres) en su Espacio, El ojo Guadix. Elimine todas esas imágenes de su Espacio en un plazo de 120 horas o se le deshabilitará el mismo. Si tiene preguntas acerca de los tipos de imágenes permitidas

en Windows Live Spaces, haga clic en el vínculo del Código de conducta en la parte inferior de la página Windows Live Spaces.
Atentamente,
Eddelyn
Atención al cliente de Windows Live Spaces "

Sólo se puede ver "El ojo de Guadix" en el caché de Google, porque Microsoft lo ha eliminado sin contemplaciones al considerar que la imagen de una madre amamantando a su hijo es pornográfica.
Hay que ser unos morbosos pervertidos, hijos de Satanás, con la mente como una pocilga para sentir otra cosa que ternura y admiración ante esta fotografía. O lo que es lo mismo: es preciso pensar como defensores del puritanismo gringo para censurar y cerrar "El ojo de Guadix" porque "hiere la sensibilidad" de los guarros que ven suciedad donde hay tanta belleza.
No es un caso aislado: no hace mucho, la revista estadounidense "Babytalk" publicó la portada que reproducimos abajo: recibió más de cinco mil cartas de lectores "horrorizados" que calificaban la foto de "indignante".

Y parece ser que la moral yanqui puede hacer estragos en cualquier cerebro poco evolucionado: el encargado del restaurante Txapela , de Barcelona, expulsó del local a una cliente que pretendía dar el pecho a su hija. Tuvo que amamantarla en la parada del autobús, en pleno invierno. A cualquiera que siga siendo cliente del Restaurante Txapela, sabiendo esto, se merece que le atice una salmonellosis. Podéis imaginar lo que creo que se merece el bestia encargado del Txapela, que os quedaréis cortos.
En solidaridad con "El ojo de Guadix", os ruego reproduzcáis esta fotografía y denunciéis el atropello que ha sufrido por esa panda de delincuentes de Microsoft, que han perpetrado la peor plataforma de blogs del mundo, heredera de los boboblogs MSN Spaces,
Si no apoyamos a cada compañero blogger que sea atacado, no tiene futuro la libertad en Internet. Porque nunca merecemos los derechos que no hayamos sabido defender para todos.
De nada, ya sabéis que me gusta ser útil.

Gatopardo

PS 5 de abril de 2007
He eliminado la fotografía. No por respeto a quien se ampara en la SGAE y en los derechos de autor, sino porque no me gusta hacer publicidad a los artistas que tiene esas premisas puramente mercantilistas. Y si encima cuentan una historia lacrimógena, menos aún.

¿Se cotactactó al personal de windows live spaces solicitando una explicación al mensaje recibido, exigiendo una rectificación?

Si así hubiera sido ¿cuál fue la respuesta de su parte?

Pregunto esto porque revisando el asunto encontré dos páginas de sitios de internet propiedad de Microsoft con imágenes e incluso videos de mujeres amamantando.

No estoy hablando de sitios de usuarios, sino sitios administrados por la emrpesa.

Algunos ejemplos:

http://www.msnbc.msn.com/id/16773617/

http://www.msnbc.msn.com/id/10154836/from/RSS/

El estado de Washington, que es donde tiene su cede Microsoft cuenta con leyes que

impiden la aplicación de leyes contra la "indecencia" en torno a la el acto de amamantar así como leyes que garanizan la posiblidad de amamantar a un niño.

No creo que el Sr. Bill Gates esté por la labor de prohibir la publicación en internet de esas fotos o que le deleite ver a iraquies destrozados...

"Imágenes con desnudos parciales" (una mejilla, un hombro, una oreja...) son todas las de humanos; ya en el lenguaje se ve que son unos imbéciles. Además esos Spaces son espantosamente feos y totalmente restrictivos: sólo se puede comentar desde una identidad Windows Live. Pero Windows Live no es un medio público sino un espacio comercial que se presta bajo condiciones. Cada cuál pone sus reglas y cada cuál decide si las acepta o se va, como muchos se habrán ido de Txapela.

La imágen de mi amiga enseñándo sus pechos antes de que su niña empezase a mamar es la imágen menos erótica y más tierna que he vivido casi diría que nunca. No sé si la tendencia moderna es considerar que el erotismo, el deseo sexual se contraponen e invalidan la ternura y la percepción de la belleza, pero os juro por mis años y mis canas que os perdéis mucho los que reaccionáis indignados porque don Antonio no tenga sensaciones asexuadas y sublimes como un querube, me parece no sólo bien, sino muy bien. Otra cosa me parecería un caso patológico.
Y respecto a los que no sienten el instinto maternal con los bebés, como Alimaña, lo comprendo perfectamente, porque a mí los niños me gustan los de las demás, y a partir de los treinta años.
Y efectivamente, la foto es bellísima, la madre tiene una expresión encantadora, y no hay que ser un pervertido para sentirse atraído sexualmente por ella: lo que me parece una perversión es que el instinto sexual y las sensaciones eróticas se consideren sucias o dignas de censura.

Saludos,
soy una madre que da el pecho, que estudia para ser profesora de preparacion al parto en Londres y que casualmente esta intentando organizar un concurso fotografico sobre el amamantamiento para la ONG con la que estudio y trabajo.
Me parecia desde lejos y sin acordarme muy bien de mi pais, que habria menos problemas por aceptar lo natural, la teta, la teta de siempre sea sexi o sea alimento, que nos esta pasando?.Aqui el comportamiento britanico siempre me parecio que era una cuestion de represion cultural y de conspiracion economica ,numeros claros de la leche en polvo= muchos millones de libras y dar el pecho=0. Los unicos que ganan son

los bebes y las madres por poder llevar acabo un sentimiento, una mision genetica, un afecto que es vital para el desarrollo de cualquier ser humano y que la Organizacion Mundial de la Salud nos recuerda deberian ser amamantados hasta los dos anos de edad, que como minimo hasta los seis meses, datos que no alcanzan a las madres.Lo que nos alcanza a todos es la maldita estupidez que a veces parece una conspiracion, por parte de un sistema que nos convence que la teta es sucia, hay que esconderla prohibirla y hacer que las madres pierdan los elementos que las definen, su sexualidad y su maternidad, su poder como individuos.Para hacer lo que muchos hacen incluidos los inquisidores que han hecho la mencionada barbaridad hay que tener desde luego, o haber tenido muy mala leche.

Amigo Manuel: Has puesto mal el enlace a tu nueva web.
Y, otra cosa:en esta bitácora he pedido que se respete la ortografía, que incluye usar las mayúsculas exclusivamente en siglas y en los títulos. He explicado ampliamente por qué es una incorrección declinar el género femenino y masculino de las palabras, porque nada tienen que ver con el sexo al que pertenezca quien queda aludido ni con la misoginia ni el feminismo. Es cuestión de lógica, de gramática y de estética. Etc.
El lenguaje bobo-blog, SMS, con mayúsculas, y los signos de emoticones me dan dentera. Y los suelo borrar.
Te ruego que lo tengas en cuenta.
Gracias anticipadas

Si de niños la mayoría de nosotros, recibimos la primera alimentación del pecho de nuestra madre... ¿dónde ve nadie en las fotos que se muestran -fuera de la satisfacción del niño que se está alimentando- ni erotico, ni nada...? Particularmente, ese tipo de imágenes siempre me han seducido -y soy lesbiana- no por su aspecto sexual, que no lo tiene, sino por la ternura que implica.
Nunca falta el que ve lo que no existe, pues su mente es tan retorcida como donde dice ternura sea capaz de darle una vuelta en su imaginación y... no sé... para consulta de psiquiatra.

Yo tengo puesto en mi "espacio" unas fotos de estatuas hiperrealistas en las que sale un personaje completamente desnudo. La puse con miedo a que me censuraran, y no ha sido así. ¿Por qué? ¡Ah! ¿Pero una madre amamantando a su bebé es más erótica que mi personaje? ¿Con lo feo que es? ¡Venga ya!

Sr. redactor-jefe:
una mujer amamantado es igual a un biberón. Comprendo ciertas deseos varoniles ante una mujer que amamanta; ante una foto, no me entra en la cabeza.
Creo que voy entiendo lo de los espermatozoides anoréxicos de los españoles, si se pone ud."así"ante una foto.
Ahora en serio.
Es una barbaridad eliminar un blog, por una foto tan hermosa, Pendón tiene razón, la mujer no está para otras cosas en esos momentos y desde luego no piensa que pasado ciertos años,el hijo que amamanta, va a ser un maleducado al contestar a una luna-dama.
Sobre los foros que me aconseja, debo decirle que hace años, me ex-colmulgó Pio Doce.

Señora autora de la foto que había aquí: hemos reproducido todos el cartel del "Concurso Lactancia Materna, 2005", en cuyas bases y condiciones se estipulaba que quien lo ganase, a cambio del cobrar el premio, cedía los derechos de reproducción para promocionar la lactancia materna. Ahora bien, usted, aprovechando la popularidad que ha conseguido, gracias al movimiento solidario en defensa de la dignidad de su fotografía (no lo olvide, usted), no se da cuenta de lo que significa que hayan cerrado varios blogs de gente dispuesta a dejar que les aniquilen su bitácora por reivindicar la belleza, y usted sólo tiene la mezquindad de reivindicar su "propiedad". Como a usted le molesta verla en los blogs, ahora que la hemos convertido en alguien a quien le piden una entrevista en El País, no tengo ningún inconveniente en quitar la foto y cualquier referencia a usted.

me parece indignante que cierren sitios con fotos de madres dándoles el pecho a sus hijos o de desnudos de tipo artístico mientras otros sitios donde niñatas posan semidesnudas por que son asi de guarras siguen abiertos...

Doña Diana:vamos a ver si nos aclaramos: a mi provecta edad no es que me ilusione ver niñatas enseñando sus encantos, me parecería un detalle de buen gusto que fueran feas y llevaran burka; y puesta a pensar puedo pensar que son unas guarras que tienen las esquinas de su casa redondas; pero eso es producto de la mala baba que me produce la falta de éxito erótico.
La cuestión es que estoy a favor de la lactancia materna y también del desnudo integral o parcial de quien le apetezca, sin restricciones ni coacciones de puritanos morbosos. Y no es cuestión de decir que aprovechando que los senos se muestran para dar de mamar han de considerarse una guarrería si no tienen un bebé adosado.
¿Ha quedado ya claro cuál es mi punto de vista y lo que opino de los desnudos, artísticos o no?
Saludos cordiales

Hola a todos los censurados…
Digamos que vengo experimentando sobre la censura en windows live desde hace 3 años.
Lo cierto es que acavas sintiendo que quien aplica la censura deve ser algun ser de ultra derecha o de algun grupo religioso como el Opus Dei.
devido a su limitado aspectro de visiones en la vida creen que todo lo que escapa a su perfecto orden social deve ser cortado de raiz, para asi tener una ciudadania mas adecuada a lo que ellos persiguen.
En mi caso de lo que hablan mis spaces o mis blogs es sobre realizacion personal y apertura de mente con varias tecnicas de estimulo interior.
Figense hasta donde llega su censura que un arxivo de videos en el You Tube, propiedad actualmente de Microsoft, fue borrado simultaneamente que
http://pantaganogroup.spaces.live.com
desde mi modo de entender si alguien censura unos textos o unas imagenes de la noche a la mañana sin previo aviso, no es por censura es por orientacion social, la cual quieren que este donde ellos quieren y no donde la sociedad quiere.
De ahi la falsa sensacion de livertad entre otras muchas falsas sensaciones que vivimos a diario.

quizas solo sea mi vision del porque o quizas no, pero lo cierto es que vives en un mundo creado para que sea vivido y dictado no como uno lo quiere sino como 4 lo dictan.

Por caprichos del destino me veo reclamando 50 m cuadrados terrícolas donde poder

soñar, a placer, haber nacido dos siglos más tarde y reclamar una celda digna (y presurizada) en Marte o en Europa (la de Júpiter).

Carecer de ese extraño sentimiento de amor a la tierra natal que algunos experimentan, y su colateral ausencia de morriña, me proyectará al universo.

Eps... a mí me parece pura demagogia, el movimiento este pro-vivienda digna.
No digo yo que no sea un derecho, que a lo mejor lo es, pero el que sea un derecho no lo hace obligatorio. También es un derecho recogido por la constitución la muerte digna pero eso no quiere decir que nos tengan que matar dignamente. Mejor que nos dejen morirnos, aunque sea indignamente, como será en mi caso, que trataré de esquivarla por todos los medios: incluyendo la violencia, el engaño, el soborno y la prostitución de mi deseada anatomía.
Por otra parte, tengo para mí que esto no tiene que ver tanto con la especulación, cuanto con la negativa de todos los partidos a liberalizar el suelo, salvo el que por razones ambientales (que no ecologistas), históricas (sin memoria, por favor)o patrimoniales (me refiero a patrimonios públicos y/o universales) deba ser protegido.
Es decir, la culpa no la tiene el pollo que se hace rico construyendo y vendiendo al precio que le paguemos sus construcciones, que es muy lícito, sino los partidos que no quieren dejar de financiarse liberando el suelo con cuentagotas desde las administraciones que controlan. Los ayuntamientos, principalmente. El promotor tiene tanto derecho a hacerse rico como los del cartelito ese ridículo a tener casa, y criticarle por forrarse haciendo negocios es, una de dos: demagogia o envidia; o ambas cosas, casi siempre.
Porque buena parte del sobreprecio que se paga en una vivienda es para pagar las superestructuras de los partidos políticos y sus desproporcionadas e idiotizantes campañas electorales.
Yo me manifestaría por que cada español tratara, al menos, de tener una idea, una opinión, una conclusión a la que llegara por sí mismo, y no a fuerza de repetir las consignas estupidizantes.
Porque esto de la vivienda digna y la especulación inmobiliaria es de traca.

(espero que valores en lo que vale esta provocación gata)

VII MARATÓN ORNITOLÓGICO EN TODA ESPAÑA DURANTE EL MES DE ABRIL

Apúntate y participa en el VII Maratón Ornitológico que tendrá lugar en toda España durante el mes de abril.
Durante el mes de abril tendrá lugar la VII edición del Maratón Ornitológico de SEO/BirdLife. Esta actividad está abierta a todos los públicos, sólo hace falta inscribir al equipo (entre 3 y 5 personas) en la delegación de Catalunya personalmente, por teléfono 93 289 22 84 o bien enviando un correo electrónico a catalunya@seo.org.
El equipo ganador será aquel que identifique el mayor número de especies en 24h. El premio para el equipo ganador absoluto del maratón (con más especies detectadas) será de una estancia pagada (dos noches) para todos los miembros del equipo en el Parque Nacional de Monfragüe.
Una vez más las **fechas** para poder realizar el maratón serán diferentes en función de la zona escogida:
-En las **zonas meridionales** (Andalucía, Extremadura, Canarias, Ceuta, Melilla, Murcia y Albacete) 14-15 de abril.
-El resto del territorio el 28-29 de abril. Cada equipo deberá enviar sus resultados a la delegación de Catalunya en un plazo inferior a 72 horas despúes de la finalización de la prueba. Los ganadores se darán a conocer la semana posterior.
Como novedad, este año se declarará un equipo ganador absoluto y también se darán a conocer los ganadores de cada comunidad autónoma. Además, todos los participantes recibirán un obsequio.

DETERMINARSE Y LUEGO ARREPENTIRSE

Determinarse y luego arrepentirse;
empezar a atrever y acobardarse;
arder el pecho y la palabra helarse;
desengañarse y luego persuadirse.

Comenzar una cosa y advertirse;
querer decir su pena y no aclararse;
en medio del aliento desmayarse,
y entre el amor y el miedo consumirse.

En las resoluciones detenerse;
hallada la ocasión no aprovecharse,
y perdido de cólera encenderse.

Y sin saber por qué, desvanecerse:
efectos son de amor; no hay que espantarse,
que todo del amor puede creerse.

Aquí está quien no viniera
A la Merced (1) sin morir,
Que le costara el vivir
Si alguna en su vida hiciera.
Tan vana como escudera,
Jamás conoció sosiego:
Fue más astuta que un griego,
Aquella de quien presumo
Que las mandas que hizo en humo
Estará pagando en fuego.

1) Convento donde fue enterrada la Marquesa del Valle, por la que Tassis no tenía mucho cariño.

Pero el que odiaba al Conde, aparte de sus asesinos, era Quevedo que en su relato del asesinato dice:

"... tuvo su fin más aplauso que misericordia. ¡Tanto valieron los distraimientos de su pluma, las malicias de su lengua, pues vivió de manera que los que aguardaban su fin tuvieron por bien intencionado el cuchillo!" (...) "La justicia hizo diligencias para averiguar lo que hizo otro a falta suya; y sólo así se halló por culpada de haber dado lugar a que fuese exceso, lo que pudo ser sentencia."...

Quevedo hubiera preferido al de Villamediana ajusticiado en plaza pública, en fin, no le gustaron los versos satíricos que el conde le dedicó a su protector, el Duque de Osuna.

Atribuido a Góngora pero del que Lope también tiene una versión, es este verso que aclara (?) las causas del asesinato del Conde:

Mentideros de Madrid,
decidnos,¿quién mató al Conde?;
ni se sabe, ni se esconde,
sin discurso discurrid:
-Dicen que le mató el Cid
por ser el Conde Lozano;
¡disparate chabacano!,
la verdad del caso ha sido
que el matador fue Bellido
y el impulso soberano.

Y este de Francisco de Rioja es importante porque lo escribe un amigo fiel del Conde-Duque de Olivares, al que Tassis dirigió sus sátiras y le disputaba su puesto junto al rey Felipe IV:

De tan poderosa mano
donde apenas hay defensa,
aun los amagos de ofensa
pagan tributo temprano;
no te admires cortesano,
ni la trates con rigor,
si no sabes que es amor
incapaz de resistir,
dígalo quien con morir
lo supo decir mejor.

Lo de los "amagos de ofensa" hace referencia a la leyenda que atribuía amores del de Tasssis con la reina Isabel de Borbón, pera algunos, la causa de su asesinato...

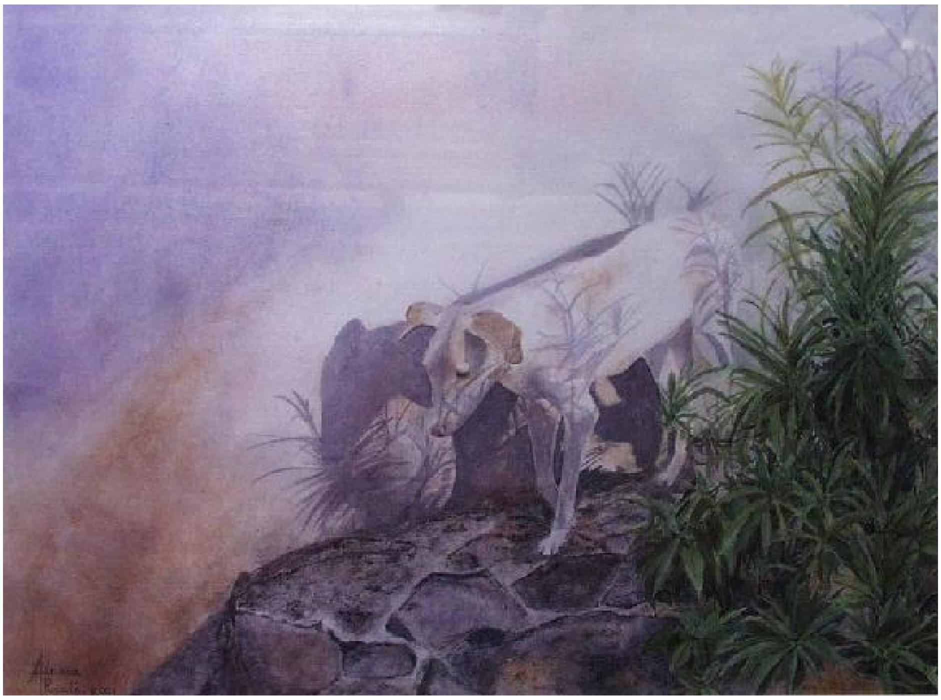
PIQUES TONTOS...



Hacía tiempo que María no venía a pasar unos días con su abuelo.
-*Vaya sitio te has ido a buscar para vivir... No hay tren, un autobús al día, y ochocientos vecinos...*

-Es un sitio tranquilo.
-¿Y en quince años no te has cansado de vivir aquí?
-No, qué va...La humanidad es la misma en cualquier lado. Con ochocientos vecinos es como si conocieras a ocho millones...
-Si tú lo dices...
Desde la parada del autobús hasta la casa hay casi un kilómetro. Seis o siete coches frenan, y se ofrecen para llevarlos.
-Preferimos ir dando un paseo
-Ya... hasta el bar, que ya nos conocemos los vicios...
-Justamente, sí.
-Vale, allí nos vemos
-Qué amables son aquí -le dice María.
-Con los que nos llevamos bien, sí.
Al llegar al bar, a Sergio le sirven un café largo sin preguntarle, y todos saludan a María, le reprochan que no haya estado en las fiestas, y le comentan anécdotas de sus visitas anteriores.
Raúl acodado en la barra, no les quita la vista de encima. El abuelo lo ignora, y sigue hablando como si no se diera cuenta. María está de espaldas y no lo ve acercarse.
-María, ¿te acuerdas de mí? -pregunta retóricamente.
-Raúl, claro que me acuerdo de ti. Siempre le pregunto al abuelo qué tal te va...
-¿Y tu abuelo qué te cuenta?
-Nada, ahora que lo pienso. ¿Qué es de tu vida?
Sergio lo reta con la mirada. Raúl baja la vista. Y baja la voz para preguntar si se puede sentar con ellos. María se adelanta y lo invita.
-Tu abuelo está enfadado conmigo.
-¿Qué? ¿Es verdad eso, abuelo?
-Sí, sí, está enfadado conmigo. Tu abuelo es una intransigente, no admite que me haya equivocado, que haya tomado una decisión contra su parecer ... por ahorrarle el dinero que no le sobra...Y ya sabes como es, no perdona una...
María acaba de descubrir un alma gemela, se le nota en la mirada de censura que le lanza a su abuelo, que se levanta, se acerca a la barra, y pego la hebra con Julio, el de la tienda de ultramarinos. Le añade algunas cosas al pedido que le tiene que llevar, y comentan las novedades del vecindario: operan de cataratas, por fin, al peluquero, y aprovechará para irse a Tarragona un par de semanas con su hija.
-Cuando vuelva, si lo han dejado bien de la vista, cuando vea los cortes de pelo que nos hace...
-Yo creo que no es porque vea mal, sino porque no ha afilado las tijeras desde el año del catapún...
-Oye, te está haciendo señas tu nieta...
-Sí, querrá irse para casa...
María tiene un gesto hosco.
-Vaya cara dura, nos dejas plantados y te pones a hablar con otra gente.
-Se me había olvidado unas cosas del pedido...
-Cosa rara en ti -dice María-*¿Qué se te había olvidado?*
-Pues, por ejemplo, que sueles desayunar Cola Cao. Y no tengo.
Raúl le dice compungido:
-Tu abuelo no quiere estar sentado a la misma mesa conmigo. Pero que sepas que yo sigo siendo su amigo.
Sergio lo mira con una sonrisa atravesada:
-No vales ni para tacos de escopeta, Raúl, no eres de fiar. Pero eso sí, veré tu entierro. Y preguntaré si has rabiado para morir. Voy a sobrevivirte para poder enterarme bien.
Raúl está lívido. Ni se despide de María, que no ha podido reaccionar, y sale del bar. Todos han escuchado. Y se ha hecho un silencio tenso. Sergio apura su café y saca el

monedero para pagar.
-Estáis invitados -dice el dueño del bar.
-¿Por quién?
-Por mí.
-¡Gracias!
Ya en la casa, mientras prepara la sopa, María se lanza a su tema preferido, que es lo duro e inhumano que es, lo poco permisivo, lo intransigente...
Sergio se afana con el sofrito de cebolla, ajos, y gambas enteras, las machaca con la mano de mortero, y lo añade al caldo de verduras que cuece con la morralla. Mientras espera, va removiendo con el cucharón de madera. María le recuerda lo poco que ha podido disfrutar de él por culpa de su carácter. Sergio tiene las gafas empañadas por el vapor de la olla. Va hacia la nevera y saca una botella de vino blanco, sirve dos vasos, y esboza un gesto de brindis.
-Siempre me has exigido más de lo que podía hacer. Me has obligado a subir a los árboles, a nadar en el río, a leer, y no me dejabas ver la televisión. y sin embargo, tú no admites que nadie interfiera en tu vida. A tu amigo Raúl, porque quiso ahorrarte un dinero, se ha convertido en tu enemigo.
Sergio cuela parte del caldo en otra olla más pequeña, y lo pone a fuego vivo. Le añade un poco de vino blanco, el rape y los calamares, una pizca de pebrella, pimentón de hoja, y tres cominos aplastados con la cuchara. Unta los cuencos de barro con un diente de ajo cortado por la mitad, e interrumpe a María, que está en la conocida fase de reprocharle lo poco abuelo que ha sido para ella.
-María, ni tú eres Heidi ni yo un abuelito de cuento. Qué se le va a hacer.Pero nunca habrás comido una sopa mejor que la mía.
-Has sido grosero y cruel con Raúl. Lo has humillado delante de todos.
-Oh, no te preocupes, está acostumbrado.
-Sí. Todos nos hemos acostumbrado a que tú eres quien decide lo que está bien y lo que está mal. ¿Qué te ha hecho para que no lo puedas perdonar?
-Son cosas mías. ¿Quieres ir poniendo la mesa?
Sumerge en la olla una cestilla metálica con los mejillones y las almejas. Pone la tapadera, y saca las servilletas, coloca los platos, los cuencos untados de ajo para la sopa, los cubiertos, y un pan mediado. María lo taladra con la mirada, silenciosa y con los brazos cruzados, sin moverse.
-Raúl también es mi amigo, por si no lo recuerdas. Tú me has dicho mil veces que quien no defiende a sus amigos no merece tenerlos. Y durante quince años ha sido tu mejor amigo en el pueblo. Dime qué te ha hecho para que lo ofendas así.
Sergio saca la cestilla de la olla, y sirve los mejillones y las almejas en una fuente. Añade dos puñados de fideo fino en la olla, y se sienta a la mesa. Rellena los vasos:
-Vamos... siéntate y come.
-Dime qué te ha hecho Raúl.
-Eres igual de incordio que tu madre, no pararás hasta que no consigas sacarme de mis casillas.
-Seguro que es algún pique tonto...
Sergio deja la servilleta sobre la mesa, aparta la silla, y se queda mirando a su nieta, que no parpadea.
-Fue por lo que le hizo a Ortega ... -Y se le quiebra la voz. María espera.
-Acuérdate, la última vez que viniste ya estaba muy viejo...
-Sí, claro que me acuerdo.
-Los últimos meses me quedaba con él, dejé de salir al monte porque no podía seguirme... se ahogaba...
-Me dijiste que le iban a poner una inyección para que no sufriera...
-Sí, hablé con el veterinario para que le pusiera primero anestesia, y luego le pondría una inyección para... Pero me resultaba muy duro, y... Raúl se ofreció para llevarlo.

Vino a buscarlo ...le di el dinero para que le pagara al veterinario ... y me despedí de Ortega. Le dije que lo enterrara él, en el ribazo del olivar...que no lo quería ver muerto... A Ortega lo puse en el asiento de atrás, echado en su manta, pero no sé de donde sacó fuerzas y se puso a dos patas, y se me quedó mirando desde la ventanilla hasta que me perdió de vista en la curva...
Sergio no puede seguir hablando. María tiene los ojos despavoridos.
-¿Y qué pasó?
-Pensé que Ortega se merecía que yo fuera a su entierro, y llegué al olivar cuando Raúl estaba cavando su tumba.
Sergio apaga el fuego y se queda ahí parado, de espaldas a su nieta.
-No sé cómo no lo maté.
María tiene un nudo en la garganta; pero se ve venir alguna idiotez mayúscula a la hora de las honras fúnebres del perro, y se muestra sardónica.
-Ya... porque no era el sitio que tú le habías dicho exactamente o, quizás, no había preparado flores para plantar en su tumba...
-Lo había ahorcado.

Creo no será fácil concienciar al prójimo del respeto a la vida de un animal. Muchos de los que sienten que se les encoge el corazón al ver un galgo ahorcado se muestran indiferentes al aplastamiento de 200 hormigas, cuando extienden su mantel para recrear un bucólico picnic.

Tendemos a sentir compasión, en exclusiva, por los animales de sangre caliente, susceptibles de sentir dolor/temor.

¿Y los demás? ¿Dónde está el límite?

Oh, dios... estoy filosofando sobre el dolor animal ¡en el blog de una gata! Necesito unas vacaciones...

LA GUERRA SUCIA EN MÉXICO, AHORA COMO ANTES.

Este artículo lo hemos publicado en Atenco somos todos y Gatopardo. En homenaje a todos los que luchan y a los que sufren la guerra sucia en México.

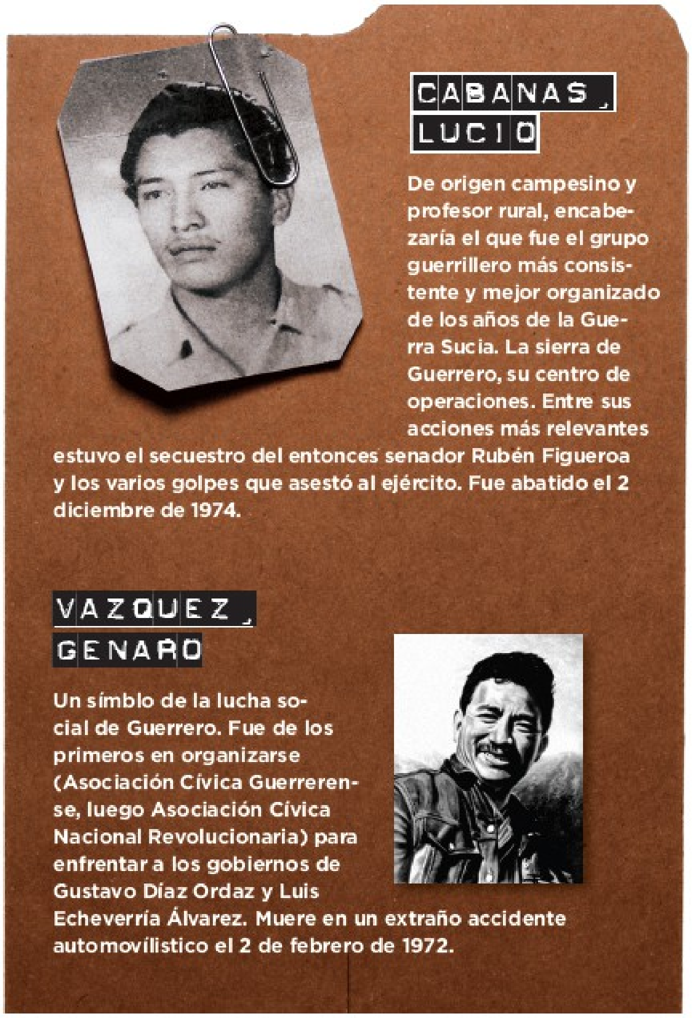
"En Guerrero, el ejército torturó en el Campo Militar Número 1, asesinó a mansalva, bombardeó comunidades, desapareció a cientos de campesinos, arrojó al mar cuerpos de hombres y mujeres aún con vida y "estranguló" a pueblos enteros para doblegarlos y conseguir su colaboración. Y de todo ello, el ex presidente Luis Echeverría estuvo al tanto. Esta es parte de una historia del país que hasta hoy no había sido reconocida oficialmente."-afirma Jacinto Rodríguez Munguía, basándose en el Informe sobre la guerra sucia FEMOSPP.
Hoy, la guerra sucia continúa, con las mismas tácticas y la misma estrategia: se trata de que ningún ciudadano se sienta a salvo, tenga la edad que tenga, haga lo haga, sea "culpable" de luchar por los derechos básicos de sus conciudadanos o no lo sea, y las torturas, la caza del hombre, el hostigamiento a las comunidades, las violaciones tumultuarias por parte de soldados del Glorioso Ejercito mexicano no son hechos aislados, sino que forman parte de un plan que busca dar ejemplo de lo que les espera a los insurgentes, minar su moral, y provocar el terror ciego en la población.
Es la labor de esos valientes soldados del Glorioso Ejercito Mexicano que violaron, fracturaron el craneo y provocaron lesiones mortales a Ernestina, una indígena nahua de 73 años que vivía en apenas un cobertizo en la Sierra de Zoncolica, en el poblado de Tatlalzingo, igual que las trece mujeres en Cohuila, que fueron violadas en el poblado de Castaños por un piquete de soldados, y en el que el juez, en vez de recabar las pruebas forenses y los testimonios de las víctimas y de los testigos para juzgar, acusa al obispado por haber animado a denunciar a las víctimas, y olvida quienes son los acusados de la salvajada, los valientes soldados del Glorioso Ejercito mexicano, a los que se les ha aumentado el sueldo, se les ha asegurado la impunidad desde hace décadas, los mismos que huyen de los narcos o les aseguran su colaboración, y sólo encuentran su valentía para violar, torturar y asesinar a "insurgentes" y "subversivos" como Ernestina, de 73 años, la última de una impresionante lista de mártires.
En México, la guerra sucia, las torturas, violaciones, desapariciones y asesinatos de los años 60 y 70, de los que habla el informe FEMOSPP continúan, mientras la mayor parte de los intelectuales, cachorros de la burguesía, dedican su atención a la lírica, a recabar favores, reconocimiento, y tienen pequeños espasmos de interés por las grandes cuestiones de la vida nacional, como, por ejemplo, la pérdida de influencia de los Republicanos en el Congreso de los EE.UU, o las nuevas teorías sobre el periodismo

ciudadano y los blogs, como signos semióticos .
Para ellos, reivindicar los derechos humanos y la justicia más elemental es cosa de mugrosos. Y este informe les parece de tan mal gusto que ni lo van a mencionar en sus exquisitas deposiciones más que prescindibles.

LA MASACRE DESCONOCIDA EN GUERRERO. DEL INFORME FEMOSPP.
Publicado en Revista Eme Equis

Como no había ocurrido nunca antes, la versión no censurada del informe del gobierno federal sobre lo que pasó durante los años de la Guerra Sucia en Guerrero detalla las "armas" del ejército mexicano en su lucha contra la guerrilla: torturó en el Campo Militar Número 1, asesinó a mansalva, bombardeó comunidades, desapareció a cientos de campesinos, arrojó al mar cuerpos de hombres y mujeres aún con vida y "estranguló" a pueblos enteros para doblarlos y conseguir su colaboración. En síntesis, hubo un *"plan de genocidio de Estado"*.
Producto del trabajo de más de 20 investigadores adscritos a la fiscalía para investigar los crímenes del pasado de la PGR, el reporte consigna con toda claridad: los hechos descritos en el mismo no fueron casuales ni producto de iniciativas individuales. La estrategia fue conocida y autorizada por el entonces presidente Luis Echeverría Álvarez y el secretario de Defensa de esa época, Hermenegildo Cuenca Díaz.
Las violaciones a los derechos humanos y los atropellos a la población descritos en el reporte son tan crudos que éste ha sido sometido a un proceso de *"limpieza"* por parte del fiscal Ignacio Carrillo Prieto para hacerlo presentable ante el presidente Vicente Fox.
El informe, que en la versión aún no sometida a las *"correcciones oficiales"* consta de 840 páginas, divididas en 12 capítulos, da cuenta de cómo el general Cuenca Díaz armó desde los primeros días del gobierno de Echeverría todos los planes de contrainsurgencia, operativos, controles, cercos a la población —como el Plan de Operaciones de Contrainsurgencia o las operaciones Telaraña, Amistad, Luciérnaga—, con el propósito final de lograr el exterminio de lo que siempre llamaron *"subversivos"*.
Los miles de radiogramas militares, cartas y memorandos a los que tuvieron acceso los investigadores de la Fiscalía Especial para Movimientos Políticos y Sociales del Pasado (Femospp) muestran las rutas que siguieron los detenidos en ese estado de la República: Base Militar Pie de la Cuesta, Campo Militar Número 1, cárceles clandestinas, desaparición o el mar como destino último.
(...)
"*Con esta operación se instauró una política de Estado en que todas las autoridades conexas con el ejército –presidente de la república, secretarios de Estado, Estado Mayor de la Defensa, comandantes de las dos regiones militares de Guerrero, oficiales a su mando y tropa– participan en las violaciones a los derechos humanos con la justificación de perseguir a un maleante prófugo. Una estrategia abiertamente contraguerrillera no podía generarse sin el consentimiento y aprobación explícita del presidente de la república, sobre todo porque aquélla aplicó un plan de genocidio que puntualmente se siguió durante todo su mandato"*.
(...)
Elaborado desde 2004 por especialistas hasta hace unas semanas adscritos a la Dirección de Investigación y Análisis de la Fiscalía, cuyo titular era el doctor José Sotelo Marbán, el informe revela que las fuerzas militares y policiacas se convirtieron en artesanos consumados de la tortura.
Lea usted el catálogo de prácticas de tormento recogido en esas páginas:
"Desfiguraciones en el rostro, quemaduras de tercer grado, darles a tomar gasolina, romperles los huesos, cortarles o rebanarles la planta de los pies, toques eléctricos, amarrarlos por los testículos y colgarlos; introducir botellas de vidrio en la vagina de las

mujeres y someterlas a vejación, introducir mangueras por el ano para llenarlos de agua y luego golpearlos".



•••

Son palabras oficiales. Y los siguientes son los hallazgos que documentan esta parte, en gran medida desconocida, de la historia reciente de México.

Eran los años setenta y la ofensiva militar contra la guerrilla no conocía límites. Las detenciones fueron apenas la primera fase de un destino incierto para cientos de habitantes de la montaña guerrerense. Vendrían entonces los días de torturas y tormentos, las últimas huellas de los desaparecidos.

Dice el informe:

"El ejército mexicano siguió ciertos patrones de detención que nos permiten explorar lo que sucedió con los detenidos desaparecidos:

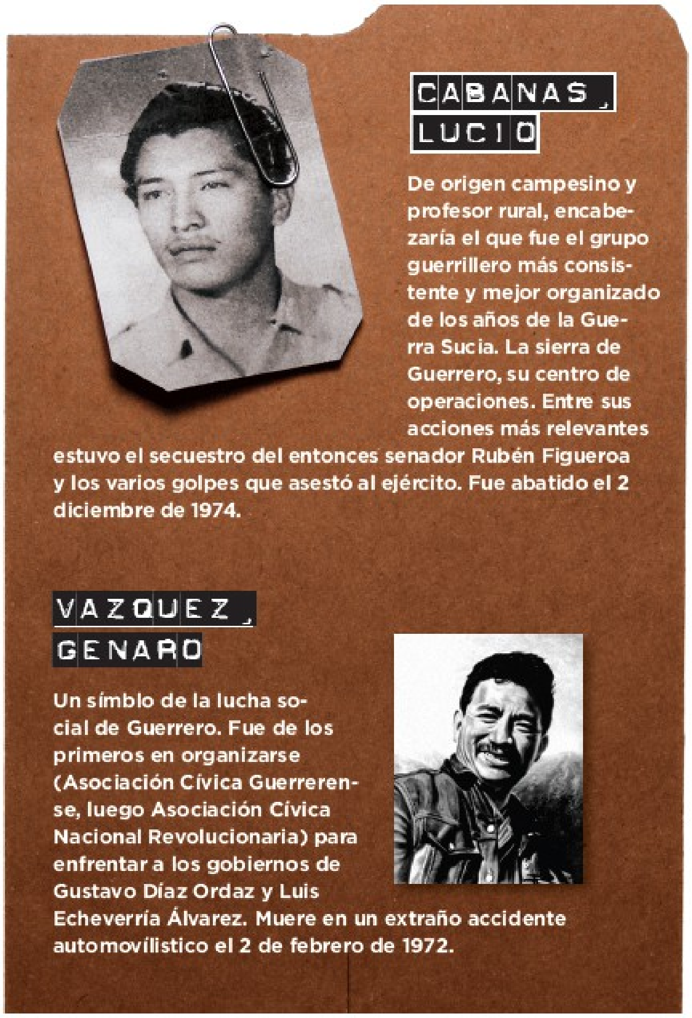
"1. La gente era concentrada en un lugar público del poblado. La cancha, la escuela, la iglesia o algún lugar céntrico en el que se suele reunir la gente del lugar.

"2. Los soldados entraban a los domicilios sin ninguna orden de cateo para cerciorarse de que no había gente que no estuviera en el lugar de concentración.

"3. Algún oficial del ejército pasaba lista. Muchas veces traían a ese lugar a algún 'soplón' o 'madrina' que le indicaba al oficial a quiénes detener. En otras ocasiones, el oficial traía una lista previa y preguntaba por la gente que estaba anotada.

"4. La gente detenida podía tener tres destinos inmediatos: (a) ser recluida en algún lugar donde era atormentada mientras era transportada fuera del lugar, (b) ser utilizada como guía para cualquier requerimiento que el ejército les forzaba a realizar, (c) ser transportada al cuartel militar por vehículo terrestre o por helicóptero".

En cierto momento cambió el modus operandi de las detenciones en Guerrero: *"Tras la detención ilegal de cientos de personas, la policía y el ejército ya no entregarían los detenidos a la autoridad, sino que los enviarían a cárceles militares o, provisionalmente, cárceles clandestinas para después ser enviados a las cárceles militares".*
Las cárceles militares de Pie de la Cuesta, en Acapulco, y la del Campo Militar Número 1, en la ciudad de México, serían una de las rutas de cientos de detenidos, torturados y, para muchos otros, la última estación previa a convertirse sólo en una palabra: desaparecido.



.

I. Artesanos de la tortura

Los relatos que incluye el informe pasan por todos los espacios del miedo y el dolor. Los espacios más oscuros del ser humano puestos al servicio de un solo objetivo: conseguir información, uno de los fines elementales de la tortura.
La lista de métodos parece no tener fin: "Desfiguraciones en el rostro, quemaduras de tercer grado, darles a tomar gasolina, romperles los huesos, cortarles o rebanarles la planta de los pies, toques eléctricos, amarrarlos por los testículos y colgarlos; introducir botellas de vidrio en la vagina de las mujeres y someterlas a vejación, introducir mangueras por el ano para llenarlos de agua y luego golpearlos. Se tiene registro de mil seisceintos cincuenta casos de gente que fue detenida y torturada en cárceles y campos de concentración; otras fueron torturadas en su domicilio o en los puntos de revisión".
Había un elemento adicional: el sadismo, con prácticas *"como quemarles los pies, colgarlos en los árboles como forma de 'ablandamiento'. La misma incertidumbre de ser llevados al campo de concentración, a ser tirados al mar —como los soldados lo anunciaban como amedrentamiento o presagio de lo que con muchos hacían".*

“Muchos de los crímenes de guerra que aquí se documentan —trátese de campos de concentración, de cerco militar, de aldea vietnamita, de sometimiento por hambre—, tienen como ingrediente central la tortura”.
Más allá de la tortura que, implícitamente, significó para los niños la ruptura de la familia, de la presencia militar en sus comunidades, de despertar y dormir con miedo, el informe recoge testimonios de cómo, para ‘ablandar’ a los adultos, se utilizó la tortura sicológica contra sus hijos.
“A mí no me metieron al tanque de agua pero sí me dieron toques eléctricos e intento de violación. Luego me sacaron en la madrugada, me dejaron cerca de donde había vivido, pero para eso me habían quitado al niño, amenazándome que nos iban a matar y que iban a matar al niño si no les contestábamos lo que ellos querían, martirizaban así a su papá, y luego de quitármelo ya no supe donde lo tenían hasta que cuando salí yo les exigía que me devolvieran al niño, y me decían que a mi hijo ya lo habían matado, que iba salir yo pero mi hijo no... cuando nos agarraron le ponían la pistola al niño en la cabeza y amenazaban a mi esposo con matar a nuestro niño, quien lloraba de miedo, se jaloneaba y lo agarraban más fuerte, yo les decía que no le hicieran daño y me decían ‘cállese vieja’, quien sabe qué, eso fue muy mal para el niño, cada vez que recordaba eso, lloraba, y decía que así como lo iban a matar a él tal vez matarían a su papá, esas fueron cosas que se le quedaron grabadas”.
La Operación Luciérnaga sería resultado de una nueva modalidad de contrainsurgencia militar: la captura de los llamados *“paquetes”*, término para reportar las detenciones ilegales prolongadas, con interrogatorios y torturas, y de lo cual el secretario de la Defensa estuvo siempre enterado.
“La recepción de los radiogramas enviados por la zona militar era contestada por el Estado Mayor. Los telegramas enviados por el secretario, constan que él, personalmente, ordenaba detener e interrogar a los sospechosos, así como informarle sobre los resultados”. Los reportes militares tenían más o menos esta estructura: “Captura de un paquete grupo Lucio integrante guardia senador Figueroa a quien se interroga…”

Se referían al ex gobernador Rubén Figueroa, que había sido secuestrado por Lucio Cabañas en junio de 1974. Precisamente el secuestro de Figueroa sería otro detonante. El informe subraya que con este caso el ejército intensificaría sus ataques en tres niveles.
1) La búsqueda del control absoluto de la región con vistas a liberar a Figueroa;

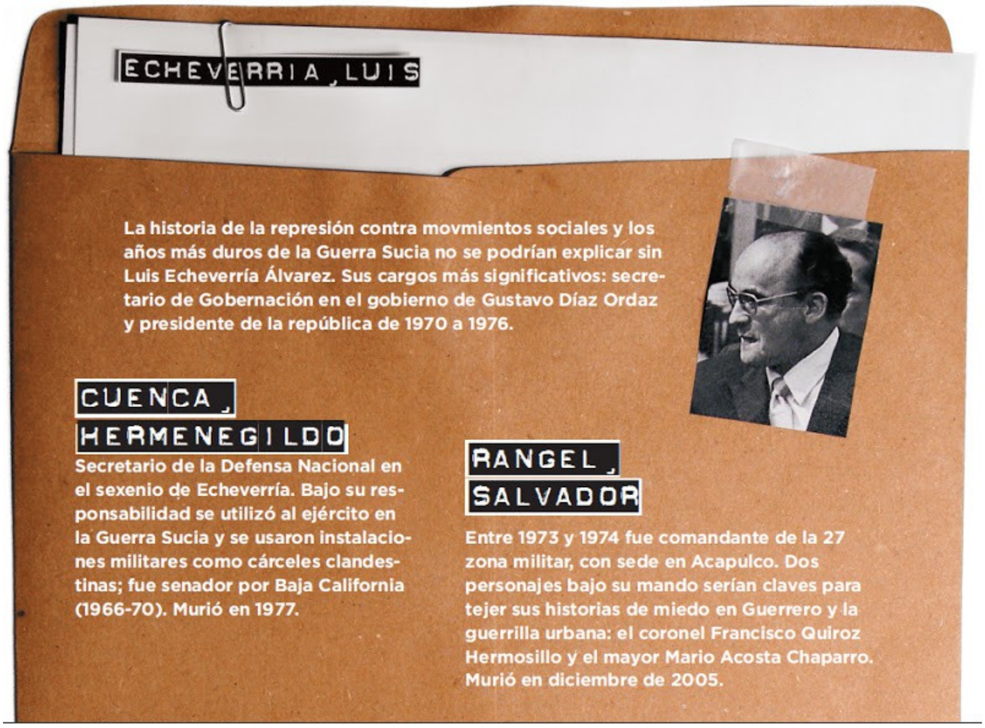
2) La destrucción del movimiento armado, persiguiendo militarmente a Lucio y, a la vez, utilizando todos los medios de destrucción contra las comunidades campesinas y
3) La aniquilación de todo resabio de guerrilla.
A un mes del secuestro se elaboró un *"documento crucial para el desarrollo subsecuente de las operaciones"* militares. El documento, enviado por el jefe del Estado Mayor, general Alberto Sánchez López, al secretario Cuenca Díaz, se titulaba Análisis y evaluación de la situación actual, político-militar en relación con el secuestro del senador Rubén Figueroa, por la gavilla guerrillera de Lucio Cabañas.
En este documento el ejército reconoce, de manera explícita, que estaba frente a una guerrilla que contaba con el apoyo del pueblo y, por tanto, debía *"actuar empleando los conocimientos de todo el personal militar que ha salido al extranjero para recibir diversos cursos de adiestramiento que tienen relación con la contraguerrilla… (que) si por conveniencia se ha dado el nombre de maleantes y gavilleros para no deteriorar la imagen de México en el exterior…(que) en la población rural hay cierta forma de pensar, en forma de odio o temor contra las acciones de la tropa".*

II. Los vuelos de la muerte
"Nos amenazaban que íbamos a ir a darles banquetes a los tiburones… Y a mis hijos nunca jamás los he vuelto a ver y a Pablo Rosas tampoco". Más de 30 años después, indelebles siguen los recuerdos para Maximiliano Nava, los de aquella tarde o noche, la hora en que fueron arrancados para siempre sus familiares y amigos de sus comunidades para convertirse en una palabra invisible: desaparecidos.
Los llamados *"vuelos de la muerte"* fueron algo más que un mero mecanismo de terror sicológico. En el informe se dice que existen denuncias de que a partir de agosto de 1975 comenzaron a realizarse bajo la responsabilidad del entonces teniente coronel Francisco Quiroz Hermosillo y el mayor Arturo Acosta Chaparro. Entre el 8 de junio de 1976 y el 7 de enero de 1979 se habrían realizado los últimos siete vuelos para arrojar los cuerpos de los detenidos al océano Pacífico.
Acosta Chaparro, aparte de la organización regular de la policía que manejaba, formó cuatro grupos que tenía a su mando directo: el grupo Chihuahua a cargo de Tarín (Gustavo), el grupo Espindosky, a cargo de José Espindosky, el grupo Chumacero a cargo de Rodolfo Chumacero, y el grupo Caballo, a cargo de Ángel Rodríguez Criollo.
A pesar de que dependía de Carlos Ulises Acosta Víquez, rendía cuentas directamente al gobernador Figueroa y se coordinaba directamente con las dos zonas militares, la 27 y la 35. Cuando Rubén Figueroa asumió la gubernatura, en abril del 1975, nombró a Acosta Chaparro delegado de Tránsito, luego director de la Policía de Acapulco y, posteriormente, jefe de todas las corporaciones policiacas del estado.

.

III. Los cadáveres y el Grupo Sangre
Esta otra realidad, ajena a gran parte de la sociedad, no lo era para los aparatos de inteligencia. La información que en junio de 1974 elaboró Luis de la Barreda, entonces director Federal de Seguridad, confirma la espiral de violencia contra los pobladores, sospechosos comunes para el poder político.
La nota tiene como identificación "Grupo Sangre". Según la tarjeta confidencial, *"tanto en el Puerto de Acapulco como en poblaciones cercanas al mismo, en diferentes lugares han venido apareciendo cuerpos sin vida de personas no identificadas. Los cadáveres presentan impactos de arma de fuego, señales de haber sido torturados y desfiguraciones en el rostro y otras partes del cuerpo, producidas por quemaduras.*
"[...] En forma por demás discreta se ha logrado saber que los cuerpos encontrados pertenecen a personas conectadas con Lucio Cabañas Barrientos y su gente, que han

sido aprehendidos cuando bajan de la sierra para abastecerse de víveres y otros objetos necesarios para ellos, o bien que sirven de correo entre los remontados y quienes se encuentran en la zona urbana.
"Que las detenciones se ejecutan por órdenes expresas del comandante de la 27 Zona Militar, con sede en Acapulco, general de división DEM Salvador Rangel Medina, que después de obtener, por diferentes medios, toda la información posible sobre Lucio Cabañas y su gente, les da a tomar gasolina y les prende fuego; posteriormente se les abandona en lugares solitarios, donde aparecen con las desfiguraciones provocadas por las llamas y presentando impactos de arma de fuego. Entre el campesinado existe contrariedad por la presencia del teniente coronel de infantería DEM Francisco Quiroz Hermosillo, comandante del 20 Batallón de la Policía Militar, a quien ya conocen y culpan de las ejecuciones".



IV. Las cárceles militares y clandestinas
En las cárceles militares quedaron muchas historias de tortura. A partir de radiogramas y testimonios de quienes pasaron horas, días, meses, en la Base Militar Pie de Cuesta, el informe da cuenta de ellas.
Un caso: Arturo Gallegos Nájera fue detenido el 20 de noviembre de 1974 y trasladado a una casa clandestina de seguridad donde se le interrogó. Posteriormente fue llevado a la base aérea de Pie de la Cuesta, donde vivió lo siguiente: *"Tuve la oportunidad de ver a varias personas que están aún en calidad de desaparecidas. El tipo de torturas eran cortas. En la boca del estómago, a puño cerrado. Aplicar corriente eléctrica a las partes nobles. También fue aplicada la tortura sicológica 'Tenemos a tu familia. A tu padre, a tu madre, a tu mujer, a tus hijos y a tus hermanos, y los vamos a matar de uno por uno si no cantas".*
En el informe se apunta que allí (Pie de la Cuesta) se ubicaba a quienes eran detenidos en Acapulco, Chilpancingo, Costa Chica u otros estados de la República. *"También pasaba por allí gente detenida en el campo de concentración de Atoyac. Otros detenidos eran regresados a la zona militar que los había remitido o eran liberados. Muchos otros fueron asesinados. Algunos en sesiones de tortura, otros enviados en los 'vuelos de la muerte' que se han denunciado… o remitidos al Campo Militar Número Uno de México"*.
Un documento da la razón. 12 de mayo de 1971. En él se informa que en el transcurso

de esa noche, por instrucciones del secretario de la Defensa Nacional, 13 detenidos en la base aérea militar Pie de la Cuesta serían trasladados hacia la ciudad de México, al Campo Militar Número 1 (CM1).

Resume el informe: *"Esta forma de operar, de entregar los civiles detenidos al ejército, se convirtió en norma. Cuando Rubén Figueroa nombró a Acosta Chaparro jefe de la policía, éste entregaba al ejército a todos los detenidos que consideraba tenían alguna vinculación con la guerrilla, en lugar de entregarlos a la autoridad civil"*.

La 27 Zona Militar, ubicada en Atoyac, sería habilitada, a partir de 1972, como campo de concentración. *"Todos los detenidos que eran llevados allí eran torturados, a muchos los subieron en helicóptero para no regresar jamás o fueron llevados a Pie de la Cuesta o bien al CM1"*.

En el caso de los detenidos en Guerrero, de acuerdo con los resultados de la investigación de la fiscalía de la PGR, el patrón de comportamiento cuando eran conducidos al CM1 era el siguiente: en el lugar había varias galeras y durante su permanencia estaban en una sola o los cambiaban, en grupo, de galera. La tortura también la hacían fuera de las galeras. La supervisión a los detenidos era realizada por militares.

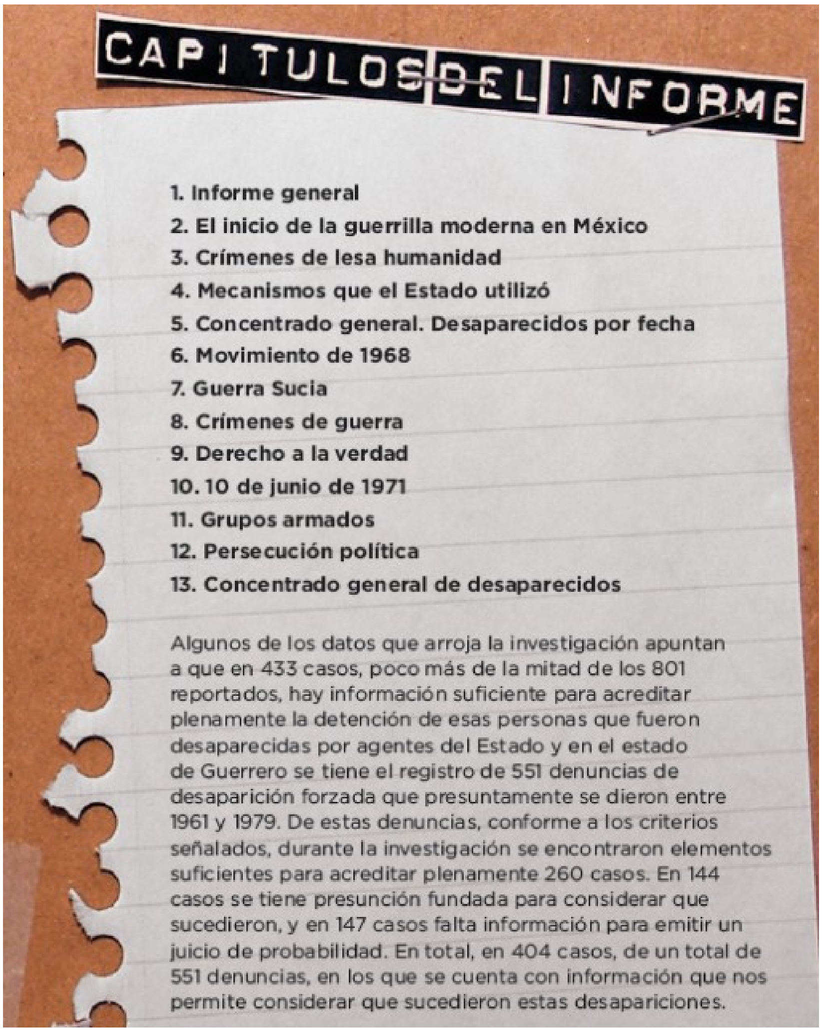
Una vez que eran enviados al CM1 podían tener los siguientes destinos:

a) Morir en los interrogatorios y su cuerpo ser desechado.
b) Ser trasladado a algún lugar de ejecución y su cuerpo ser desechado.
c) Ser liberado.
d) No existe conocimiento de que haya todavía gente detenida.

La versión de los detenidos agrega detalles de los métodos de operación. El avión que trasladaba a los detenidos en Pie de Cuesta tenía camas empotradas y allí los acostaban con los pies hacia adelante. Iban dos guardias con sus armas largas vigilándolos. Cuando llegaban a México les apretaban las vendas y los sacaban cargando del avión. Los encerraban en cuartos separados. Las celdas medían unos dos metros. El lugar donde los torturaban era una casita que también utilizaban los generales o coroneles para recibir visitas.

Conforme a un testigo protegido que cita el informe, *"Quiroz Hermosillo tenía dos camionetas en que periódicamente se llevaban a seis a ocho personas en cada viaje y los desaparecían. Era el propio Quiroz Hermosillo quien dirigía estas acciones, así como una persona a su mando que se llevaban a las gentes en unas camionetas que después reconoció en Chilpancingo en la casa de gobierno de Rubén Figueroa. Estas camionetas —una de color blanca y otra rosita de castilla— […] tenían pintadas en la puerta a un luchador, una persona atlética, grande, con short. Al abrirse por atrás tenían doble compartimiento. Lo primero que se veía era un botiquín como de ambulancia y al abrirse éste estaba otro compartimiento en el que sacaban a la gente del CM1. Se supone que los sacaron para matarlos [...]"*.

Según el informe, por la cárcel del CM1 pasaron más de 46 años los disidentes que el Estado mexicano quiso mantener secuestrados de manera ilegal. *"Allí fueron detenidos los estudiantes que acudieron a la plaza de las Tres Culturas en Tlatelolco el 2 de octubre de 1968. Allí fueron a dar cientos de detenidos en la Guerra Sucia de Guerrero. Tenemos el número incompleto de más de 200 personas remitidas de Guerrero de manera ilegal y por lo menos 65 de ellas se encuentran en calidad de desaparecidas"*.



V. Veinticuatro mil soldados para cazar a Lucio

Este informe, que aún no incluye las *"correcciones oficiales"* que se le están haciendo, pone al descubierto lo que hasta ahora se desconocía o era apenas una referencia testimonial: para contener a Genaro Vázquez Rojas, Lucio Cabañas y un centenar de guerrilleros en la montaña de Guerrero, el ejército desplazó a veinticuatro mil elementos y en la búsqueda de *"subversivos"* se cercaron, arrasaron y bombardearon comunidades completas; se impidió el tránsito humano, de alimentos y medicinas; se provocaron desplazamientos como los ocurridos en la guerra de Vietnam.

El 23 de abril de 1970, por ejemplo, el ejército mexicano habría atacado la comunidad de Piloncillos. De acuerdo con la denuncia ante el ministerio público, a las 9 de la mañana de ese día llegaron cien efectivos, entre ellos 15 vestidos de civil, y sin previo aviso entraron a varias casas sacando a sus moradores con lujo de fuerza y brutalidad, llevándose a media docena de señores a la cancha del poblado y ahí fueron masacrados. *"Congregaron a cinco hombres que encontraron en la comunidad, los formaron frente a la escuela y, colocados frente a la pared, fueron acribillados frente la comunidad y luego rematados con el tiro de gracia".*

Luego de la emboscada de Lucio Cabañas a un convoy militar, donde se registraron diez muertos y 18 heridos en el ejército (25 de junio de 1972), un reporte de la DFS señala que la guerrilla había entrado de lleno a la lucha abierta, actuando como fuerza popular en contra del ejército y las fuerzas de seguridad. La respuesta inmediata sería la de sustituir los sargentos que controlaban los pueblos, por grupos de tenientes.

El 23 de agosto de ese mismo año, la guerrilla asestaba un segundo golpe al ejército en Arroyo Oscuro, ejerciendo así un control amplio sobre la zona. La respuesta fue movilizar cinco batallones de infantería (unos cinco mil efectivos) y diez mil policías para cazar a Lucio y seguidores que, según las cuentas de la misma Sedena, eran entre cien y ciento cincuenta.

En noviembre de 1972, la DFS reporta que el poblado de los Llanos de Santiago de la Unión había sido incendiado (unas 50 casas y la capilla) por soldados, obligando a la población a huir. La razón: ser sospechosos de abastecer a las fuerzas de Lucio Cabañas.
Otro bombardeo ocurriría a finales de junio de 1974 sobre el cerro de la Mojileca. Según contaron los habitantes de las comunidades Los Cajones, Corrales de Río Chiquito y de los ejidos Los Pitos, Los Pitales y Letrados, vieron cuando los aviones dejaron caer las bombas y escucharon muchas explosiones. Ese día muchas familias decidieron salir del pueblo. En el cerro El Encanto, los aviones llevaron a cabo otro raid y tiraron dos o tres bombas. Para entonces habían llegado patrullas militares y fue sobre ellas que cayeron los explosivos.
A la par de los bombardeos, una acción permanente fue el cerco contra las comunidades a las que se bloqueó el tránsito, paso de alimentos y medicinas. Operaciones que en países como Guatemala se conocieron como "quitarle al agua a los peces", que no era otra cosa que el estrangulamiento de la población, base de apoyo de la guerrilla.
En el caso de Guerrero, de acuerdo con el mismo informe, esto formaba parte del Plan de Operaciones establecido por el ejército con el conocimiento del presidente Luis Echeverría.
En La Orden de Operaciones Número Seis se aprueba *"impedir el paso de víveres que puedan ser destinados al enemigo".* Se recoge un testimonio de la comunidad Corrales de Río: *"Los soldados saquearon todo, se metieron a las casas, quemaron la ropa, quebraron los muebles, se llevaron los sarapes, desaparecieron el café, no dejaron nada del maíz y del frijol. Después no dejaban regresar a trabajar las huertas, por lo que se perdieron las cosechas".*
En una de las varias conclusiones que arroja el documento, se afirma que a partir de 1973 el ejército había emprendido una *"política de genocidio de manera sistemática. Es el año que mayores desapariciones se producen en la historia de nuestro país y el estado de Guerrero aporta el mayor número".*
Otro de los objetivos de los retenes militares fue identificar a los afines a la guerrilla. Para eso, el ejército utilizó las llamadas *"madrinas", "gente que le habían quebrado su voluntad y estaba dispuesta a señalar a los partidarios de la guerrilla, o que los obligaban a hacerlo bajo amenazas"*. El uso de "guías" o "madrinas" fue del total conocimiento del secretario de la Defensa Nacional como consta en los radiogramas.
Al final, este informe que pretendía ser la entrega última de la fiscalía al presidente de la república y a la sociedad, se volvió un documento incómodo para el mismo fiscal, entre otras cosas por las afirmaciones que ahí se hacen, como la siguiente, sobre lo que ha significado la Guerra Sucia para el poder político en México:
"Desgraciadamente, el Estado Mexicano ha recurrido periódicamente a esta práctica con el objeto de aniquilar al disidente y su poder de convocatoria en la sociedad. Esta práctica se ha asociado con otras dos que le sirven al mismo propósito: criminalizar la víctima y asegurar la impunidad del agresor. De esta manera, además de que la población es la víctima de la agresión, resulta responsabilizada de los hechos y perseguida. La impunidad que se asegura en todos estos casos, es la de los altos funcionarios del Estado que son los artífices de estos crímenes. Cuando los operarios no logran escapar de la investigación ministerial, se les suele asegurar trato preferencial, castigos cortos y beneficios de reducción de la pena".
Han pasado más de 30 años de que la llamada guerra sucia dejara marcado, para siempre su nombre en miles de historias familiares. Han pasado más de 30 de que los hombres del poder, entonces casi invencibles, determinaran el viaje sin retorno de cientos de mexicanos. Hace unos días se cumplieron 30 años de la última vez que vieron con vida a Aurora de la Paz Navarro antes de ser detenida por Humberto Quiroz Hermosillo, y recluida en el Campo Militar Nùmero 1.
Hasta ahí la vieron con su vientre abultado llevando su hijo en las entrañas. De ahí

saldría la última versión, por ahí de febrero de 1976, de que la vieron viva, de que el hijo había nacido en cautiverio, y la historia se corta de tajo. Ella nunca regresaría y el hijo, tampoco.
La existencia resumida en números. Son desaparecidos.

Antes, cuando trabajaba en las comunidades y veía tantas infamias; buscaba la manera de solucionar las cosas desde dentro, despacito y con buena letra como dicen por aquí. Pensaba, todos quieren ayudar a México, sí, pero con saliva.
Ahora, desde el otro lado, desde ese lado que solo da saliva porque las cosas por el momento son así. No tengo manera, ni modo para ahogar mi frustración. Antes, por lo menos, la ahogaba partiéndome el lomo por algo que valiera la pena, aunque fuera para unos pocos.
Mirar al pasado y pensar en esos 1,650 muertos en una operación genocida, solo me demuestra que no hemos avanzado ni un poco. Que continuamos ahí mismo y que nuestra dictadura, no fue de uno solo, sino de muchos, que es peor y que continúa siendo exactamente lo mismo pero con otro rostro que es peor.
Ahora mismo, leyendo el buen artículo que has puesto Gatopardo, pienso que otra tarea que nos falta por agregar es la justicia por los hechos pasados. Pero ¿cómo ajustar cuentas con el pasado si seguimos igual o peor?
Pero de todo, lo que más rabia me da es que siendo más de cien millones de mexicanos en México, sin contar los que están fuera. Sigamos con los brazos cruzados,

consintiendo en seguir siendo los peones de las estrellas. Nosotros somos los únicos responsables de éstas masacres.

Ya ves, a Luis Echevarría en México lo trataban de doctor.
Santiago Genovés, el egocéntrico y famoso antropólogo siempre andaba muy agradecido con él ya que financió alguna de sus investigaciones. Creo que Genovés en aquellos tiempos era profesor universitario en México.
Y pienso cuando hace mil años, mientras hacía el servicio militar en el 73, a Genovés lo tenía por algo grande ya que desafió al gobierno español e hizo realidad su aventura de cruzar con una balsa, repleta de gente de todo el mundo, el Atlántico.
Y es que, cuando te acercas un poco, nada es lo que te pareció de lejos.

el pueblo d mexico es ciego acaso??? vivimos en una epoca de amnesia, donde no recordamos lo que vivimos hace unas horas y nos importa poco la ideologia q deberia mover al país... tal parece que en la mente del estudiante solo hay ignorancia y egoismo, duele mucho aceptar que todos estos movimientos, este genocidio, no sirvio, la dictadura sigue, solo que disfrazada de democracia... es triste escuchar a gente q ni si qiera sabe q sucedio hace 40 años y mucho menos porque sucedio... debemos voltear a la historia, conocer nuestro pasado, rescatar las ideas de movimiento, que es lo unico q el gobierno no nos puede quitar!!!!!

Soy una persona que estuve muy cerca de los acontecimientos en Atoyac de Alvarez, Gro. dentro del batallón de fuerzas especiales del ejército, y fueron 500 soldados únicamente los que se mandaron a buscar a Lucio, es una mentira lo de los 24 000 soldados, en ese entonces en todo el ejército no los había, yo creo que debemos ser objetivos y solo dar la información verídica y no inventar y desinformar a la ciudadanía, no dudo que debe haber violaciones a los derechos humanos, todos los ejércitos del mundo en elgun momento han cometido errores y los que se puedan comprobar que se castiguen conforme a derecho, yo creo mi querido gatopardo que tienes una imaginaciòn muy florida, pero la mayor parte de lo que dices son falacias y están muy lejos de la realidad, te invito a que realmente hagas una investigación exhaustiva y des a conocer sobre lo que está comnprobado que sucedió, todo lo demas son novelas.........

Ya me gustaría tener la imaginación que usted me atribuye; pero si hubiera leído el artículo con la atención que merece sabría que son datos facilitados por los organismos oficiales a la Fiscalía Especial para Movimientos Sociales y Políticos del Pasado (Femospp) y publicados en el informe sobre la Guerra Sucia en México.
Las novelas son las que usted se habrá tenido que contar a si mismo para hacerle la cirugía estética al pasado si participó de cerca en la vergonzosa actuación del "Glorioso" Ejército Mexicano.
Porque no hay hombre que se pueda catalogar como tal si ha tenido parte en esa ignominia.

Que bueno que me contestó, solo para decirle que leí perfectamente todo el artículo, y si usted está criticando al gobierno y no cree en el, como puede usted confiar en los datos que el mismo gobierno le dá? no es eso una incongruencia? si le estoy recomendando hacer una investigación mas a fondo, no se trata de que recurra solo a datos proporcionados por terceras personas, ¡INVESTIGACION DE CAMPO! es a lo que me refiero, no puede Ud. afirmar o confirmar nada si no hizo Ud. mismo la investigación, con ese criterio nunca vamos a llegar a ningun lado, Ud, sabe cuantos efectivos tiene el ejército en éstos momentos? no verdad? la mayor parte de los datos que Ud. proporciona en éste artículo son muy dudosos, es muy fácil dar opiniones y emitir criterios y juzgar a la gente sin conocer en realidad sus antecedentes, te vuelvo a repetir! nuestra imaginación es muy grande pero la verdad siempre nos supera!

OTRO CASO DE ABUSOS SEXUALES EN UN COLEGIO LEGIONARIO A UN NIÑO DE TRES AÑOS

La Juez del Tribunal Superior de Justicia del DF de México pide que comparezcan Marcial Maciel y Álvaro Corcuera, su sucesor, el 8 de marzo de 2007, a las 11,30, para tomarles declaración por los abusos cometidos por un profesor del Colegio Oxford contra un niño de tres años.
La titular del Juzgado 19 Civil del Tribunal Superior de Justicia del DF (TSJDF), Maricela Cruz Sánchez, ha convocado a Marcial Maciel Degollado y Álvaro Corcuera Martínez del Río, a las 11'30 horas del 8 de marzo de 2007, como testigos en la causa 882/2206, que José Bonilla Sada y Lisset Slimna Aldrete han interpuesto contra el Colegio Oxford , (Centro de Educación y Cultura de Ajusco, AC), perteneciente a los Legionarios de Cristo, contra Pilar Soto Maza, directora del centro, y Joaquín Mondragón Rebollo, presunto autor de los abusos sexuales que sufrió el hijo de los demandantes a los tres años de edad, cuando era alumno de preescolar.

EL PADRE DEL NIÑO ABUSADO CUENTA EL CASO
De nueva cuenta, un episodio de abuso sexual y ocultamiento pende sobre un centro de los Legionarios de Cristo: el colegio Oxford Preschool. El padre de la víctima hace un recuento pormenorizado.
"Quiero que se haga justicia y voy a luchar por ella. Y si defender a mi familia me cuesta la vida, será un precio muy bajo. No les tengo miedo". José Bonilla habla con una enorme carga de indignación. Han pasado seis meses desde aquella noche que le cambió la vida. La noche del 1 de abril de 2006, cuando su esposa y él descubrieron que su hijo de tres años había sido víctima de abuso sexual.
Los hechos ocurrieron en el Oxford Preschool, un colegio de los Legionarios de Cristo. Y, según Bonilla, la reacción de la institución acabó por parecerse a otras historias, oscuras: la del Instituto Cumbres en 1983, la del propio padre Maciel.
—Quiero que todo el mundo sepa quiénes son y cómo operan para evitar que historias como esta se repitan —dice a MILENIO —*. Y tengo de mi lado algo que ellos nunca van a tener: la verdad.*

***
Pilar Soto, la directora del colegio, escucha la denuncia de los señores Bonilla. Furiosos, angustiados, aseguran que Joaquín Mondragón Rebollo, el profesor de deportes, abusó sexualmente de su hijo, el más pequeño de sus alumnos en la academia de futbol. Según José, Miss Pilar les responde que eso no es posible. Y les pide dos días para consultar a sus superiores.
***
El pediatra de la familia, Roberto Hirsch, pide una serie de análisis clínicos para descartar cualquier infección, sida incluido. José se cimbra.
—*Fue algo verdaderamente lamentable. Algo que me tiene muy impactado todavía*— dice al recordar uno de los momentos más difíciles del proceso, y muestra los resultados de la biometría, el urocultivo, el examen general de orina y el de anticuerpos HIV; todos negativos.
El doctor Hirsch los refiere con Rosa Korbman de Shein, psicoterapeuta especialista en niños y adolescentes. José saca de su archivo el currículum de Shein y me lo muestra. Cada escena que describe está respaldada por documentos. Del archivo sale también la conclusión de las pruebas aplicadas por la doctora Shein. La evaluación arroja datos que confirman el abuso sexual.
***
El consejo directivo de los Legionarios de Cristo designa al director de Comunicación Institucional de la Universidad Anáhuac, Roberto Sánchez Mejorada, como interlocutor con la familia Bonilla. Se muestra muy conmovido con la historia y establece una buena relación con ellos. Les presenta a Ricardo Sodi, abogado del colegio y director de la Facultad de Derecho de la Universidad Anáhuac del Norte. Juntos analizan la posibilidad de presentar una demanda. Sodi insiste que la vía jurídica será el camino más complicado, pero deja la decisión en sus manos. Los dos funcionarios les manifiestan que tendrán tres prioridades: el bienestar del niño, la protección de la familia y la reputación del colegio.
***
El 18 de abril, José Bonilla presenta por su cuenta una denuncia penal contra Joaquín Mondragón en la Fiscalía para Delitos Sexuales de la Procuraduría del DF por el delito de violación agravada. Es el gran detonador. Tres días después, la escuela presenta la suya, en términos bastante imprecisos según José, un abogado laboralista de 47 años.
—*Ni siquiera señalan el nombre completo de la persona a la que acusan*— dice, mientras me muestra una copia del documento.
En la escuela, las 34 maestras y una veintena de padres de familia firman cartas de apoyo al profesor de deportes y reúnen dinero para apoyarlo. Descalifican las acusaciones de Bonilla y comienzan a hostilizar a la familia. Aíslan a los niños, los desinvitan a las fiestas y a los eventos escolares, los separan de sus amigos, les piden que se vayan del colegio.
—*No tuvieron la menor discreción con el asunto, ni cuidaron a mi familia, como habían prometido*— dice José.
—¿Y qué pasó con el profesor Joaquín?
—*Según la escuela, lo suspendieron desde el 4 de abril. Pero en el IMSS se le da de baja, por terminación de contrato, hasta el 1 de septiembre. Curiosamente, un día después de que el juez 17 de lo Penal libra una orden de aprehensión contra él por los delitos de abuso sexual agravado y violación agravada. Está prófugo hasta la fecha.*
***
Durante la averiguación previa, la familia Bonilla es citada a declarar en la Fiscalía para Delitos Sexuales. José me lee un fragmento de la declaración ministerial de su hijo de tres años: *"...que no quiere al profesor Joaquín porque le lastimó su "colita". Que le muerde su "colita". Que le unta una pomada en la boca y luego le mete su "colita". Que él dice no, no, no, pero Joaquín dice que sí. Que si no, no jugará futbol. Que la "colita"*

de Joaquín es grande y fea, y que le sale algo raro que sabe feo y que él escupe. Que con ellos está otro niño que lo ve todo y que llora mucho…".
José interrumpe la lectura. La imagen vuelve a estremecerlo.
—*Varias veces, al salir de la escuela, llegaba con un dulce y la boca muy irritada* —recuerda la mamá. —*Yo le preguntaba por qué tenía tan roja la boca, pero él no quería hablar. Se pasaba a la parte de atrás del coche y se dormía*—.
—¿No sospechabas nada?
—*No. Es imposible pensar que algo así pueda ocurrir en la escuela.*
—¿Por qué escogieron el Oxford? ¿Conocían a los Legionarios?
—*Yo no* —dice José—. *Yo estudié en escuelas laicas. Y en la Ibero tuve poco que ver con los jesuitas*.
—*Yo elegí el colegio por el nivel académico y por los valores que inculcaban a los niños* —precisa su esposa, abogada, como él—. *Quería que mis hijos estuvieran protegidos y la escuela me parecía como una fortaleza.*
***
El proceso legal sigue su curso y Bonilla conserva en buenos términos la relación institucional. Hasta que se da un incidente que enciende los focos rojos. Sánchez Mejorada le sugiere pedir una segunda opinión y lo refiere con la psicóloga Gabriela Rodríguez. Bonilla accede. Pero al llamarla, ella cree que habla con el abogado de la escuela, y en un tono irónico se mofa abiertamente del diagnóstico de la doctora Shein y le pide que le lleve al niño, *"para desmentirlo"*.
—*Sentí que se estaban burlando de mí* —dice Bonilla.
Indignado, llama a Sánchez Mejorada y a Eugenio Grandío, director operativo de todos los colegios de los Legionarios. La psicóloga se ve obligada a escribir una carta de disculpa. José también la tiene en su archivo.
—*Ahí abrí los ojos y empecé a documentarme sobre los Legionarios y el padre Maciel.*
***
En julio, José Bonilla le comunica a Sánchez Mejorada su intención de presentar otra demanda, ahora por daño moral. Sánchez Mejorada le dice que el colegio asume su responsabilidad y le ofrece, compensar todos los gastos relacionados con el asunto. En agosto se reúnen por última vez y Sánchez Mejorada le pide que fije una cantidad *"para dar por terminado el problema"*. Bonilla lo consulta con el abogado Salvador Ochoa, quien unos días después recibe una llamada de Ricardo Sodi en la que se refiere a Bonilla como un extorsionador que usa a su hijo para exigirles a los Legionarios cien millones de pesos.
Es el punto de quiebre. Bonilla toma la decisión de hacer público su caso. La revista Proceso da a conocer la historia el 24 de septiembre.
Los Legionarios insisten en llegar a un arreglo, pero a Bonilla ya no le interesa.
—*Voy a presentar dos denuncias más* —me dice—. *Una civil, por daño moral, contra el colegio, la directora y el profesor Joaquín. Voy a citar como testigos al propio padre Maciel, a Álvaro Corcuera, Superior de los Legionarios de Cristo, y a todas las maestras y padres de familia que firmaron las cartas. Y voy a pedir una indemnización. Y también denunciaré penalmente a Pilar Soto, la directora del colegio, porque el niño estaba bajo su custodia.*
—¿Cuándo sentirán que se les hace justicia?— pregunto—. José toma su tiempo antes de responder:
—*No sólo poniendo al violador en la cárcel, sino teniendo una sentencia muy firme, que ya no pueda ser recurrida por nadie. Pero siento que la justicia sólo se logrará si ellos declaran públicamente que todo esto ocurrió por negligencia suya, y nos ofrecen una disculpa.*

REENVIAMOS: Denuncia de la OCEZ-FNLS por agresiones de PARAMILITARES en Chiapas
INICIO DEL REENVÍO

Ejido Carrizal, Municipio de Ocosingo, Chiapas, a 7 de Marzo de 2007.

DENUNCIA PÚBLICA

A LOS MEDIOS DE COMUNICACIÓN DE CHIAPAS, MÉXICO Y EL MUNDO.

A LOS ORGANISMOS DEFENSORES DE LOS DERECHOS HUMANOS.

A LAS ORGANIZACIONES INDEPENDIENTES Y DEMOCRÁTICAS.

Han sido ya demasiadas las ocasiones en que a través de los medios de comunicación y de forma directa, nuestra Organización Campesina Emiliano Zapata (OCEZ–FNLS) les ha dado a conocer a los gobiernos estatal, municipal y federal, de las acciones delictivas y violentas que viene perpetrando el grupo de delincuentes paramilitares de "los Petules" en contra de nuestros compañeros y compañeras del ejido Carrizal. Sin embargo han pasado meses y años sin que las autoridades gubernamentales pongan freno a las fechorías de estos delincuentes y les den el castigo correspondiente.

Lo anterior viene a demostrar claramente la complicidad existente entre el gobierno de Chiapas y dicha banda paramilitar, la cual se encubre dentro de la Organización Regional de Cafeticultores de Ocosingo (ORCAO). El gobierno de Pablo Salazar Mendiguchía no sólo les brindó impunidad, sino que los apoyó con proyectos, recursos y puestos claves para sus comandantes con el fin de que se fortalecieran; mientras que su operador político Juan González Esponda y el Tercer Regidor de Ocosingo José Pérez Gómez, se encargaron de elaborar la estrategia que "los Petules" debían seguir para intentar aniquilar a nuestra organización independiente y democrática.

Con la llegada del nuevo gobernador Juan Sabines, esta situación no ha cambiado: los mandos paramilitares continúan en sus puestos como parte de sus cotos de poder, por lo que "los Petules" siguen sintiendo que gozan de la misma impunidad que antes,; mientras que la permanencia de Juan González Esponda y de Mariano Herrán Salvatti en sus mismos cargos, es la mejor garantía de ello. Por ésta razón las agresiones de dichos paramilitares continúan hacia nuestros compañeros; por lo que podemos afirmar que más bien se trata de una POLÍTICA DE ESTADO encaminada a atacar a la OCEZ –FNLS y a cualquier manifestación de organización independiente.

En este marco, el pasado 25 de febrero mientras nuestras familias del Carrizal se trasladaron al festejo de aniversario de una comunidad vecina, el grupo delictivo de "los Petules" aprovechó la oportunidad para destruir 200 metros del alambrado de nuestro potrero colectivo, robándose las tres hiladas de alambre y tumbando los postes. De esto pudieron ser testigos los policías de seguridad pública (PEP), el ministerio público de Ocosingo y algunos miembros de nuestra organización que se quedaron ahí ese día.

Como OCEZ–FNLS tomamos el acuerdo de no caer en esta nueva provocación que nos estaban haciendo, para evitar llegar a dónde querían llevarnos ellos y los operadores gubernamentales. Sin embargo, al ver que no caímos en su trampa, el día de ayer martes 6 de marzo de 2007 por la mañana, "los Petules" pasaron a la agresión directa contra tres compañeros nuestros; quienes se lograron defender y la cosa no pasó de

algunos simples golpes.

Pero un rato después, ya mejor preparados y con armas de fuego, dichos paramilitares emboscaron en el camino a un grupo de miembros de la OCEZ–FNLS y se dio un nuevo enfrentamiento a golpes. Esta segunda vez resultaron lesionados nuestros compañeros Lorenzo Sántiz López (que antes ya había sido hospitalizado por otras agresiones de ellos mismos), Agustín Sántiz López, Luis Sánchez Gómez y Marcos López Sántiz. Por suerte, las armas de fuego de "los Petules" usadas contra a nuestros compañeros, no hirieron a ninguno, sólo las utilizaron para intimidarnos.

Sin embargo no todo paró ahí. En la tarde quisieron llegar al ejido Carrizal 6 camionetas de la Policía Sectorial, pero al momento en que se encontraban en el camino de acceso a la comunidad, "los Petules" dispararon sus armas de fuego para que las escucharan los policías y luego culparnos a nosotros de ello. Es claro que estos paramilitares, a través de su comandante y Regidor José Pérez Gómez, llamaron a las fuerzas policiales para esperar su llegada y entonces hacer los citados disparos.

Una vez más DENUNCIAMOS quiénes son los dirigentes de dicho grupo paramilitar, con el fin de dejar constancia de que ellos son los principales responsables directos de todos los ataques que hemos sufrido como OCEZ–FNLS y de los que puedan darse en el futuro. Sus nombres son: Pedro López Rodríguez, Martín López Rodríguez primero, Pedro López Sántiz, Jacinto López Sántiz, Armando Rodríguez Gómez, Martín López Rodríguez segundo (éste último es candidato a diácono y fue el que dio la orden de atacar a nuestros compañeros en la citada emboscada) y José Pérez Gómez (que es Tercer Regidor Plurinominal del PRD en Ocosingo y dirigente de la ORCAO).

ADVERTIMOS públicamente que esta situación de agresión permanente por parte de estos paramilitares, puede estallar en cualquier momento en enfrentamientos mayores y de lamentables consecuencias. Ya lo hemos señalado en incontables ocasiones anteriores, sin que las autoridades gubernamentales hagan nada al respecto.

Por ello RESPONSABILIZAMOS DIRECTAMENTE de todo lo que pueda suceder al gobierno de Chiapas encabezado por Juan Sabines Guerrero, y particularmente al supuesto "Comisionado para la Reconciliación de Comunidades en Conflicto" Juan González Esponda, a Juan Vázquez (la sombra del poder en la SEPI) y al "Fiscal General de Justicia" Mariano Herrán Salvatti, herederos todos ellos del fascismo de Pablo Salazar Mendiguchía.

¡ CASTIGO Y DESARME A LOS GRUPOS PARAMILITARES EN TODO EL PAÍS !

¡ LIBERTAD INMEDIATA A TODOS LOS PRESOS POLÍTICOS DE MÉXICO !

¡ CON LA UNIÓN DE LOS POBRES VENCEREMOS !

Organización Campesina Emiliano Zapata (OCEZ–FNLS)

¡ POR LA UNIDAD OBRERO , CAMPESINA, INDÍGENA Y POPULAR !

"Cosas que desgraciadamente ocurren"
Soldados violaron y mataron a anciana, acusan indígenas nahuas
Por Laura Castro Medina/corresponsal

Soledad Atzompa, Ver., 28 febrero 07 (CIMAC).- Indignados por la violación y homicidio de una anciana presuntamente por cuatro elementos del Ejército Mexicano, la mañana de ayer al menos 3 mil indígenas de Zongolica exigieron al gobernador del estado, Fidel Herrera Beltrán, el castigo a los responsables y el retiro de las fuerzas armadas acampadas en distintos puntos de la zona serrana.

Sin embargo, a pesar de las promesas del ejecutivo estatal de aplicar la ley y brindar apoyos sociales y materiales para los pobladores, éstos nuevamente bloquearon caminos, como el día anterior, y retuvieron por más de media hora al secretario de Seguridad Pública, Juan Manuel Orozco, al procurador Emeterio López y demás autoridades, y dañaron sus unidades vehiculares.

Con palos, piedras y machetes, los pobladores amenazaron con linchar a los

responsables de la agresión y exigieron el retiro del Ejército de los 14 municipios de la sierra de Zongolica.

Fue imposible para la Secretaría de Seguridad Pública y la Secretaría General de Gobierno tranquilizar a los pobladores que buscan hacer justicia por su propia mano.

El presidente municipal de Soledad Atzompa, Javier Pérez Pascuala, en nombre de su pueblo, exigió justicia y la salida del Ejército pues son constantes sus abusos de poder, robo, agresiones sexuales y violación a los derechos humanos.

La Procuraduría estatal anunció la instalación de una mesa de diálogo con las organizaciones indígenas y autoridades municipales para impedir cualquier acción de los lugareños en contra de los militares apostados en la zona.

Y ante la delicada situación, Carlos Francisco Mora Domínguez, subsecretario de Seguridad Pública, aseguró que este "acontecimiento" no interferirá en las relaciones entre el estado y las fuerzas militares, así como tampoco en el Programa de Seguridad Federal, impulsado por Felipe Calderón, que se pretende realizar en Veracruz.

Minimizando el hecho, dijo: "son cosas que desgraciadamente ocurren en la sociedad".

ERNESTINA

Ernestina Ascensión Rosario, de 73 años de edad, murió la mañana del lunes a causa de lesiones en diversos órganos vitales, originados por una violación múltiple, cometida presuntamente por elementos del Ejército Mexicano en la comunidad de Tetlacingo, del municipio de Soledad Atzompa.

El informe del médico forense detalla que Ernestina Ascensión murió por fractura de cráneo, hemorragias internas y sangrado anal propiciado por una penetración múltiple. Por ello se inició la investigación asentada en las averiguaciones previas 140/07 y 471/07 en la Agencia Especializada en Delitos Sexuales y en la Agencia del Ministerio Público Investigador, respectivamente.

En las varias horas que duró su agonía en el hospital, a donde la llevaron luego de ser encontrada en muy mal estado el domingo en su vivienda, Ernestina culpó a los soldados por la agresión. Relató que fue golpeada, maniatada y violada por 4 militares.

Ante el hecho, los habitantes de esta comunidad náhuatl de la sierra de Zongolica amenazaban con linchar a los soldados que, en repetidas ocasiones, han abusado de la población indígena de esa región.

Los soldados acampados en la zona, pertenecientes a la 26 zona militar, permanecen desde hace más de un año en diversos puntos de la sierra de Zongolica debido a la presunta existencia en esa región de células del Ejercito Popular Revolucionario (EPR) y del Ejército Revolucionario de los Pueblos Indígenas (ERPI).

Apenas el 2 de febrero, elementos de la 26 Zona militar, en completo estado de ebriedad, habían destruido algunos cultivos de hortalizas y agredieron físicamente a los propietarios de las parcelas, por lo cual representantes del 63 Batallón de Infantería se vieron obligados a cubrir una indemnización de dos mil pesos a cada uno de los 6 afectados.

LOS SOLDADOS

El Gobernador, al reunirse con los deudos de Ernestina, manifestó: "junto a la solidaridad expresa del pueblo y gobierno de Veracruz está también la del Glorioso Ejército Mexicano, comprometido con nosotros a investigar y aplicar todo el peso de la ley de la jurisdicción del fuero común y de la jurisdicción castrense a quien resulte responsable de este insensato y estúpido crimen".

De acuerdo a un comunicado del Gobierno del estado, mientras continúan las investigaciones, los cuatro elementos del Ejército Mexicano señalados como los presuntos responsables de este crimen, están a disposición del Ministerio Público.

Los militares se encontraban destacamentazos en la comunidad de Tetlacingo y pertenecen al cuartel militar de San Antonio del 63 Batallón de infantería con base en Orizaba.

PROFESIONES DE RIESGO: TRABAJADORES DEL SISTEMA SANITARIO

Los españoles hemos pasado de la reverente obsequiosidad hacia las fuerzas vivas del pueblo al trato amenazante y chulesco que antes reservaban los caciques a sus asalariados, porque ésa es la percepción que tenemos gran parte de los ciudadanos de quienes trabajan en la función pública.
Está creciendo llamativamente el porcentaje de empleados de la Sanidad pública agredidos e insultados por los pacientes o sus familiares como respuesta por un diagnóstico o un tratamiento que consideren inadecuados. Más del 85% del personal que trabaja en urgencias en un hospital español ha sido víctima de agresiones físicas, verbales, y amenazas graves, según los datos de una encuesta en la que han participado dos mil sanitarios de Aragón y Castilla-La Mancha. Sólo se denuncian las más graves, las que ineludiblemente obligan a rellenar un parte de lesiones.
Para poder trabajar, un médico ha estudiado seis años en la Facultad de Medicina, y ha hecho tres años como médico residente interno en un hospital, con 58 horas de trabajo semanales, con guardias de treinta horas, sin regulación laboral que no sea la que a golpe de sentencia se consiga en casos concretos. Y al cabo de ese tiempo podrá tener un puesto de trabajo si gana unas oposiciones durísimas, con un salario notablemente más bajo que el de un fontanero.
No importa. Siempre serán más creíbles que el médico unos programas de televisión en los que hablan sin repajolero rigor de enfermedades y de tratamientos, y los que comentan lo bien que le va este fármaco o aquél o un anuncio leído de soslayo .
El médico suele frustrar nuestras expectativas, porque la mayor parte de las veces acudimos a su consulta para tratar de encontrar un remedio para la falta de ejercicio físico, para la voracidad que nos engorda un kilo por año, para la insatisfacción vital y la incapacidad para aplicar normas higiénicas mínimas. Y en estos casos, la enfermedad no es un conjunto de síntomas, sino una protesta genérica por una vida que no gusta, y se enarbola la lengua pastosa, la pesadez de piernas, el cansancio para iniciar el día, la desgana en el trabajo, los dolores erráticos y el malestar difuso o localizado como una pancarta que obligue a nuestro médico a diagnosticar una dolencia que nos sirva de coartada para exigir atenciones en nuestra familia y algo de protagonismo en nuestro entorno.
Es muy difícil que un médico, que tiene como máxima reivindicación profesional poder dedicar diez minutos a cada paciente, nos convenza de que lo nuestro no requiere una batería de pruebas para adornar nuestra exigua biografía, y para poder contarle las peripecias hospitalarias a los amigos. Y, encima, se le ocurre decirnos que la solución

está en empezar a quitarnos el sobrepeso, las seis o siete horas ante la televisión como único ocio...De una tacada nos ha dicho gordos y aburridos, y nos ha frustrado la justificación para quejarnos. Y todo eso en los seis o siete minutos que los gerentes de la sanidad pública le dejan para atender a cada paciente.
Nos han dejado creer que, si hacíamos lo que se esperaba de nosotros, nuestra vida sería un camino empedrado de satisfacciones. En las películas y en la televisión, las familias charlan animadamente desde el desayuno, sentados amigablemente, mientras degustan zumos recién exprimidos y tostadas apetitosas, y, al despedirse y al reencontrarse, los niños y los adultos se besan y se abrazan. Las familias se interpelan e intercambian opiniones, y siempre hay un momento en que se miran con ternura y con admiración, y la convivencia está teñida de momentos idílicos. La mayoría de la gente nos despertamos de mala uva, no soportamos que nos hablen, desayunamos un café con cara despavorida con el tiempo en contra, no somos capaces de encontrarle maldita la gracia al nuevo día que se avecina, y a nuestro alrededor tenemos clones en iguales circunstancias.
Las veces que alguien comete la imprudencia de decir lo que piensa o expresa una opinión, se lía una discusión de mil demonios, así es que lo normal es pasar de puntillas por ese campo minado por las susceptibilidades que es la familia, y mirar fijamente la televisión, e insultar de vez en cuando a los presentadores, que para eso cobran un pastón .
La última vez que sentimos esa mirada llena de ternura y de admiración fue hace muchos años, cuando contamos que le habíamos prestado nuestros ahorros a un amigo. Fue justo antes de decirnos: -*"¡Pero qué poco seso tienes!*- Y eso no da para blindar un ego. Ni para que nos compense aguantar tanto sin atención facultativa y sin anestesia. Así es que montamos el follón en la Seguridad Social, en el colegio de los críos, o en el autobús, que para eso pagamos.
Y hacemos daño para consolarnos.

1. A nadie se le pone una pistola en la nuca para que estudie Medicina. Hay profesiones más cortas y menos duras. Siempre se puede optar por una de ellas.
2. Frente al enfermo gordo o neurástenico muy a menudo se sienta un majadero ignorante llamado médico, que no ha revisado sus conocimientos desde que le dieron el título,y que se halla en un estado de stress o desequilibrio mental cercano a provocar lesiones u homicidio involuntario en el paciente.
3. Frente al paciente maleducado lo normal es que se siente también un médico más

maleducado, aficionado (como el 100% de la enfermería) al tuteo falangista, al interrogatorio personal sin ninguna justificación científica o a la prepotencia y patanería de los doctores de "El Rey que rabió".
4. En este país un ciudadano para tener consulta con una de esas joyas de la medicina, que efectivamente la pagamos y a precio muy caro, ha de sufrir una batería de enfermeras marimandonas y marimachos, amancebadas con el volante y el "sientate aquí que ya te llamaré cuando me parezca", que justifica muy ampliamente cualquier maltrato a semejante tropa de sádicos.
5. En sanidad privada no ocurre eso. Médicos y enfermeras aguantan con obsequiosidad y sonrisa profesional gordos, neuróticos o enfermos imaginarios.
Por mí, madama Gatopardo, que les den matarile.

Mi hermana es médico de familia y yo la veo feliz, le gusta lo que hace y me gusta el trato que dispensa. Me cuenta leyendas y certezas pero no veo diferencias esenciales entre sus conflictos y los de un cartero, excepto por la trascendencia que supone diagnosticar, frente a entregar una vulgar carta de amor.

Todos los médicos deberían ser como mi hermana y todos los pacientes, como la Gatita.

Es la solución infalible e irrealizable que puedo ofrecer, ahora mismo.

Autor: Reivindicaciones de los Médicos Internos Residentes (MIR)

Las asociaciones de MIR piden al Ministerio de Sanidad que modifique el Real Decreto que regula su actividad laboral y formativa. Entre las principales reformas que pide este colectivo en relación al decreto que, según ellos, Sanidad se ha negado a modificar, se incluye la necesidad de cambiar la regulación en cuanto a horarios laborales, ya que los MIR pueden tener jornadas de trabajo de hasta 32 horas seguidas. Según el texto, la posibilidad de prolongar 8 horas más su jornada de 24 horas atiende al "especial interés formativo o por necesidades del servicio", explicó la AMIRCAM.

Más sueldo

Además del descanso de los residentes tras una guardia (atención continuada), la organización solicita una equiparación "inmediata" del sueldo base de los MIR (actualmente en torno a 850 euros mensuales) al del personal estatutario con mismo grado de titulación (Licenciados en Medicina).

Asimismo, solicitan que las guardias, atendiendo a su "especial penosidad" (alto grado de exigencia, nocturnidad, especial dedicación, estrés) y a su "importancia social", se remuneren porcentualmente respecto a las horas de atención continuada del personal estatutario y, en ningún caso, por debajo de los 10 euros por hora. También reclaman que el número máximo de horas de guardia en cómputo trimestral no supere las 99 mensuales.

También quieren que se remunere la productividad y la exclusividad laboral, así como la eliminación de la exclusividad formativa. Finalmente, exige a Sanidad que garantice una formación de especialidad adecuada y continuada, que asegure su profesionalidad en el presente y en el futuro.

En los últimos meses, miembros de la Asociación de Médicos Internos Residentes de la Comunidad de Madrid (AMIRCAM), en representación de las asociaciones autonómicas de MIR y de la Asociación Españolad de MIR (AEMIR) han realizado una ronda de contactos con sindicatos, Organización Médica Colegial (OMC), sociedades científicas y con el Consejo Estatal de Estudiantes de Medicina (CEEM) para obtener apoyos.
Negativa de Sanidad

El director general de Recursos Humanos del Ministerio de Sanidad, José Antonio Benedicto, indicó que no se modificará el Real Decreto que regula las condiciones laborales de los Médicos Internos Residentes (MIR) porque "se consensuó con ellos, aparte de con todas las Comunidades Autónomas y los sindicatos".

Qué coincidencia.
Ya sabes que he estado de médicos (y si no te lo cuento).
Bueno, pues tras quedarme contenta con la nueva médico (la otra me insultaba y tal y cual) hoy he ido a por dos certificados para unos curros.
Como me parecía mucha presencia seguida (análisis, y visiticas y tal) la he llevado una plantina en un tarro majo.
Tome, le he dicho, que son muchas visitas, así que le traigo un presente al estilo antiguo.
Total, que casi se me echa a llorar.
Por lo visto es la primera vez.

Cuando a uno le duele algo estando en una sala gigantesca repleta de enfermos y ve pasar a algunos médicos bromeando con claros signos de relajamiento... pues se cabrea. Y es que con la salud no se juega, y cuando te duele algo estás predispuesto a montar la de dios es cristo por cualquier nadería.
A los médicos se les ha perdido el respeto, ya no son los semidioses de antaño, y eso es bueno...
Primero: porque los semidioses no existen y, segundo: porque es conveniente que de vez en cuando descubran su parte estúpida que todos tenemos.

A mi compañera, siendo enfermera, un médico la golpeó sin querer pinchándose por ello una aguja contaminada de hepatitis (eso sí que es un riesgo).
Mi compañera nunca sufrió acoso o violencia por parte de un enfermo, ni como enfermera primero ni después como médico. Eso sí, siempre se enfrentó dando la cara sin esconder sus dudas, siempre acompañó al enfermo y su familia hasta su último momento... tal vez es eso.

Y así podría contar mil casos, y no solo de ella.

CONSEJOS A MÍ MISMA

No hables jamás
desde la cima helada de los años.
Aprende a blasfemar a carcajadas.
Empápate de lucidez
hasta que te salten los sesos en el cráneo.
Asume insomnio
con más sueños que vergüenza,
y ese cansancio total, ya sempiterno,
que te acompaña.
Vive como se llora, a borbotones,
sin ira y sin esquinas,
sin plazos ni mañana.
Mira, escucha,
usa los sentidos como herramientas
—son auroras boreales de la vida—
no los condenes a infiernos tibios
y noches como mortajas.
Y ama cuanto sepas,
de una vez por todas cada día,
porque la virtud afea el cutis
y estropea la vesícula biliar.

DESPLOME EN LA BOLSA DE WALL STREET Y LA PRENSA SERIA ESPAÑOLA SIN ENTERARSE

Wall Street se desplomó ayer, martes, 27, arrastrando al Dow Jones 550 puntos, y al resto de los mercados bursátiles mundiales.
El origen de la crisis, se encuentra en la decisión del Gobierno chino de tomar medidas contra la especulación financiera, y en la política interior norteamericana, como el oscuro atentado del que salió ileso Dick Cheney en Afganistán, las declaraciones del ex presidente del Banco de la Reserva Federal de Estados Unidos, Alan Greenspan, quien anunció una "posible" recesión en su país en los próximos meses.y las preocupantes cifras del PIB, que confirman el diagnóstico de que los valores norteamericanos están sobrevalorados
La bolsa china cayó un 9%, al día siguiente de un cierre con alza récord en el índice de Shanghai
El índice industrial Dow Jones cayó 546,02 puntos, equivalentes a un 4,3%, la peor caída desde septiembre del 2001,cuando cerró con una baja de 684,81 puntos, equivalentes a un 7,13%.
El desplome afectó a todas las acciones en el mercado, pero especialmente a las tecnológicas.
En los mercados europeos, el índice británico FTSE 100 cayó 2,31%, el índice alemán DAX perdió 2,96%, y el índice francés CAC-40 se desplomó 3,02%. El Ibex 35 se situó en 14.307,7 puntos (12.15 horas), mientras que el Indice General de la Bolsa de Madrid

retrocedía un 0,79%, hasta las 1.589,35 unidades. Por su parte, el Ibex Nuevo Mercado caía un 0,17% y se situaba en 3.673,20 enteros.
En latinoamerica, ell Ipsa de Santiago de Chile retrocedió en un 4,9%, el Merval de Buenos Aires bajó en casi un 7,5%, el Bovespa de Sao Paulo alrededor de un 6% menos, y el IPC de México registró una caída del 5,8%, la mayor en siete años.
El dólar bajó respecto a otras monedas, y lo mismo sucedió con los precios del oro.
Las acciones en baja superaron a las acciones en alza en proporción de 7 a 1 en la Bolsa de Valores de Nueva York, con un volumen de operaciones de 2.380 millones de acciones.
El índice Russell 2000, barómetro de las empresas más pequeñas que se cotizan en la bolsa, perdió 30,96 puntos.

Mientras, en España, la prensa seria nos ilustra sobre el problema que tuvo Penélope Cruz con la cremallera del vestido, los rifirrafes partidistas de los políticos que se dedican *full time* a sus propios intereses, entre los que no están los que afectan a los ciudadanos, y los más sesudos periodistas siguen explicándonos las características de los explosivos que se pudieron utilizar en los atentados, aunque es muy probable que no supieran distinguirlos si los tuvieran delante, aunque les fuera la vida en ello.
Ni siquiera los españoles merecemos este periodismo.

Te aseguro que los periódicos de este país daban la noticia del desplome de la bolsa, acompañada, eso sí, de los vaivenes del vestido de la Penélope.

Poco tiene que ver el atentado contra Cheney con todo eso.
La crisis norteamericana es real y sabida, y el desplome bursátil ha servido de tapadera a un hecho indiscutible.
El desastre occidental en Afganistán era previsible y esperado por todos, y nada tiene que ver con la bolsa (Afganistán no tiene petróleo).
El atentado tiene mensaje puesto que ha sido realizado con muchos medios y en zona segura... pero no olvidemos que Karzai es llamado el alcalde de Kabul porque fuera de allí ya no pinta nada.
Los chinos están reajustando su economía con minuciosa frialdad y la caída de la bolsa ha sido producto de ello. Era necesario para evitar la hinchazón virtual, que no real, de sus mercados.
No pasa nada, todo eso es más noticia que otra cosa, los que deben preocuparse son los que su economía depende de la especulación bursátil, los que lo hacen de su trabajo van a seguir igual de colgados.

Que conste que no tengo idea de economía, Pau, pero sé cómo se colocan las noticias en un periódico según la importancia, interés y transcendencia, y doy la razón a El espía que surgió del frío: se le dio el tratamiento de una noticia de agencia que no merece un artículo explicativo.
Respecto a tus frases "era previsible", "esperado por todos", "un hecho indiscutible" "Afganistán no tiene petroleo" me pregunto si tus interlocutores hemos hecho algo muy malo en esta vida para que me obsequies con el mismo catálogo de frases hechas que los representantes que pasan una vez por semana, y sea cual sea el tema, te las colocan al desgaire.
Si a mí se me hubiera ocurrido soltar sin anestesia respecto a un derrumbe así me habrían hecho ir corriendo a mirarme a ver si es un hictus cerebral."No pasa nada, todo eso es más noticia que otra cosa" y "los que deben preocuparse son los que su economía depende de la especulación bursátil" -dices-, y resulta que, sin ir más lejos, incide en las hipotecas a 50 años, el ajuste a la baja del precio de los bienes raíces, no perecederos,y , justamente la sobrevaloración del precio de las viviendas es el resultado directo de la especulación. Por poner un solo ejemplo.
Si el espía quiere, que explique en qué le afecta a la economía de los ciudadanos que no tienen su dinero en bolsa.
Y luego, Pau, si te da un ataque de vergüenza torera, a ver si lees algún estudio serio sobre los intereses del Imperio en las zonas productoras de opio que no tienen petroleo.

¡Ay, qué paciencia me haces tener!

Temblor en las bolsas: el Ibex 35 se derrumba y llega a perder los 13.900 puntos.
(En www.elconfidencial.com/, hace 1 hora)
Brusco giro bajista en los mercados. Las ganancias que registraba la renta variable se han esfumado en apenas media hora. Las ventas se producen en todos los mercados mientras que los futuros sobre índices en Wall Street previenen de una jornada bajista al otro lado del Atlántico. El Ibex 35, que subía un 0,6% a las 12,30 horas, cae un 2,5%, hasta 13.895 puntos.

En un momento de pánico, los mercados bursátiles han temblado nuevamente como el martes y miércoles envueltos en temores sobre el crecimiento económico, la subida del petróleo y la sensación de sobrevaloración de los valores que más han subido en los últimos meses. El Ibex 35 baja un 6,4% en tres sesiones, su peor racha desde los días anteriores al inicio de la guerra de Irak en marzo de 2003.

En el mercado español, tan sólo compañías como Red Eléctrica aguantan el tirón y sólo cae un 0,2%. Endesa o Fadesa también se sostienen con caídas menores al 1%. Ambas empresas son objeto de OPA por parte de E.ON y Martinsa y aguantan sobre el nivel ofertado por ambos compradores.

Después de decenas de suspensiones por exceso de volatilidad, una mayoría de valores registra descensos importantes. Telecinco, Antena 3 y Cintra bajan más del 5%. Pero

son los grandes valores quienes arrastran al mercado. Una lluvia de ventas se ceba sobre Santander, que cae un 3%; Telefónica, un 1,9%, y BBVA, que pierde un 2,1%. Entre los pequeños valores destacan los desplomes de Astroc, que baja un 18%, y Avánzit, que pierde un 14%.

El volumen de negocio va camino del récord histórico. A las 14,00 horas, el efectivo contratado en la bolsa española supera los 7.000 millones de euros, aunque gran parte ha sido la compra del 7% de Endesa por parte de UBS, el bróker que actúa por cuenta de la italiana Enel.

Una fuente financiera señaló que las ventas procedían principalmente de gestores de fondos por el tamaño de las órdenes y que podría deberse a reajustes de carteras y al nerviosismo generado por las últimas caídas. El sentimiento de desaceleración económica -el PIB de EEUU creció un 2,2% en el cuarto trimestre de 2006, por debajo de lo esperado- y los malos augurios de Greenspan llenan de pesimismo a los inversores desde el martes. El incremento de los indicadores de inflación alimentan el miedo un escenario de bajo crecimiento con alzas en los precios.

Sin embargo, no todo es pesimismo. El director gerente del Fondo Monetario Internacional (FMI), Rodrigo Rato, dijo hoy que el mundo está todavía en un "escenario muy benigno". Las caídas de los mercados de valores globales esta semana están más relacionados con una evaluación de los riesgos que con los fundamentos actuales, en opinión del rector de una de las institucionales financieras más influyentes para los mercados junto con la Fed. Rato también advirtió sobre la existencia de "riesgos a la baja" en la economía mundial y previó que la economía estadounidense registrará durante este año una "suave" ralentización.

Estoy con el espía: en España tenemos una prensa completamente idiotizada. Una prensa que repite las mismas sandeces periódicamente. Están los santones de las tertulias, más previsibles ya que los mismos políticos tras (o ante)los que se alinean. Están los "comunicadores", que dan un poquito más de grima todavía, pues han olvidado, en su mayoría (salvo César Vidal y Jiménez Losantos que son personas admirables) para qué están donde están y se limitan a enrocarse en su tronito y dejar

que entre el dinero. Y luego hay una legión gigantesca de redactores analfabetos que da la sensación de que redactan una noticia al año y luego cambian los nombres de los protagonistas. Eso sí, hay dos excepciones honrosas en la profesión periodística: los periodistas deportivos y los del corazón. Gente culta y abnegada, que ama el periodismo, el lenguaje y me ama a mí, como casi todo el que me conoce.
De todas formas, espía, parece que has perdido la perspectiva: ¿a quién le importa Wall Street cuando a Pe se le rompe la cremallera? ¿Y cuando se descubre que Isabel Pantoja se fumó un porro hace 30 años?

Fuera de las portadas sensacionalistas que, eso sí, dan mucha pena (la portada del Periódico de Catalunya con la barriga de Ronaldinho fue un buen ejemplo), en el interior de los diarios leí artículos muy interesantes sobre el desplome de la bolsa, los leí al día siguiente de ello.
Cada uno tiene su opinión y la mía no siempre coincide con la de los articulistas.
Mucha gente tiembla cuando ocurre algo así, pero lo cierto es que la economía ya no depende de las altas y bajas bursátiles. La experiencia de los últimos tiempos bien que lo ha demostrado. Tampoco veo que la caída de la bolsa tenga que ver con la subida de las hipotecas. En todo caso, las hipotecas han estado subiendo en coincidencia con la bolsa, aunque eso no signifique que no pueda influir a largo plazo.
Es más preocupante ver lo que está ocurriendo con la economía norteamericana que todo el problema del hinchazón y deshinchazón de la bolsa. Humildemente pienso que el tema merece un profundo estudio aunque poco podamos hacer nosotros para evitar lo que se avecina.
No dudo del gran comercio que existe con el opio en Afganistán, pero sigo pensando que nada tiene que ver el ataque a la base norteamericana con el derrumbe de la bolsa.
Me sabe mal que mis frases sean tan poco de tu agrado pero no dejan de ser lo que son: simples frases más o menos afortunadas que intentan explicar una opinión, desacertada o no, pero legítima.
Sería bueno que el espía nos diera una lección sobre el tema, es una lástima que no esté por la labor y menos por mi falta de belleza.
También es cierto que no conozco economista o analista económico que haya acertado más de un cincuenta por ciento en sus previsiones de futuro.

JORNADAS DE PROTESTAS DE PERIODISTAS EN MÉXICO Y XALAPA

Publicado en EnlaceVeracruz 212, que vuelve a estar en la brecha. Y que no nos falten.

.

¿Y yo por que? ¡HIC!

Este miércoles 28 de febrero será una jornada de plantones y conferencias de periodistas.

En Xalapa, los reporteros de diversos medios se manifestarán en la Plaza Lerdo solicitando que el secretario de Gobierno, Reynaldo Escobar Pérez, publique la Ley de Acceso a la Información aprobada por el Congreso de Veracruz. También se solicita los avances sobre las desapariciones y homicidios de periodistas en la entidad y el esclarecimiento del desvío de recursos públicos de parte del secretario de Gobierno a favor del precandidato a la alcaldía de Xalapa por el PRI, David Velasco Chedraui, cuya denuncia fue interpuesta ante la Contraloría del Estado por este medio y los diarios Seis en Punto y El Grillo Jarocho.
Los medios de comunicación publicaron en días pasados el video tomado al funcionario violando la ley en la colonia Floresta de Xalapa, y en cambio como contestación estos medios de comunicación recibieron de parte del funcionario estatal una serie de ofensas al trabajo periodístico y documentado.
Por otra parte, el periodista y director del Diario Tribuna , Martín Serrano Herrera , dará una conferencia de prensa en el Club de Periodistas de México, patrocinado por Reporteros sin Fronteras con sede en Paris, Francia, así como por organizaciones de periodistas canadienses y norteamericanas. Serrano Herrera expondrá su caso en que fue golpeado y despojado de su imprenta en el gobierno alemanistas y como un agente del Ministerio Público y un juez, ya detenidos dos de los responsables, los dejaron en libertad sólo porque eran miembros de las barras y federaciones de abogados.

Ahora Martín acaba de obtener la protección de la justicia federal en contra de la Procuraduría General de Justicia de Veracruz y el Tribunal de Justicia, ya que lo dejaron en total indefensión y entrarán las autoridades federales a la revisión de fondo de las autoridades de Veracruz.

Serrano Herrera interpuso la denuncia hace años en contra del gobernador Miguel Alemán y otros funcionarios de su gobierno. La cita de la conferencia de Martín es en el Club de Periodistas de México, en la calle Filomeno Mata numero 8 del centro histórico del Distrito Federal, y también el periodista veracruzano dará a conocer la serie de atropellos que existen en contra de periodistas en el estado de Veracruz, ya segundo lugar nacional en reporteros asesinados.

Así que los que decidan asistir a la Plaza Lerdo de Xalapa, la cita es a las 10 de la mañana.

En solidaridad con nuestro Compañero y Amigo César Vázquez Chagoya y con La joven Mujer que filmó a Reynaldo Escobar Pérez, Secretario General de Gobierno, en su "tiempo libre" y supuestamente, con recursos públicos, (las investigaciones lo precisarán) hacer proselitismo a favor de su candidato al gobierno municipal de Xalapa.
Señor Gobernador, por este medio, como ciudadano Veracruzano y Mexicano, en pleno ejercicio de mis derechos constitucionales, respetuosamente, le expreso que coincido con sus afirmaciones en el sentido de que:
"EN LAS democracias más maduras contemporáneas –dijo el gobernante-, hasta los funcionarios pueden hacer campaña todos los días; en las leyes de México no, pero los que tengan un tiempo libre y lo quieran dedicar a su tarea política, mientras no la confundan con el ejercicio de los presupuestos o de la autoridad, son reconocidos y respetados"…citado por Carlos Jesús Rodríguez en su columna "Por si Acaso" de este lunes.
Por considerarlo de interés público, le invito a reflexionar que su declaración, no ha sido valorada, menos respetada por su Secretario General de gobierno, Reynaldo Escobar Pérez, ni por David Velasco Chedraui, director de Museos, en su gobierno; pues en contra de lo que usted advierte, aparentemente, ellos han hecho un uso indebido de los recursos públicos; pues mire en qué forma, por demás caprichosa y visceral, se está enturbiando aceleradamente, el proceso electoral de nuestro estado, del que constitucional e insoslayablemente, usted es el primer responsable de que se respeten las Leyes y la normatividad vigentes en materia electoral.
En Consecuencia de lo anterior y por considerar y valorar, que USTED NO PUEDE SER CULPABLE DE LOS ERRORES DE SUS COLABORADORES; PERO SÍ, ES RESPONSABLE DE CORREGIRLOS A TIEMPO, PARA EVITAR QUE CAUSEN DAÑO A LA ECONOMÍA Y, LA VIDA POLÍTICA Y DEMOCRATICA DE NUESTRO AMADO ESTADO DE VERACRUZ; O tal vez, POR SUS MULTIPLES OCUPACIONES, no ha tenido tiempo de leer las notas sobre los errores de su Secretario General de Gobierno, en el uso de sus tiempos libres y sin deslindarse de la representación de su persona o como representante del Gobernador Constitucional del estado de Veracruz, como el funcionario más obligado a respetar la constitución de nuestro estado, que usted juró respetar; y menos se deslindó del uso de los recursos públicos, le reproduzco en esta entrega la columna "Pasillos del Poder" de nuestro compañero y Amigo, César Vázquez Chagoya, con la sincera intención de que usted tome cartas en el asunto, como es su insoslayable responsabilidad y se eviten agresiones al trabajo de periodistas, como ocurrió, con la JOVEN MUJER que lo filmó y en consecuencia las declaraciones del mismo Reynaldo Escobar Pérez, que usted puede confirmar en www.enlaceveracruz212.com.mx, en contra de la persona y esposa de César Vázquez Chagoya.
No sé Señor Gobernador, si su Secretario General de Gobierno tenga que agradecerle a usted algo muy fuerte, que motive en él esa conducta; pero César Vázquez Chagoya, sí tiene que agradecerle a él; por el bien de Veracruz que es nuestro interés conjunto, y de

su gobierno, que a la mayoría de los veracruzanos verdaderamente priistas nos preocupa, le pido respetuosamente que lea usted la columna en comento:
"Pasillos del Poder: GRACIAS, DON REYNALDO"
César Augusto Vázquez Chagoya - Domingo 25 de febrero de 2007.- Reynaldo Gaudencio Escobar Pérez, siendo alcalde de Xalapa, llegó en estado de ebriedad al Palacio de Gobierno, sede del poder ejecutivo con Miguel Alemán, e iracundo se fue contra el director del diario "Marcha" retándolo a golpes porque según el munícipe, el editor se había metido con su mujer (quien era síndica del ayuntamiento de Xalapa) y su familia: "A mi dime lo que quieras, pero a mi Coni y a mi familia la respetas". En esos momentos, atestados de periodistas, todos se quedaron azorados ante el proceder de Reynaldo contra Saúl Contreras. Los más cuerdos metieron paz. Otro día, en el restaurante Vikí's, ubicado en la prolongación de la avenida Veracruz, Reynaldo tomaba alcohol con sus asesores, amigos y empleados; se echaba una copa de tantas cuando entró al lugar Saúl Contreras, y con los humos de su euforia etílica, se fue contra el editor y de nuevo los mesurados metieron paz. Nadie tenía la culpa de que el alcalde y la síndica se enamoraran, pero Reynaldo no podía distinguir entre el ataque a la funcionaria y a su mujer. Siendo también alcalde, Reynaldo demanda, acosa a los periodistas Marco Antonio Cruz "El Tlacuilo" y a Javier Hernández Alpizar porque se habían atrevido a señalar los daños ecológicos y la muerte de 4 niños en la congregación de Chiltoyac por diarreas, a raíz que Reynaldo en ese lugar paradisíaco decidiera instalar el basurero municipal. Ante lo anterior no podemos darnos por mal servidos en los periódicos "El Grillo Jarocho", y el vespertino "Seis en Punto", propiedad de Mario Chama Díaz, que se vendieron como nunca; y tampoco en la página de Internet EnlaceVeracruz212.com.mx, porque se tuvo el mayor número de visitantes por el gran empujón publicitario que nos dio el secretario general de Gobierno, Reynaldo Escobar Pérez, al referirse al video que se le tomó en la colonia Floresta de Xalapa, el cual dijo que había sido grabado porque se lo pedí a mi supuesta esposa que fuera a hacerlo, que ella le había manifestado que lo hacía con gusto porque le gustaba David Velasco Chedraui y que lo quería tener en su colección personal. Bueno, hasta en televisión salimos. Todo viene porque el 11 de febrero de este año, el segundo hombre del Fidelismo acompañó a David Velasco Chedraui a la referida colonia en claro apoyo a su precandidatura para la alcaldía por el PRI de la capital del estado, con todos los recursos públicos del gobierno de Veracruz a disposición de Reynaldo. Ese día, vestido con su playera roja, don Reynaldo dijo que él es el secretario de Gobierno (necesita recalcarlo para que los demás lo sepan), y que le tiene mucha confianza el gobernador Fidel Herrera Beltrán porque es el encargado de mantener la paz social en los 212 municipios de la entidad, manejar los registros civiles, registros públicos de la propiedad, los 23 reclusorios, además de Tránsito del Estado. Muchas responsabilidades para un sólo hombre. Reynaldo, quien se hacía acompañar de su chofer, equipo de seguridad, vehículo del gobierno y por la Policía Intermunicipal, manifestó ante los colonos que lo mandó el gobernador a resolver los asuntos de la gente y más a lo referente a la falta de agua y drenaje para 60 colonias que él como alcalde "había resuelto" criticando incluso que a estas alturas ya deberían estar terminadas las obras, pero que el actual ayuntamiento (presidido por Ricardo Ahued) se metió en pleito con la empresa Aguas Tratadas de Xalapa y se ha perdido tiempo y las consecuencias la sufren los colonos. Así lo señaló el secretario de Gobierno. Después presentó a David Velasco, quien según dijo el gobernador le pidió que lo llevara a las colonias para que se diera cuenta de las necesidades de la gente y que era un joven que tenía aspiraciones (la alcaldía de Xalapa). El empresario también manifestó que tiene una fundación en la calle Ávila Camacho número 87, donde dan consultas médicas gratuitas que si no pueden solucionar los problemas de salud, entonces se les canalizaba al Centro de Especialidades Médicas "Rafael Lucio", donde no les costaría nada o muy poco. (David, un particular, utilizando recursos públicos porque el hospital es del gobierno de

Veracruz). Para sellar con medalla de oro ese día, el secretario de Gobierno le pidió al coordinador de la Policía Intermunicipal que hablara sobre la seguridad ante los presentes. Eso faltaba para complementar la violación a la ley, así como la utilización de recursos públicos a favor de David Velasco, que está penado en todos los códigos, desde el penal, electoral y hasta el de ética. Como recíproco agradecimiento al empujón publicitario de don Reynaldo, los diarios de Chama y nuestra página de Internet (en donde por cierto sigue el video y el audio a disposición del público) nosotros no podemos hacer menos que preocuparnos por la salud del secretario general de Gobierno. Eso de llegar borracho a laborar no sólo daña su salud, sino la imagen del gobierno. Nuestra preocupación se basa en lo siguiente: cuando salió el video manifestó que era un ataque del PAN (se confundió con tantas preocupaciones y sustancias espirituosas que toma), pero no es cierto: es un trabajo periodístico de Seis en Punto, El Grillo Jarocho y EnlaceVeracruz212.com.mx. Todavía tuvo la ocurrencia de decir que la grabación la había hecho mi esposa y, queriendo ofender, dice que la entrevistó y que le dijo mi supuesta cónyuge que le gustaba Velasco Chedraui. Como don Reynaldo compara el juego del billar con la política, a lo mejor quiso hacer una jugada de varias bandas para que este autor sacara su hígado, me metiera con su vida privada y el problema se hiciera personal. No, don Reynaldo: el asunto no es personal, sino legal y usted debe rendir cuentas ante la justicia por desviar recursos públicos para fines ajenos a su encomienda como secretario de Gobierno y representante legal del mismo, por lo que vuelvo a su salud física y mental; en verdad que se le cruzan los cables al secretario de Gobierno y los siguientes puntos lo dicen todo: 1.- A la muchacha que tomó las imágenes, los guardaespaldas y el mismo Reynaldo la acosaron cuando ella grababa un video en la vía pública (nunca se metió a un lugar privado). Le manifestaron que no siguiera grabando y le tomaron fotos. En una aparece un guardaespaldas hablando con ella, después otra con el simpático Reynaldo abrazando a la muchacha, así como fotos de la joven tomando el video y después en la multitud. ¿Si no estaban haciendo nada malo, para que querían impedirle que tomara el video? Conocido el video, Reynaldo, como es su costumbre a denigrar a las personas y sobretodo a los ciudadanos, exhibe las fotos de la joven a la prensa, como si la cámara y ella fueran las culpables de los desvíos de recursos públicos a favor de David Velasco. Después dice que es esposa de Vázquez Chagoya y que le gustaba David. Vaya forma de ofender a una dama. En esta acción, Reynaldo no sólo muestra su poca educación hacia las mujeres, sino una grave desinformación y eso que es el hombre que guarda la tranquilidad de los 212 municipios del estado, simplemente porque la joven valiente no es mi esposa y si lo fuera tampoco merecía la ofensa, porque es un funcionario público y no un payaso mentiroso. 2.- Es grave el estado mental de Reynaldo porque se mete a las colonias de Xalapa en donde se olvida que gobierna un priísta llamado Ricardo Ahued, del mismo partido del secretario de Gobierno y del gobernador, echándole la culpa de que las colonias están sin agua ni drenaje cuando el culpable fue el mismo Reynaldo por empezar las obras por los terrenos donde la familia de David Velasco Chedraui construye fraccionamientos, plazas comerciales, etc. En síntesis: la obra se empezó por las colonias ricas primero para beneficiar a sus amigos, pues no alcanzo el dinero para las pobres. Trata políticamente y públicamente al ayuntamiento de Xalapa peor que a un ayuntamiento panista, a quienes tanto odia y eso que el dirigente estatal de los blanquiazules es hijo de una prima hermana de Reynaldo.3.- Dice el buen Reynaldo, en su desorden mental, que no violó ninguna ley porque era domingo y día sin labores. Entonces para él en ese momento no existieron los policías intermunicipales, no estuvo su equipo de ayudantes, ni los vehículos del gobierno. Tampoco que David ofreciera gratis los servicios del CEM o más baratos a los que quisieran, canalizándolos el hijo de una de las familias más millonarias de Xalapa. Es la primera vez en la historia política del estado que a un secretario de Gobierno se le ve haciendo campaña política a favor de un precandidato del PRI a la alcaldía de Xalapa los fines de semana (si esto último fuera el motivo de

quitarse la chaqueta de funcionario y violar la ley) cuando los reclusorios, policías, agentes de tránsito, etc., que dependen de él, no dejan de trabajar en esos días. ¿Entonces quién los manda en los fines de semana y los tiempos libres del secretario? ¿Los directores? ¿Quién supervisa a los directores? ¿Trabajan o también se van a descansar y hacer labor a favor del PRI? ¿Qué justificación hay para esto? 4.- Para que no quede en una denuncia más en medios de comunicación, este lunes 26 de febrero a las 12 horas presentaremos una denuncia ante la Contraloría General del Estado, aprovechando el Lunes de Puertas Abiertas. Lo mismo se hará ante la Fiscalía Especializada en Delitos cometidos por Servidores Públicos, así como ante la Legislatura de Veracruz, en contra de Reynaldo Escobar Pérez y David Velasco Chedraui, por desvíos de recursos públicos y los que resulten. 4.- Pero el asunto no queda ahí. ¿Por qué unos comunicadores presentan una denuncia legal contra funcionarios públicos, cuando su función es reseñar, analizar la noticia, etc.? Simplemente porque lo que pasó en la colonia Floresta de Xalapa, es un acto más de corrupción donde la autoridad no quiere rendir cuentas a nadie. El Congreso de Veracruz ya aprobó la Ley de Acceso a la Información y como no la publica el que la debe publicar en la Gaceta del Estado, no se crea el Instituto de Acceso a la Información, que es el instrumento legal para hacer efectiva la ley. ¿Sabe quién la debe publicar? Reynaldo Escobar Pérez, en su carácter de secretario general de Gobierno. Si existiera el Instituto de Acceso a la Información, en los hechos de la colonia Floresta la autoridad tendría la obligación de explicar por escrito lo que pasó con sólo pedirlo por escrito, pero como no va a ser así (ya vimos y oímos cómo se mofa Reynaldo de su delito) nos veremos en la necesidad de interponer denuncias y de manifestarnos públicamente cada miércoles, empezando este 28 de febrero de marzo en la plaza Lerdo de Xalapa, para exigir que se promulgue la ley (que tiene que ver mucho con nuestra profesión) y nos den a conocer los avances en las investigaciones sobre los asesinatos y desapariciones en Veracruz, ya segundo lugar nacional de periodistas muertos después de Tamaulipas, así como también los resultados de las investigaciones de la Contraloría sobre el caso de desvío de recursos públicos en la colonia Floresta de Xalapa por parte del secretario de Gobierno y el precandidato del PRI a la alcaldía, David Velasco Chedraui.6.- Usted no lo va a creer, pero Reynaldo Escobar Pérez, en diciembre pasado, presidió la formación de la Comisión Estatal de Defensa de los Periodistas, en donde participa el ombudsman Gerardo Perdomo Cueto y varios periodistas. ¿En manos de quién está la seguridad interna de Veracruz y la vida de los periodistas?Se insiste, Reynaldo ya anda alucinando y merece un examen a fondo de cuerpo, mente y alma.”Hasta aquí la nota de César Vázquez Chagoya.¿Actuará el Gobernador a tiempo para evitar que se distorsione y dañe el proceso electoral en Veracruz? ¿ Se investigarán los hechos que pudieran configurar delitos electorales por parte del Secretario General de Gobierno? Se aplicarán las Leyes para castigar los presuntos delitos electorales en que supuestamente ha incurrido el Secretario General de Gobierno, Reynaldo Escobar Pérez? ¿Hay más funcionarios públicos estatales, haciendo proselitismo ilegalmente, en sus tiempos libres y usando recursos públicos? Aclaro…son preguntas VEREMOS…

Qué los gobernantes no respeten las leyes, sino que usen los presupuestos que administran para sus asuntos viene a ser una constante en nuestro país, y si no hubiera

periodistas que se juegan todo por denunciar, estaríamos en la jungla.
Gracias por su labor, que es insustituible.

DE LO QUE ACONTECIÓ EN EL CORTE INGLÉS CON JUAN MANUEL ZARAGOZA MATEOS...

Contra todo gusto y ley,
y sin mirarse al espejo,
pretendió carnal forcejo
el rijoso panther grey.

La moza, que era gallarda,
y de vista andaba bien,
le respondió con desdén
al carcamal avutarda.

Resígnate, Zaragoza,
que no gustas a la moza.

Enconado en su pasión,
y en su calidad de jefe,
el baboso mequetrefe
persistió en tal acción.

Amenazó y coaccionó
con la sanción y el despido;
se puso carifruncido:
la respuesta fue un no.

Resígnate, Zaragoza,
que nadie contigo goza.

Como es de El Corte Inglés,
mientras vende camisones,
tócase los compañones
y habla de griego o francés.

Harta de tal estafermo,
la dama lo ha denunciado:
veredicto y sentenciado
por verduriento y muermo.

Resígnate, Zaragoza,
que ya eres un carroza.

En mi pueblo y en el tuyo,
un viejo verde es lo mismo;
acepta pues el bautismo,
pesadísimo capullo.

DENUNCIAN ACTOS ILEGALES DE SECRETARIO DE GOBIERNO DE VERACRUZ, REYNALDO ESCOBAR PÉREZ

Mientras siga suspendido **enlaceveracruz212.com.mx** de César Augusto Vázquez Chagoya, periodista del estado de Veracruz, como testimonio de nuestra solidaridad, hemos decidido publicar aquí sus artículos y denuncias.
Invitamos a todos los que estén en deuda de gratitud con los periodistas mexicanos por el talento, la honestidad y la valentía que demuestran, que ayuden a romper el cerco al que están sometiéndolos los corruptos en el poder.
Veracruz es el estado donde más periodistas han sido asesinados, desaparecidos, secuestrados, golpeados y amenazados de México, que después de Irak es el país donde más periodistas son asesinados.

DOCUMENTO ENTREGADO EN LA CONTRALORÍA

Lic. Susana Torres Hernández

Contralora General del Estado de Veracruz

PRESENTE

Mario Chama Díaz y Cesar Augusto Vázquez Chagoya, en uso de nuestros derechos constitucionales, le solicitan su intervención para que se investigue al Secretario General de Gobierno, Reynaldo Gaudencio Escobar Pérez, y al ciudadano David Velasco Chedraui, Presidente del Patronato de los Museos de la ciudad de Xalapa y precandidato del PRI a la alcaldía de la capital del estado por los siguientes hechos, que pudieran ser desvíos de recursos públicos del Gobierno de Veracruz a favor del señor Velasco Chedraui:

1.- El día 11 de febrero, el señor Secretario General de Gobierno, Reynaldo Escobar Pérez, se presentó a la colonia Floresta de esta capital en un vehículo oficial acompañado por su escolta y personal a su mando en la dependencia que dirige, así como del Coordinador de la Policía Intermunicipal, Manuel Díaz Escobar. Al señor Escobar Pérez también lo acompañaba el señor David Velasco Chedraui, a quien el señor Secretario de Gobierno lo presenta ante los colonos como un joven que tiene aspiraciones y que lo hacía por instrucciones del Gobernador del Estado para que conociera las necesidades de Xalapa.

2.- En el evento en clara acción de apoyo a la precandidatura a la alcaldía de David Velasco, también habló éste y le dijo a la gente reunida que tenía un patronato en la avenida Ávila Camacho número 87, donde daban consultas médicas y lo que no podían resolver serían canalizados al Centro de Especialidades Médicas “Rafael Lucio”, donde no se les cobraría nada o casi nada. Cabe mencionarle que dicho hospital es propiedad del Gobierno del Estado de Veracruz y hasta donde se sabe el señor Velasco Chedraui ni es Secretario de Salud ni ocupa algún cargo en dicho hospital para disponer que no se cobre nada o poco a los enfermos que él mismo canaliza desde su fundación.

3.- En ese día, también habló sobre seguridad el Coordinador de la Policía Intermunicipal, Manuel Díaz Escobar, quien tenía rodeado el acto de elementos a su mando con el uniforme oficial y sus armas de cargo. Tanto el señor Díaz Escobar, como sus elementos, dependen y cobran en el Gobierno del Estado de Veracruz y uno de sus jefes es el Secretario de Gobierno Reynaldo Escobar Pérez, quien es encargado de la política interna de la entidad.

PRUEBA

1.- Entregamos como prueba, el video y audio de la reunión efectuada en la colonia Floresta el 11 de enero del 2007, así como la versión estenográfica de los discursos de Reynaldo Escobar Pérez, David Velasco Chedraui y Manuel Díaz Escobar, donde se asienta lo narrado en los puntos anteriores.

Damos como domicilio para recibir notificaciones en la calle Querétaro 59, de la colonia Progreso Macuiltepetl de la ciudad de Xalapa, Veracruz.

Ese día, vestido con su playera roja, don Reynaldo dijo que él es el secretario de Gobierno (necesita recalcarlo para que los demás lo sepan), y que le tiene mucha confianza el gobernador Fidel Herrera Beltrán porque es el encargado de mantener la paz social en los 212 municipios de la entidad, manejar los registros civiles, registros públicos de la propiedad, los 23 reclusorios, además de Tránsito del Estado. Muchas responsabilidades para un sólo hombre.
Reynaldo, quien se hacía acompañar de su chofer, equipo de seguridad, vehículo del gobierno y por la Policía Intermunicipal, manifestó ante los colonos que lo mandó el gobernador a resolver los asuntos de la gente y más a lo referente a la falta de agua y drenaje para 60 colonias que él como alcalde "había resuelto" criticando incluso que a estas alturas ya deberían estar terminadas las obras, pero que el actual ayuntamiento (presidido por Ricardo Ahued) se metió en pleito con la empresa Aguas Tratadas de Xalapa y se ha perdido tiempo y las consecuencias la sufren los colonos. Así lo señaló el secretario de Gobierno.
Después presentó a David Velasco, quien según dijo el gobernador le pidió que lo llevara a las colonias para que se diera cuenta de las necesidades de la gente y que era un joven que tenía aspiraciones (la alcaldía de Xalapa). El empresario también manifestó que tiene una fundación en la calle Ávila Camacho número 87, donde dan consultas médicas gratuitas que si no pueden solucionar los problemas de salud, entonces se les canalizaba al Centro de Especialidades Médicas "Rafael Lucio", donde no les costaría nada o muy poco. (David, un particular, utilizando recursos públicos porque el hospital es del gobierno de Veracruz).

Para sellar con medalla de oro ese día, el secretario de Gobierno le pidió al coordinador de la Policía Intermunicipal que hablara sobre la seguridad ante los presentes. Eso faltaba para complementar la violación a la ley, así como la utilización de recursos públicos a favor de David Velasco, que está penado en todos los códigos, desde el penal, electoral y hasta el de ética.
Como recíproco agradecimiento al empujón publicitario de don Reynaldo, los diarios de Chama y nuestra página de Internet (en donde por cierto sigue el video y el audio a disposición del público) nosotros no podemos hacer menos que preocuparnos por la salud del secretario general de Gobierno. Eso de llegar borracho a laborar no sólo daña su salud, sino la imagen del gobierno.

Nuestra preocupación se basa en lo siguiente: cuando salió el video manifestó que era un ataque del PAN (se confundió con tantas preocupaciones y sustancias espirituosas que toma), pero no es cierto: es un trabajo periodístico de Seis en Punto, El Grillo Jarocho y EnlaceVeracruz212.com.mx. Todavía tuvo la ocurrencia de decir que la grabación la había hecho mi esposa y, queriendo ofender, dice que la entrevistó y que le dijo mi supuesta cónyuge que le gustaba Velasco Chedraui.

Como don Reynaldo compara el juego del billar con la política, a lo mejor quiso hacer una jugada de varias bandas para que este autor sacara su hígado, me metiera con su vida privada y el problema se hiciera personal. No, don Reynaldo: el asunto no es personal, sino legal y usted debe rendir cuentas ante la justicia por desviar recursos públicos para fines ajenos a su encomienda como secretario de Gobierno y representante legal del mismo, por lo que vuelvo a su salud física y mental; en verdad que se le cruzan los cables al secretario de Gobierno y los siguientes puntos lo dicen todo:

1.- A la muchacha que tomó las imágenes, los guardaespaldas y el mismo Reynaldo la acosaron cuando ella grababa un video en la vía pública (nunca se metió a un lugar privado). Le manifestaron que no siguiera grabando y le tomaron fotos. En una aparece un guardaespaldas hablando con ella, después otra con el simpático Reynaldo abrazando a la muchacha, así como fotos de la joven tomando el video y después en la multitud. ¿Si no estaban haciendo nada malo, para que querían impedirle que tomara el video? Conocido el video, Reynaldo, como es su costumbre a denigrar a las personas y sobretodo a los ciudadanos, exhibe las fotos de la joven a la prensa, como si la cámara y ella fueran las culpables de los desvíos de recursos públicos a favor de David Velasco. Después dice que es esposa de Vázquez Chagoya y que le gustaba David. Vaya forma de ofender a una dama.

En esta acción, Reynaldo no sólo muestra su poca educación hacia las mujeres, sino una grave desinformación y eso que es el hombre que guarda la tranquilidad de los 212 municipios del estado, simplemente porque la joven valiente no es mi esposa y si lo fuera tampoco merecía la ofensa, porque es un funcionario público y no un payaso mentiroso.

2.- Es grave el estado mental de Reynaldo porque se mete a las colonias de Xalapa en donde se olvida que gobierna un priísta llamado Ricardo Ahued, del mismo partido del secretario de Gobierno y del gobernador, echándole la culpa de que las colonias están sin agua ni drenaje cuando el culpable fue el mismo Reynaldo por empezar las obras por los terrenos donde la familia de David Velasco Chedraui construye fraccionamientos, plazas comerciales, etc. En síntesis: la obra se empezó por las colonias ricas primero para beneficiar a sus amigos, pues no alcanzo el dinero para las pobres. Trata políticamente y públicamente al ayuntamiento de Xalapa peor que a un ayuntamiento panista, a quienes tanto odia y eso que el dirigente estatal de los blanquiazules es hijo de una prima hermana de Reynaldo.

3.- Dice el buen Reynaldo, en su desorden mental, que no violó ninguna ley porque era domingo y día sin labores. Entonces para él en ese momento no existieron los policías intermunicipales, no estuvo su equipo de ayudantes, ni los vehículos del gobierno. Tampoco que David ofreciera gratis los servicios del CEM o más baratos a los que quisieran, canalizándolos el hijo de una de las familias más millonarias de Xalapa.

Es la primera vez en la historia política del estado que a un secretario de Gobierno se le ve haciendo campaña política a favor de un precandidato del PRI a la alcaldía de Xalapa

los fines de semana (si esto último fuera el motivo de quitarse la chaqueta de funcionario y violar la ley) cuando los reclusorios, policías, agentes de tránsito, etc., que dependen de él, no dejan de trabajar en esos días. ¿Entonces quién los manda en los fines de semana y los tiempos libres del secretario? ¿Los directores? ¿Quién supervisa a los directores? ¿Trabajan o también se van a descansar y hacer labor a favor del PRI? ¿Qué justificación hay para esto?

4.- Para que no quede en una denuncia más en medios de comunicación, este lunes 26 de febrero a las 12 horas presentaremos una denuncia ante la Contraloría General del Estado, aprovechando el Lunes de Puertas Abiertas. Lo mismo se hará ante la Fiscalía Especializada en Delitos cometidos por Servidores Públicos, así como ante la Legislatura de Veracruz, en contra de Reynaldo Escobar Pérez y David Velasco Chedraui, por desvíos de recursos públicos y los que resulten.

4.- Pero el asunto no queda ahí. ¿Por qué unos comunicadores presentan una denuncia legal contra funcionarios públicos, cuando su función es reseñar, analizar la noticia, etc.? Simplemente porque lo que pasó en la colonia Floresta de Xalapa, es un acto más de corrupción donde la autoridad no quiere rendir cuentas a nadie. El Congreso de Veracruz ya aprobó la Ley de Acceso a la Información y como no la publica el que la debe publicar en la Gaceta del Estado, no se crea el Instituto de Acceso a la Información, que es el instrumento legal para hacer efectiva la ley. ¿Sabe quién la debe publicar? Reynaldo Escobar Pérez, en su carácter de secretario general de Gobierno.

Si existiera el Instituto de Acceso a la Información, en los hechos de la colonia Floresta la autoridad tendría la obligación de explicar por escrito lo que pasó con sólo pedirlo por escrito, pero como no va a ser así (ya vimos y oímos cómo se mofa Reynaldo de su delito) nos veremos en la necesidad de interponer denuncias y de manifestarnos públicamente cada miércoles, empezando este 28 de febrero de marzo en la plaza Lerdo de Xalapa, para exigir que se promulgue la ley (que tiene que ver mucho con nuestra profesión) y nos den a conocer los avances en las investigaciones sobre los asesinatos y desapariciones en Veracruz, ya segundo lugar nacional de periodistas muertos después de Tamaulipas, así como también los resultados de las investigaciones de la Contraloría sobre el caso de desvío de recursos públicos en la colonia Floresta de Xalapa por parte del secretario de Gobierno y el precandidato del PRI a la alcaldía, David Velasco Chedraui.

6.- Usted no lo va a creer, pero Reynaldo Escobar Pérez, en diciembre pasado, presidió la formación de la Comisión Estatal de Defensa de los Periodistas, en donde participa el ombudsman Gerardo Perdomo Cueto y varios periodistas. ¿En manos de quién está la seguridad interna de Veracruz y la vida de los periodistas?

Se insiste, Reynaldo ya anda alucinando y merece un examen a fondo de cuerpo, mente y alma.

EL CARDENAL NORBERTO RIVERA SUPO TODO Y PROTEGIÓ AL PEDERASTA NICOLÁS AGUILAR RIVERA

SANJUANA MARTINEZ* ESPECIAL PARA *LA JORNADA

"Ustedes olvidarán pronto lo que les hizo el padre Nicolás Aguilar Rivera. Al rato, ya ni se acordarán. Deben saber perdonarlo. El padre es un hombre enfermo". Con esta frase el cardenal Norberto Rivera Carrera, arzobispo primado de la ciudad de México, intentó convencer a las víctimas del cura pederasta para que guardaran el secreto y no acudieran a las autoridades a denunciarlo, luego de que el presbítero violó a más de 60 niños de la Sierra Negra de Puebla.

"Por supuesto nunca olvidé lo que me hizo", dice en entrevista Sergio Sánchez Merino, quien fue víctima de abuso sexual por Nicolás Aguilar cuando tenía 12 años. En noviembre de 1997 se entrevistó con el cardenal Rivera para denunciar la conducta criminal del presbítero, pero el purpurado decidió *"proteger a su subordinado, en lugar de a los niños"*, afirma.

Sergio vive ahora en Cary, Carolina del Norte. Hasta allí se fue huyendo del escarnio de la feligresía. Católicos fundamentalistas se encargaron de arremeter contra los únicos cuatro niños de los 60 que sufrieron abuso que se atrevieron a denunciar al sacerdote ante los juzgados poblanos entre 1997 y 1998.

La intervención de Rivera Carrera fue decisiva para dejar impunes los crímenes de Aguilar Rivera, quien aún ostenta su ministerio sacerdotal y vive tranquilamente entre Puebla y Morelos. En 1997 el purpurado ya había dejado el cargo de obispo de Tehuacán, Puebla. Dirigía la oficina de manera interina el padre Teodoro Lima. Aunque el cardenal fue nombrado arzobispo primado de México el 13 de junio de 1995, mantenía contacto regular con la diócesis. Tanto, que las víctimas al ir a denunciar al cura afirman haber tratado con el cardenal Rivera, quien personalmente recibió a los afectados.

Antes de ir a la "casa del obispo", donde se hallaba el purpurado, cuatro de los niños decidieron acudir primero a la policía para denunciar al sacerdote: *"Luego las mamás y los niños fuimos a la casa del obispo Rivera. El ordenó que no dejaran entrar a las mamás, que sólo pasáramos los niños por separado. Nos fue atendiendo uno por uno. Recuerdo que me pidió que le contara todo. Luego me dijo: 'A ustedes pronto se les*

olvidará lo que el padre Nicolás les hizo. La Iglesia les dará asesoría sicológica y con el tiempo ya no se acordarán'".
Sergio recuerda en detalle lo sucedido. Explica que el cardenal estaba muy serio y que en seguida apeló a su silencio y comprensión, porque desconocía que ellos ya habían ido a denunciarlo ante las autoridades judiciales: *"Tienes que entender que el padre Nicolás es un hombre enfermo de la cabeza"*, dijo Norberto Rivera al niño. *"Fue un error lo que hizo, pero es mejor que esto no se sepa. Es mejor que ustedes no vayan a la policía, porque luego los perjudicados van a ser ustedes. Todos se van enterar de lo que les pasó. Es mejor guardar silencio, para que ustedes no salgan dañados."*
El cardenal fue nombrado segundo obispo de Tehuacán por el papa Juan Pablo II el 5 de noviembre de 1985, cargo que ocupó durante los siguientes 10 años, hasta que el 13 de junio de ese año fue nombrado arzobispo primado de México. La estrategia del purpurado fue proteger al sacerdote desde el principio.
Sergio recuerda con tristeza el proceder del obispo Rivera, sobre todo porque nunca mostró ningún afecto o cariño por los niños: *"Para él era muy fácil decir que nosotros lo íbamos a olvidar. Nos dijo que nos iban a dar terapia, que nos iba a mandar un sicólogo. ¡Mentiras! Nunca llegó la ayuda. Cuando supieron que nosotros ya teníamos demandado al padre Nicolás, menos".*
La pederastia del sacerdote era pública. Los crímenes sexuales de Aguilar Rivera contra menores de edad se iniciaron desde su paso por el seminario, según afirma Agustín Ríos Nájera, otra de las víctimas de esa época. En la década de los 80 era párroco en Tehuacán, Puebla, donde los ataques a los acólitos eran "secreto a voces" hasta que en 1986 Nicolás apareció mal herido, tirado en un charco de sangre a consecuencia de una fuerte contusión en la cabeza.
Los hechos fueron consignados en medios informativos de Puebla, que afirmaron que el cura mantenía relaciones sexuales con dos muchachos en Cuacnopalan, Puebla, cuando lo golpearon. Luego otros reportes periodísticos de la zona difundieron la denuncia de una maestra que acusaba al sacerdote de haber violado a su pequeño hijo.
La *"enfermedad"* de Nicolás como denominaba Rivera Carrera la pederastia del cura estaba causando serios problemas con la ley a la Iglesia de Tehuacán, por lo que el obispo trasladó al sacerdote a la diócesis de Los Angeles en 1988, argumentando que tenía problemas de "salud" y "familiares", según consta en el intercambio epistolar con el cardenal de Los Angeles, California, Roger Mahony. El purpurado mexicano argumenta que él explicó en otra misiva la *"problemática de homosexualidad"* del presbítero, pero Mahony sostiene que es mentira, ya que nunca recibió esa carta, de la cual el arzobispo primado de México jamás ha presentado copia. El purpurado estadunidense responsabiliza directamente a Rivera Carrera de propiciar los crímenes de Nicolás cometidos en Estados Unidos.
El clérigo volvió a México en 1989, huyendo de la justicia angelina, donde enfrenta denuncias por 26 violaciones a niños. Pese a conocer los hechos mediante las cartas del cardenal Mahony, Norberto Rivera, aún obispo de Tehuacán, no lo retiró del ministerio sacerdotal. El derecho canónico ordena que quien abuse sexualmente de un menor puede ser castigado con la suspensión al sacerdocio.
Rivera Carrera no fue el único en encubrir al pederasta; también lo supo el obispo de Puebla, Rosendo Huesca Pacheco, quien, según la víctima Joaquín Aguilar, estaba plenamente enterado de los crímenes de Nicolás: *"El caso de pederastia de este sacerdote es muestra de la debilidad del corazón humano"*, dijo en conferencia de prensa Huesca Pacheco el pasado 25 de septiembre, al enterarse de la denuncia presentada en la Corte Superior de California. Reconoció que desde antes de que Rivera Carrera llegara a la diócesis se conocían "los señalamientos" de este párroco y comprendió por qué nadie de sus superiores quiere abordar este tema de manera clara y transparente: *"A nadie le gusta agarrar chayotes con las manos"*.
Nicolás ya era prófugo de la justicia cuando fue enviado a una "clínica" de la Iglesia

donde se aplican con dudoso éxito terapias a los curas para combatir la homosexualidad, la pederastia o el alcoholismo, pero luego fue incorporado a la parroquia de San Antonio de las Huertas, donde violó a Joaquín Aguilar, en 1995.
"Nicolás siempre ha sido el protegido de Norberto Rivera", afirma sin titubeos el experimentado periodista de Tehuacán Marco Aurelio Ramírez Hernández. *"Nicolás pertenece a su grupo. Aunque el cardenal ya no es obispo de aquí, sigue moviendo los hilos del poder."*
Con 34 años de experiencia, Ramírez Hernández ha trabajado en varios medios de información; hoy es corresponsal de *El Heraldo de Puebla,* del Grupo Monitor. El periodista lleva siguiéndole los pasos a Nicolás desde su época del seminario: *"Norberto Rivera sabía que Nicolás era pederasta desde antes de las denuncias de la década de los 80. Cuando Norberto llega a Tehuacán emprende una limpia de toda la gente del primer obispo de la localidad, Rafael Ayala y Ayala. Así ajustaba intereses económicos y de poder político".*
Afirma, con base en documentos, que Rivera Carrera fue acumulando propiedades: *"Eran cotos de poder y el obispo comienza a consentir varias corruptelas. En ese tiempo Nicolás era maestro en el Seresure* (Seminario Regional del Sureste) *y Norberto lo clausuró. Hay dos motivos: unos dicen que fue porque se descubrió que en el seminario había practicas homosexuales, y otros que lo cerró para combatir a los teólogos de la liberación".*
Fue cuando Norberto Rivera "acomoda" a su gente desempleada tras el cierre del seminario: *"Ya en 1986-87, luego de que a Nicolás lo golpearan los dos muchachos en Cuacnopalan, Puebla, se ventilaron sus problemas. Diez años después vienen las denuncias de los 60 niños de la Sierra Negra que acudieron a Norberto y éste les dice que lo perdonen".*

Pero el cardenal Rivera ¿ya no era obispo de Tehuacán?
No, pero seguía teniendo todo el poder. De hecho estaba de interino Teodoro Lima. Nicolás regresó en el interinato, por más de un año no tuvimos obispo.

Norberto se exculpa diciendo que a él lo nombran arzobispo de México en 1995. Toma posesión de su cargo en la ciudad de México el 26 de julio de 1995...
Si, pero siempre hay un tiempo que se les da para que asuman los cargos. Pese a que ya no era obispo, él seguía manejando todo en Tehuacán. De hecho cuando Nicolás regresa huyendo de Los Angeles se reintegra y Norberto nunca lo suspendió como sacerdote, incluso sigue dentro.

Es decir, ¿sabía el cardenal de los abusos sexuales cometidos por Nicolás?
Claro. Tan es así que presiona a las madres de los cuatro menores que interpusieron la demanda para que no atacaran a Nicolás, argumentando que "el padre está enfermo". La pregunta es que si el cardenal está admitiendo que su sacerdote está enfermo, es obvio que él sabe de su peligrosidad. ¿Cómo no lo retiró del ministerio? ¿Cómo no lo recluyó?

Los Angeles: 26 víctimas
El camino devastador del párroco se complica tras violar a 26 niños en Los Angeles. En 1989 huye de Estados Unidos hacia México. Es cuando se le recluye en la clínica para protegerlo y tras unos meses es restituido en su ministerio y de nuevo se le coloca a cargo de los monaguillos. En 1995 viola a Joaquín Aguilar. Después se traslada nuevamente a Tehuacán. Allí se hace cargo de la preparación de la primera comunión de los niños pese a sus crímenes.
Trabajaba en la parroquia de la Virgen de Juquilita y en la iglesia de San Vicente Ferrer,

en San Nicolás Tetitzintla de Tehuacán, Puebla, donde era responsable de la relación con monaguillos y de los niños que ayudaban en las distintas actividades pastorales. Unos 60 niños entre cinco y 13 años, que vivían en las colonias populares Viveros, Aeropuerto, La Huizachera, Aviación y Emiliano Zapata iniciaron su preparación de primera comunión.
Sergio Sánchez Merino, de 12 años, formaba parte del grupo a cargo de Nicolás Aguilar, quien impartía clases de catecismo: *"Él venía los domingos, a dar misa. La iglesia era de madera y lamina. Las clases eran en su casa, que estaba a cinco minutos de la capilla. Tras la misa nos íbamos todos caminando hasta su casa. Nos acomodaba en unas bancas que puso en el patio".*
La voz de Sergio se entrecorta; empieza a recordar: *"Yo veía que él, al final de cada clase, siempre decía a un niño que se quedara para 'hacerle la prueba'; el resto nos íbamos. Hasta que un día me tocó: 'Oye, quiero que te quedes', me dijo, 'para hacerte unas preguntas y ver si estás aprendiendo'".*
El joven suspira. Guarda silencio unos segundos y prosigue: *"No podía desconfiar de él porque era el padre. Yo estaba en la banca y me dijo: 'Métete por aquí', señalándome la puerta de su casa. Entré y él cerró la puerta con llave. Me acuerdo que en la tele estaba pasando un partido de básquetbol. Me preguntó si yo hacía algún deporte y otras cosas que no venían al caso. Lo empecé a notar medio raro porque se me quedaba viendo mucho. Estaba parado viendo la tele y en eso se me paró enfrente. Yo me espanté*.
"Recuerdo perfectamente cómo era el lugar. Tenía una cama, un espejo y otros pocos muebles. Me agarró de los brazos y me contó una historia sobre un tumor que supuestamente tenía en el estómago. Me agarró muy fuerte las manos y me las puso a su alrededor, pidiéndome que le tocara el tumor. Luego se desabrochó el pantalón y puso mis manos en su pene... Yo sentí mucho miedo, no sabía qué hacer."
Sergio repite: *"Es un trauma, un trauma, un trauma. Yo era un niño aterrorizado"*.
Continúa: *"En ese momento me dijo: '¿Quieres morirte? ¿Quieres que se muera tu mamá? ¿Verdad que no? Pues entonces hazme así'. Me puso su pene en la boca. Y se vino"*.
Nicolás se dio cuenta de que era tarde y estaba oscureciendo. Le preguntó si existía la posibilidad de que algún familiar lo viniera a buscar. Sergio asintió, por lo que rápidamente se subió el pantalón y decidió llevar al niño a su casa. En el camino le advirtió: *"'Más te vale que te quedes callado y no digas nada de lo que hemos hecho porque se trata de un secreto'*. Yo estaba muy asustado y más cuando empezó a hablar con mi mamá: *"Señora le dijo Nicolás por qué no deja que su hijo se venga a dormir esta noche a mi casa. Préstemelo, mañana temprano se lo traigo".*
La madre de Sergio se negó: *"Estoy seguro de que si hubiera a dormir con él me habría penetrado como a los otros niños. Yo sabía que muchos ya se habían quedado a dormir con él. Seguramente su plan era violarme esa tarde, pero como se le pasó el tiempo manoseándome y se hizo tarde, le dio miedo que me fueran a buscar a su casa. Por suerte mi mamá no me dejó ir"*.
Sergio no contó nada a su madre, pero se lo confió a su amigo Joaquín, quien a su vez le confesó que a él le había hecho lo mismo: *"Pero más feo. A mí me penetró"*, le dijo. Ambos niños decidieron abandonar sus casas y huir sin rumbo.
"Queríamos escaparnos, irnos, para que ya no nos siguiera molestando. Conseguimos 50 pesos, agarramos un poco de ropa y nos fuimos. Así anduvimos varios días. Nos fuimos hasta la terminal de autobuses de Puebla y en la noche dormíamos en las sillas. Las dos familias nos andaban buscando y fueron a preguntar a otro amigo, que les contó que él también había sido violado por el padre Nicolás. Y les dijo: 'Por eso se fueron, porque a ellos les hizo lo mismo'."
La noticia de los abusos sexuales contra los niños corrió como la pólvora. Las familias de los 60 niños se movilizaron para ayudar a encontrar a los dos niños desaparecidos. La multitud enardecida fue a buscar a Nicolás a su casa con la intención de lincharlo, pero

fue advertido por las autoridades y pudo escapar.
Sólo cuatro familias de los niños acudieron al Ministerio Público para presentar una denuncia; el resto prefirió ir a la diócesis para hablar con los superiores de Nicolás: *"Los obispos* (Rivera Carrera y Lima) *los convencieron de guardar silencio sobre lo sucedido. Dicen que les dieron mucho dinero, por eso nunca movieron nada".*
El proceso 6/1998 duró cuatro años y el párroco fue sentenciado a un año de prisión por "ataques al pudor". Sin embargo, nunca pisó la cárcel, ya que mantuvo su libertad bajo fianza. En 2001 la justicia le concedió un amparo para dejar sin efecto dicha condena. Finalmente, hace tres años, el ayuntamiento de Tlalmanalco de Velásquez, estado de México, le entregó una carta oficial por "buena conducta".
Los juicios contra el párroco son claro ejemplo de la impunidad en México y de la protección de los superiores eclesiásticos. El cura Nicolás Aguilar demandó por difamación a Joaquín Aguilar, el niño a quien violó en 1995. El 20 de diciembre de ese año, la justicia le envía un citatorio a la dirección que el mismo presbítero registró ante las autoridades. Vivía en la calle General José Morán 52, en la colonia San Miguel Chapultepec, donde está la segunda vicaría del arzobispado de México. El proceso de Joaquín contra Nicolás duró siete años y finalmente fue sobreseído por prescripción de los hechos.
"Todo fue una mentira dice decepcionado Joaquín Aguilar, en el juzgado perdieron el expediente cuatro veces. Perdieron las pruebas que presentamos contra él. Querían que nos cansáramos. Al final, cuando supimos que era la Iglesia la que pagaba los abogados del cura, yo mismo dije a mis papás que lo dejáramos. No encontré justicia en México, por eso me fui a la Corte Superior de California para intentar conseguir la justicia que se me ha negado en mi país", dijo en entrevista antes de irse a vivir a Estados Unidos.
Joaquín ha dejado recientemente el Distrito Federal debido a las amenazas que han recibido él y su familia. Luego de que la Secretaría de Gobernación prohibió a sus abogados estadunidenses la entrada a México durante los próximos cinco años, el joven se sintió en completa indefensión y decidió dejar su país.
El proceso de *"los niños de la Sierra Negra"* muestra también cómo el Poder Judicial ha preferido proteger a los curas pederastas en lugar de a las víctimas. El expediente de los niños de la Sierra Negra, al que ha tenido acceso esta periodista, tiene el número 34/97/DRZS/TH-2 y fue remitido el 8 de enero de 1998 al juzgado primero de lo penal de Tehuacán, Puebla, por Rodolfo Igor Archundia Sierra, de la localidad poblana de Tepexi Rodríguez. Un mes antes había iniciado la averiguación la agente del Ministerio Público Irma Leonor Ramírez Galicia.

"Me dijo que yo le gustaba"

En su declaración del 27 de noviembre de 1997, el niño Joaquín Rodríguez González, de 12 años y estudiante de primero de secundaria, declaró que conocía al padre Nicolás desde hacía seis meses. Explicó que acudía a su casa ubicada en la avenida Peñafiel, colonia Aeropuerto, para recibir "las pláticas de la doctrina", que eran los sábados a las 18 horas: *"La primera vez llegamos unos 50, después aumentamos, pero últimamente ya íbamos como 10, ya que el padre Nicolás a todos los jóvenes que íbamos nos obligaba a hacer cosas. A mí como al mes siguiente del día en que empecé a ir a las pláticas me empezó a abrazar y a acariciar, ya que después de las pláticas me decía que me quedara. Como yo iba solo, también me quedaba solo y me pasaba a su casa, ya que las pláticas eran en el patio y me llevaba a su recámara, y la primera vez me dijo que yo le gustaba y me empezó a acariciar metiéndome las manos debajo de la camisa. Yo le dije que qué le pasaba, que por qué hacía eso, y él me dijo que porque yo le gustaba. Me dijo que no le dijera a nadie, porque si no iba yo a ver lo que me iba a pasar. Después de esto me fui a mi casa y no le conté a nadie. Seguí yendo a las pláticas porque soy coordinador, pero al siguiente sábado, después de la reunión,*

nuevamente me dijo que me quedara. Siendo como las 8 de la noche, en esa ocasión tuve relaciones sexuales con él, ya que primero me llevó a su recámara... me quitó el pantalón y el se empezó a quitar toda su ropa hasta que quedó completamente desnudo y yo me quedé únicamente con mi camisa. Me obligó a que mi pene se lo metiera a él en la cola, y lo que él hacía era que se ponía enfrente de mí y se agachaba y yo quedaba parado atrás de él y después así era como yo le metía mi pene y él se movía para adelante y para atrás y así estábamos durante bastante tiempo, hasta que él se cansaba me dejaba. Después de esto me dijo que me vistiera y me fuera, pero que no le dijera a nadie. Esto ocurrió varias veces, máximo un mes, pero yo no le decía a nadie porque me daba miedo que le hiciera algo a mi familia y la última vez que me obligó a hacerlo fue hace como tres meses, por esto yo dejé de ir a las pláticas a su casa y después empecé a ir a la capilla de la colonia Aviación...y el día 16 de noviembre del año en curso, después de las pláticas, el padre llegó a la capilla y dijo que si alguno de nosotros hablaba mal de él se la iba a ver con él y por miedo a que me pasara lo mismo me fui a Puebla a la casa de mi tía Guadalupe con uno de mis amigos, que se llama Sergio".

El patrón de conducta del cura pederasta era el mismo. Se ganaba la confianza de los padres de los niños y luego se acercaba cada vez más a los menores. La declaración de Felipe Valladares Rivera, de 14 años, es reveladora. El menor cuenta el 27 de noviembre de 1997 cómo el padre Nicolás lo subió a su coche y allí empezó los abusos sexuales: *"En el camino, como íbamos en el coche únicamente él y yo, me empezó a acariciar la pierna izquierda y yo le dije 'ora, qué, padre', y me arrimé hacia la puerta, pero él me dijo que le gustaban mucho los niños, después llegamos a la capilla de la colonia Viveros"*.

Felipe cuenta que pasaron unos meses cuando el padre fue a su casa para pedirle permiso a su madre que se quedara a dormir en su casa. Cuando llegaron hasta allí, se dio cuenta de que también tenía a los hermanos Efrén y Guadalupe Alva Cortez: *"El padre nos dijo: 'ustedes se acuestan en el colchón', ya que tiene un colchón en un cuarto de su casa, que es donde se duermen los niños con él. El se fue a su recámara, donde se fue a desvestir, quedándose únicamente en trusa; después llegó y nos dijo que si nosotros no acostumbrábamos a quitarnos la ropa para dormir, porque en su pueblo ellos sí acostumbraban. Le contesté que no, y nos acostamos en el colchón Efrén, Guadalupe y yo; diciéndonos: 'mientras me voy a dormir con ustedes', se acostó con nosotros y se acostó junto a mí del lado derecho y después de un buen rato me empezó a acariciar, primero mi pecho, pero yo no dije nada, para ver hasta dónde llegaba, y me empezó a tocar en mi parte masculina, después me agarró la mano derecha e hizo que la metiera dentro de su trusa para que le tocara el pene, pero yo saqué mi mano y la volvió a meter. Creo que pensó que estaba yo dormido y me besó en la boca, por eso en ese momento me levanté y le dije 'voy al baño' y no dije nada, porque en ese momento pensé en vengarme y me pasé del otro lado cuando regresé del baño, y quedó el padre junto al niño chico Efrén Alva Cortez. Durante toda la noche a mí ya no me hizo nada y pensé que a Efrén no le iba a hacer nada, pero el otro día también me contó lo que le había hecho"*.

Todas las víctimas de la Sierra Negra del padre Nicolás Aguilar eran extremadamente pobres. En las actas consta cómo las madres de los pequeños no saben leer ni escribir y ubican su residencia en colonias marginadas de la zona. En la declaración de Efrén Alva Cortez, de 11 años, el 27 de noviembre de 1997, coinciden los hechos con la versión de sus amigos: *"Escuché a Felipe que iba al baño y cuando regresó se acostó en medio y yo quedé en la orilla del lado del padre. De repente me empezó a acariciar y a tentar en mis brazos, después en mi estómago, después metió su mano en mi pene, ya que metió su mano adentro de mi trusa y me empezó a acariciar, y después me agarró la mano y me la metió en su trusa y luego yo la saqué y de nuevo la volvió a agarrar y se la volvió a meter en su trusa y agarrando mi mano hacía que yo acariciara su pene. Después que*

saca sus manos y me agarró mi cara y me volteó poniéndome de frente con él y me dijo: 'a mí me gustan mucho los niños', y metió su lengua en mi boca y yo me volteé y tiré la salvia y después quiso volver a meter su lengua en mi boca".

Han pasado nueve años de aquellos hechos. Los cuatro niños de la Sierra Negra intentan olvidar lo sucedido y seguir con sus vidas, luego de la frustración que vivieron.

Lo que más molesta a Sergio es el *"fingimiento"* de los obispos que ahora dicen no haber sabido nada de lo que hacía Nicolás: *"Fue escándalo, salimos en todos los periódicos, en la radio, en la televisión. Me entrevistaron muchas veces. Por eso me sorprende que ahora Rivera diga que no sabía nada. ¿Cómo?, si yo mismo hablé con él. Todavía me pregunto cómo pueden seguir protegiéndolo. Para ellos es un 'enfermo', pero para los demás es un criminal"*.

Sergio, Joaquín, Efrén y Felipe enfrentaron luego de la denuncia el escarnio social por haberse atrevido a denunciar penalmente a Nicolás: *"Ibamos por la calle y nos decían: "Allí vienen los violados por el padre"*. Todo eran burlas. En la escuela salía de pleito porque les pegaba a todos los que me hacían bromas. Me peleaba mucho. Así que me salí de la escuela, ni terminé la secundaria".

Las vidas de Joaquín, Efrén y Felipe se vieron igualmente dañadas: *"Mis compañeros acabaron mal porque se metieron a las drogas y algunos se hicieron alcohólicos. Cada uno es distinto, a algunos les afectó más que a otros, pero nos destruyó la vida. Yo recibí amenazas, así que mejor me desaparecí de allí"*.

Dice que en su pueblo hay muchos "*fanáticos católicos"* que insultaban a su familia: *"Incluso a la madre de uno de los cuatro la querían linchar por haber ido a la policía: "El padrecito es muy bueno, no como su hijo, que es de lo peor. Por andar de chismosa te vamos a linchar"*, le gritó una señora entre la multitud que fue a la salida del juzgado.

Sergio decidió irse a Estados Unidos en 2003. Antes de partir ratificó la denuncia en 2002 y el abogado que lo atendió le dijo que existía una sentencia sin cumplir, ya que Nicolás había logrado escapar gracias al aviso del mismo juez del caso, Carlos Ramírez: "Me dijo que todo estaba arreglado, que el sacerdote había sido condenado a pagarnos 40 mil pesos a cada uno, pero fueron puras mentiras. Nunca nos dieron nada. No teníamos ni abogado".

La vida les ofrece a las víctimas del padre Nicolás Aguilar una nueva oportunidad para hacer justicia. Sergio está decidido a presentarse ante la Corte Superior de California, el tribunal que admitió a trámite la denuncia contra el cardenal Rivera Carrera por conspiración a la pederastia, interpuesta el pasado 19 de septiembre.

El abogado Jeff Anderson irá interponiendo demandas individuales por cada una de las víctimas del padre Nicolás Aguilar. Las demandas serán contra los cardenales Rivera Carrera y Roger Mahony por haber protegido al sacerdote y contra el cura pederasta.

Sergio dice tener una nueva esperanza, luego de la impunidad que impera en México: *"Esto no puede quedar así. Tienen que castigarlos, tanto a él* (Nicolás Aguilar) *como al obispo Norberto Rivera por haberlo protegido"*.

La Iglesia ha sobrevivido al poder del tiempo (2000 años de mentiras los avalan) y al poder de la razón (más de 1000 millones de católicos resisten) pero se está encontrando con las cosas veredes del PODER JUDICIAL.

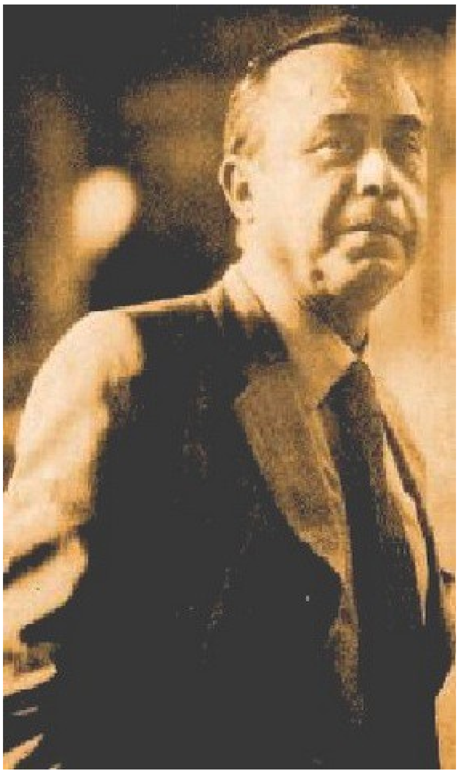
LEONARDO SCIASCIA O LA LUCIDEZ DESENGAÑADA



Y con respecto a amigos que no leen sus libros, aunque no parece que eso le amargara, el tono es desenvuelto y alegre; Proust cuenta su conversación telefónica con un amigo común, el duque de Albufera:
-*Querido Luis, ¿has leído mi libro?*
-*¿Tu libro? ¿has hecho tú un libro?*
-*Si, Luis, hasta te lo he mandado.*
-*Ah, mi pequeño Marcel, si me lo has mandado, seguro que lo he leído. Sólo que no estoy seguro de haberlo recibido.*

"El amor está en el tacto". Una verdad que sólo un genio puede revelar. (Y el genio, según Buffon, es *"una gran aptitud para la paciencia"*; la paciencia, por ejemplo, de esperar una revelación como ésta). Y tuve la siguiente idea filológica, borgiana: Buffon anota esta revelación; Balzac la convalida un siglo después; Gide un siglo después de Balzac; a mí me parece palmaria sesenta años después de que Gide la anotó en los *Feuillets*. Gide tenía entonces cuarenta y tres años. Yo tengo cincuenta y seis en el momento de conocerla. ¿Cuántos años tenía Buffon cuando la pensó, y cuántos Balzac cuando la citó en *Les Paysans*? En conclusión: ¿es ésta una verdad que –aun siendo palmaria desde un principio– puede revelársele a un hombre que ha superado lo que Góngora llama el *"climatérico lustro de la vida"?*

Ya es difícil encontrar un cretino que no sea inteligente y un inteligente que no sea cretino. Los inteligentes siempre han sido escasos, y nos embarga cierta melancolía y añoranza cada vez que nos topamos con cretinos adulterados, sofisticados. ¡Qué lejos están ahora los cretinos de otros tiempos! Genuinos, íntegros. Como el pan casero. Como el vino y el aceite de los campesinos.

La religión católica, ¿de orden privado? De orden social, señor, de orden social y·de autoridad"*, responde el católico.

Hola Gatopardo, acabo de borrar -por primera vez en los dos años que hace que soy "bloguera"- dos comentarios de quien ya sabemos, en los que desvelaba en mi bitácora datos personales que no son los tuyos, diciendo que eres tu. No lo permitiré, que amistad obliga. Una cosa es la libertad y otra el incurrir constantemente en delitos contra la intimidad y el honor de las personas.
Mañana me instalan ya los datos recuperados de mi antiguo ordenador, casi todos se han recuperado pero he perdido muchos y valiosos. Se confirma que fue un ataque cracker deliberado.
Bueno, respecto de Sciascia, leí hace tiempo el libro y muchas de sus citas me parecen las mismas que las de los presocráticos, pero dichas con otras palabras... El hecho es que nos es difícil separar lo que pensamos y decimos, de lo que hemos mamado e introyectado, y terminamos diciendo todos lo mismo sólo que adaptado a los tiempos que vivimos, que no en vano somos productos culturales. Eso sí, algunos cribamos de entre nuestras respectivas culturas, aquello que nos atenaza y esclaviza; aquello que nos "cretiniza y estupidiza" y lo desechamos, quedándonos con aquello que nos hace libres y nos permite crecer, en la medida que nuestra inteligencia y nuestro

discernimiento nos lo permiten. Sciascia, al parecer, gozó sobradamente de ambos rasgos.
Un entrañable abrazo

RESPUESTA DE DOÑA VIOLANTE AL "SONETO DE REPENTE ", DE LOPE DE VEGA

Violante, de Giorgio Vasari

SONETO DE REPENTE

Un soneto me manda hacer Violante,
que en mi vida me he visto en tanto aprieto;
catorce versos dicen que es soneto,
burla burlando van los tres delante.

Yo pensé que no hallara consonante
y estoy a la mitad de otro cuarteto,
mas si me veo en el primer terceto,
no hay cosa en los cuartetos que me espante.

Por el primer terceto voy entrando,
y parece que entré con pie derecho
pues fin con este verso le voy dando.

Ya estoy en el segundo y aun sospecho
que voy los trece versos acabando:
contad si son catorce y está hecho.

Lope de Vega

RESPUESTA DE DOÑA VIOLANTE A LOPE DE VEGA

No me eches tú, Lopillo, tanto morro,
no creas que me cumples mi deseo
hilvanando un soneto, pues bien veo
que hoy la pluma la llevas en el gorro.

No pienses que, con verte, yo me corro,
o que estimo un soneto un devaneo,
pues soy una mujer que pienso y leo;
no trates de engañarme hoy a lo zorro.

Ni pienses que, de cierto, soy Violante,
ni me hables de cuartetos y tercetos,
ni aún en dónde colocas cada acento;

sé bien que lo que cuenta, lo importante
es el decir, al fin, de modo escueto
un concepto, una flor, un sentimiento.

Pedís, Reina, un soneto, y os le hago:/
ya el primer verso y el segundo es hecho;/
si el tercero me sale de provecho,/
con otro más en un cuarteto acabo.//

Ya llego al quinto, ¡España! ¡Santiago,/
cierra! Y entro en el sexto: ¡Sus, buen pecho!/
Si del séptimo libro, gran derecho/
tengo a salir con vida de este trago.//

Ya tenemos a un cabo los cuartetos:/
¿Qué me decís, Señora? ¿No ando bravo?/
Mas sabe Dios si temo a los tercetos.//

¡Ay! Si con bien este soneto acabo,/
¡nunca en toda mi vida más sonetos!/
Mas de éste, gloria a Dios, he visto el cabo.

Soneto de Baldomero Fernández Moreno (1886-1950) «Epílogo al soneto de Violante».

CÓLERA DE VIOLANTE

Cuando Violante vio que en un segundo
Lope de Vega terminó el soneto,
miró al maestro, que sonrió, discreto,
y su pecho quedó meditabundo.

El pecho de Violante, un breve mundo
por un tajo partido en dos, direto,
casi escapó del regalado peto,
elástico como era y furibundo.

Porque ella no quería la acrobacia
de que dio muestras el de la perilla
y la guedeja montañesa y lacia.

Ella soñó el soneto maravilla,
el que hiciera inmortal toda su gracia
de ricahembra y marisabidilla.

Un maestro literario

Si Lope escribió a Violante
ese soneto con tanta premura
lo hizo así; con aquella frescura...
y a mi me parece impresionante;

que él, sin pretender ser un pedante
y sí, maestro en literatura,
para escribir con tanta finura,
soneto que merece que se cante

y si en dos cuartetos y dos tercetos
es capaz de escribir lo que él ha escrito
¿qué podría decirnos mas escueto?

y decir tanto solo en un ratito

como lo escrito en ese soneto;
¡un verdadero maestro! ¡repito!

En especies, no contante y sonante

Hecho está el soneto doña Violante
Espero que me pague mi trabajo
Dejando que le endiñe el badajo

Tanto por detrás como por delante

Pués bién, querida, aflójese el refajo
Y que su buén marido no se espante
Que lucir cuerno es muy elegante
Si comparte conmigo lo de abajo

Por su amor se me enciende e inflama
El sufrido preso de mi bragueta
Venga hermosa; túmbese ya en la cama!

Que no solo de pan vive el poeta
Y, además de la gloria y la fama,
Tambien precisa culo, coño y teta

Y para terminar, un pareado
Que entre tres puede ser " emparedado"

VIOLANTE Y LOPE DÁNDOLE A TOPE

Un soneto me manda hacer Violante
Yo acepto, mas le digo que primero
He de mojar mi pluma en su tintero
Para así poder seguir adelante

Yo mojo y remojo con esmero
Y mi pluma se humedece al instante
De blanca tinta espesa y chorreante
Que rebosa del cálido agujero

Vuelvo a mojar con aire decidido
Y tanto empeño pongo en el proyecto
Que de aquel curioso encargo me olvido

Y, viéndome la bella tan inquieto
Me reclama el soneto prometido
¿El soneto?, pregunto, ¿Qué soneto?

(¡ Y dale !)

Un poema pide una calentorra
Y el poeta no capta ni de lejos
Que ella le está tirando los tejos
E improvisa un poema ñoño y chorra

No pilla el muy garrulo los manejos
Que se trae la bella y noble zorra
Pués quiere que la monte y se corra
En su chocho y no sabios consejos

E improvisa, el muy lelo, una poesía
Muy ingeniosa, si, pero mas nada
Que la deja indiferente y muy fría

¡ Despierta y dale leche merengada

OTRA ENTREGA

Un soneto me manda hacer Violante
Y en mi vida me he visto en tal aprieto
Yo, que sueño con su coño prieto,
Me pongo a escribir mas que Dante

Y aunque no soy poeta escribo el soneto
Para ver si la bella petulante
Se me abre de patas al instante
Y mi cipote en sus entrañas meto

Una vez rematada la poesía
Le pregunto empalmado como un mulo:
"¿Para que la quiere usted vida mía?"

Y sonriendo con falso disimulo
Contesta sin la menor cortesía:
" Para limpiarme mi hermoso culo"

¿Que si sufrí con la rima, me dices,
al perpetrar la suerte del soneto?
Te lo confieso, no es ningún secreto:
tal que el más lerdo de los aprendices.

Antes del tercer verso ya maldices
y aún no tienes un mísero cuarteto;
las palabras te pierden el respeto
y huyen, las muy hijas de... meretrices.

¿Pero acaso tiene algo de extraño
este penar, este desesperarte
ya en los versos nones como en los pares?

Ni te menosprecies ni sufras daño,
que a veces las rimas, más que arte,
son sólo simples juegos malabares.

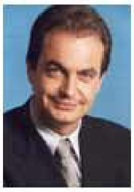
EL GOBIERNO DE RODRÍGUEZ ZAPATERO Y EL MERCADO INTERNACIONAL DE ARMAS

Quien lea los principales periódicos españoles o escuche los noticieros de radio y televisión sabrá que los temas de interés que nos preocupan y apasionan son las guerras intestinas entre los periodistas de los dos bloques ideológicos, que se han decantado por o contra el estatuto de autonomía de Andalucía y Cataluña, sobre la culpabilidad exclusiva de los islamistas en el atentado del 11 de marzo de 2004 o su complicidad con ETA, y sobre la legitimidad de que una emisora de la iglesia contrate a quien arremete con polvora del Rey contra todo lo que le encocora o la de desterrarlo a las islas Kandongas sin billete de vuelta. El resto, es decir, la mayoría de los programas de máxima audiencia y la prensa del colorín de mayor tirada, describe el frenesí de los amores y desvíos de unos famosos, que cobran por su intimidad y callan para subir su precio, y que mantienen a los ciudadanos en constante indignación, opinando sobre quienes no conocen pero les resultan más transparentes que su propia familia.
Cuando pretendemos obtener noticias de algún calado económico, político y diplomático, los cuatro gatos con intereses más que sospechosos, hemos de acudir a la prensa internacional para saber, por ejemplo, sobre el destino de las armas que convierten a España en la undécima potencia exportadora. Y hemos de leerlo en Red Voltaire que recoge los artículos de quienes jamás recibirán el placet de los grandes medios.
Transcribo el artículo de Armando Quiñones, Fuente: Canarias-semanal.com, recogido por Red Voltaire, por si alguien tuviera interés en conocer como se concreta en la práctica el famoso "talante" de Rodríguez Zapatero y del PSOE.

LAS PARADOJAS DE LA POLÍTICA EXTERIOR ESPAÑOLA.
El gobierno de Rodríguez Zapatero y el mercado internacional de armas
Desmontando el mito del presunto carácter «pacificador» del Ejecutivo de Zapatero. El pasado mes de noviembre, el gobierno español de Rodríguez Zapatero firmó con la monarquía marroquí un macro contrato valorado en más de 200 millones de euros, por el que España se compromete a suministrar a ese país vecino 1.200 blindados, 800 camiones militares y 10 patrulleras.
17 de febrero de 2007
Según Armando Quiñones, autor de este trabajo, la decisión del gobierno Zapatero de

rearmar a la monarquía alauita [marroquí] no solo introduce elementos gravísimos de inestabilidad que afectan al Archipiélago Canario, sino que rompe también las posibilidades de una solución pacifica del conflicto en el Sahara. Quiñones desmonta el mito de la política “pacificadora” de las relaciones exteriores del ejecutivo español, aportando datos y argumentos generalmente ignorados por los grandes medios de comunicación.



Rodríguez Zapatero, presidente del gobierno, conversa con los miembros del comando conjunto de las fuerzas armadas en el día del desfile militar en Madrid.

Muy pocas decisiones han proporcionado tanta rentabilidad política al ejecutivo de José Luis Rodríguez Zapatero como la retirada de las tropas españolas de Irak. Salir del atolladero irakí, al que la miopía aznarista había arrastrado a la política exterior española, no fue solamente una medida acertada.
Además, sintonizó con el deseo mayoritario de la sociedad, que había expresado tajantemente su rechazo a los criminales compromisos contraídos por el anterior gabinete derechista. A este gesto inicial se agregaría, meses después, una incierta propuesta de "Alianza de Civilizaciones", de cuyo contenido y objetivos nadie ha sabido dar razón. Aún así, tanto la retirada de las tropas como la propuesta "civilizatoria" posterior han proporcionado a la política exterior de Rodríguez Zapatero una aureola pacifista que, sin embargo, es absolutamente inmerecida.

En la senda de la OTAN
Con una música muy distinta a la que marcan los acordes de los discursos oficiales, el Gobierno de Zapatero no ha hecho otra cosa más que continuar la senda militarista que ya había emprendido el Partido Popular. En el año 2006, España se convirtió en el segundo país de la OCDE que más aumentó el presupuesto destinado a la investigación militar. Solo la belicosa administración norteamericana del presidente Bush superó a la española en este rubro.
Aunque a algunos ingenuos exegetas de la política exterior "pacifista" del PSOE pueda sorprenderles, lo cierto es que los 23.000 millones de euros de gastos militares previstos para 2007 constituyen la mayor cifra registrada en los últimos años. Traducido al Román paladino: casi el 15% del presupuesto del Estado español se dedica a gastos militares. Unos 58,10 millones de euros diarios. O expresado de manera más elocuente: el equivalente a la suma total de los gastos de los ministerios de Trabajo, Asuntos Sociales, Educación y Cultura, Agricultura, Pesca y Alimentación y Medio Ambiente.

Las misiones «humanitarias»
Durante el 2006 se multiplicaron también -hasta alcanzar la decena - el número de países en los que intervienen las tropas españolas. En la actualidad, España participa en diez de las llamadas "misiones humanitarias", cuyo supuesto carácter neutral es más que discutible. La mayoría de ellas, aunque lleven el sello de las Naciones Unidas,

coinciden al milímetro con los intereses de la política exterior norteamericana. Y no podía ser de otra manera. Los Estados Unidos dominan el foro en el que se decide el lugar donde, "humanitariamente", hay que enviar tropas y cañones.
La beatífica imagen de la labor que realizan las tropas españolas que se ha logrado transmitir a la sociedad es, sin duda, un éxito mediático, pero también una rotunda ficción. Lo es en Afganistán donde, al igual que en Irak, los norteamericanos han impuesto un gobierno títere a su servicio. Continúa siéndolo en la isla caribeña de Haití, donde la misión humanitaria en la que participa el gobierno español fue precedida por la descarada intervención de las tropas norteamericanas; lo fue en Somalia, en Yugoslavia etc. Para lograr el éxito de tales operaciones se juega, pues, con dos componentes: el mediático y el militar.

Fuente foto: Ejército de Tierra, España

En las etapas previas a la operación los mass medias se encargan de fabricar la imagen del conflicto que se ha producido o se va a producir. Los "buenos" y los "malos" son presentados de acuerdo con el papel que les corresponde, en función de los intereses de quienes, posteriormente, van a dejar sentir su "humanitaria" intervención. A veces no es precisa siquiera esa maniquea división. Un "todos son malos" puede justificar también la intervención de las tropas salvadoras. En realidad, no se trata de una técnica nueva.
El imperialismo francés y británico la utilizó a lo largo de todo el siglo XIX y principios del XX. Gracias a ella construyeron su imperio e impusieron su influencia en el mundo.
La que sí es nueva es la coartada con la que se encubre la auténtica finalidad de este tipo de operaciones. Las invasiones "a secas" están hoy mal vistas y su justificación no resulta tan sencilla.
La época en la que las cañoneras cercaban Japón o imponían a los chinos el tráfico de opio ha quedado atrás, aunque en "casos acuciantes" o con enemigos especialmente rebeldes pueda ser necesario dar marcha atrás a la rueda de la historia. Irak fue la última muestra de ello.
En cualquier caso, aunque los nuevos tiempos requieran nuevas formas los objetivos finales de dominación no son tan diferentes. Felipe González lo expresó con claridad hace unos años - siendo ya ex presidente - en el club de prensa del rotativo "La Provincia" en Gran Canaria. "Si Europa quiere dejar sentir su peso en el mundo debe disponer de destacamentos militares capaces de desplazarse a cualquier parte del planeta a prestar ayuda allí donde sea necesario". Entre sus oyentes se encontraban dos futuros militantes de su partido en Canarias, que terminarían convirtiéndose en dirigentes del mismo: José Miguel Pérez y Arcadio Díaz Tejera.
Ambos supieron coger recortes de la contundente admonición del patriarca. El primero, convirtiéndose en el teórico insular del "gran proyecto africano" que las multinacionales europeas y norteamericanas preparan para nuestro vecino continente. El segundo, a

modo de precoz Adelantado, organizando viajes de políticos y empresarios, ávidos de negocios fáciles, al Sáhara ocupado.

Fuente foto: Ejército de Tierra, España

Con estos antecedentes, pues, a nadie le debe sorprender que el pasado 30 de diciembre de 2006 el Ministerio de Defensa presentara al Consejo de Ministros una propuesta sobre la posibilidad de suprimir el actual límite de 3.000 militares para misiones en el exterior. La iniciativa ministerial trata de adecuar las posibilidades de actuación del Estado español a los nuevos "compromisos" internacionales adquiridos. Y es que, para un futuro muy cercano, está previsto que España participe en dos proyectos cruciales de las potencias hegemónicas del planeta: los destacamentos de la UE y la nueva Fuerza de Reacción Rápida de la OTAN. Aunque el cometido agresivo de estas iniciativas militares parece obvio, no siempre ese carácter está claro para una buena parte de los ciudadanos.

España, undécima exportadora mundial de armamentos.
Pero, además de prepararse militarmente para intervenir en aquellos lugares en los que puedan encontrarse en juego sus intereses y los de sus socios, España se ha convertido en el curso de los últimos años en la undécima potencia exportadora de armamento del planeta. Mientras no se escatiman datos ni espacios para publicitar las cifras que puedan poner de relieve los éxitos económicos, científicos o incluso deportivos del país, este lamentable ranking es sometido a sordina y se hurta al conocimiento publico.
En este capítulo, nuestros principales clientes no se encuentran, naturalmente, en el llamado "primer mundo" sino entre aquellos países a los que luego intentaremos rescatar con nuestras "misiones civilizatorias y humanitarias". España es hoy el primer proveedor de munición de los países del África subsahariana, donde las ventas de esta mortal mercancía alcanzan los 1,2 millones de euros, casi el doble de lo que vende a Francia y el triple de lo que vende a los EEUU.
La presunta política exterior "pacificadora" del gobierno del PSOE no ha puesto tampoco objeciones a la exportación de las denominadas "bombas de racimo". Estos artilugios de la muerte, condenados internacionalmente por las organizaciones humanitarias, proyectan su carga mortal en centenares de pequeños explosivos, convirtiendo a las poblaciones civiles en sus principales víctimas.
Las cifras de nuestras exportaciones de armas no han hecho más que crecer en los últimos años. Si en el año 2.000 exportábamos por valor de 138 millones de euros, en el 2005 - última anualidad de la que se disponen de datos- casi cuadruplicamos las cifras, alcanzando los 420 millones de euros. Una vez más, la paradoja se manifiesta cuando se analiza la política exterior del PSOE. Durante el gobierno derechista de Aznar las partidas de armamento que se exportaban eran considerablemente inferiores a las actuales. Y ello, a pesar de que el gobierno que preside José Luís Rodríguez Zapatero fue elegido, precisamente, gracias a la voluntad de paz de sus electores.

La ocupación marroquí del Sáhara: del apoyo político al militar
Pero si hasta ahora existían datos suficientes para calificar a la política exterior del PSOE como engañosa, las noticias que se agregan estos últimos días proporcionan motivos para considerarla también como peligrosa. Hoy, casi dos meses después, los medios de comunicación nos han puesto al corriente de que el pasado noviembre, con un sigilo propio de las operaciones inconfesables, el gobierno de Rodríguez Zapatero firmó con Marruecos un macro contrato por valor de más de doscientos millones de euros, por el cual España se compromete a transferir a este país norteafricano 1.200 blindados, 800 camiones militares y 10 patrulleras.
La envergadura económica de esta operación carece de precedentes. Equivale, de manera aproximada, a la mitad de las exportaciones realizadas por España en el curso del último año. No forma parte, desde luego, de las transacciones normales que se realizan en este orden. Sus implicaciones no son sólo económicas sino también políticas. Con el acto de la firma de este macro contrato España ha asumido, implícitamente, la responsabilidad de rearmar al ejército de la monarquía alauita.
En la geopolítica del noroeste africano hay dos factores que no deberían obviarse en la política exterior española:
- 1º) El carácter claramente expansionista de una monarquía con evidentes características semifeudales. Es sabido que la monarquía alauita y algunas de las organizaciones políticas que le prestan apoyo, ha considerado históricamente como parte de su hinterland al Sahara que hoy ocupa ilegítimamente, a Mauritania y al Archipiélago Canario.
- y 2º) El noroeste africano está sometido en la actualidad a un alto el fuego acordado en 1990, entre la potencia beneficiaria del macro contrato -Marruecos- y el Frente POLISARIO. España es uno de los países garantes del cumplimiento de los acuerdos de las Naciones Unidas, según los cuales se consagra el derecho del pueblo saharaui a ejercer su autodeterminación a través de un referéndum.
La decisión española de rearmar al ejército de la monarquía marroquí introduce elementos gravísimos de inestabilidad en la zona, que no solo comprometen el ejercicio de la soberanía por parte del pueblo saharaui, sino que abren un abanico de peligrosísimas posibilidades para el futuro del Archipiélago canario.
Posiblemente los planes que la UE y los EEUU tienen reservados para África no estén ausentes en la decisión del ejecutivo de Zapatero. Las implicaciones de esos planes y sus repercusiones sobre el Archipiélago canario serán tratadas en una segunda entrega de este trabajo.

Perturbadora, por decir lo menos, resulta la información que presentas y con demasiadas aristas como para poder hacer un comentario breve sobre la misma.

Pero diré lo siguiente. No tengo armas y no deseo tener una. Me opongo al armamentismo.

Pero no estoy convencido de que me gustaría vivir en un mundo sin armas.

El problema no está en votar o no votar, ni es optar por un ejercito simbólico y neutral o un ejercito profesional y prepararse para secundar políticas agresivas, sino en una ciudadanía ajena a los datos reales, a su control y su conocimiento, cegada por los slogans y los prejuicios ideológicos, y, desde luego, en aquel viejo aserto de los situacionistas que denunciaban los imperativos de una economía basada en el provecho a corto plazo aunque a la larga sea su ruina. Porque contribuir a armar a Marruecos, que mantiene sus reivindicaciones contra el pueblo saharahui, contra las ciudades españolas en África y contra las Islas Canarias es una necedad difícilmente comprensible, y más cuando nuestra pertenencia a la OTAN tiene una cláusula que nos deja sin su amparo precisamente en las zonas mencionadas.

CORRUPCIÓN Y SALUD: PROBLEMAS EN EL MERCADO DE LOS MEDICAMENTOS

Capítulo del Informe global de la corrupción en España, de Transparencia Internacional (pdf)

Manuel Martín García y Marciano Sánchez Bayle (Federación de Asociaciones para la Defensa de la Sanidad Pública)

El gasto farmacéutico público tiene una importancia trascendental para nuestro sistema sanitario. En el año 2003 supuso el 30% del gasto total del Sistema Nacional de Salud, con un incremento del 12% con respecto al del año anterior. Su crecimiento anual, siempre por encima de los dos dígitos, ha hecho que pasara en diez años de 5.124 millones de euros a los 11.463, lo que supone un crecimiento del 53,3%. Aunque el problema del gasto en medicamentos es común a la mayor parte de los servicios sanitarios europeos, en España adquiere una mayor trascendencia como puede verse si comparamos nuestro porcentaje de PIB destinado a gasto farmacéutico público (1,2%) con la media de los 15 países occidentales de la UE (0.9%), es decir un 25% superior. Sin embargo dedicamos un 14% menos a la sanidad pública y un 66% menos a investigación. De seguir esta progresión, y dado que los prepuestos sanitarios crecen en torno al 6-7% anual, en el breve plazo de 3-4 años el prepuesto de farmacia podría equipararse al capítulo de personal y al gasto corriente en la mayoría de los servicios de salud autonómicos, lo que haría inviable económicamente al sistema.

La industria farmacéutica realiza importantes esfuerzos para promocionar sus productos, destinando a esta actividad imponentes cantidades económicas que llegan a suponer entre el 25-40% del coste del fármaco. Esta actividad está destinada a influenciar las decisiones de los médicos del sistema sanitario público que son los responsables de las prescripciones mediante recetas y los que deciden los fármacos que se adquieren y utilizan en los hospitales (jefes de servicio, responsables de compras y miembros de las comisiones de farmacia hospitalaria).

Gestión irracional que induce a pensar en utilización fraudulenta en los procesos de adquisición de fármacos por los hospitales

El mercado farmacéutico español es muy importante, ocupa el 7º lugar y está en continuo crecimiento, por encima del experimentado por el PIB. Este mercado tiene una serie de características singulares, que benefician a los laboratorios farmacéuticos.

1. Es un mercado intervenido: La comercialización y financiación de los nuevos medicamentos debe ser autorizada por el Ministerio de Sanidad que es quien fija los precios mediante negociaciones con la industria.
2. Existe una gran concentración de laboratorios, la mayoría de ellos multinacionales, que buscan disminuir la competencia mediante fusiones y absorciones que es hace más poderos y eliminan rivalidad.
3. Estos laboratorios realizan importantes esfuerzos para comercializar sus productos mediante técnicas de marketing publicidad muy agresivas dirigidas teóricamente a informar sobre nuevos fármacos pero que en realidad están destinadas a influenciar la voluntad de los prescriptores mediante regalos, invitaciones a viajes y comidas, visitas directas los mismos, subvenciones a congresos, etc.
4. Los laboratorios destinan a esta actividad un importante volumen de recursos (entre el 25 y el 40% de sus ganancias superando incluso el gasto que destinan a investigación).
Los destinatarios de estas actividades son los médicos de atención primaria y de los hospitales, que tienen una gran capacidad de influencia sobre os anteriores a través de las prescripciones realizadas en consultas externas. Sin embargo, salvo en dos hospitales, no existen normativas internas que regulen las relaciones con los represententes de los laboratorios ni se evidencian esfuerzos por parte de la administración para controlar estas prácticas o para contrarrestar la influencia con información objetiva.
5. Los concurrencia de competencia es escasa ya que los fármacos están protegidos por las leyes de propiedad intelectual.
Los genéricos, fármacos mucho más baratos que los similares de marca que tienen caducada su patentes, tiene un uso poco generalizado, como consecuencia de la anterior legislación sobre patentes en la solo eran patentables los procedimientos de tipo químico para preparar los medicamentos lo que estimuló y facilitó la proliferación de copias y retrasó la introducción de los genéricos.
6. La legislación sobre medicamentos se incumple sistemáticamente como en el caso de la prohibición de bonificaciones que hace que los grandes laboratorios saquen al mercado y bonifiquen la venta de genéricos por debajo del coste de producción para evitar la consolidación de una industria de genéricos competitiva.
7. Cada año se sacan nuevos fármacos similares a los existentes, que no aportan ninguna ventaja o que incluso no existe evidencia científicamente fundamentada sobre su eficacia terapéutica, pero que tienen un precio mucho más elevado. Estos fármacos pasan a ser financiados por el sistema público e incorporadas a los centros hospitalarios sin criterios fundamentados. El ultimo año se incorporaron 778 nuevas especialidades farmacéuticas a sistema en 1,172 formatos diferentes. Sin embargo el propio Ministerio de Sanidad que los autorizó y financió analizó que sólo el 17,5% de los mismos suponían una novedad terapéutica relevante mientras el 75% no apartaban apenas ninguna.

CASOS CONCRETOS:

1. Análisis del gasto farmacéutico hospitalario en Galicia: Informe Consello de Contas de Galicia 14 de Julio 2004

El incremento anual del gasto farmacéutico hospitalario fue del 14,8%, frente a un a 4,8 % del crecimiento total del gasto hospitalario. Algo a tener muy en cuenta dado que el gasto farmacéutico supone el 11% del total hospitalario. El crecimiento del gasto

sanitario del Servicio Gallego de Salud fue del 5,6%, lo que supone que el gasto de farmacia los superó en un 62,1%.
Existen variaciones muy importantes en este crecimiento en los diferentes hospitales, en el año analizado que oscilan entre un crecimiento negativo del – 10,8% hasta un + 62,1 %, que ponen de manifiesto diferencias muy significativas en la evolución del gasto, y que suponen una notable variabilidad no justificable por criterios epidemilógicos o de mayor demanda asistencial (las estancias hospitalarias se incrementaron en un 0,8% con una variación en los diferentes hospitales entre un -8% y un + 10%).
Este gasto supera en un 12% al presupuesto previsto en año analizado, condicionando un déficit presupuestario para el conjunto de hospitales de 27%.

Factores responsables de esta situación:

a) Procesos de selección poco rigurosos influenciados por los laboratorios farmacéuticos.
En el proceso de selección, compra y prescripción de fármacos por los hospitales intervienen distintos elementos, como son los Servicios de Farmacia Hospitalaria, los jefes de los servicios clínicos y los facultativos prescriptores.
Para garantizar una selección eficiente y racional de medicamentos a utilizar, cada hospital debe contar con una serie de instrumentos como la Comisión de Farmacia y Terapéutica, las Guías Farmacoterapéuticas que regulan y ordenar la prescripción en el centro, Sistema de Evaluación de la utilización de medicamentos y Protocolos terapéuticos.
En los hospitales de Galicia se han detectado importantes variaciones en las Guía Farmecoterapéuticas (en cuanto a principios activos a utilizar o formas de presentación de los mismos), no explicables por las características de cada centro. Esto demuestra diferencias en el rigor utilizado para la selección de fármacos y el poder de influencia de los laboratorios farmacéuticos sobre los responsables de definir los fármacos de la Guía.
En muchos hospitales de Galicia se autoriza un importante volumen de fármacos no recogidos en las Guías. Como las **(1)** desviándose hacia otros más costosos aunque de similares características, este fenómeno está también probablemente relacionado con la influencia de los laboratorios sobre las decisiones de los jefes de servicio o la prescripción de facultativos.
Las prescripciones realizadas desde las consultas externas del hospital no se atienen a guías básicas, pese a la importante influencia sobre que tienen pobre el gasto por recetas extrahospitalario. Las dispensaciones por estas recetas tienen una escasa coincidencia con las adquisiciones realizadas por los centros hospitalarios (19,5% de concordancia, no concuerdan en el 80,55 oscilando entre el 63,8 y el 93,7%).

b) Deficiencias en las Comisiones de farmacia Hospitalaria.

Solamente el 25% de los hospitales tienen Comisiones de Farmacia con normas específicas, que se realicen sesiones periódicamente o incuso se hayan constituido. Lo más habitual es que estos instrumentos de control no funciones adecuadamente en los hospitales, lo que tiene como consecuencia que en muchos casos las decisiones sobre inclusión de medicamentos se realizan sin aportar argumentos o que no se tengan en cuanta diferencias en precios para un mismo medicamento.

Gestión de la adquisición de fármacos por los hospitales

1. Se incumple sistemáticamente la Ley de Contratos de las Administraciones Públicas que exige que la adquisición de los fármacos se realice atendiendo a criterios de publicidad, concurrencia y no discriminación, como garantía para evitar el uso

fraudulento de los fondos públicos que favorezcan a determinados proveedores. En muchos casos lo pedidos de realzan directamente a los laboratorios sin mediar concursos ni valoraciones comparativas. Gran parte de estos fármacos son de precio más elevado pese a tener igual perfil terapéutico que otros similares. También ocurre que no hay reducciones de precio pese a adquirirse volúmenes elevados de esos productos.

2. Otras irregularidades relacionadas con las adquisiciones de medicamentos por los hospitales y que debería investigarse por si existieran connivencia y es gran parte de que los pedidos no esté documentados, ni tampoco como los criterios utilizados para realizarlos. También es común el que no exista albaranes de entrada de los productos ni quien se hace cargo de los mismos.

3. El volumen de genéricos adquiridos por los hospitales es apenas del 1,2% del total. Las diferenciasen los precios para un mismo producto llegan a ser del 34%.
Si analizamos los ahorros potenciales en los fármacos donde se da una mayor variación de precios las cifras son escandalosas: en 28 fármacos adquiridos por los hospitales los ahorros potenciales de podrían haber ascendidos a ascendieron **(1)** a 1.872.096 euros (310 millones de pesetas).

4. Las adquisiciones de los hospitales no son homogéneas, no responden a criterios racionales de elección y se concentran, curiosamente, en los productos más caros y en un reducido número de laboratorios (el 70% del mercado se lo reparten 20 laboratorios y los cinco más significativos consiguen el 33% del mismo). Las Comisiones de Farmacia de los Hospitales deberían decidir las compras teniendo en cuenta las características terapéuticas de los fármacos, sin embargo se ha detectado que algunos centros disponen de sistemas informáticos de gestión de compras regalados por los laboratorios a los que adquieren medicamentos.

2. Las Bonificaciones de los medicamentos

En España esta en vigor un sistema de precios de referencia que permite la sustitución por los farmacéuticos de los medicamentos prescritos por los médicos en el caso de que no tengan existencias por otro del mismo grupo. Este sistema de sustitución ha generado un gran mercado de “ofertas” de medicamentos a las oficinas de farmacia por el que estas reciben bonificaciones de medicamentos “gratis” por cada numero de envases que compren a los laboratorios fabricantes o a las distribuidoras comerciales, dándose casos de bonificaciones que van desde un envase por 10, hasta 1 por 1.
El volumen de ventas que es objeto de estas bonificaciones se ha calculado en cerca del 30% del volumen total de ventas, lo que significa que una cantidad de 683.000 € anuales sobre el gasto de 2001. Como el PVP esta fijado por el Ministerio de Sanidad y Consumo, la venta de estos medicamentos obtenidos como bonificaciones no puede realizarse a un precio distinto del oficial, con lo que los márgenes de beneficio en estos casos se colocan en el 100%, lo que supone una vulneración de los márgenes de las oficinas de farmacia que también están fijados reglamentariamente al ser las oficinas de farmacia un sector que funciona fuera del mercado.
La denuncia publica de estos hechos genero una gran polémica sin que el Ministerio de Sanidad ni las Comunidades Autónomas que tienen la facultad sancionadora actuaran al respecto manteniéndose en una ambigüedad hasta ahora no despejada. Posteriormente el Código de Buenas Practicas de Farmaindustria (la patronal farmacéutica) señalo a esta practica como ilegal, llegando a imponerse una sanción a una de las empresas farmacéuticas que la utiliza, y en Cataluña, recientemente se ha corroborado por los tribunales de Justicia la sanción impuesta por la Generalitat a un farmacéutico por la

utilización de estas practicas. Sin embargo el Plan Estratégico de Política Farmacéutica para el SNS aprobado por el Ministerio de Sanidad en diciembre de 2004, no aborda este problema.

3. Las exportaciones paralelas
Los precios de los medicamentos en España, como en la mayoría de los países de la Unión Europea están fijados por el Gobierno, lo que hace que sean netamente inferiores a los de muchos países de la UE. Este hecho propicia las llamadas "exportaciones paralelas" que consisten en la venta en países de la UE que tienen precios mayores de los medicamentos comercializados en España, con la obtención de elevados beneficios por el diferencial de los precios, sistema este que es usado por algunas distribuidoras y que produce en ocasiones situaciones de falta de abastecimiento. Este hecho es el que ha generado que alguna de las multinacionales que se sienten perjudicadas por esta practica se planteen la distribución directa de sus fármacos a las oficinas de farmacia.

Aunque parezca contra intuitivo, estoy convencido de que ne materia de propiedad intelectual debe incrementarse el periodo de protección de patente para los medicamentos para incrementar la competencia y bajar los precios.

Al existir periodos de protección más amplios para las patentes se amplía tambien el plazo para recuperar lo invertido en investigación y desarrollo del medicamento.

Hoy día no solamente hay menos laboratorios, también son menos los productos que desarrollan pues solo pueden apostar al desarrollo delos productos que prometen ser "grandes ganadores" y evitan desarrolar productos de los que no puedan recuperar la inversión durante el periodo de protección de la patente.

En un ambiente de mayor protección de patentes y por ende de menos riesgo, sería previsible el ingreso de mayor numero de participantes en la industria de desarrollo de fármacos.

Los pequeños laboratorios no se verían forzados a ser solamente fabricantes de genércios o a vender sus desarrollos a las multinacionales capaces de enfrentar los costes de llevar el producto al mercado si hubiera una legislación mas generosa en materia de patentes para medicamentos.

Amigo Ramón: Quisiera obtener más información sobre la linea que apuntas en tu comentario, que me parece muy sensata, (cosa que no es garantía de que lo sea).
Cuento con una enciclopédica ignorancia en este terreno, como en otros, y podría ser víctima de prejuicios que me llevan a considerar que las medidas de garantía que se exigen sólo son handicaps para los laboratorios farmacéuticos pequeños, y no para los grandes.
¿Me puedes ayudar a desasnarme?
Gracias por ser tan sagaz y tan poco previsible en tus reflexiones.

Eso que dice Ramón está muy bien, pero ocurre que la experiencia ha demostrado que no es buena solución. La industria es liberal y lo primero que hace es aprovecharse al máximo de la situación, utilizando la bajada de costos para aumentar la plusvalía de la patente.
La investigación en España es algo baja, pero no tanto como las estadísticas nos demuestran. Las universidades, paralelamente, hacen un gran servicio de investigación no cuantificado en los presupuestos y cobrado como servicios a la industria, lo que no sé es si esta es farmacéutica u otra.
Los laboratorios invierten millonadas en productos de los que puedan sacar rendimiento, por tanto, en medicamentos para el primer mundo. Para los del tercer mundo lo dejan al aire como buenos empresarios que son.
Preguntemos el por qué no han desarrollado antes una medicación contra la diabetes, sabiendo tanto como se sabe de ella.
¿Tal vez es porque no sale a cuenta perder la millonada que representa la producción de insulina?
Preguntemos por qué se abandona la producción de un medicamento barato, se cambia nombre y excipiente, y se vuelve a comercializar con un precio muy elevado.
Y preguntemos el por qué en Cuba, la soriasis y el colesterol están erradicados gracias a medicamentos que no podemos utilizar el resto de los mortales.
¿Es que no sale a cuenta perder la cantidad ingente de dinero que representan las mil pomadas o pastillas de enfermo crónico que eso representa?
¿En manos de quienes dejaremos las patentes?
¿En estas?
Y un cuerno.

Pau,

Como liberal y optimista te puedo decir que una de las cosas que más preocuparía a la

industria farmacéutica es la ampliación de los plazos de patente.

Bajo el esquema actual, los riesgos innerentes al desarrollo de nuevos fármacos supone desalienta la entrada de nuevos jugadores a ese sector de la economía y el desarrollo de medicamentos que no garanticen un rápido retorno de la inversión en investigación y desarrollo.

Hay que crear un marco jurídico que favorezca la aparición de nuevos competidores en el mercado farmacéutico, particularmente en el desarrollo de nuevos productos.

Sobre la diabetes te diré que los laboratorios no han encontrado remedio a la diabetes por la misma razón que no lo han encontrado los investigadores Cubanos: el problema es muy dificil de resolver.

Sobre el cambio de formulaciones para aumentar el precio, supongo que se puede hacer por falta de competencia , que es precisamente lo que a mi me gustaría incrementar.

Quizás el haber erradicado la Soriasis en Cuba sea un gran mérito, pero a lo del Colesterol le encuentro explicación: allá no hay, entre otras muchas cosas McDonalds, el transporte público es tan malo que necesariamente la gente hace ejercicio pues tiene que caminar a todo sitio y la lista del racionamiento hace prácticamente imposible tener el colesterol alto.

Finalmente decir que lo que pagas fomentas y lo que dejas de pagar desalientas.

Yo no sé a que te dediques Pau, pero estoy seguro que si tu te dedicaras a desarrollar o a producir medicamentos te gustaría que te pagaran por ello.

Si queremos más y mejores medicamentos debemos crear condiciones para fomentar la competencia en el sector.

Nada tiene que ver mi trabajo con la producción de medicamentos.
Sé que hay dos corrientes de opinión en como tratar el problema de la industria farmacéutica, también sé que las soluciones que se procuraron a este problema no dieron resultado alguno, o en todo caso, el contrario al esperado. Soluciones preconizadas por las mismas farmaceuticas, claro.
Es posible que tengas razón, parece que conozcas mejor el mundo farmaceutico que yo. Lo que ocurre es que las empresas de las que depende la salud deben estar muy reguladas. Queremos que lo estén las clínicas, los centros de investigación, los hospitales... entonces, ¿cómo no van a ser reguladas las farmacéuticas?
Lo que sí es necesario es que un laboratorio pueda tener la suficiente plusvalía para salir rentable al financiero, de no ser así deberíamos financiarlos con fondos públicos, como hacemos con los hospitales o centros universitarios dedicados a la salud. Y eso tampoco debería ser tan grave ni escandaloso, creo que se hizo durante la dictadura y, por la entrada en la Unión, se tuvo que abandonar este procedimiento.
No... En Cuba el colesterol no se ha erradicado como tu piensas. La cocina popular cubana se basa mucho en el "porco" (cerdo) y el pollo. El primero ya sabemos de que

pie calza, el segundo sería bueno si no utilizasen la piel para nada, el problema es que la utilizan y mucho. De todos es sabido que la piel de pollo es colesterol puro.
Y sí, andan mucho, como en casi todo el mundo, como en la India, Paquistán, Marruecos, Senegal, Brasil, etc. Los que no andamos somos nosotros, habitantes del primer mundo.
Erré al decir que el colesterol estaba erradicado en Cuba. No lo está, pero lo controlan con medicamentos mil veces más sencillos y baratos que los nuestros, y con más éxito que nosotros.
No solo han controlado estas enfermedades, también tienen muy desarrollado la curación de muchas otras que aquí... nada de nada.
Es típico ver a norteamericanos ricos en las clínicas del interior de la isla, norteamericanos que llegan desde Canadá o México y a los que no les timbran su pasaporte.
¿Por qué no podemos disfrutar de sus avances?
¿Lo sabes?
Yo creo saberlo...
Las farmacéuticas norteamericanas disponen de un lobby que fuerza, como otros muchos, el que no se desarme el bloqueo a la isla.

Tres cosas hay en la vida: Salud, dinero y dinero.

Fecha: 19/02/2007 10:14.

Autor: Ramón Mier

Pau,

El sector de la salud está bastante regulado. Algunos piensan que demasiado y otros que muy poco. Tanto para universidades como para las empresas es muy difícil, tardado y costoso poder llevar al mercado sus productos por dada la regulación existente.

Estoy seguro que gran parte de esa regulación está en buena medida justificada. Sobre todo para proteger a los usuarios de efectos indeseables.

Sobre los medicamentos Cubanos y su falta de disponiblidad en el resto del mundo diré que el bloqueo explicaría la ausencia de los mismos en Estados Unidos pero no en el resto del mundo.

México, por ejemplo, no tiene bloque comercial contra Cuba. Aquí es posible adquirir todo tipo de productos de origen cubano. En México se pueden adquirir de cuba semillas (como la de la papaya o fruta bomba) habanos, cigarros, ron, ¡hasta grupos de danza para espectáculos de cabaret! Lo que gustes y mandes.

También es posible adquirir de cuba productos farmacéuticos. Entiendo que en México se importan productos biológicos como sueros y vacunas.

Lamentablemente los productos farmacéuticos están sujetos, como los de cualquier otro país a los requisitos de registro, comprobación de efectividad biológica, etc. Lo cual lleva tiempo y dinero.

Supongo que la situación debe ser similar en otros paises del mundo, como España.

Al igual que tu creo que debe promoverse la inversión pública en la ciencia médica. Creo que se debe apoyar la busqueda de soluciones a problemas de salud pública cuya rentablidad no sea atractiva para las empresas y cambiar el marco jurídico para que pudiera llegar a serlo. Forzar a los laboratorios a hacerlo con pérdidas es un despropósito. A nadie se le debe forzar a hacer algo contra su voluntad o sin una retribución que se acepte voluntariamente. Eso se llama esclavitud.

Eliminar patentes no garantiza la producción y el abasto de medicamentos. Te daré un ejemplo.

Yo soy sobreviviente de un piquete de alacrán (o escorpión).

El suero antialacránico que salvo mi vida está libre de patente. Sin embargo su disponiblidad está muy limitada y va en declive.

Ante la disminución de casos de picaduras al rededor del mundo por el uso de insecticidas y a que la población se ha movido de zonas rurales a urbanas, su producción ha dejado de ser viable económicamente.

Entiendo que ahora solamente se produce en México y en alguna nación Africana. El último laboratorio que lo producía en los Estados Unidos (en la universidad de Arizona me parece) cerró hace poco tiempo.

Los problemas de la salud y la industria farmacéutica son muy complejos. La solución simplista de culpar a las farmacéuticas y quitar patentes pudiera tener, como los medicamentos que no han sido suficientemente estudiados y probados efectos secundarios...

La leche!
No sé quien me ataca con tanta saña, puesto que se esconde bajo un disfraz carnavalesco.
Antes hubiese dicho que es la misma gata, pero bien poco hace que a un impresentable le zanjó el tema de manera cortante.
Por tanto...
Así y todo debe saber que mi menda abandonó hace ya tiempo el hábito de comer pétalos. Ahora, si lo hago, es por razones puramente degustadoras en restaurantes burgueses, en los que se ha puesto de moda festejar el paladar con flores frescas.
Que sepa también, que en caso de comerse mi pellejo traidoramente sabroso, necesitaría la ayuda de toda la comunidad farmacéutica, cubana o no, para desintoxicarse. Lo del colesterol sería como vulgar constipado ante la virulencia de semejante ataque tóxico-bacteriano.

Lo de Cuba es anecdótico y no demostrativo de simpatía alguna hacia un dictador determinado. Solo servía como ejemplo de lo que puede o no hacer la industria farmacéutica.
Negar mérito a los investigadores cubanos es tan necio como creer que por ello es bueno su régimen político.
Por mi parte dejo zanjada la discusión. Creo que Ramón Mier lleva razón en lo que dice, como que algo de razón también llevo yo.
Un cordialísimo saludo.

Sin embargo, lo que plantea el informe sobre la corrupción de transparencia internacional es el hecho de que el gasto farmacológico no se sostiene sobre criterios terapéuticos ni hay control ni protocolo que lo respalde. Tanto los beneficiarios de la seguridad social que pagan un 40% como los que no pagan nada por los medicamentos, tenemos, por ejemplo, una prescripción para tomar 3 pastillas al día durante una semana, y nos dan una caja de 40 pastillas, porque así las presentan los laboratorios. Y así con todo. Al cabo de dos o tres episodios veniales de enfermedad que tiene un ciudadano sano, su botiquín casero desborda de cajas mediadas, que acabarán caducando o en un contenedor de farmacia que recicle para una ONG. Si se trata de un enfermo crónico, los vaivenes en la prescripción de fármacos le hará propietario de una sucursal de farmacia.
No se trata de privar a los laboratorios de su legítimo beneficio, sino de solicitarles que empaqueten teniendo en cuenta las diferentes dosis, o que estuchen de dos en dos las

pastillas para que el farmacéutico pueda vender lo que el médico prescribe y no lo que el laboratorio empaquetador impone como dosis mínima.
Etc.
Tomo nota del debate sobre las patentes y periodos de carencia para documentarme.
Saludos cordiales

En Estados Unidos las farmacias venden empaquetados únicamente los productos de libre venta, es decir los que se venden sin prescripción médica.

El resto de los productos se vende conforme a la receta dada por el médico.

Las farmacias tienen el producto al granel y lo colocan en frascos conforme a las instrucciones del médico.

En México sucede lo mismo que en España.

El sistema que utilizan los americanos no está libre de problemas, pues los usuarios podían confundir sus medicamentos al ser servidos en frascos muy similares unos de otros y con etiquetas difíciles de leer. Además algunas personas los encontraban difíciles de abrir.

Sin embargo a ese problema también le han encontrado soluciones. La empresa Target (competidora de Wal-mart) desarrollo un envase que yo encuentro genial y que puedes mirar en el siguiente vínculo:

http://www.msnbc.msn.com/id/7634269/

En ella se pone claramente el nombre del paciente, el nombre del medicamento, el número de unidades que lleva el recipiente y si habrá de surtirse nuevamente o no.

Además llevan en el cuello de la botella un anillo de colores que varian según el medicamento para hacer más facil la identificación y evitar confusiones.

Don Ramón:
En Estados Unidos, no se exige que el personal de farmacia que manipula y mete las pastillitas en los botes tenga cualificación profesional alguna.
El dispensario/farmacia no guarda ni un protocolo de seguridad ni cumple con condiciones tales como temperatura, grado de humedad, desinfección, etc, etc imprescindibles en el manejo de farmacos.
El tiempo de espera del paciente para recibir 20 grageas de amoxicilina viene a ser de 25-35 minutos, si no hay cola.

El sistema de etiquetado, habra visto usted que no resiste la manipulación ni la humedad (la goma de la etiqueta sí, pero no la tinta del letrero). Esto es particularmente peligroso en el caso de pacientes con vista defectuosa.
El sistema de apertura es apto para un mapache hábil o un ratero de bus, pero una pesadilla para: ancianos, enfermos de artrosis, parkinson, etc.
Los códigos de colores son muy vistosos siempre que el paciente no sea daltónico o invidente (No se han enterado aún de la etiquetas Braille).
En las farmacias de Estados Unidos, en cambio, se vende al buen tuntún pastillas de cafeína, parches de nicotina o laxantes sin advertir al comprador de los graves efectos secundarios que pueden acarrear.
El bote no viene acompañado de un prospecto donde se detalle composición, posología y contraindicaciones, aparte del no beba, no fume y conduzca con cuidado, que es lo mismo que dice el manual de mi taladradora.

LA NOSTALGIA YA NO ES LO QUE ERA...

Nuestro webmaster, Roberto Abizanda, ha trabajado jornadas maratonianas dignas de mejor causa por culpa de la avería.
Y total, para fastidiarnos el merecido descanso a los que tenemos una bitácora en Blogia. En este fin de semana seguirá dándose un tute para que funcionen correctamente.

Blogia informa:

Información sobre la avería en blogia.com (Febrero 2007)

15 de febrero 2007 - 7:40

Necesitamos más tiempo. La copia es lenta, pero pronto se podrán ir viendo algunas páginas.

14 febrero 2007 - 22:00

¡Ya tenemos nuevo servidor! A ver si la próxima noticia es ya la última... Dadnos unas horas.

14 de febrero 2007 - 17:37

Nos han dicho que en 3 horas la tendremos activada. Esta noche recuperaremos los blogs y mañana por la mañana debería estar todo funcionando normalmente.

Desde este momento y hasta mañana por la mañana permanecerá desactivado el envío de emails (aviso de nuevos comentarios y recordar contraseña).

Y estas maravillas del diseño gráfico son para endulzar la espera. Y de paso para confirmar que el gusto estético está normalmente ausente de los que perpetran portadas de libros, revistas, páginas web, carátulas de discos, aquejados de un delirante horror vacui.

Muchísimas gracias por la información. Lo que no entiendo es como no nos la proporcionan los de Blogia.
En cuanto al diseño, se confirma una vez mas que "potosó" no lo hace todo.
Lo bueno de esto es que así ponemos en practica EL ARTE DE PLATICAR del artículo anterior que debería ser impartido en las escuelas. Y muchas gracias por tus visitas a equinoXio y a mi bitácora y tus palabras

DEL ARTE DE PLATICAR

Así pues, las contradicciones en el juzgar ni me ofenden ni me alteran; me despiertan sólo y ejercitan. Huimos la contradicción, en vez de acogerla y mostrarnos a ella de buen grado, principalmente cuando viene, del conversar y no del regentar. En las oposiciones a nuestras miras no consideramos si aquéllas son justas, sino que a tuertas o a derechas buscamos la manera de refutarlas: en lugar de tender los brazos afilamos las uñas. Yo soportaría el ser duramente contradicho por mis amigos el oír, por, ejemplo: «Eres un tonto; estas soñando.» Gusto, entre los, hombres bien educados, de que cada cual se exprese valientemente, de que las palabras vayan donde va el pensamiento: nos precisa fortificar el oído y endurecerlo contra esa blandura del ceremonioso son de las palabras. Me placen la sociedad y familiaridad viriles y robustas, una amistad que se alaba del vigor y rudeza de su comercio, como el amor de las mordeduras y sangrientos arañazos. No es ya suficientemente vigorosa y generosa cuando la querella está ausente, cuando dominan la civilidad y la exquisitez, cuando se teme el choque, y sus maneras no son espontáneas: *Neque enim disputari, sine reprehensione potes 1)*
Cuando se me contraría, mi atención despierta, no mi cólera; yo me adelanto hacia quien me contradice, siempre y cuando que me instruya: la causa de la verdad debiera ser común a uno y otro contrincante. ¿Qué contestará el objetado? La pasión de la cólera obscureció ya su juicio: el desorden apoderose de él antes que la razón. Sería conveniente que se hicieran apuestas sobre el triunfo en nuestras disputas; que hubiera una marca material de nuestras pérdidas, a fin de que las recordáramos, y de que por ejemplo mi criado pudiera decirme: «El año pasado os costó cien escudos en veinte ocasiones distintas el haber sido ignorante y porfiado.» Yo festejo y acaricio la verdad cualquiera que sea la mano en que la divise. Y en tanto que con arrogante tono conmigo no se procede, o por modo imperioso y magistral, me regocija el ser reprendido y me acomodo a los que no acusan, más bien por motivos de cortesía que de enmienda, gustando de gratificar y alimentar la libertad de los advertimientos con la facilidad de ceder, aun a mis propias expensas.

Difícil es, sin embargo, atraer a esta costumbre a los hombres de mi tiempo, quienes no tienen el valor de corregir, porque carecen de fuerzas suficientes para sufrir el ser ellos corregidos a su vez; y hablan además con disimulo en presencia los unos de los otros. Experimento yo placer tan intenso al ser juzgado y conocido, que llegar a parecerme como indiferente la manera cómo lo sea. Mi fantasía se contradice a sí misma con frecuencia tanta, que me es igual que cualquiera otro la corrija, principalmente porque no doy a su reprensión sino la autoridad que quiero: pero me incomodo con quien se mantiene tan poco transigente, como alguno que conozco, que lamenta su advertencia cuando no es creído, y toma a injuria el no ser obedecido. Lo de que Sócrates acogiera siempre sonriendo las contradicciones que se presentaban a sus razonamientos puede decirse que de su propia fuerza dependía, pues habiendo de caer la ventaja de su lado aceptábalas como materia de nueva victoria. Mas nosotros vemos, por el contrario, que nada hay que trueque en suspicaz nuestro sentimiento como la idea de preeminencia y el desdén del adversario. La razón nos dice que más bien al débil corresponde el aceptar de buen gana las oposiciones que le enderezan y mejoran. De mejor grado busco yo la frecuentación de los que me amonestan que la de los que me temen. Es un placer insípido y perjudicial el tener que habérnoslas con gentes que nos admiran y hacen lugar. Antístenes ordenó a sus hijos «que no agradecieran nunca las alabanzas de ningún hombre». Yo me siento mucho más orgulloso de la victoria que sobre mí mismo alcanzo cuando en el ardor del combate me inclino bajo la fuerza del raciocinio de mi adversario, que de la victoria ganada sobre él por su flojedad. En fin, yo recibo y apruebo toda suerte de toques cuando vienen derechos, por débiles que sean, pero no puedo soportar los que se suministran a expensas de la buena crianza. Poco me importa la materia sobre que se discute, y todas las opiniones las admito: la idea victoriosa

también me es casi indiferente. Durante todo un día cuestionaré yo sosegadamente si la dirección del debate se mantiene ordenada. No es tanto la sutileza ni la fuerza lo que solicito como el orden; el orden que se ve todos los días en los altercados de los gañanes y de los mancebos de comercio, jamás entre nosotros. Si se apartan del camino derecho, es en falta de modales, achaque en que nosotros no incurrimos, mas el tumulto y la impaciencia no les desvían de su tema, el cual sigue su curso. Si se previenen unos a otros, si no se esperan, se entienden al menos. Para mí se contesta siempre bien si se responde a lo que digo; mas cuando la disputa se trastorna y alborota, abandono la cosa y me sujeto sólo a la forma con indiscreción y con despecho, lanzándome en una manera de debatir testaruda, maliciosa e imperiosa, de la cual luego me avergüenzo. Es imposible tratar de buena fe con un tonto; no es solamente mi discernimiento lo que se corrompe en la mano de un dueño tan impetuoso, también mi conciencia le acompaña.

Nuestros altercados debieran prohibirse y castigarse como cualesquiera otros crímenes verbales: ¿qué vicio no despiertan y no amontonan, constantemente regidos y gobernados por la cólera? Entramos en enemistad primeramente contra las razones y luego contra los hombres. No aprendemos a disputar sino para contradecir, y cada cual contradiciéndose y viéndose contradicho, acontece que el fruto del cuestionar no es otro que la pérdida y aniquilamiento de la verdad. Así Platón en su República prohíbe este ejercicio a los espíritus ineptos y mal nacidos. ¿A qué viene colocaros en camino de buscar lo que es con quien no adopta paso ni continente adecuados para ello? No se infiere daño alguno a la materia que se discute cuando se la abandona para ver el medio como ha de tratarse, y no digo de una manera escolástica y con ayuda del arte, sino con los medios naturales que procura un entendimiento sano. ¿Cuál será el fin a que se llegue, yendo el uno hacia el oriente y hacia el occidente el otro? Pierden así la mira principal y la ponen de lado con el barullo de los incidentes: al cabo de una hora de tormenta, no saben lo que buscan; el uno está bajo, el otro alto y el otro de lado. Quién choca con una palabra o con un símil; quién no se hace ya cargo de las razones que se le oponen, tan impelido se ve por la carrera que tomó, y piensa en continuarla, no en seguiros a vosotros; otros, reconociéndose flojos de ijares, lo temen todo, todo lo rechazan, mezclan desde los comienzos y confúndenlo todo, o bien en lo más recio del debate se incomodan y se callan por ignorancia despechada, afectando un menosprecio orgulloso, o torpemente una modesta huida de contención: siempre que su actitud produzca efecto, nada le importa lo demás; otros cuentan sus palabras y las pesan como razones; hay quien no se sirve sino de la resistencia ventajosa de su voz y pulmones, otro concluye contra los principios que sentara; quién os ensordece con digresiones e inútiles prolegómenos; quién se arma de puras injurias, buscando una querella fratricida para librarse de la conversación y sociedad de un espíritu que asedia el suyo. Este último nada ve en la razón, pero os pone cerco, ayudado por la cerrazón dialéctica de sus cláusulas y con el apoyo de las fórmulas de su arte.

ESTAMOS TENIENDO PROBLEMAS EN BLOGIA.COM

AVISO DE BLOGIA.COM

Información sobre la avería (Febrero 2007)

13 febrero 2007 - 13:02

Seguimos a la espera. Hemos insistido para que nos sirvan la máquina antes, pero nos remiten a las 72 horas (de las que ya se han cumplido 48).

12 febrero 2007 - 9:48

Estamos a la espera del nuevo servidor.

11 febrero 2007 - 21:40

Aunque la mayoría de blogs no se han visto afectados directamente, el funcionamiento de algunas partes del sistema estaba en el servidor averiado. Es el caso de los comentarios o el diseño de algunas plantillas. Avisaremos cuando esté solucionado.

Actualizado 22:07: Ya funcionan los comentarios.

11 febrero 2007 - 21:24

Ayer por la mañana (hora española) se produjo un fallo en el disco duro de uno de los servidores de Blogia que provocó su caída. Se intentó su reactivación en varias ocasiones, sin éxito.

Hemos contratado otro servidor para que sustituya a este, para el cual nos han dado un plazo de puesta en marcha de 72 horas.

También estamos intentando desde ayer recuperar la información del disco duro averiado. Está muy dañado. En todo caso pensamos que podremos recuperar con la copia de seguridad los contenidos de mínimo hasta hace 9 días, pero casi seguro que estarán incluídos los nuevos artículos y comentarios hasta el viernes.
BLOGIA.COM

10 febrero 2007 -22.07

Nuestro webmaster lo arreglará, seguro...

... pero mientras, paciencia: no deja poner comentarios, no deja editar, de pronto salen letreros en idiomas exóticos...
Y los paranoicos, tranquilos, no es una poderosa confabulación contra nadie. Es que de vez en cuando las cosas se escarallan...

HANNAH O LA ÉTICA A ULTRANZA

Que conste que, como todos mis amigos, Hannah suele estar en desacuerdo conmigo, cosa que le honra y me divierte, porque no hay cosa que lleve peor que privarme de una buena polémica.
Cuando se trata de ética, no obstante, solemos llegar a similares conclusiones, y como ella lo explica perfectamente, os ruego que vayais a su blog para leer "Anatomía de una dolorosa desilusión " y así me evito plagiar sus razones, que confirmo.

De nada, ya sabéis que me gusta ser útil.

Permíteme dos comentarios. Tú empezaste la polémica y elegiste las armas, así que yo también las utilizo. Todo este lío se originó por la falta de ética de Acumán y mía propia que entraba en contradicción con tu honestidad. Pues nada, copio a continuación, faltando a la caballerosidad, parte de mensajes que me enviaste en los que no me queda muy claro qué quieres decir. A ver si los lectores sí:
"Según la doctrina jesuítica que admiro, dentro de las coqueterías admisibles si queremos ser eficientes y lograr fines muy concretos, debemos dejar los escrúpulos de conciencia que podamos subvencionar de nuestro bolsillo. Bienvenidas sean las pelas de origen sospechoso si se detinan al bienestar de alguien ajeno. Si fuera en beneficio propio estoy segura de que nos acarrearía desgracia, pero mientras sea para los demás, si hubiera que un buen plan para atracar un banco, participaría.
Así es que espero que tu nariz torcida y tu cara de crío, y tus delirantes planes altruistas los seduzcan, y quieran financiar casas de acogida, escuelas, microcréditos, asilos, y todo lo que se te ocurra. Gatopardo a Miguel Ángel Carcelén, 21/12/2006.
Qué feo está revelar conversaciones con damas, pero más feo está no sustentar con hechos que los fines no justifican los medios. Otra perla más de Gatopardo:
"Ese víbora –refiriéndose a García Nieto, de la Fundación Dosmilnueve, de Zaragoza, por quien le pregunté- está encantado de conocerse, pero debió de ver posibilidades en tu sonrisa oriental cuando escuchas melonadas, adquirida en el ejercicio apostólico, y antes o después, te encarga que seas su negro para hacerle una autobiografía en que quede su retrato alicatado hasta el techo.
Tiene dinero negro para invertir: y en Nigeria, Colombia, Mozambique, no son racistas con el color del dinero."Gatopardo a Miguel Ángel Carcelén.
Pues estos mensajes y otros de parecido tenor eran los que desde el principio me hicieron sospechar que algo no cuadraba. ¿Podrías explicarnos a todos qué querías decir exactamente? Si fuera necesario demostrar la autenticidad de esto no tengo inconveniente en hacer un volcado de pantalla. Faltaría más, ya sabes que a mí también me gusta mucho ser útil.
Un beso

Soy un poco pesado, pero en justa correspondencia al interés que tienes en que tus lectores conozcan el artículo de Carmen, yo no puedo por menos que no privarles de mi escueto comentario. Si vais al blog de Carmen no lo leáis, que es el mismo:
Con intención de ser breve y ánimo de ofender:
- el tema del artículo: me dijiste por teléfono que sólo un tonto o un enfermo, como era el caso de Gatopardo, a la que le suponías un claro trastorno bipolar según te indicaban la muchas conversaciones telefónicas tenidas con ella a lo largo de estos meses, podía tomarse en serio ese escrito. Queda muy bonito alabar en público a Gatopardo o a quien sea y luego ponerlo de vuelta y media en privado, queda muy bien pedir en un blog que no se meta nadie con ella y luego comentarme a mí que es una persona dañina donde las haya con un trastorno psiquiátrico importante, que por eso se pone tan nerviosa cuando le sacan el tema de los manicomios, por espigar alguna de las muchas perlas con las que la obsequiaste. Pero esto es una cortina de humo, claro, para esconder que a día de hoy sigue siendo un tonto o un enfermo quien se crea que las hermanas Koplowitz se van a preocupar de sobornar a Publicaciones Acumán, mundialmente conocida; en cualquier caso, es respetable tu decisión de no estar de acuerdo con ese escrito, aunque eso no convierte a Acumán, creo, en una panda de corruptos;
- mientes al decir que me mostré reticente al enviarte un contrato, sólo hace unos días me solicitaste un contrato y hasta el número de pie que calza todo quien tenga relación con Acumán. Te recuerdo que sólo me hablaste de un papel para Hacienda en el que Acumán dejara bien claro que tú habías cedido tus derechos de autor y no recibirías ningún dinero por la publicación del libro. Siempre te dije que te lo enviaría pero, por supuesto, cuando ya todo estuviera bien atado, que no ha sido el caso. También adelanto que no es que tú prohíbas a Acumán que publique tu libro, sino que antes de que tú renunciaras, te comuniqué por escrito y así se pude ver en las fechas de los correos, que era Acumán quien decidía no publicar nada tuyo a la vista de tus exigencias. Me exigías y me dabas un plazo de una semana para que rectificara mi artículo y te facilitara esa serie de datos que expones si queríamos seguir con la publicación. Pues mira qué fácil fue, como te dije que no iba a rectificar lo evidente, ya no fueron necesarios más datos. En tu exhaustiva investigación –ya me temo que hiciste el mismo cursillo que el espía que surgió del frío, de quien me aseguraste que era la misma Gatopardo y que ella te había reconocido en más de una ocasión que a veces escribía en su blog con otros seudónimos- metes por medio a Maná, cuyos proyectos y actividades pueden verse en esta página (http://ong-mana.info/). Acumán hace años que no tiene nada que ver con Maná, el año pasado les editó un cuento de la colección Solidaricuentos únicamente, financiada por el Ayuntamiento de Albacete, que no se dio cuenta de que Acumán es una estafa, pero ya de paso echas un poquito de mierda sobre una ONG de reconocida solvencia –a la que no pertenezco, quizá sea por eso- diciendo que has hablado con el interventor (¿de dónde?) y te ha dicho que Maná no presenta justificantes del dinero recibido. Pues están tontos varios organismos oficiales (Diputación Provincial de Albacete, Junta de Comunidades, Ayuntamientos...) que nada más que este año les han concedido 262757.16 euros, unos cuantos milloncetes, vamos, todos los detalles los podéis ver en este enlace (http://ong-mana.info/proyectos). Les regalan millones y los de Maná no presentan justificantes, y así llevan once años, ¡qué cara más dura!, y los organismos públicos, año tras año, haciendo la vista gorda y dándoles más subvenciones, ¡así va España! Yo mañana voy a hablar con el Ayuntamiento de Albacete para aclarar este punto, y llamaré también a la Diputación y me acercaré a la Delegación de la Junta, que pilla al lado de mi casa, para decirles que los de Maná los están estafando. Si no fuera así, me parece que tendrás

que dar una explicación de ese infundio del interventor, porque ya me va dejando de hacer gracia los que jugáis a detectives y abogados de secano en estos inventos de los blogs. Antes de mediodía de mañana tendré todos los datos, y esos sí me interesa que los conozcas;
- ¿en qué lugar de la página de Acumán figura como marca registrada? Indícamelo porque yo no la encuentro, ¿no la habrás confundido con el copyright?; ¡ah!
- el ISBN, te copio este enlace aparte de la legislación que en privado te he recomendado que consultes (http://www.isbn-international.org/esp/preguntas.html); ¿tú crees que podemos llevar tantos años publicando –más de 40 títulos- y nadie nos ha llamado la atención por la arbitrariedad al colocar o no ISBN? Algún truco habrá; te dejo que lo investigues y así te sigas ejercitando;
- tienes razón en otra cosa que no hacía falta investigar porque la pone en cuarenta sitios de la web, que en la cuenta de Acumán figuro yo, o para ser más exactos, la cuenta de Acumán es mi cuenta, por una razón muy sencilla y mafiosa que, pecando de inmodestia, te voy a revelar: más del 70% de los ingresos de Acumán proceden de los premios literarios que gano y de los derechos de autor y reprográficos de mis libros publicados en distintas editoriales (EDAF, Huerga y Fierro, Ediciones del Oeste, A la luz del candil, etc...). Puedes pasearte por internet para ver si eso es cierto.
Cuando hay que hacer transferencias a los proyectos a mí no me cobran en el Santander comisión y es tontería que yo cree una cuenta para tener que traspasar allí MI dinero, el que dono a Acumán, y de esa otra cuenta traspasarla a la de la ONG que se tercie. Porque eso de que a las ONGs no les cobran comisión es un cuento chino. ¿Que no es habitual que el presidente sea el titular de la cuenta? Pues seguramente no, pero nos ahorramos las comisiones;
- otra mentira tuya: Acumán no emite facturas. Pues las copias que tenemos en la carpeta deben ser ectoplasmáticas. Ahora mismo estoy viendo una factura al Ayuntamiento de Casas Ibáñez (Albacete) por valor de 300 euros, por ejemplo; otra factura al Centro de la Mujer de Toledo por valor de 800 euros, y suma y sigue. Puedes, en tu intensa investigación llamar allí a ver si Acumán emite facturas o rayos ultravioleta;
- colofón final: las únicas prácticas mafiosas que ves, dices, son las de Acumán y su director. ¿Dónde está la mafia?, ¿dónde está el engaño? He puesto a tu disposición y pongo a disposición de todo el que lo quiera ver los ingresos que hemos ido haciendo a lo largo de los años a distintas ONGs, por mayor valor del que figura en la página web. Eso creo que es lo importante, que ni un duro está sin justificar, que en la Avenida de Francia, 10, portal 1, 3º A, de Toledo, donde yo vivo, hay una carpeta con multitud de ingresos bancarios a nombre mío, de mi mujer, de algún colaborador o de Acumán (aunque no exista) a distintas ONGs o proyectos particulares, como fue el del año pasado en Tolima (Colombia). Que ningún autor de los que ha publicado con nosotros ha puesto un duro para esa publicación, que es totalmente falso que tú nos hayas dado dinero para la publicación de ese libro;
- epílogo que un hombre juicioso no debería jamás escribir: ¿cuánto dinero crees que íbamos a obtener con la publicación de tu libro? En el mejor de los casos mil euros, y currándonoslo bien, ¿Y quién te crees que iba a poner el dinero para su publicación?, si tiene dinero Acumán, Acumán, y si no saldría de mi sueldo como funcionario del Estado, que para eso la cuenta de Acumán es mi cuenta. Soy yo quien paga las ediciones de los libros y quien se arriesga a perder el dinero, porque si el libro no da beneficios yo no exijo a Acumán que me lo devuelva, como fue el caso de Gatopardo, pongo por caso, que iba a vender miles de libros y hubo cientos de peticiones, la mitad de las cuales todavía no hemos cobrado, a día de hoy Acumán ha ganado con el libro Relatos de Gatopardo 6,20 euros, no es broma, y gracias a que el seguro nos indemnizó por los libros que se malograron en una inundación (http://miguelangelcarcelen.blogia.com/2006/102001-muy-breve.php), que si no el

libro Relatos de Gatopardo arrojaría un déficit de 324 euros. Porque no lo hemos sabido vender , por supuesto, el que haya autores que sin tener una de las quince bitácoras más leídas a nivel mundial hayan vendido en Acumán más de 5000 ejemplares (Oraciones del corazón, de César Rodríguez) es casualidad, o a lo mejor es porque además quien nos encarga ese libro luego lo paga. Ya aprovecho para hacer propaganda y decir lo que tú no les has dicho a tus lectores, que Acumán no cobra jamás por adelantado un libro, jamás. Que quien lo quiere lo encarga, se lo enviamos y luego ingresa el dinero en la cuenta de Acumán, que es la mía, ya convinimos en eso. Pero los únicos que no han entendido esa dinámica y han dejado de pagar los libros han sido los lectores de Gatopardo, tales como (qué feo está esto de dar nombres de morosos) Rubén Arguisjuelas, Estefanía Montero, Ricardo Méndez, etc.
- Carmen, tal y como me dijiste y tienes escrito en mi blog (http://miguelangelcarcelen.blogia.com), si hay delito lo que se debe hacer es denunciarlo a la justicia, no airearlo en estos foros. Pues ¿a qué esperas?, si tantas pruebas tienes de que Acumán y yo somos una mafia corrupta y tus lectores te secundan compadeciendo a cuantos han sido timados, estás en la obligación moral de denunciar a Acumán y a mí mismo. Por cierto, ¿por qué ninguno de los cuarenta autores publicados por Acumán ha tenido jamás ninguna queja? Buscad en internet a ver quién habla mal de Acumán y a quién le debe dinero Acumán o yo mismo, ¿no es eso sospechoso? Carmen, hay muchas formas de hacer las cosas sin saltarse la ley ni la moralidad, y si la de Acumán, dentro de eso, no coincide con la que a ti te gustaría, pues te buscas otra editorial y santas pascuas, ¿para qué echar mierda? Y en lo referente a tu moralidad y buena intención tampoco debería explayarme, pero buena intención habría sido no hacerle perder a una correctora más de cinco horas revisando tu texto, ni una hora a un diseñador gráfico de portadas, ni otro tanto a un maquetador. Toda esta requiloria, como te dije, la podías haber solicitado antes de enviarnos el trabajo. Te recuerdo que te ofreciste tú, Acumán no te buscó. Nos has hecho perder mucho tiempo y hay una lista de autores larga pendientes de publicación, ansiosos de ser estafados por Acumán. Eso sí es inmoral, claro que si el blogger del que hablas que te aconsejó fue la del trastorno bipolar ya me lo explico todo, la que reclama ética y luego no tiene reparos en cometer un delito (porque violar la privacidad de otra persona es delito, como meterse en su cuenta de correo, en su blog, etc...), que fue lo que hizo Gatopardo con el mío sospechando que yo también tengo trastorno bipolar y hago como ella. Todos nos retratamos tarde o temprano, y ya veo que lo del trastorno bipolar no era broma. Bueno, acabo que me tengo que ir a ver Cuéntame, que me lo ha grabado Pilar y es lo único que veo en televisión, mañana, después de hablar con quienes he dicho me paso por aquí para poneros lo que me han contado en torno a las irregularidades de Maná. Para las de Acumán podéis venir a mi casa y verlas in situ, os recuerdo Avda. Francia 10, portal 1, 3º A. ¿A que no conocéis a ningún estafador que de tantos detalles? ¡Qué rollo tengo!, y el tiempo que tardo en escribir estas sandeces es tiempo que le quito a la escritura de cuentos y novelas con las que luego gano de vez en cuando algún premio literario con cuyo importe financio la publicación de libros solidarios. Por cierto, no dejéis de visitar el blog que me ha dedicado Gatopardo y anotad vuestro comentario. El color de fondo un poco claro, pero el Pinocho ya se lo he copiado para mi blog.
De nada, a mí también me gusta mucho ser útil. Un beso cínico.
Una última cosa, para Gatopardo, aunque ya me pasaré por su blog, les copio a los sufridos lectores parte de lo que me contestaste en un correo del que puedo hacer un volcado de pantalla en el momento que se me pida: “Según la doctrina jesuítica que admiro, dentro de las coqueterías admisibles si queremos ser eficientes y lograr fines muy concretos, debemos dejar los escrúpulos de conciencia que podamos subvencionar de nuestro bolsillo. Bienvenidas sean las pelas de origen sospechoso si se detinan al bienestar de alguien ajeno. Si fuera en beneficio propio estoy segura de que nos

acarrearía desgracia, pero mientras sea para los demás, si hubiera que un buen plan para atracar un banco, participaría.
Así es que espero que tu nariz torcida y tu cara de crío, y tus delirantes planes altruistas los seduzcan, y quieran financiar casas de acogida, escuelas, microcréditos, asilos, y todo lo que se te ocurra. Gatopardo a Miguel Ángel Carcelén, 21/12/2006.
Qué feo está revelar conversaciones con damas, pero más feo está no sustentar con hechos que los fines no justifican los medios. Otra perla más de Gatopardo:
"Ese víbora –refiriéndose a García Nieto- está encantado de conocerse, pero debió de ver posibilidades en tu sonrisa oriental cuando escuchas melonadas, adquirida en el ejercicio apostólico, y antes o después, te encarga que seas su negro para hacerle una autobiografía en que quede su retrato alicatado hasta el techo.
Tiene dinero negro para invertir: y en Nigeria, Colombia, Mozambique, no son racistas con el color del dinero."Gatopardo a Miguel Ángel Carcelén
Si os pluguiera puedo poner más.
Otro beso.

Gracias, Miguel Ángel. Me has dejado sin palabras. Creía que no ibas a contestar, pero es justo que podamos escuchar a las dos partes.

Me ciño al tema que plantee -escuetamente- desde el principio:
Me da vergüenza colaborar con quienes deciden que un libro y un autor son interesantes, reciben dos llamadas diciendo que si se publica procederán contra ellos y, en consecuencia, renuncian a seguir adelante con la edición del libro.
Y dentro de mis principios de broncas barriobajera, eso es sustentar y secundar las tácticas mafiosas.
Y la respuesta, Miguel Ángel, no la has planteado nunca respecto a la ética, cosa que sería enriquecedor, sino que montaste un concurso de adhesiones al líder y de ataques a mí, que, como bien se puede comprender, me divierten sobremanera.
Por cierto, en ese párrafo de mi carta hablaba de la Fundación Dosmilnueve, pero lo hago extensivo a otro puñado de Fundaciones, Asociaciones filantrópicas y ONGs.
El debate no es nuevo, y me parece digno de proseguirlo.
Y afirmar que yo he entrado en tu cuenta de correo y en tu blog no deja de ser un delirio enrabietado como el resto de tu respuesta ante quien osa no estar de acuerdo contigo.
Y por cierto, lo que no te ha dicho Carmen, por discreción, pero te lo digo yo, es que

Gatopardo es una iniciativa puntera de la que formamos parte un colectivo de casos psiquiátricos irrecuperables.

Y a los morosos, pedí que compraran los Relatos, que no hacía falta que lo leyeran, y eso incluye pagarlo.

De todas formas, que conste y quede claro que no forma parte de mi negociado venderlo ni promocionarlo. Eso es cosa de Acumán, y es obvio que sólo logró vendérselos a los del seguro porque sólo lo han pedido quienes no lo pagaron. ¡Y el caso es que yo me lo maliciaba con la gentecica que lee este blog!

Para Hannah:
Debería cobrarte por esto, pero lo haré para futuros escritos tuyos (que nunca he dicho que no tengan calidad, que sí la tienen):
- Falta de concordancia entre sujeto y verbo.
- "Que" como nexo en una oración relativa no lleva tilde.
- "Quien" (nexo de oración) tampoco lleva tilde.
- Como: adverbio comparativo. Tampoco lleva tilde (en el 80% de los casos lo has puesto con ella). Sólo cuando es adverbio interrogativo (tu DRAE también lo certifica así).
- El gerundio se utiliza cuando es acción simultánea, no pasada o futura.
- Sí: adverbio de afirmación. Sí lleva tilde, el condicional no la lleva.
- Ni siquiera: "siquiera" todo junto.
- Para poner un cierre de paréntesis, antes tiene que haber uno de apertura.
- Aunque: sin tilde, por favor.
- Disidente. "Desidente" no aparece en el DRAE y estoy segura de que en el tuyo tampoco.

No he podido seguir leyendo, pero seguro que sacab algo más. Aparte de equivocaciones que hay que supongo que han sido por la rapidez al escribir (somos humanos todos, no lo olvides).
Perdona si te lo has tomado a mal. Sólo era una advertencia, porque me parece una falta de respeto al lector que el autor cometa faltas e incorrecciones (aunque todos sabemos que hay gente que se dedica a ello).

Gatopardo, sé que no es el blog de Hannah, pero como (sin tilde) no lo puede leer...

Otra puntualización: me reafirmo en lo que le escribí a Gatopardo, que el libro se vendió muy bien, pero que se cobró muy mal, de los 50 ejemplares que nos quedaban en depósito ahora tenemos los que nos han devuelto, que son bastantes más. En el blog de Hanna he contestado lo siguiente, por si os interesa:
Lo prometido es deuda. Acabo de hablar con don Miguel Escribano Giraldo, interventor del Excmo. Ayuntamiento de Albacete, en el número 967596100, extensión 1120, y me ha asegurado que ni él ni nadie de su sección a hablado jamás con Carmen Moreno Martín ni con nadie sobre la relación que existe entre la ONG Maná y el Ayuntamiento de Albacete. Me ha asegurado que JAMÁS ha habido ninguna irregularidad por parte de Maná en la justificación de ayudas recibidas o contrataciones para la realización de cuentacuentos, talleres solidarios o similares, cosa que se viene produciendo desde hace muchos años.
Le he ofrecido la dirección de esta página en la que sale él a relucir para ver en qué medida ese infundio pueda ser denunciado.
Excuso decir que ni en la Diputación de Albacete ni en la Junta de Comunidades saben nada de esas irregularidades. Así que, Carmen, yo sí te exijo una rectificación pública o una aclaración sobre estas mentiras que menoscaban una gran labor solidaria.
Y nada más, el enlace que indico para lo del ISBN también lleva a las causas de exención del ISBN en España. Y a Gatopardo ya le contesto en su blog, para que siga siendo uno de los blogs más visitados en literatura en español.
Perdona que ya no visite más esta página, pero yo no estoy jubilado con gran invalidez y tengo otras ocupaciones además de pasarme el día delante del ordenador lanzando infundios y creando confusión.
Y ahora añado que todavía no nos has aclarado a los lectores de tu secta que cómo es que el dinero sucio de las koplowitz es sucio, y el dinero sucio de Luis García Nieto, según tú, no es sucio y en Nigeria, Mozambique, etc, no miran el color del dinero. Ésa es la cortina de humo que en verdad me interesa.
Yo también me uno a tu club de fans y al club de los esquizofrénicos, ¿me aceptáis? También padezco trastorno bipolar.
Aviso que este es mi último comentario (¡qué pena!), pero es que tengo otras ocupaciones, como ya he dicho más arriba.
Otro beso para ti de tu enrabietado admirador, que lo es.

Transcripción del E-mail de Miguel Ángel Carcelén Gandía, para Carmen Moreno Martín

"Pues también me gustaría que éste fuera mi último email.

Revisa bien lo del ISBN, no sólo el Decreto 2984/1972, de 2 de noviembre, aunque también.

No entro nada más que tú a Acumán no le has donado 150 euros que a mí me conste, se lo he preguntado a quien lleva las cuentas y no le consta esa entrada. Según el comentario del blog tú ingresaste 150 euros por la petición que yo hice para el proyecto de Nigeria, esos 150 euros me los donaste a mí, aunque la cuenta sea la misma, al igual que lo hicieron muchos otros a los que se lo he reconocido en la dedicatoria del libro que la editorial Huerga y Fierro me publicará en breve con el título de IGUAL QUE UN COLIBRÍ. Esos 150 euros los envié por medio de Acumán al proyecto indicado, pero en rigor de términos, me los donaste a mi, así que si los quisieras reclamar me los tendrías que reclamar a mi, no a Acumán, y no dudes de que te los devolvería de inmediato.

Churras con merinas, ¿de qué daño hablas de Acumán a Maná? No despistes la cuestión: escribiste bien claro lo de las irregularidades de Maná con el Ayuntamiento de Albacete. Ahí Acumán no pinta nada, que yo sepa, pero se trataba de esas cortinas de humo que tan poco te gustan. Acumán no pinta nada, pero toda mi familia lleva años trabajando en Maná para que ahora vengas a dudar, como ya te dije ayer de la honorabilidad de mi familia. De mí puedes decir cuanto quieras, y de Acumán ni te cuento, en serio, no me voy a molestar, creo que ya lo has visto. Pero te exijo, ayer te rogaba, que me rectifiques y aclares lo de las irregularidades de Maná porque ahí sí te vi mala fe y ahí sí te voy a pedir responsabilidades.

Cuando lo hagas, rectificar que es de sabios como bien dijiste, o me lo aclares con datos, que tú misma exiges para otras cosas, podremos dar por finalizado el intercambio de correos."

MI RESPUESTA:
No voy a molestarme en responder a su e-mail, que estoy sin ordenador y me cuesta esfuerzo, trabajo y energía ir a un cíber, que ya le dije que no le iba a enviar ningún correo más, que para eso le he enviado el burofax, y que ya me apesadumbra estar molestando a los amigos.
Pero le digo aquí lo mismo que en mi blog ha dicho una amiga en mi nombre:

Lo qué he dicho del ISBN, dicho y comprobable está.
Los 150 euros que en mi nombre donó Gatopardo –estaba yo, con lo de la fractura de cadera, impedida- donados están. Ni se los pedí ni se los pediré. Si los ha empleado en lo que dice, bien, y si no, allá su conciencia. Nunca te he pedido dinero, ni he dicho que me lo hayan pedido, ni usted ni Acumán. Mí donación fue a Acumán –si lo sabré yo- porque para mí, usted era el director y su representante. Lamento que no tenga claro que es Acumán, cuando es usted, persona privada, cuando representa a Acumán, si existe Acumán, si Acumán tiene representantes legales, etc.– Justamente retrata de eso, y de eso van han ido mis averiguaciones y resultados, ¿o no sabe usted leer? A tenor de los impedimentos y dificultades que tiene en demostrar la existencia legal y la regularidad fiscal de Acumán, unido al despliegue de falsedades, inexactitudes y

contradicciones a las que recurre para desviar la atención de lo que verdaderamente importa, no me extraña que usted se haga un lío.
Si se detienes a leer, comprobará que escribo: "puestos en contacto con el interventor de Albacete" –en ningún momento he escrito que yo, personalmente, haya hablado con el interventor de Albacete-. Lo que si he hecho yo directamente es todo lo demás, y aún estoy esperando alguno de los documentos solicitados. Pero aclararé lo referente al interventor, aunque, en principio, la persona que sí se puso en contacto con él, me merece credibilidad. Usted no.

Hannah

ps: sobre el interventor de Albacete en relación con los justificantes de la ONG Maná, sólo le puedo decir que no me es posible desvelar mis fuentes, y que no he contrastado yo misma en persona la veracidad de esos datos. De modo que es el único dato que, honestamente, no puedo defender hasta el final. Pero de todo lo demás de mi artículo y del texto del burofax que le he remitido, no rectifico nada y lo mantengo todo.

Nada más

Hannah

Nada más.

Contesto con mucho gusto: hay Asociaciones y Fundaciones que entregan dinero (de dudosa procedencia)a fines filantrópicos: si en mi mano estuviera, que no lo está, no lo rechazaría, siempre y cuando yo no me lucrara personalmente. (En ese intercambio de e.mail hablábamos de un premio de un asilo de monjitas que te repugnaba aceptar, te recuerdo)
Sin embargo, si hay amenaza doblada con soborno, diciendo que entregarán dinero para mi Asociación y los fines que defienda, no aceptaría.
Respecto a los libros que se hayan vendido o no de Gatopardo, no es asunto mío, sino de Acumán, y como no he pedido las cuentas, no es necesario que me las des, a no ser que te resulte útil para seguir con las cortinas de humo. Porque, si en el libro no consta el número de ejemplares impresos, la imprenta que lo hizo e inscrito en su contabilidad, ni se registrado en el ISBN con todos los datos pertinentes, y como sistema de pago se utiliza el "ingreso en cuenta" de un particular, lo cierto y verdad es que no hay forma de saber otra cosa que lo que nos quieran decir, y que, como he reiterado, no es asunto que me interese personalmente.
Saludos

Miren lo que he encontrado en el blog de Carcelén:

Autor: David Melar

Ante el cúmulo de investigaciones, informaciones, y réplicas de una u otra parte, quiero expresar mi experiencia personal con la editorial Acumán y Miguel Ángel Carcelén. Colaboro como voluntario de las ONG´s “AVENTURA SOLIDARIA”, “BERIT” y “ÁFRICA DIRECTO”, en proyectos para el desarrollo de Mozambique, donde he estado en dos ocasiones, viendo de cerca y trabajando en los proyectos. Cuando conocí Acumán y les llevé un manuscrito con fotos y poemas de mis experiencias en Mozambique, me dijeron que saldría publicado y jamás me pidieron dinero para la edición ni que tuviese que renunciar a mis derechos sobre el texto para el futuro. Cuando salió el libro (“Latitud todo sur”) le dije a Miguel Ángel que no quería resultar gravoso para Acumán y que quería pagar la edición (700 libros), o al menos una parte de ella. Él me dijo que no me preocupase, que de siempre Acumán corría con el gasto de la edición, porque para eso era una editorial solidaria. Se me puede creer o no, pero el caso es que los gastos fueron asumidos por la editorial, incluso habiendo tenido la oportunidad de haber recuperado parte del dinero de la edición.

En esos momentos, Acumán destinaba los beneficios de los libros que editaba a un proyecto en Colombia. En el caso de mi libro, como trataba sobre proyectos en Mozambique en los que yo mismo colaboraba, Miguel Ángel me dijo que lo lógico era que los beneficios se destinasen a Mozambique, al proyecto que yo quisiese. De ese modo se enviaron al puesto de salud y centro nutricional de Muhalaze (distrito de Matola), creado y gestionado por mis amigos de la ONG AVENTURA SOLIDARIA.

A lo largo de los meses le iba pidiendo a Miguel Ángel que me diese libros para venderlos a mis amigos y conocidos. Nunca hubo ningún problema. Me llevaba los libros, los vendía, y el dinero de la venta estaba en mi poder. Cuando acabé de distribuir libros por mi entorno le dije que iba a ingresar el dinero a la cuenta de Acumán para que desde allí se hiciese la transferencia a Aventura Solidaria. Él me dijo que no era necesario, que puesto que yo mismo formaba parte de la ONG podía hacer el ingreso directamente. Sin embargo ingresé el dinero a Acumán, y al día siguiente se hizo la transferencia al número de cuenta de Aventura Solidaria.

Quien quiera puede informarse:
Fundación Aventura Solidaria
c/Amann, 3, Planta baja, 48992 Getxo, Vizcaya
CIF: G-95141180
aventsolidaria@terra.es
944914576

Además, Acumán se ha ofrecido en más de una ocasión para hacer rastrillos a beneficio de Mozambique con la multitud de objetos y libros que tiene.

Por otro lado, hace unos meses les presenté a un amigo, colaborador de Aventura Solidaria y África Directo (www.africadirecto.org) que había escrito un diario de sus viajes como cooperante a Mozambique y Etiopía. Han estimado su manuscrito y estaba prevista su publicación en los próximos meses ("Piel de Azabache"). Javier Panadero, el autor, ha decidido dividir los beneficios entre Aventura Solidaria y África Directo, y en ningún momento Acumán se ha opuesto a ello.

Sé que es muy difícil tragarse lo de una editorial 100% solidaria, no sólo sin ningún beneficio propio, sino incluso asumiendo los costes de edición para que la recaudación llegue íntegra a una ONG. Quizá yo tampoco lo hubiese creído de no ser porque lo he visto con mis propios ojos.

Es todo cuanto sé, y quien no me crea, por favor, que se informe en Aventura Solidaria y África Directo.

Saludos.

Todo esto cuénteselo usted a la Agencia Tributaria, que es donde hay que explicar lo de las cuentas bancarias de esa editorial solidaria a nombre de particulares. Le atenderán encantados. No se le olvide llevar copia de la última declaración de Hacienda de Acumán.

Fecha: 12/02/2007 13:26.

Autor: Gatopardo recapitulando que es gerundio.

1)Hasta el 23 de enero de 2007 colaboré voluntariamente con Acumán, y ofrecí libre y voluntariamente mis relatos para que los publicaran y destinaran a los fines solidarios que consideraran convenientes.
No albergo duda alguna de que así se haría en el caso de que hubiera habido ganancias, cosa que no ha sido posible porque los que compraron mi libro no suelen pagarlo, según informa Miguel Ángel Carcelén.
2) El día 23 de enero 2007 por no estar de acuerdo con una decisión de Acumán, rescindo mi colaboración y prohibo nuevas ediciones de los Relatos de Gatopardo.
Y a raíz de esto se desencadenan ataques de todos los colores contra mí, y una campaña de loas y desagravios algo cursis, fuera de tiesto y poniendo la venda antes de la herida.
Señores míos: mi decisión se basó en un artículo escrito con el título "Prácticas mafiosas". Resulta que tal artículo no debería haberlo tomado al pie de la letra, según argumenta Miguel Ángel Carcelén, porque a nadie se le ha ocurrido, salvo a mí, creer nada de lo que dice ahí.
Y el tratamiento de schock para quien ha creído que lo que escribió no era una patraña para promocionar un título y un autor en una editorial alternativa, que no es Acumán, ha consistido en innumerables desmentidos a acusaciones que no había realizado, y a sospechas que no había albergado, a pesar de las advertencias e infomes que me habían llegado, porque como he dicho en varias ocasiones no creeré que Miguel Ángel Carcelén y la mayoría de los voluntarios se hayan lucrado personalmente
Pero resulta más sospechoso que otra cosa su campaña, que no me parece normal como respuesta a quien decide no continuar ofreciendo su colaboración.
Y cuantas más explicaciones den en cosas que no he preguntado, más sospechoso me va a parecer.
Respecto a las objecciones que hace Hannah, El espía que surgió del frío, y otros, ocurre otro tanto, llegando a tratar de intimidarla telefónicamente, mediante amenazas de un falso funcionario de un organismo oficial, que lo ha desmentido.
Y así estamos, recibiendo testimonios sobre aspectos que no hemos cuestionado. Hasta ahora.
Saludos cordiales.

Pero ni ustedes ni los palmeros de Miguel Angel Carcelén son quienes para otorgar marchamo de legalidad a una serie de irregularidades financieras y fiscales, que las ve hasta el más tonto. A saber: 1)Ejercer actividades económicas y no declararlas a Hacienda.
2)Recaudar fondos para supuestas actividades benéficas sin tener ningún permiso legal.
3) Derivar esos fondos a cuentas bancarias particulares.
4)Ocultar sistemática y dolosamente a Hacienda toda información de los beneficios que

se obtienen de una actividad económica y de una asociación de caridad sólo reconocida por los listos que la crean y los ingenuos que la mantienen.
4. Negarse a formalizar contratos con autores,a comunicar CIF o datos legales de su "empresa", "asociación" o lo que sea el chiriguito que ha montado.

5. Ocultar número de ejemplares de cada tirada que publica

SOBRE EL JUEVES, 1 DE FEBRERO, A LAS 19:55

Estoy un pelín harta del "vamos a morir" constante y a gritos por todos los rincones, la verdad. Y en particular del negocio ecologista, tan rentable y tan maravilloso.
Te venden siete toneladas de envases, y luego eres un ser abominable si los usas, y más si no los reciclas, para alimentar las fábricas de reciclado, fábricas al fin y al cabo como todas las demás, negocios y empresas en pos de la pasta, como todas las demás. Sería más fácil no producir envases, ir con tu botellica al super a que te la rellenen, o devolver el casco como toda la vida, y llevarte los garbanzos liados en papel de periódico, o en tu botecico que tienes en casa para ir a por garbanzos. Pero eso es menos negocio, y aquí de lo que se trata es de ganar pasta. Sería más fácil recortar el consumo de papel, que ya existe internet, joder, pero a la industria papelera igual le molesta el asunto.
Aquí todo el mundo se molesta a la mínima que propones un cambio que suponga ganar menos dinero. Y encima la culpa la tengo yo, muchacha abominable y contaminosa, tía gorrina.
Te venden el coche de los humos y retrasan en todo lo posible la fabricación y venta de los que no usan gasolina. Más negocio. Eso sí, tú te tienes que sentir como una terrorista por usar tu coche contaminante, y comprarlo sí pero usarlo no gracias, aunque son los niños del dólar los que se niegan a dar salida a otras opciones que hace mucho que existen.
Te enseñan a consumir todo lo posible, a cambiar de móvil, de ordenador, de ropa y de pellejo cada seis meses, a comprar y tirar lo más rápido posible, a ponerte la calefacción derrochona y el aire acondicionado, porque así funciona el negocio. Al invierno lo llamamos ola de frío (vamos a morir) y al verano ola de calor (vamos a morir) y al virus que todavía no ha mutado y no resulta una amenaza lo llamaremos pandemia (vamos a morir, por si no lo sabías) y venderemos millones de vacunas para un virus letal que

todavía no existe (la industria bondadosa del fármaco asegura que vamos a morir)
Y por supuesto tienes la culpa de todo, por hacer uso indiscriminado de los bienes y servicios que se te meten por los ojos de forma indiscriminada, porque ese es el funcionamiento normal de nuestro sistema económico. Consume mucho y siéntete culpable.
Y por supuesto, que nadie dude que vamos a morir de un momento a otro, y que la culpa es mía, que anoche metí en el contenedor de basura orgánica un bote de coca-cola, mi maldad no conoce límites, ja, ja, ja. Ja.

Idos a la mierda con vuestros Apocalipsis de pacotilla, anda, que vais muy bien servidos.

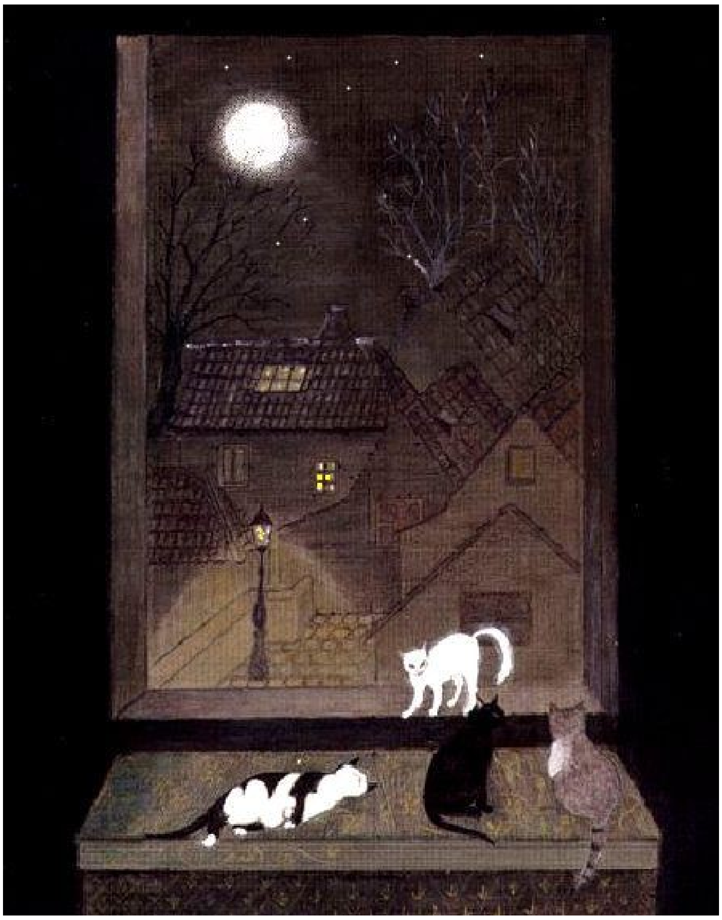
LLEGÓ FEBRERO Y EL AMOR GATUNO



Los gatos, en efeto,
son del Amor un índice perfeto,
que a los demás prefiere;
y, quien no lo creyere,
asómese a un tejado
con frías noches de un invierno helado,
cuando miren las Hélices noturnas
las estrelladas urnas
del frígido Acüario,
verá de gatos el concurso vario
por los melindres de la amada gata,
que sobre tejas de escarchada plata
su estrado tiene puesto,
y con mirlado gesto
responde a los maúllos amorosos
de los competidores,
no de otra suerte, oyendo sus amores,
que Angélica la bella
de Ferragut y Orlando,
amantes belicosos,
cuando andaban por ella,
sin comer ni dormir, acuchillando
franceses y españoles,
de que no se le dio dos caracoles.

¿Qué cosa puede haber con que se iguale
la pacienca de un gato enamorado,
en la canal metido de un tejado
hasta que el alba sale,
que, en vez de rayos, coronó el oriente
de carámbanos frígidos la frente?
Pues sin gabán, abrigo ni sombrero,
Febo oriental le mirará primero
que él deje de obligar, con tristes quejas,
las de su gata rígidas orejas,
por más que el cielo llueva
mariposas de plata cuando nieva.

SI ALGUNO QUISIERE SABER

Si alguno quisiere saber de la Auctora cuál fue su intención en las

páginas de "Gatopardo", digo que, siendo ignorante y no bachiller, escribí para pasar mi fortuna y darme solaz y gozo, si no castamente, al menos cautamente. Si me dicen cómo alcancé a saber tantas particularidades buenas o malas, digo que no es mucho escribir una vez lo que vi hacer y decir tantas veces; y si alguno quisiere decir que hay palabras maliciosas, digo que no quiera nadie glosar malicias imputándolas a mí, porque yo no pensé poner nada que no fuese claro y a ojos vistas, y si alguna palabra lo pareciere, digo que no es maliciosa, sino malencólica. Si me decís por qué en estos dos años no puse mi nombre, digo que mi oficio me hizo noble, siendo de los mínimos de mis coterráneos; y, como vi coger los ramos y las hojas del árbol de la vanidad a tantos, yo, que soy de chica estatura, no alcancé más alto, y me asenté a su pie para ver pasar la vida. Y, por ello callé y callaré mi nombre.

RIPIOS AL SEGUNDO ANIVERSARIO DE GATOPARDO

Señores, tengan en cuenta
que el dia uno de febrero
se inauguró el avispero
de la juerga y de la afrenta

Reunidos en comité,
y nemine discrepante,
la abuelarra comandante,
hicimos este abecé:

Es norma de Gatopardo,
si alguien se pone a tiro,
sea plebe, sea duunviro,
que no se escape sin dardo.

Si la víctima en cuestión
es melifluo y sin humor,
y persiste en el error,
va derecho al paredón.

Si es honesto ciudadano,
observador de la ley
y santurrón como buey,
le colgamos un campano.

Si mujer y sufridora,
y nos cuenta su diario,
que alegre su antifonario
y se haga acosadora.

Si tiene cierto interés
por mostrar carné y nombre,

que luego no se asombre
si recibe algún revés.

Bienvenidos los goliardos,
golfos, rebeldes y bordes,
mentes inmisericordes,
por apellido: Bastardos

Y que no nos den la lata
ni meapilas ni legales:
somos los Irregulares,
somos gente de Zapata.

PABLO BORDONABA

A muchos de ustedes este nombre no les dirá nada. No era famoso, No era ni un autor, ni crítico, ni editor. Era simplemente un librero. Eso sí, un gran librero a pesar de ser pequeño. Un cuerpo pequeño para una gran pasión por el libro, por la lectura y que ayer perdió definitivamente la última de las batallas.
Quizá algunos de ustedes se acuerden de una librería barcelonesa llamada Cinc D´Oros. Era una de esas librerías como tantas en tantas ciudades ,donde durante mucho tiempo la trastienda era más importante que la tienda. Librerías que ocuparon un papel fundamental en la lucha cotidiana contra la dictadura franquista. Quizá ahora que hablámos de recuperar la memoría histórica (¡ Que la recuperen quienes la hayan perdido!), se podría reivindicar el papel que esos minúsculos espacios,atiborrados de libros, con estanterías combadas por el peso de la cultura, ocuparon ,en la recuperación de las libertades.
Despues de otros trabajos editoriales, (¿ se acuerdan de Dopesa ?) Pablo estuvo en la librería Look, que el grupo Planeta tuvo en la calle Balmes. Cuando se cerró Look, Pablo se jubiló laboralmente, pero no culturalmente. En esta librería tuvimos el honor y el placer de contar con él y con Elena como público en bastantes actos. Eso sí había que convocarle por teléfono; era de los pretecnológicos que no utilizaba el ordenador.
Pablo estuvó en el Penal de Burgos cuando la sola mención del Penal ponía los pelos de punta. Pero alguna vez comentó que los momentos más durós es cuando se cerraba una librería. Y vió cerrar muchas.
Cinc D´Oros cerró por que no pudo aguantar la especulación que provocó una subida continua y desmesurada de alquileres. Es demasiado caro una librería en plena Diagonal de la Barcelona postolímpica. Pero también cerró, por que muchos clientes comenzaron a pensar que era "antiguo" comprar libros en un espacio lleno de libros y que lo "moderno" era ir a lugares de diseño con enormes pilas de mercancía.

Ningún ordenador podrá sustituir a un librero. Ningún ordenador será capaz de recomendar una traducción de Holderlin hecha por Jose Maria Valverde, en lugar de otras traducciones. Todavía, los ordenadores no son capaces de compartir con un lector el descubrimiento de un libro.
No sabemos cómo esta el Ibex o el Dow Jones. Seguramente los turistas de las Ramblas que desgustan paella precocinada con jarras de café con leche habrán hecho mas rica y opulenta a una Barcelona. Pero la Barcelona humana y culta, la Barcelona de las personas, es hoy más pobre. Ha muerto un librero. Y es algo que no podemos reemplazar. Somos más pobres.
Hace un año moría Justo Vasco. Y los que le conocimos aún no hemos sabido llenar su hueco. En Gijón y fuera, le seguimos echando de menos.

Saludos negrocriminales y buena lectura.

Del blog de Paco Camarasa , el librero de **NegrayCriminal** , ese pequeño reducto de los amantes del género negro que tiene su espacio en el barrio de la Barceloneta, en Barcelona, que os recomiendo:

"En la librería Negra y Criminal (real) podrás encontrar tus libros criminales preferidos, y hasta un librero; una especie en vías de extinción.
Hemos querido proporcionar a todos aquellos aficionados al género, un lugar donde podáis encontrar aquellos libros sin los cuales no merece la pena seguir viviendo.
Muchos de ellos, difíciles de conseguir en otras librerías que no se permiten la especialización: librerías inundadas de novedades de rápida circulación.
Aquí podrás encontrar libros descatalogados, libros de segunda mano, y también "nuestros rescatables": libros que consideramos muy recomendables pero que al dejar de ser "novedad" dejan de encontrarse en el circuito de librerías habitual.
Y, como no, todas las novedades del género.
Nuestra librería es pequeña, cálida y acogedora. Ven a conocerla.
Horarios de atención al público:
· de martes a viernes de 16 a 20 horas
· sábados de 10 a 14 horas
· lunes cerrados

Siempre que se cierra una librería pienso que a partir de ese momento me faltará alguna cosa. Hace unos días lo he experimentado con el cierre de mi libfrería de cabecera. Esta vez no ha sido por falta de clientes, al librero le han ofrecido un trabajo más remunerado y, seguramente, más tranquilo y ha echado el cierre.
A Paco Camarasa le conocí cuando tenías una librería en Valencia justo debajo de donde yo tenía el despacho.
Una v ez estuve en su librería barcelonesa y me pareció un espacio para acariciar los libros. Espero que nunca tenga que cerrar.

Cerró un librero. Peor aun, ha desaparecido.

Quedan muchas librerías y muchos libreros, gata.
Nacen y mueren constantemente, porque mientras haya gente que guste leer bien, habrán buenos libreros. En Barcelona quedan muchos de ellos.
Los que vivimos fuera del centro, sabemos que hay muchos lugares y rincones con buenos libreros.
Sin saber leer entramos pidiendo encuadernaciones y nos sirven lo pedido sin mover un músculo, pero en cuanto ven que buscas algo, que eres exigente con el producto... sale el librero que tienen dentro.
No desesperes gata, porque de seguro, el último hombre que desaparezca con el planeta será uno de ellos.

Ustedes dan una importancia a los libros que, en realidad, no tienen. La tuvieron, colateralmente, como mecanismo de transformación de la cultura oral a la escrita, como soporte de tal progreso. Pero lo verdaderamente esencial fue la supervivencia del conocimiento abstracto. Y la siguen teniendo (importancia), precisamente, como clásico sostén material del mismo. Siguen resultando prácticos. Creo, incluso, que son a la cultura lo que un fetiche al sexo. Y son entrañables, una reliquia, testigo y huella de nuestro devenir histórico.

Pero, una vez más, lo verdaderamente importante es que conocimiento y cultura sobrevivan, que la gente se impregne de ellos y, en ese sentido, resulta igual de útil una pantalla, igual de honrosa y está igual de legitimada.

Es un punto de vista ex profeso vaciado de romanticismo, claro.

Besos, Gatita.

ANATOMÍA DE UNA CORRUPTELA

A Gatopardo, a quien ya le advertí que el whisky es mejor acelerador de neuronas que el café

Después de leer el sentido artículo de Gatopardo, donde prohibe a Acumán que siga

publicando sus “Relatos” por el comportamiento antiético del Sr Carcelén con otro autor, me ha despertado la curiosidad un individuo capaz de sacar de quicio a nuestra correosa abuela. En su iracunda indignación, Madame Gatopardo no ha sabido ver que el texto del Sr Carcelén , donde aparentemente explica las razónes de por qué Publicaciones Acumán rechaza un libro de Ernesto Koplowitz, es una auténtica joya textual sobre la psicología de un corrupto.El resumen de la historia que cuenta el Sr. Carcelén en su blog es la siguiente:

Ernesto Koplowitz propone a publicaciones Acumán que edite su libro de memorias. Esta obra contiene información escandalosa sobre la familia Koplowitz: en concreto contra Alicia y Esther Koplowitz y su primo Carlos. Ernesto Koplowitz pone como única condición pagar él la autoedición. Acumán, después de recibir y avaluar la obra y su documentación, decide su publicación y así se lo hace saber a Ernesto Koplowitz.

El maquetador de Acumán recibe una advertencia de un señor que dice llamarse Carlos Albujer: si el libro de Koplowitz se publica, “*va a proceder judicialmente contra él”*. Esta advertencia es escuchada también por el propio sr. Carcelén, a quien el tal Carlos Albujer se la repite. Carlos Albujer pide el número de cuenta bancaria de publicaciones Acumán. El Gabinete Jurídico “Alarcón y Asociados Abogados” llama al Sr. Carcelén. Aquí es imposible saber lo que le dicen los abogados, ya que, en el relato de Carcelen, veremos que el considera “lo mismo” lo que son dos cosas totalmente diferentes.

Hay un reunión de cinco integrantes de Acumán, donde se decide no publicar la obra de Ernesto Koplowitz. El Sr. Carcelén se lo comunica al Sr. Koplowitz con sus disculpas y decide “dejar constancia de mi desacuerdo en este espacio” (el blog).
Ahora vamos a ir viendo cómo esta historia, sencilla e inteligible, ha sido tergiversada y trufada de insinuaciones que rayan la imbecilidad o el delito. El modelo retórico elegido por el Sr. Carcelén es el de la confidencia a los amigos, y la *captatio benevolentiae* (o búsqueda de empatía en el auditorio) se conforma con recursos estilísticos propios de un curita pillín en la reunión parroquial del viernes.
Para explicar por qué contesta a un señor que dice ser Ernesto Koplowitz - que es la conducta educada de cualquier editorial o persona con un ciudadano- trae a colación la primera fabulación de la serie:

“*Nos lo tomamos a guasa, la verdad, pero como ya en una ocasión, por tomarme a guasa una llamada del Gabinete de la señora esposa del Presidente del Gobierno, casi me meto en un lío, le contestamos que enviara el material”*. Vamos a ver: ¿A qué señora se refiere? ¿Ana Botella? ¿Sonsoles Espinosa? ¿Qué pasó con el Gabinete qué le hizo modificar sus modos de actuación en la editorial? ¿Lo amenazaron? ¿Lo insultaron? Es más ¿Cómo tuvo algún problema con un organismo que no existe? La mujer del presidente del gobierno español no tiene Gabinete de ninguna clase. No busquen el teléfono, ni el presupuesto de este organismo, que sólo tiene algún lugar en la desbordante imaginación del narrador. La novela negra que le sirvió de fuente era norteamaericana.Me malicio que no guardaron prueba de esta portentosa psicofonía de la Moncloa. De hacerlo, rogaría que me la mostrara; que consulte con sus abogados si es legal que la esposa de nuestro presidente vaya atemorizando asociaciones benéficas, o, en última instancia que se la envíe a Iker Jiménez.

Sigue el Sr. Carcelén con otra afirmación peligrosa: *“El autor ha sufrido tres intentos de asesinato por parte de alguien que está empeñado en que ese libro no salga a la luz, su página web ha sido boicoteada mil veces y la que tiene ahora mismo -no*

todos los días se puede ver- es una pena de tan modesta y camuflada como la ha hecho" Ojo, que éstas son palabras de Carcelén. No de Koplowitz, aunque el Sr. Carcelén quiera que parezca una descripción del contenido del libro. El mensaje que nos deja es claro y el razonamiento, si lo seguimos, pavoroso: alguien intenta matar a Ernesto Koplowitz para que no publique su libro. Carlos Albujer y Alarcón y Asociados Abogados llaman a Carcelen avisándole de los problemas que puede ocasionarle publicar la obra. Si yo fuera socio de Alarcón Asociados andaría algo más que preocupado por el papelín que el Sr. Carcelén les ha atribuido en la historia.

El Sr. Carcelén, que es lo bastante desconfiado y cauteloso como para dudar de la identidad de Ernesto Koplowitz, y para investigar los problemas de éste con otras editoriales e imprentas, su página web, etc, sorprendentemente no hace una sola verificación sobre lo más importante de toda la historia: ¿Hay alguna constancia documental de estos intentos de asesinato? ¿alguna denuncia? ¿algún dato o impresión inferido de su trato con Ernesto Koplowitz que le haga creer que éste realmente está en peligro de muerte? ¿Algún chismorreo de la web siquiera?.

Éste es el primer "descuido" de la trapisonda argumental. El segundo aún es más inexplicable. Después de peinar archivos y bases de datos (y los tengo en cantidad), no he encontrado a un personaje llamado Carlos Albujer. Hay un Charles Albujer que arribó a Nueva York en 1876, pero no creo que sea el caso, aunque puede tratarse, como ocurría con el Gabinete de la mujer del presidente, de otro fenómeno de fantasmogénesis. Publicaciones Acumán recibe advertencias de un señor que dice llamarse Carlos Albujer y no comprueba siquiera su existencia. Es más, en una demostración de maliciosa necedad, Carcelén añade, en un aparte muy teatral, "*que no sé si será el primo mafioso"*. A este primo de las Koplowitz se ha referido antes Carcelén: "*un tal primo Carlos, que debe ser un mafioso a la nueva usanza'*. Esto es un ejemplo de la prudencia y continencia verbal que demuestra Miguel Ángel Carcelen en la defensa de los intereses de negritos y huérfanos. El famoso "primo Carlos" es Carlos Koplowitz Grunbaum cuyo apellido, fotos e historia puede verse en la primera página de la web de Ernesto Koplowitz, que Carcelén dice haber visto. Como Carlos Koplowitz decida demandar al Sr Carcelén por difamación, los 12.000 euros que tanto le preocupaban adelantar en la edición, no van a cubrir ni las costas de los procuradores.

Tampoco parece interesar a nadie, ni a Carcelén ni a la partida de imbéciles que lo jalean y ríen las gracietas, a quién representa y en nombre de quién habla "Alarcón Abogados". Tampoco se ha identificado el letrado. Carcelén ha levantado el teléfono y una voz anónima, en nombre de un despacho de abogados, le ha soltado los artículos del Código Civil y del Código Penal sobre editores rebeldes. Y ha cundido el pánico. Si Carcelén sostiene que ha ocurrido así, mañana le prometo que lo llama un "Gabinete Garrigues" tranquilizándolo y aconsejándole que publique el peligroso libro. Y espero que le conceda la misma credibilidad que a Alarcón Abogados.

Miguel Ángel Carcelén está acostumbrado a un público confiado, benevolente y entusiasta y echó el colmillo predicando a una feligresía poco dada al espíritu crítico y analítico. Observen el relato de las dos advertencias que recibe: (el de Carlos Albujer):

"Y es solicitar el número de depósito legal y confirmar el ISBN, un día después, y recibir el maquetador de Acumán una llamada de don Carlos Albujer -que no sé si será el primo mafioso- diciendo que ha llegado a su conocimiento que Publicaciones Acumán va a editar el libro de Ernesto Koplowitz y quería advertirnos que en el momento que salga a la luz va a proceder judicialmente contra él por las calumnias que se vierten contra gente respetable. Me pasa el mochuelo a mí y me dice lo mismo".

Quitados los perifollos de estilo, el mensaje es claro: Carlos Albujer va a proceder judicialmente contra el autor del libro o contra su publicación. Pero llevado, por su entusiasmo, añade la segunda advertencia:

"Y al rato me llaman Alarcón y Asociados Abogados (igual que en las películas) diciéndome lo mismo, que quien publica es responsable de lo que publica casi en igual medida que el autor".

Ese *"lo mismo"* no tiene nada que ver con lo que le ha dicho el Sr. Albujer, pero pelillos a la mar. Sin dejarnos respiro para digerir tan increíble escena, rubrica y confirma el tenebroso aviso de Alarcón y Asociados: *"Conozco el Código Penal porque me lo tuve que estudiar y sé que eso es casi cierto"*. Yo no sé si, en las oposiciones a funcionario de prisiones, además del código Penal, se incluía un tema de Criminología llamado "Detección de mentiras", pero es de manual que el mentiroso, cuando ha soltado una trola, suele coronarla con frases del tipo "Y esto lo sé yo de buena fuente".

Un personaje tan atolondrado como el Sr. Carcelen, que olvida tomar las mínimas precauciones que tomaría una ancianita ante llamadas extrañas, pone mucho interés en explicar cómo va a recibir los pagos de una transacción que él mismo llama "soborno" (sigue con el mismo tono ji-ji-ja-ja, aunque la historia es bastante sórdida y repugnante): "Olvido decir que don Carlos Albujer me había comentado que independientemente de nuestra decisión le había gustado mucho la idea de Acumán y si le pasaba un número de cuenta contribuiría de forma económica con nosotros". O sea que no había tal amenaza. El donativo no es tal soborno, puesto que Albujer lo ha prometido sea cual sea la decisión de la Editorial.

Pero, si es un soborno encubierto, Albujer -que me recuerda al capitán Khan cada vez más-, se propone o bien hacerlo efectivo por transferencia, dejando huella de sus datos, o bien plantarse en la ventanilla de un banco con los millones -porque supongo que no han vendido a Ernesto Koplowitz por mil euros- y decir aquello de "ponga Pepe López García como impositor, que se me ha olvidado el DNI". ¿A quién le está contando Carcelén esta patochada? A alguien cuya inteligencia no valora en mucho.

La reunión del consejo editorial, donde se decide traicionar y vender a Koplowitz, está descrita con desparpajo y desenfado de sotana vaticanista, pero con escrúpulos de virgen "apañada". Su único fin es señalar a sus compañeros de organización como culpables de la traición, una traición que él acepta por demócrata: *"Me ponen vuelta perejil"*, *"Es la primera vez que no me secundan"*...Nótese que, hasta el momento, el no ha dicho su opinión ni juicio ni postura ética ante semejante barbaridad.

Vamos a ver el colofón que nuestro ejemplar analizado da a la historia:

Si Ernesto Koplowitz está loco, han hecho bien en traicionarlo. Como mensaje moral de quien se dice preocupado por los débiles y olvidados de este mundo, no está mal. Bordea un regocijo en el ensañamiento con el débil, que explicaría los mensajes de apoyo que está recibiendo Carcelén a su hazaña.

Si Ernesto Koplowitz no está loco y lo matan - obsérvese que siempre tiene que haber sacrificio de este señor- Carcelén amenaza con que Sergio, *"que es un fenómeno"*, va a publicar el libro en internet.

Bravo, porque ya hemos llegado al asunto principal. Este editor, después de haberse negado a publicar la obra de Koplowitz, ha retenido tres copias ilegalmente, sin el

permiso del autor y las piensa usar a su buen entender. ¿Las va a vender también al mejor postor en aras de la causa tercermundista? Como tampoco aquí está dispuesto a asumir las responsabilidades de un delito, se busca su Cirineo particular en la persona de Sergio: "Sergio no lo llegó a archivar en su ordenador, pero por equivocación lo envió por email a tres conocidos de total confianza". Es decir, si aparece un matón, es Sergio quien ha birlado la copia y pregúntenle a él a qué tres amigos se los ha enviado. Al tal Sergio le está dando todos los números del sorteo para que tenga el premio del último detective privado que apareció muerto en un descampado de Madrid, tras haber sido torturado durante dos días.

Hay que decir que Miguel Ángel Carcelén, además de traidor y delator, es un tonto peligroso.

Por dios, esto no se hace, ¡hay que pensar en la salud sensorial del lector, cogno!

Y aún cardiovascular.

Así que, en lo sucesivo, sugiero añadan puntos y aparte en los textos, con espacio en blanco incluido, por si acaso resultaran sumamente interesantes y su lectura taxativa (en aras de no perder de ubicación el renglón en curso) pusiera en peligro la normal ventilación pulmonar.

Por cierto, cuando lo lea el señor Carcelén probablemente también se quede sin aire, a saber por qué razones, en el suyo caso.

Saludos.

Autor: Miguel Ángel Carcelén Gandía

Soy Miguel Ángel Carcelén Gandía, director de Publicaciones Acumán, no soy ni el espía que surgió de allí ni de allá, muy poco amigo de participar en foros donde tras el anonimato se vierten fácilmente acusaciones no demostradas ni –me temo- demostrables, e insultos a mansalva. Cuando van contra mi persona, ni hago caso, a decir verdad andaba algo preocupado porque hacía tiempo que ningún anónimo hablaba mal de mí, y eso es extraño, pero cuando se trata de Acumán mi cargo (director, ¡nada menos!), me obliga a vencer mi pereza para entrar al trapo de escritores de altos vueltos, a la vista está, que pese a su apretada agenda sacan tiempo para denunciar corruptelas en internet.
Espero no ser tan extenso como el espía, quien aventuro dirá como es canción habitual en este pentagrama (ya veis con qué facilidad me sale la lograda prosa poética, otro recurso del que nos valemos los tontos peligrosos, en expresión del amigo) que preserva su identidad porque de lo contrario se le echarían encima la KGB (que ya no existe, como el Gabinete de la señora presidenta), la CIA, tres matones a sueldo de un reducto de los GAL que opera en Haití, y un murciano que la tiene tomada con él porque en uno de sus tan perfilados artículos casi desentrañó que en las cadenas que rodean la catedral de su ciudad se esconde el secreto de los Templarios, arcano incluso para los redactores a sueldo de Iker Jiménez.
Detallo, sólo detallo, las afirmaciones que se ponen en mi boca sin ser mías (basta cotejar con el artículo original) en el primer párrafo para que el lector se de cuenta de cuántas más no habrán en el resto:
1.-"Esta obra contiene información escandalosa". ¿Dónde has leído eso? Yo hablo de entresijos de la familia Koplowitz, y la palabra entresijo, según el DRAE, no tiene connotaciones negativas.
2.- "Carlos Albujer pide el número de cuenta bancaria". ¿Te lo pidió a ti, espía? Porque a mí no, y a nadie de Acumán. Insisto, ¿qué artículo has leído tú, criatura?
Y ahora hago acotaciones.
- ¿Algún curita pillín además de intentar captar tu benevolencia en la reunión parroquial del viernes intentó contigo alguna otra cosa más y por eso tienes tal fijación con mi condición de ex sacerdote? Lo pregunto porque lo repites varias veces en tu ¿artículo? y no veo en qué modo afecta a lo acontecido. Por cierto, la captatio benevolentiae, amén de ser empleada por curitas pillines en imitación de la escuela paulina, fue empleada siglos antes por culturas que poca relación decían con la cristiana. ¿Tú también pasaste por un seminario?
- Primera fabulación de la serie: te la detallo, portento investigador, aunque esa anécdota de mi vida ya está publicada, en papel y en dos libros además, parece que tus fuentes sólo alcanzan lo digital. Cuando por el año 97, creo recordar, me embarqué en el proyecto de editar un libro compuesto por relatos, poesías, escritos de gentes famosas, populares o conocidas, contacté con todo personaje que pude, siendo uno de ellos la señora Ana Botella. Muchos respondieron, otros no, y Ana Botella fue una de las que respondió, aunque con tanto retraso que cuando mi madre me pasó la llamada en mi casa de Albacete y escuché que se trataba del Gabinete de la señora Ana Botella, pensé que era mi hermana Sole haciendo el tonto, gastándome una broma, y contesté una serie de barbaridades o gracias que no vienen al caso. Nadie me amenazó ni a mí ni a Acumán, otra vez ¿dónde has leído que nos amenazara la señora del presidente? Estuve a punto de meterme en un lío porque se supone que yo representaba a una editorial solidaria que podía, por mi metedura de pata, perder la colaboración de una firma tan importante en aquel momento como la de Ana Botella. Y en parte me metí en un lío, porque a Ana Botella, supongo, le pasarían noticia de lo sucedido o directamente su jefa de Gabinete o como quieras llamarlo –que sí existía, aunque doña Sonsoles no lo tenga- estimó que bastaba con un simple adhesión a la causa sin enviarnos su escrito. Y así fue. El libro salió a la luz en colaboración con Edisena S.L., con sede en Requena, y su título fue Algo de cada uno, (ISBN 84-89887-19-5) en el que escribieron más de

cuarenta firmas, unas más famosas que otras, y al que Ana Botella apoyó tal y como figura en el apartado de Agradecimientos del libro, en el párrafo sexto. La señora presidenta no atemorizó a nadie, todo lo contrario, apoyó –de forma tibia, cierto, pero apoyó- a una asociación benéfica. Todo lo demás es fabulación del señor espía, incondicional de Cuarto Milenio, aprecio.
- Te copio, espía, y no sabes cómo me duele: ¿Hay alguna constancia documental de estos intentos de asesinato? ¿alguna denuncia? ¿algún dato o impresión inferido de su trato con Ernesto Koplowitz que le haga creer que éste realmente está en peligro de muerte? ¿Algún chismorreo de la web siquiera?. Éste es el primer "descuido" de la trapisonda argumental. Sí que la hay, por supuesto, y se contiene en el libro, con pelos y señales, partes de lesiones, fotocopias de las denuncias y de los procedimientos que se originaron por ellas, incluyendo atestados policiales. Evidentemente en parte por toda esa documentación don Ernesto Koplowitz está teniendo problemas para publicar el libro, no porque en él haga lo que tú, acusar sin pruebas documentales. Don Ernesto tiene una página web, puedes contactar con él y pedirle te confirme si es cierto todo lo que cuento, yo no te voy a copiar lo del libro porque no es mío y porque no estoy autorizado por don Ernesto, pero si tanto interés tienes en ayudarle pide que te de autorización para publicarla aquí. Lo que sí puedo decirte, porque las sentencias son públicas, es que mires las que se publicaron del procedimiento seguido, por ejemplo, en el Juzgado de instrucción número 35 de Madrid en enero de 1999 y que lo tienen por uno de los protagonistas. Vida mía, ¿tú te crees que yo iba a pillarme los dedos en algo tan simple?
- Has repeinado archivos y bases de datos, cómo no, un espía que se precie las tiene en abundancia y de calidad, y no has encontrado a Carlos Albujer. ¿Y a mi madre, la has encontrado, Rosario Gandía Monteagudo? Lo pregunto porque tampoco aparece en el Google y a veces tienen dificultad para encontrarla en los archivos de la Seguridad Social y Hacienda. Pero, claro, lo que no aparece en Google, como dice mi amigo Alfonso Ruiz de Aguirre, no existe.
- Corazón, en el libro, que no me he leído porque tiene más de 300 páginas, sólo he ojeado, aparecen varios Carlos. Yo no soy asiduo de la prensa rosa y no conozco ni al primo Carlos bueno ni al primo Carlos malo. Aquí viene la cuña publicitaria, para chulearme, que es lo que se nos da bien a los tontos peligrosos: en diciembre estuve comiendo con el Marqués de Griñón, codo con codo, y me enteré de quién era cuando se montaba en el coche y mi mujer decía que iba a llamar a su madre enseguida para contárselo. Fíjate si sé quién es el Grunbaum del que hablas. Pero que me demande, que, te digo lo que a todos, temblando estoy. Aún no he perdido ningún juicio en el que se me ha demandado, y han sido varios, como sabrás por tus inmensas bases de datos.
- Tienes razón en una cosa, menos mal, en que no me interesa quién habla en nombre de Alarcón y Asociados Abogados. Pero a Ernesto Koplowitz sí. Yo he resumido mucho lo sucedido porque mi blog no es de defensa de las causas perdidas del mundo, para eso ya existen otros foros. En mi blog, que es muy personal, muy modesto y muy para los amigos, cuento las cosas que me pasan o que me preocupan para el público que quiera leerme, sin tener que respaldar cada frase con un acta notarial. No comprobé si existía Alarcón ni Albujer, porque yo no soy detective ni espía, me dedico a otras cosas, pero sí llamé al interesado para preguntarle, y él me confirmó que no le extrañaba nada y que se lo estaba esperando, entre otras muchas cosas que no voy a poner aquí porque ya estoy aburriéndome yo, imagínate quien haya osado llegar hasta aquí.
- Yo no alcanzo a ver la diferencia entre el mensaje de Carlos Albujer y el de Alarcón y Asociados, en ambos casos se trata de una advertencia. ¿No es lo mismo? Bueno, pues muy parecido. ¿En qué se parece una patata a un tomate? En que ambos son rojos, excepto la patata. Es para desengrasar, no te lo tomes a mal, espía.
- Como que ¿cómo voy a recibir el pago del soborno? Hijo mío, si lo dices al principio de tu artículo, ¿no nos pidió el número de cuenta? Eso pasa por escribir sin releer. Pero no

te preocupes, a Cervantes le ocurría igual y hay dos personajes que mueren en la primera parte del Quijote y luego, en la segunda, aparecen tan frescos. Veo que no soy el único atolondrado. Y más cierto que mi público es "confiado, benevolente y entusiasta" pocas cosas puede haber, por eso la cantidad de amenazas, denuncias y problemas que he tenido con mis escritos (¿Has buscado bien en internet y en otras bases de datos?, ¿seguro que has hecho bien los deberes?). Por cada aplauso que recibo antes me han pitado diez veces, hijo de mi vida, en expresión resabiada de mi época curil.
- Hasta mi vecino recién nacido habría sabido leer en mi ¿artículo? que espero con tanta confianza recibir el dinero del soborno o donativo de Carlos Albujer como en la combustión espontánea de De Juana Chaos.
- Los responsables de tal decisión no son los componentes del Consejo Editorial de Acumán, órgano que no existe y que se inventa nuestro glosador de lujo, el espía que surgió del frío, sino todos los que tomamos decisiones en Acumán. Yo me manifesté en contra, y acepté y compartí la mayoría, que para eso dejé la disciplina jerárquica hace años. En ningún sitio he ocultado que soy el director de Acumán, por lo tanto, yo soy el responsable último, no le cargo el mochuelo a mis compañeros. Y cierto es que se trata de la primera vez que no me secundan, y pensándolo en frío veo que tenían toda la razón del mundo.
- Y ahora vamos al colofón, ¡por fin!. Yo retengo ilegalmente tres copias sin permiso del autor, ¿dónde o quién te ha contado eso, fénix de los ingenios? Anda, ve a las fuentes antes de hacer el ridículo y pregúntame a mí o a Ernesto Koplowitz. O a Sergio, que lleva un par de días escondido debajo de la cama por temor a que los sicarios del primo Carlos –el malo, se entiende, o el bueno disfrazado de malo para liar más a la policía cuando descubran el cadáver salvajemente torturado-. Sergio es mi tonto particular y lo utilizo para estas cosas, para esto y para negociar con los mismos hampones que arden en deseos de conocer tu identidad el precio de las copias retenidas ilegalmente y mi precio personal. Fue Sergio quien me pidió que dejara constancia de lo que había hecho, y lo ha hecho, no te quepa duda, lo que ocurre es que Sergio, como otros muchos colaboradores de Acumán que corrigen o maquetan a distancia, no reside en Europa, ¿llegan hasta él tus bases de datos?
Punto final: estoy de acuerdo contigo, captatio benevolentiae al canto e invertida, soy un traidor y un delator porque me he traicionado y delatado a mí mismo. Lo de tonto peligroso no te lo discute ni el lucero del alba.
- Firmado: Miguel Ángel Carcelén Gandía (sin seudónimos)
Voy a enviar copia de esto a los que estuvieron presentes en la reunión y a Ana, que no pudo estar, para que corrijan lo que crean que es incorrecto, así también los hago a ellos partícipes de mi villanía. Cuando me devuelvan conformidad lo pongo como comentario. A Gatopardo le he escrito preguntándole si todo esto es una broma o qué, si no lo fuera, que intuyo que no, hasta ahí me llega la inteligencia, tendré que contestar su artículo de ayer, y, la verdad, con lo poco que me gusta perder el tiempo en estos cabildeos...
Me hacen una precisión que incluyo: Acumán es la única editorial solidaria europea que destina sus beneficios de forma íntegra a proyectos de ayuda al desarrollo en países empobrecidos. Está formada exclusivamente por voluntarios y guarda recibo de todas la entregas de dinero hechas a las ONGs o similares que se detallan en su página web. Acumán no ha recibido jamás ninguna subvención ni ayuda de ningún organismo público ni privado y con Acumán ha colaborado gente tan tonta como para dejarse engañar como Mario Benedetti, Pilar Cernuda, Matilde Artés (Presidenta de las Madres de la Plaza de Mayo), Hilario Camacho, José Bono, Pedro Casaldáliga, José Luis Coll, Gloria Fuertes, Pablo Guerrero, José Antonio Labordeta, Fernando Lalana, Manu Leguineche, Pérez de Tudela, Vázquez Figueroa, Bernabé Tierno, Serafín Zubiri y un largo etcétera.

Señor Carcelén: omitamos el ramillete de alusiones a su vida íntima, a su familia, y a sus ideas y creencias. Me interesan tanto como las de Ernesto Koplowitz y su caniche, si hay o hubiere. Usted no es interesante.
Usted ha dicho lo que ha dicho y entre el amén y amén de las ovejas, dos cabras le hemos soltado sendas coces en los morros. Así es que no voy a repetir lo que ya he dicho. Lo único que tengo que añadir es que es usted un mentiroso compulsivo con la verborrea de un telepredicador, y otra cosa: no me siga mentando los fines de Acumán, porque los benefactores exhibicionistas me producen acidez de estomago.

¿Cómo que omitamos ese ramillete? ¡Si es lo único que
no quita el sueño de todo el texto! Yo sé que no soy interesante, por eso me llama tanto la atención que haya sido protagonista de las críticas de dos cabras, ¡¡dos!! en esta ocasión, en otras, bastantes más. Y me callo que ya dudo bastante de que se trate en realidad de dos, porque el espía escribe igual que Gatopardo (habrán ido a la misma escuela, qué mal pensado soy). Me mentiroso compulsivo ya me trataron, sin resultado, claro. De telepredicador no, pero estoy en lista de espera. Y te mento los fines de Acumán porque no todos los que leen esto conocen de qué va la cosa y porque, copio por si te suena: "¿Una iniciativa anónima para recaudar fondos sin decir de donde ni para qué, con destino anónimo estaría más en consonancia con el Evangelio?
¿Para que los autores que colaboramos no supiéramos cómo, quién, ni para quién?
¿Para que nos alcanzaran las indulgencias plenarias por nuestra buena fe y la observancia de la doctrina cristiana?
¿Y los que somos ateos, como es mi caso, y con el colmillo retorcido, que investigamos antes de fiarnos?
Vamos, que no es usted más tonto porque no entrena...".
Lo escribió alguien muy cercano. De todas formas me anoto lo de benefactor exhibicionista, me ha gustado. A otros les gusta aparecer en las estadísticas como los que más premios literarios han ganado, o como poseedor de uno de los blogs más leído en lengua castellana. A mí me gusta aparecer en esas estadísticas como alguien que da todo lo que puede, que nunca es suficiente, a gente que se muere de hambre. Ésa era la moralina final. Te repito, perdón, te digo, ya no voy a hacer más comentarios. Esta forma de perder el tiempo habiendo otras necesidades no me es grata.

Miguel Ángel: eso que citas lo dije yo respondiéndole a quien solicitaba que Acumán

fuera casi clandestino en nombre de la moral cristiana, y no sólo lo dije entonces, sino que me reafirmo ahora.

El caso escueto es que habéis tomado una decisión que a mí y a El espía que surgió del frío nos ha parecido inmoral, y para justificarte nos hablas de fines altruistas a gogó, y mil peripecias que ya he leído en tus libros.
El hecho escueto es que todos los fines de Acumán y sus métodos me han parecido acordes con la ética hasta el día 23 que leo tu artículo, y a partir de ese momento me niego a hacerme cómplice con vuestra decisión por parecerme perfectamente repugnante, y de la misma manera que he defendido a Acumán públicamente, he dicho cuál es mi desacuerdo públicamente.
Y no soy El espía que surgió del frío, que se parece a mí en el estilo como un huevo a una castaña por mucha ilusión que te haga encontrar similitudes.
¡Venga, ánimo, que tú si eres demócrata y tienes a la mayoría contigo!

Ole, ole y ole. Sr. Carcelén, es usted un fenómeno. Porque leyendo el post parece usted un individuo altamente peligroso para la sociedad, pero ha sido capaz de desmontar punto por punto la inverosímil historia que nos cuentan aquí. Enhorabuena, no pierde usted el tiempo respondiendo, no; Debe quedar su imagen limpia, por si quedan dudas. Y que le voy a contar de lo de curilla y esas cosas...es una simple falta de respeto de quien escribe, que tengo la impresión de que le conoce a usted personalmente y de que es el odio quien guia sus pasos.
Por otro lado, si es así como usted describe su editorial, ánimo y adelante. Pero, aunque destine todos sus beneficios a fines sociales, ¿De verdad en España una editorial puede llegar a ganar dinero? Saludos

Vaya rifi-rafe tenéis montado.
Supongo que se escribe así: rifi-rafe, porque de hacerlo mal me veo en el paredón gatuno.

La cuestión de fondo y, por lo que veo, es si el fin justifica los medios.
Para mí la cosa está clara aunque en ello no mojo un pelo.
Soy tan solo un vulgar y asiduo lector de la gata y cliente de Acumán, presente y futuro, espero.
Me gustaría que tanto unos como otros reflexionaran antes de llegar a finales tan onerosos para una buena causa.
Me gustaría saber lo que piensa el señor Carcelén sobre eso, sobre si el fin justifica los medios. También me gustaría saber si la gata no ha traicionado nunca su premisa, la que defiende con tanta saña. Vamos... si nunca ha utilizado un mal medio para conseguir un buen fin. Y si ha sido así, si se ha arrepentido de ello.

Aparte, claro está, de todo esto, le diría, señor Carcelén, que tener colaboradores tan listos o tontos (nunca se sabe) no significa nada.

Un abrazo a los dos.

Los actos de desagravio de las masas enfervorizadas son los habituales. No te preocupes. Ocurre siempre que uno de Planeta se pasa a Alfaguara o uno de Plaza Janés se pasa a la Esfera de los Libros... Como en el Opus Dei, en los Legionarios de Cristo... ya sabes como es esto de los rebaños y los pastores. ¿No has leído la maldición a Spinoza? ¡Ah, qué prosa! Búscala y la lees.

Miguel Ángel Aguilar, ¿no eres tú el que lleva la página web de albaceteliterario? Pregunto porque hemos intercambiado varios correos, y si no todos conmigo algunos sí con mi compañera Pilar o Mariché, y es la primera vez que te oímos decir que has sufrido la falta de ética de Acumán. Hasta el momento el tono había sido muy cordial, y recuerdo que la última vez que nos comunicamos fue hace un par de semanas en un correo en el que nos pedías la portada de uno de nuestros libros con mayor resolución de la que te habíamos mandado para colocarla en tu página web. Si tan poca ética tiene Acumán ¿por qué nos pediste esa portada y por qué están colgados algunos de nuestros libros en tu página? Y si no están lo han estado. ¿En qué consiste la falta de ética que hemos tenido contigo? Yo voy todos los fines de semana a Albacete y no me importa charlar cara a cara contigo para que me expongas tus razones y para que me expliques por qué le vas diciendo a autores que se interesan por la publicación que Acumán edita de pena. Uno de ellos ha editado recientemente con nosotros al ver que lo que decías no era cierto. Se llamaba hipocresía tener dos caras, y veo que con nosotros la estás teniendo. Y no quiero pensar que eso sea porque la editorial o asociación o lo que sea en la que tú colaboras llamada Quevayanellos le haya ofrecido a muchos autores publicar en autoedición o coedición y al menos tres de ellos hayan preferido Acumán. Y tampoco quiero pensar que sea porque en el libro de Las Verdaderas Mentiras, de Miguel Carcelén, que defendiste incluso frente al veto de la librería diocesana Biblos de Albacete, como puede leerse en este blog con todo detalle (http://miguelangelcarcelen.blogia.com/2006/052102-un-mal-comienzo.php) se criticase a tu tío sacerdote Javier Avilés por cosas que están demostradas hasta la

saciedad.
De todas formas, si no es por eso, no entiendo por qué a nosotros nos das la cara buena y luego nos criticas. Agradecería que nos dijeses a todos en qué ha faltado Acumán a la ética contigo.
Lo que sí te agradezco es que no firmes con seudónimo.

Estimada Marta Martín:
A ver, sí, soy el Miguel Ángel de Albaceteliterario.com (ni antes he firmado con pseudónimo ni ahora lo hago "MAAguilar" es la forma habitual con la que firmo en prensa artículos sin demasiada importancia).
No puede ser la primera vez que me oyes o lees hablar sobre la falta de ética de Acumán, porque antes de hacerlo público en ningún medio (el comentario que suscita tu

respuesta es, de hecho, el primero que he publicado al respecto, y ya ves que al respecto de otro tema y habiendo pasado bastante tiempo de por medio) lo hablé con una de vosotroa de Acumán por e-mail (espero conservar esos e-mailes) haciéndoos saber mi malestar por el asunto en cuestión.

¿Qué asunto en cuestión?

Pues que en un e-mail personal hacia vosotros os comentaba mi experiencia directa con el libro de "Las Verdaderas mentiras" en una librería de Albacete, y, al poco tiempo, me encuentro con un fragmento de ese e-mail reproducido en Internet por uno de vuestros autores (en concreto por Miguel Ángel Carcelén) citando que se trata de un e-mail mío a Acumán, etc. De sobra conoces que me quejé de que parte una comunicación personal hacia Acumán se hiciera pública por uno de vuestros autores (pues como tal lo hizo, no como miembro de Acumán, lo que tampoco hubiera sido nada ético, pero en fin) incluyéndola en uno de esos textos denuncia que gusta de propagar, y yo que se lo alabo. Pero no con mis textos. Y la culpa no fue –jurídica y éticamente- de Carcelén, sino de la destinataria del e-mail: Acumán. ¿Qué es eso de ir dando e-mailes privados a los autores para que estos los hagan públicos dando pelos y señales?
Esta pública explicación que me pides ya la conoces –si no tú, sí la compañera con la hable este tema en Acumán- de modo que me sorprende tu sorpresa. Y no quiero pensar que se trata de una marca de la casa sino que tú, en concreto, lo ignoras (eso ya sería cuestión de comunicación interna en Acumán).

Me comentas que te extraña mi comentario frente a la cordialidad de trato que mantenemos y que "Si tan poca ética tiene Acumán ¿por qué nos pediste esa portada y por qué están colgados algunos de nuestros libros en tu página?".

Bien, te lo explico.
Yo tengo un extraño concepto del periodismo y el tratamiento de la información, y desde Albaceteliterario.com intentamos dar a conocer y publicitar todas las novedades editoriales de autores de Albacete que vayan teniendo lugar. Si yo decidiera que publicitamos los libros en función de lo simpáticos, antipáticos, éticos o desafortunados que son sus autores o editores muy triste criterio informativo y periodístico me parecería ese.
De modo, que el que yo haya tenido una desafortunada experiencia (la arriba mencionada) con vosotros no quita para que haga mi trabajo lo mejor que puedo y sé. Y lo más cordial y educadamente posible. No me parece adecuado andar echándoos en cara aquel asunto cada vez que trate por cuestiones informativas con vosotros, francamente. Igual que no me parece inadecuado haberlo mencionado, por vez primera aquí en público bastante tiempo después, porque éste (la ética) es el tema de este artículo de la web de Gatopardo. No quisiera haber entrado en detalles, tan sólo dar testimonio de que entiendo ciertas posturas aquí descritas a raíz de esa experiencia mía con vosotros. Por lo demás, sólo puedo decir que cuando os he pedido información o un jpg de alguna portada de algún libro vuestro me habéis atendido con total diligencia y rapidez.
Entiendo que lo cortés no quita lo valiente, y no soy yo de andar a la greña con tema como estos, como has podido comprobar. Quizás, si hubiera sido Carcelén ya hubiera publicado uno o más artículos al respecto. Será cuestión de talantes, no sé.

Más cosas: No tengo el menor inconveniente en quedar contigo personalmente, por supuesto, siempre que a ambos nos cuadre el día y la hora y tengas ese gran interés ;-)
Me comentas que quieres que te explique (como dándote explicación, creo entender) por qué "le vas diciendo a autores que se interesan por la publicación que Acumán edita

de pena". No tengo recuerdo alguno de ir diciéndole (¿te agrada esta forma verbal, no?) a ningún autor que Acumán edita de pena. No obstante, y siéndote completamente sincero como acostumbro, te diré que tengo una memoria desastrosa (no sobre esto, sino sobre mis quehaceres y cosas en general) de modo que, en caso de tú tener constancia de algún comentario mío al respecto te ruego que me lo hagas saber porque, aunque no soy ningún fan de vuestras ediciones, intento –por norma- no hablar mal públicamente de ninguna editorial por encargo desde que hemos motado quevayanellos.com, por pura elegancia. Si me he traicionado te ruego que me lo hagas saber, porque no sería una noticia grata para mí mismo en primer lugar). La última vez –que yo recuerde- que he hablado de Acumán con un autor ha sido con Ricardo Espín, quien me comentó su intención de publicar con Acumán, a lo que yo le asentí, le di la enhorabuena y le dije que me parecía muy bien.

Ya ves que no soy hipócrita ni que tengo dos caras (a no ser que consideres hipocresía mi compostura profesional de no darle una opinión detallada y sincera a Espín acerca de mi personal y prescindible parecer sobre vuestras ediciones).

Dices que tres autores a los que yo les he ofrecido "algo" (no sabes, ni tú ni yo¿?) el qué exactamente) han preferido Acumán:
Te ruego que me digas de qué tres autores se trata (si lo prefieres por e-mail privado, porque quizás esos supuestos autores que mencionas no gusten de ser aireados en conversaciones tan sórdidas o equívocas como esta) porque yo sólo tengo constancia de haber hablado de este tema con Ricardo Espín (y ya cuando "El Oráculo de la maldad" estaba muy en marcha en Quevayanellos). Es por saber si te has equivocado, si mi memoria es equiparable a la de un pez o si mientes, que espero no sea así.

Sí crees que una personal inquina motivada por el libro de los curas es lo que me "guía" (ya te acabo de comentar con pelos y señales cuantas "explicaciones" me has pedido) ¿no crees que esa inquina que me atribuyes no concuerda mucho con la defensa que os hice, y con la publicidad que en Albaceteliterario.com hay y habrá de ese y otros libros vuestros?

Estimada Ana, intento ser más serio que toda esta ristra de posibilismos con lo que tú juegas. No por nada, sino por mi propia salud mental.

Recibe un cordial saludo.

PD: Lo de que me aclares si algo de lo que digo se debe a mi pobre memoria no es ninguna ironía, es totalmente en serio.

Usted que conoce el Código Penal dígame bajo qué delito están tipificadas las siguientes irregularidades:
1)Ejercer actividades económicas y no declararlas a Hacienda.
2)Recaudar fondos para supuestas actividades benéficas sin tener ningún permiso legal.
3) Derivar esos fondos a cuentas bancarias particulares.
4)Ocultar sistemática y dolosamente a Hacienda toda información de los beneficios que se obtienen de una actividad económica y de una asociación de caridad sólo reconocida por los listos que la crean y los ingenuos que la mantienen.
4. Negarse a formalizar contratos con autores,a comunicar CIF o datos legales de su "empresa", "asociación" o lo que sea el chiriguito que ha montado.
5. Ocultar número de ejemplares de cada tirada que publica
6. Negarse a dar factura de los libros que vende al comprador.
A mí me parece esto una estafa al erario público y a los particulares, pero usted dirá, que es el especialista en escapar de inspecciones fiscales y en hacer rentable al tercer mundo.
Y cállese hasta que no someta la cuenta bancaria que está a nombre de Miguel Ángel Carcelen Gandía y donde todos los incautas ingresan sus "donativos" (o lo que sean) y que usted tiene la cara dura de llamar "cuenta de Acumán" a una auditoria en toda regla.

A PARTIR DE AHORA, PROHIBO A ACUMÁN CUALQUIER EDICIÓN PRESENTE O FUTURA DE MIS RELATOS

In memoriam Giovanni Falcone, Francesca Morvilio, Rocco Di Cillo, Vito Schifani, Antonio Montinaro, Paolo Borsellino...

La mafia es una asociación criminal, que cuenta para la consecución de sus fines con sicarios dispuestos a matar, profesionales, políticos, y funcionarios, en todas las áreas, capaces de ponerse a su servicio, secundados por una amplia masa de ciudadanos pasivos que consideran su bienestar y seguridad por encima de sus deberes éticos.
La mafia se ha extendido a los países en los que ha encontrado este magma social beneficioso: despiadados asesinos, políticos y empresarios desprovistos de escrúpulos, gente que calla y otorga a cambio de favores y fines que considera sublimes, y ciudadanos capaces de la mayor vileza con tal de salvaguardar su tranquilidad.
Miguel Ángel Carcelén, director de Publicaciones Acumán, editorial cuyos beneficios se destinan a causas solidarias, muestra de forma palmaria esa idiosincrasia en su artículo "Prácticas mafiosas", atribuyéndoselas muy cristianamente a los representantes de las hermanas Koplowitz, que los han amenazado para que no publiquen el libro de memorias de su hermanastro, Ernesto Koplowitz . A cambio, han prometido un donativo, y Acumán ha aceptado el trato.
Puesto que considero que la posición de Acumán cae de pleno en el comportamiento mafioso, y en memoria de todos los que cayeron luchando contra la mafia, a quienes me debo moralmente, prohibo a Publicaciones Acumán cualquier edición de mis "Relatos" presente o futura. Y ruego a quien tenga pensado comprar mi libro que no lo haga.
Me daría demasiada vergüenza contribuir con Publicaciones Acumán, a partir del momento en que acepta el chantaje, el soborno, y los reivindica en nombre de sus fines.
No hay ningún fin que justifique la vileza de los medios que se utilicen para alcanzarlos.
Ninguno.

Respeto tu decisión, aunque no la comparta, ya te lo he dicho en privado. Lo que no puedo respetar es la glosa tan libre y el extracto que haces de mi artículo por lo que respecta a las amenazas, por llamarlo de alguna manera, y mucho menos la falsedad de esta simplificación tan hiriente y tan impropia de ti: "A cambio (de no publicar el libro) han prometido un donativo, y Acumán ha aceptado el trato". No es que te lea siempre, pero es la primera vez que veo que tergiversas de forma tan palmaria una frase para respaldar tus argumentos.
Pero insisto, respeto tu decisión.

Fecha: 24/01/2007 23:09.

Autor: Gatopardo

El artículo "Practicas mafiosas" está enlazado para que se pueda leer íntegro.
Pero concreto cómo he llegado a la conclusión de que habéis aceptado un trato que tiene en cuenta vuestra seguridad y los fines que os interesa defender:
"Olvido decir que don Carlos Albujer me había comentado que independientemente de nuestra decisión le había gustado mucho la idea de Acumán y si le pasaba un número de cuenta contribuiría de forma económica con nosotros. Ya le dije que sí, que encantado de la vida. Me callé que los sobornos siempre son bien recibidos cuando no se les sigue el juego." (en ese punto aún no habías claudicado ante la opinión de la mayoría y seguías queriendo publicar un libro que te parecía interesante por la denuncia que contenía) Y ahí si dices que te pide la cuenta. Aunque luego mantengas que no te la ha pedido. Y, efectivamente, no creo que te la pidiera: no suelen hacer así las cosas.
Párrafo final de tu articulo "Prácticas mafiosas":
"Y otra cosa, el libro no se publica, pero la colaboración económica de don Carlos Albujer, si es que llegara, nos la quedamos (contra el parecer de la mayoría de Acumán); es dinero sucio, pero cuando de sacar a niños de la miseria se saca no importa su grado de limpieza, ¿qué queréis?, me he vuelto así de desaprensivo."
Cualquiera que claudique ante una amenaza mafiosa por miedo, por conveniencia propia o por otros intereses secunda los intereses de la mafia. Y no me cabe ninguna duda de que es cómplice y colaborador necesario.
Y cualquiera que sea cómplice y colaborador necesario de la mafia me da igual todos los proyectos sublimes que financie, porque la mafia, a través de fundaciones, para desgravar y lavar dinero negro, realiza una obra filantrópica ingente, mayor que la que vamos a hacer nosotros en toda nuestra vida, y , a pesar de eso, sigue siendo mi bestia negra.
Porque los medios y los métodos no me son indiferentes.

Yo hubiera respetado tu decisión si hubieras dimitido de tu puesto de director de Acumán para mostrar tu desacuerdo con la decisión mayoritaria.

Siento de verdad que te encabezones en una película de mafiosos que sólo tuvo atisbo de principio porque, entre otras cosas, ni Publicaciones Aumán es la Editorial Planeta, ni creo que nuestras arcas se vean favorecidas por soborno alguno. Casi todo el mundo que ha leído el artículo, el mío, lo ha interpretado como lo que es sin buscarle tres pies al gato; y no hace falta ser especialista en novela negra para, como tú bien dices, saber que los mafiosos no van pidiendo números de cuenta. Si no tienes dificultad en reconocer que es de todo punto improbable que un mafioso me pida el número de cuenta, ¿por qué te tomas al pie de la letra cada frase del artículo, especialmente ésa? Para tu tranquilidad, ni él me pidió número de cuenta alguna -supongo que andaría pensando en bolsas de basura negras- ni yo tuve oportunidad de dárselo. Y no dimití de Acumán porque me creo eso de la democracia, aunque yo sea el director, y porque sé que a veces me emperro en ideas que no son buenas y cinco cabezas piensan mejor que una sola, y porque la gente que colabora con Acumán es muy de fiar y yo no soy dado a pataletas. Prefiero que prevalezca la opinión de la mayoría, aunque yo sea el responsable último, porque una labor como la de Acumán está por encima de esas cuestiones. Último dato: cuando se decidió si se publicaba tu libro, un libro con seudónimo, no hubo unanimidad, pero se aceptó la decisión de la mayoría también, y nadie dimitió. Si cada vez que alguien no está de acuerdo tiene que dimitir, Acumán no llevaría casi doce años funcionando. Esto es una editorial solidaria modesta, no un Ministerio. Pero, en cualquier caso, ya no voy a hacer más comentarios. Que sea la gente la que lea los artículos y decida qué clase de personaje vil, filántropo de pacotilla y mafioso empedernido soy.

Miguel Ángel: Pensabais publicar un libro que os pareció interesante. Ante las amenazas, decidisteis no arriesgaros, no seguir adelante con la edición. Cedisteis al chantaje. Y que conste que me da igual quien sea el autor.
Yo no soy demócrata: ni cuando más del 97% de los españoles votaban "sí" a Franco ni ahora, cuando la mayoría de los comentaristas consideran natural ceder y plegarse a las exigencias de unos mafiosos -Y no fui yo quien los denominó así, sino tú- y aunque la mayoría se extrañe que vuestra decisión me provoque una profunda repugnancia.

Que conste que yo no me meto con nadie, que no es cosa mía apostar en partidas ajenas sin saber si es póker o mus lo que se juega. Y más tras una vivencia de dos años viendo volar las bofetadas por internet, prefiero olvidarlo. Lo que sí digo es que desde mi experiencia personal, cada vez que he dado con un salvador de la raza humana al borde de la canonización, he terminado viendo que era otra cosa bien distinta, a la segunda mirada. No sé si será el caso o no, ni juzgo a quien no conozco de nada, ni tengo por qué poner en duda los fines bondadosos y altruistas de nadie, igual existen, igual son ciertos. Sea como sea, en este caso en particular, con los artículos de unos y otros sobre la mesa, efectivamente estoy de acuerdo con usted, gatita, y yo también detecto un tufillo extraño a cuerno quemado en todo esto, el que suele encontrarse en los sótanos de las tiendas al por mayor de amor universal.

LOS CUATRO LISIADOS

Un mudo a nativitate,
y más sordo que una tapia,
vino a tratar con un ciego
cosas de poca importancia.
Hablaba el ciego por señas,
que para el mudo eran claras:
mas hízole otras el mudo,
y él a oscuras se quedaba.
En este apuro trajeron
para que los ayudara
a un camarada de entrambos
que era manco, por desgracia.
Éste las señas del mudo
trasladaba con palabras,
y por aquel medio el ciego
del negocio se enteraba.
Por último, resultó
de conferencia tan rara
que era preciso escribir
sobre el asunto una carta.
«Compañeros, saltó el manco,
mi auxilio a tanto no alcanza;
pero a escribirla vendrá
el dómine si le llaman.»
«¿Qué ha de venir, dijo el ciego,
si es cojo, que apenas anda?
Vamos: será menester
ir a buscarlo a su casa.»

Así lo hicieron y al fin
el cojo escribe la carta;
díctanla el ciego y el manco,
y el mudo parte a llevarla.
Para el consabido asunto
con dos personas sobraba;
mas como eran ellas tales,
cuatro fueron necesarias.
Y a no ser porque ha tan poco
que en un lugar de la Alcarria
acaeció esta aventura,
testigos más de cien almas,
bien pudiera sospecharse
que estaba adrede inventada
por alguno que con ella
quiso pintar lo que pasa
cuando juntándose muchos
en pandilla literaria,
tienen que trabajar todos
para una gran patarata.

Esto me ha recordado algo que se contaba de una reunión entre un sordo, un ciego y un cojo y que terminaba así: "Pasos oigo" -dijo el sordo- "Sombras veo" -replicó el ciego- "Yo ya corro" -gritó el cojo-... Y no recuerdo por qué se cuenta que estaban reunidos ni para qué... Y espero que no me despellejéis demasiado por ello, cosas de la asociación libre. Y a todo esto, la situación puede que describa ciertos mundos literarios -se me ocurren algunos- pero, ¿no os parece que también viene al pelo para mundos políticos o de politicastros?

MONJITAS, PATANES, HAMPONES, EXTREMEÑOS... Y EL CORTE INGLÉS (2)

A Krusher, en quien tengo puesta toda mi complacencia. Y cómo no, a don Ricardo, a sueldo de Moscú . Nos vemos en el muro o en el

paredón. Lo que haga falta.

Cuanto más alto sube el mono, más se le ve el culo (Refrán inglés)

En España, las riadas y los ministros de Defensa son desasatres endémicos, incontrolables, pero soportados con bovina resignación por el ganado patrio. En dos legislaturas nos ha llovido el Nelson de Perejil, ese capellán castrense que fue José Bono y, ahora, José Antonio Alonso o qué-pasa-con-un-juez-cuando-se hace-chica-Bond. Al Centro Nacional de Inteligencia le ha caído aquella maldición de Gatopardo: "*Al que haga algo malo, que le aten un tonto a un brazo*", y aún no ha purgado sus muchos pecados.

La situación de la seguridad nacional informática es la siguiente: El CNI español (que ya logró el acceso a todas las versiones de Windows y Office) va a tener acceso y a disponer del código fuente de Microsoft Office, según un acuerdo entre Microsoft y el CNI que se inscribe en el programa "Government Security Program", según el cual la compañía informática comparte su codigo fuente con ciertos gobiernos u organismos por motivos de seguridad No sabemos de quién. Desde hace dos años a Microsoft se le están "perdiendo" por la red copias del código fuente de Windows NT y Windows 2000. Pero la compañía es optimista, como sólo lo puede ser un estadounidense, y Tom Pilla (su portavoz) dice que es un trocito de nada lo que se ha pirateado y que el FBI ya está en pos de los malhechores. Con esto y, sabiendo que el trozo de código restante, va a pachas con el Centro de Inteligencia Español, podemos estar tranquilos.

El organismo adscrito al CNI que va a hacerse cargo del código fuente y, por tanto, va a poseer el sistema de encriptación y desciframiento de todos los sistemas operativos informáticos en España (presentes, pasados y futuros), es el Centro Criptológico Nacional. Este Centro Criptológico Nacional (no se pierdan esta página, que parece un anuncio de Fanta) es *"responsable de velar por el cumplimiento de la formativa relativa a la protección de la información clasificada en los aspectos de los sistemas de información y telecomunicaciones, de acuerdo a lo señalado en el artículo 4.e) y f) de la Ley 11/2002, de 6 de mayo"* y, asimismo, es la autoridad máxima de certificación criptológica de seguridad de Tecnologías de la Información". El Centro Criptológico Nacional queda adscrito al Centro Nacional de Inteligencia y comparte con éste medios, procedimientos, normativa y recursos.

Bien, pues este dechado de virtudes, ha decidido, como no podía ser menos, pasarse por el Corte Inglés y su Desparpajada Sección Informática para pedir ayuda y socorro en la organización del PKI .¡Dios nos asista!

El Public Key Infraestructure (ya ven que las habilidades angloparleras del presidente Aznar han dado su fruto) comprende todo lo relativo a las claves públicas que identifican y garantizan la firma electrónica de los ciudadanos que acceden a la Administración y Servicios Públicos. El que va a encriptar toda esa información es Informática El Corte Inglés y por el módico precio de 296.000 euros (IVA incluido). Es decir, que el Corte Inglés va a acceder a información de alta seguridad de todo el Estado, de todos los ciudadanos y todas las empresas de España y, además, se le paga. Por qué y cómo el Ministro de Defensa ha tomado semejante decisión es digno de análisis y reflexión. Que la prensa haya pasado de puntillas por este maridaje era de esperar.

Pero no se preocupen. Esto no va a llegar a nada. La Sección Informática del Corte Inglés sabe de claves lo justito para rellenar el crucigrama del ABC que lleva bajo el sobaco don Isidoro. Las páginas web de la Administración no creo que puedan funcionar peor de lo que lo hacen ya, pero veremos avisos tan sorprendentes como éste ***)** que aparecía en la página de la Fundación Ramón Areces, propietaria de El Corte Inglés, esta Navidad. Y, además, perfeccionarán, si es posible, la vulgaridad estética del *mezzogiorno* que abanderan nuestros gobiernos. La página web del Tesoro Público parecerá más estanco y expendeduría de Tabacos y la de Cultura será más boutique de hortera de barrio que nunca. Los españoles, en lugar de certificados telematicos,

recibiremos un número para participar en el sorteo de "Piratas del Caribe" y, descubriremos que, ante Hacienda, somos nuestros difuntos abuelos. En fin, que vamos a terminar en el Cuartelillo de la Guardia Civil más próximo solicitando fe de vida y certificado de adhesión al régimen al teniente de turno. Eso los vivos. Los occisos, extintos o macabeos, lo tienen aún peor: entre Archivos Estatales, Informática el Corte Inglés y Funeraria Desenterradora "La Memoria Histórica" están que no acaban de sentar cabeza.
Y es que El Corte Inglés ha decidido entrar de hoz y coz en el siglo XX.
El esquema estratégico ha consistido en ir a mear la puerta de PRISA y seducir a madame Ester Uriol, deslumbrante grisura del periodismo económico. No creo que Uriol, que se integra en el Departamento de Comunicación, llegue a pergeñar una explicación verosímil sobre algunos misterios de la contabilidad de El Corte Inglés, pero lo que sí es seguro es que trae de PRISA el espíritu de la casa. Así que no se sorprendan si, a partir de ahora, los empleados de Isidoro Álvarez andan a cuatro patas y a toque de silbato.
La reconversión de "rancio y vulgar" a "vulgar y agresivo" ya ocasionó un escándalo de calado: en su imparable carrera por soltarse la faja, El Corte Inglés llamó "conejas" a las madres de este país. Ángel Barutell (responsable de relaciones externas), en peligro de caer en un síndrome de personalidad múltiple, tuvo que presentar sus respetos y su chequera en el V Encuentro Mundial de las Familias para lavar la cara a la empresa y evitar la excomunión.
Porque, si el Vaticano hubiera lanzado un anatema sobre esta dinastía de plutotenderos, no sólo las carmelitas de Cáceres no hubieran podido ayudar a sus hermanos en Cristo a pagar condenas por pederastia, sino que se hubiera cometido una tremenda injusticia.
Nadie como El Corte Inglés ha mimado a las familias. Y para ejemplo, recordemos el caso del alcalde de Zaragoza, Juan Alberto Belloch (que también tuvo bajo su mando al CNI y al Capitán Khan, siendo ministro de Justicia e Interior). Ya saben que Informática El Corte Inglés es promotor de la Expo 2008 y socio principal de los proyectos Innovate y Milla Digital (la misma patochada ofimática que el PKI, pero con joteros de fondo) y que el honrado alcalde maño envió al Corte Inglés *"un doble mensaje de agradecimiento: por elegirnos como sede y por su compromiso con la ciudad en el ámbito de proyectos de nuevas tecnologías".* En realidad, el agradecimiento debería haber sido triple ya que El Corte Inglés (en su sección Viajes) tuvo la delicadeza de contratar a su mujer, Mari Cruz Soriano, con una función aún por determinar. El curriculum de esta dama incluye pavorosas apariciones en la televisión del tardofranquismo, dando la tabarra y la concertina en un piano de plástico blanco. Eso y un 44 de pie es lo único que he encontrado como digno de reseña.
No todo el mundo es tan agradecido y fino con el Corte Inglés como lo son Federico Mayor Zaragoza, su hijo Federico Mayor Menéndez y el Centro de Biología Molecular "Severo Ochoa" , subvencionado de la Fundación Ramón Areces. Federico Mayor Zaragoza, antiguo Director General de la Unesco, heraldo del Tercer Mundo (*"donde hay un pobre, allí que va Federico"*, que decía la Santa de Calcuta), ha tenido que padecer un auténtico *via crucis* ideológico para asumir la presidencia de Iberbanda, sociedad en la que participa El Corte Inglés, PRISA, Telefónica y gente de la catadura de Carlos Slim (con su empresa Sercotel/Telmex). El caso de Federico Mayor merece un artículo aparte: el entramado de Fundaciones que preside, la relación de éstas con grandes empresas, el desparpajo con el que pone una vela a Dios y otra al Diablo, y el que se haya convertido en santón de progres indocumentados, es la mejor prueba de que no desaprovechó sus años con el Opus Dei.
El Corte Inglés va emulando la estrategia de otros emporios económicos, pero no logra tapar el tufillo de sus orígenes. Yo no sé cuántos anuncios de colchones habrá costado el que nuestros aguerridos periodistas hayan pasado por alto el hecho de que Noelia de Mingo, una médica de la Fundación Jiménez Díaz que asesinó a tres pacientes e hirió a siete, es sobrina de Juan Manuel de Mingo, presidente de La Fundación Ramón Areces.

La Fundación Jiménez Díaz y los superiores inmediatos de esta maniaca homicida desatendieron sistemáticamente, durante año y medio, las quejas de pacientes y compañeros sobre el agresivo y extraño comportamiento de esta esquizofrénica paranoide. Hasta la fecha nadie ha sabido explicar por qué se la protegió así.
Si tienen tiempo y gusto por el morbo, vayan consultando las relaciones entre la Fundación Jiménez Díaz y la Fundación Ramón Areces. Si no, espérenme a que vuelva de tomar unos whiskies, porque esta gente me deja gustazo a relanzón en escabeche insoportable.

Como saben todos los lectores, en esta bitácora borro los exabruptos malsonantes, las faltas de ortografía y de ideas.
Si tiene a bien exponer razonadamente sus argumentos, y es capaz de hacerlo, pese a su terrible enfermedad neurológica, espero que nos honre con su prosa.

La Fundación Areces no tiene nada que ver con la Jiménez Díaz. La doctora Mingo no es de momento ninguna asesina.Confunde usted unas congregaciones religiosas con otras (1ª parte). Puede que yo tenga faltas de ortografía, pase; que tenga alguna enfermedad neurológica también es posible aunque a día de hoy no me haya sido diagnosticada, y que esa enfermedad afecte a las ideas, pues complicado creo yo si no va asociada a algún otro tipo de enfermedad. De cualquier manera le repito que un esquizofrénico puede desempeñar cualquier tipo de trabajo, y sepa que sólo en España hay diagnosticados de esquizofrenia paranoide alrededor de ochocientas mil personas, de las cuales NINGUNO es un asesino. Su falta de respeto me abruma.

Le agradezco las precisiones que le hace al autor, que seguramente le serán de gran utilidad para corregir en la tercera parte.
Por lo que a mí respecta, tengo la sensación de que se ha apresurado usted en la lectura del texto, porque
a)no hay en la primera parte una taxonomía sobre las diferentes sectas que conviven en la Iglesia Católica.
b)en los presupuestos de la Fundación Ramón Areces podrá ver las actividades de la Fundación Jiménez Díaz que subvenciona
c) las alusiones a la doctora Mingo están extraídas de la sentencia judiacial.
Un esquizofrénico que trabaje como medico, que mantenga durante más de un año una conducta delirante en el trato con los pacientes, los subalternos y los compañeros, hasta el punto de que se le exima de hacer guardias, hubiera requerido la baja por enfermedad y atención psiquiátrica. El derecho al trabajo de los esquizofrénicos no está en causa en este artículo, sino las razones que tuvieron los responsables del servicio para no intervenir ante las reiteradas quejas y avisos de los pacientes y de los compañeros de trabajo.

Le dejado algun comentario en la Web de A sueldo de Moscu, pero se lo paso para deleite de sus lectores:
Gatopardo, me gusta leer sus textos, creo que es buena literatura lo que escribe, pero el problema es diferenciar la realidad de la ficcion y no mezclar churras con merinas. Vamos que debe ser el whisky, el que hace que derrape...

1) Informatica El Corte Ingles, es una consultora mas de informatica, que...
2) ha sido seleccionada por el Ministerio, por iniciativa del CNI (segun la noticia).
3) El costo del proyecto no me parece mucho (300K), es mas me parece que va a quedar una chapuza, como siempre.
4) No se desarrollan "claves" ni se "accede" a la informacion de nadie, sino algoritmos de encriptacion, firma digital, rechazo de datos (en intercambios entre particulares), etc...

Y un par de precisiones mas:

- Defensa tiene una partida de muchos millones de Euros, claro, pero tambien se gastan en mas cosas que la PKI.

- Se contrata gente de fuera del ministerio entre otras cosas porque no se puede mantener en nomina a un grupo de especialistas en criptografia, otro de desarrolladores software, a 3 jefes de proyecto, una secretaria, y un conserje. Y por que para eso hay empresas que saben y se dedican a ello.

- La encriptacion de datos y otros "contratos" sensibles se contratan a empresas en todo el mundo y no pasa nada. Para eso existen disposiciones legales, de procedimiento, auditorias y demas.

- Para una vez que del presupuesto de Defensa sale una aplicacion civil (y no a la inversa) vamos y nos quejamos. PKI no es "Inteligencia Militar", en el sentido puro, sino un conjunto de aplicaciones tambien en el area civil.

Autor: El espía que surgió del frío puntualiza

1.Al Corte Inglés no le interesan los datos económicos del ciudadano medio. El ciudadano medio es tan exhibicionista, servil y obsequioso, que ya se los ha proporcionado al rellenar el formulario de la Tarjeta de El Corte Inglés.
2. La vida privada del ciudadano medio no interesa a nadie que no sea una agencia de publicidad de quinta fila, que aún no se ha enterado de que los productos no seducen: se imponen. Los más graves secretos del honesto ciudadano sólo merecerían un juicio de faltas. Es el confesor quien fideliza clientela otorgándoles una importancia que no

tienen.
3. Son las compañías rivales de El Corte Inglés los primeros que habrían de preocuparse:
Por el poder derivado del control informático de la información.
Porque un gobierno decida establecer unilateralmente alianzas económicas y de seguridad con una empresa competidora.
Porque éste es el primer e imprescindible paso de una operación que afecta a sectores como telefonía (véanse los movimientos de El Corte Inglés con Iberbanda, Telefónica etc), espacios de transmisión o usos de satélites.
Porque estos sectores son los pasaportes para una ampliación de mercados, que es vital para la sobrevivencia de estas compañías. Tengan a bien repasarse el mapa de empresas españolas en el mundo.
4. Subsidiariamente, estas "canonjías" a las que son tan adeptos nuestros gobernantes suponen un coste al estado y un endeudamiento político para el futuro sucesor, que suele resolverse con crisis anormales de los mercados nacionales.
5. El Ministerio de Defensa ni el CNI no tiene carta blanca constitucional para compartir información de seguridad con quien le venga en gana. Ya ha tenido importantes y graves fallos en los últimos años. El protocolo de seguridad debe ser cumplido punto por punto. Y las chulerias "vintage" Rumsfeld/Cheney quedan fuera de nuestro ordenamiento jurídico, aunque gocen de la comprensión y aplauso de millones de borregos.

5. No existen conspiraciones. Existen informaciones que nadie lee porque ocupan muchos renglones.

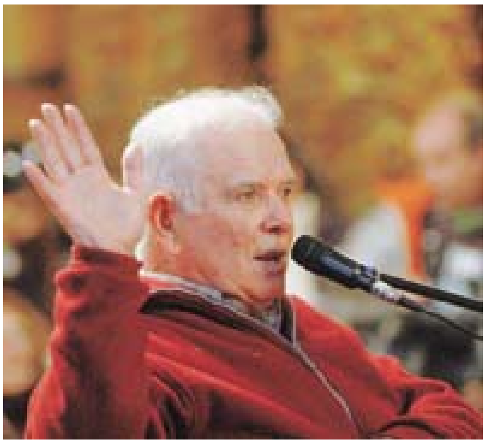
JORGE JULIO LÓPEZ: ¿UNA FALLIDA OPERACIÓN DEL GOBIERNO?

Autor: Christian Sanz
Publicado en Tribuna de Periodistas

El día 28 de julio de 2006, Jorge Julio López declaró contra Miguel Etchecolatz en el marco de una causa por torturas contra su persona y por la desaparición de otros dos individuos. El 18 de septiembre, cuando debía declarar nuevamente, el testigo desapareció por completo. Fue un día antes de que Etchecolatz fuera condenado a reclusión perpetua.
Desde que López ha desaparecido hasta el día de hoy sucedieron muchas cosas extrañas y nada se ha avanzado en el intento de establecer su paradero. Ni los rastrillajes, ni las líneas telefónicas habilitadas, ni la millonaria recompensa que ofrece el gobierno bonaerense han servido para encontrar a López.
En el expediente judicial que lleva adelante el fiscal de La Plata Marcelo Martini, figuran casi 300 rastrillajes, hechos en diversos lugares de la Capital Federal, distritos vecinos y localidades del interior bonaerense. Todos han sido infructuosos.
Al mismo tiempo, se analizaron más de 1500 llamados de celulares activados en la zona de Los Hornos el día de la desaparición de López, pero tampoco se consiguieron resultados.



El hombre invisible
Jorge Julio López era albañil, vivía en el barrio platense de Los Hornos y tenía 77 años al momento de desaparecer, justamente cuando debía presentarse a la audiencia de alegatos en la causa judicial contra Etchecolatz.
Si bien en un principio se especuló con que podría haberse perdido por un problema de salud, el transcurso del tiempo abonó la hipótesis de un posible secuestro por la importancia de su declaración en el juicio que se le instruyó al referido represor. Así se lo dio a entender a la sociedad y todos los esfuerzos oficiales se conjugaron en pos de reforzar esta hipótesis.
Recordemos que, en su testimonio ante el Tribunal Oral Federal 1 de La Plata, López aseguró que había sido secuestrado en octubre de 1976, agregando haber sido torturado por Etchecolatz mientras estuvo detenido en la comisaría 8 de La Plata. También contó que pudo ver cómo ejecutaban con disparos en la cabeza a otras dos víctimas: Patricia Dell Orto y su esposo Ambrosio De Marco en el centro clandestino de detención que funcionó en Arana. En ese marco, identificó a Etchecolatz como integrante de la *"patota"* que ilegalmente lo detuvo en su casa del barrio platense de Los Hornos.
Según allegados al gobierno nacional, la declaración de López fue *"fundamental"* para encarcelar a Etchecolatz y, por eso, era imprescindible que declarara nuevamente el 18 de septiembre de 2006, fecha en la que el albañil finalmente desapareció.
¿Es tan así? ¿Era fundamental ese testimonio?
Por lo que sostuvieron integrantes del Poder Judicial de La Plata, no lo era. Por caso, el fiscal del juicio, Carlos Dulau Dumm, aseguró que *"el testimonio de López fue muy importante, pero tanto como otros"*. De hecho, se pudo condenar a Etchecolatz sin necesidad de que este brindara una nueva declaración.

"Una operación muy grande"
No son pocas las dudas que han rodeado la desaparición de López, algunas de ellas surgidas de la propia rutina del evaporado testigo. Veamos:
1-El albañil utilizaba todos los días un mismo modelo de zapatillas, del que tenía dos pares. El lunes en que desapareció, las zapatillas quedaron en la casa y el albañil se ausentó calzando un par de borceguíes que nunca usaba.
2-Cuando salía de su domicilio, López tenía la costumbre de cerrar la puerta con llave y después tirar la llave adentro por una ventana. Esta vez se llevó la llave con él **(1)**.
3-En su casa falta un pequeño cuchillo que el testigo utilizaba, pero que nunca antes había sacado de su domicilio. Todo indica que se lo llevó en esta oportunidad.
A los referidos enigmas se han sumado las dudas surgidas de su propio testimonio ante la justicia. Detalles imposibles de retener, datos que son falaces y dudosas anécdotas, hacen que su declaración sea poco creíble, a punto tal que la titular de Plaza de Mayo, Hebe de Bonafini -de su misma extracción ideológica- ha echado un manto de

escepticismo a la cuestión.
"Para nosotros, no es un típico desaparecido. López no fue militante, hay que investigar su trayectoria (...) vive en un barrio de policías, tiene un hermano policía y la familia no habla de que está desaparecido, lo cual es extraño", dijo Bonafini hace meses al salir de una reunión con el presidente Néstor Kirchner en la Casa Rosada.
La titular de Madres aseguró posteriormente lo mismo que dicen los investigadores hoy en día: que el albañil no era el único testigo de importancia en la causa contra Etchecolatz. Las palabras finales de Bonafini fueron aún más elocuentes, al tildar lo sucedido como una *"operación muy grande"*.
Lo antedicho provocó el consecuente enojo de gran parte de las agrupaciones alineadas al gobierno, pero más aún generó desconcierto. En realidad Bonafini dijo en voz alta lo mismo que muchos no se animan siquiera a sugerir y que todos sospechan: que el testimonio de López fue digitado. Es dable recordar que sus propios familiares admitieron que el albañil nunca había hablado con ellos de los detalles que luego comentara ante los jueces.
Amén de esto, llama la atención que la declaración judicial de López sea tan puntillosa, contradiciendo sus primeros testimonios referidos a su secuestro y en donde aseguraba no recordar detalles concretos del cautiverio que había vivido. Según han publicado otros medios digitales: *"En su declaración en el juicio por la verdad es totalmente inducido por los jueces. Dice no reconocer a sus torturadores. En el juicio oral da nombres, increíble. Habla que en Arana supuestamente veía por una mirilla todo. Todas las personas que declararon si en algo coincidieron es que en Arana no se podía ver, ya que estaban vendados y atados. Él sí ve por una mirilla. Lo raro es que las mirillas por disposición interna, se abrían de afuera (...) En Arana ve a una persona que llaman Higuita por el parecido con el jugador colombiano, que lo llamaban Higuita. Nuevamente extraño, ya que Higuita en esa fecha tenía 10 años y además no era aún conocido."*
Elocuencia aparte.

La trama oculta
Al día de hoy, a pesar de todo el esfuerzo que asegura haber puesto en este tema, el kirchnerismo no ha logrado dilucidar si López está muerto, secuestrado o perdido. La investigación no avanza, las hipótesis que se barajan son contradictorias y el Gobierno ni siquiera disimula su urgencia por cambiar de tema en la agenda diaria.
Por caso, este periodista intentó sin éxito entrevistar a algún funcionario de Poder Ejecutivo para aclarar algunos de los puntos que no cierran. Todo fue en vano, ya que ni siquiera logró un comentario *"off the record"*.
Esto obligó a que **Tribuna de periodistas** tuviera que hurgar a través de fuentes no oficiales de diversa índole para poder avanzar en la resolución de este caso. Se consultó a más de veinte informantes, de los cuales menos de la mitad pudo aportar datos fehacientes y contrastables para poder armar este rompecabezas.
Todos coinciden en afirmar que la operación se montó desde el propio Gobierno.
¿Los motivos? Podrían ser varios, de acuerdo a los diferentes comentarios. Aunque ninguna de las razones invocadas se contraponen entre sí. Veamos.
Una de las primeras entrevistas realizadas para este artículo fue con un ex comisario bonaerense de gran influencia al día de la fecha, quien habló con gran seguridad sobre la cuestión: *"El secuestro de López fue digitado por el Gobierno, pero se les 'fue' de las manos* **(2)***. Lo habían sacado en un barquito pesquero en un lugar llamado Atalaya, en el Partido de Magdalena. El gobierno NO utilizó para este operativo, ningún servicio de seguridad."* **(3)**.
De la misma manera, opinó la segunda fuente consultada, relacionada al corazón del PJ bonaerense: *"En mi opinión, es una operación del Gobierno. Me inclino por esta teoría ya que los 'paquidermos'* (ex represores) *no tienen ninguna razon, ni siquiera la causa Etchecolatz, para ir a levantar a un tipo que en relidad zafó de la 'boleta' por haber*

colaborado con la policía de la provincia."
El tercer informante, conocido "colaborador" de la SIDE, fue más crudo en su relato: *"Dicen los sospechosos de siempre que López hizo como Gerez, se entregó a una opereta del Gobierno, pero los 77 pirulos le costaron mucho y el hombre 'quedó duro'. Y que está incinerado... sí, quemado y sus cenizas esparcidas para nunca aparecer."*
Pero... ¿por qué el Gobierno habría de secuestrar a López? Todos los consultados coinciden en afirmar que la evaporación del albañil fue planificada para poder lograr la *"excusa perfecta"* que permita al kirchnerismo avanzar contra los jerarcas de la sangrienta dictadura militar. Al mismo tiempo, se lograría quitar *"prestigio"* a diversas organizaciones de derecha que comienzan a crecer a nivel popular, como los *"familiares de las víctimas de la guerrilla"*.
Esa certeza fue aportada por la cuarta fuente consultada por este periódico, un ex agente inorgánico de la SIDE que revistó durante dos décadas en esa dependencia del Estado: *"López abandonó su hábitat en forma voluntaria, pero aconsejado y acompañado por alguien que lo convenció de la necesidad de ocultarse unos días para evitar represalias contra él y su familia por sus declaraciones en el juicio a Miguel Etchecolatz y de paso generar un clima adverso para la marcha de los familiares de víctimas de la subversión del día 5 de octubre.*
Si analizamos la interna por las candidaturas en la Provincia de Buenos Aires, es fácil darse cuenta de que con este acontecimiento el actual gobernador, Felipe Solá, ha quedado sin ninguna posibilidad de reelección. En menor medida, pero muy comprometidas y relegadas, están las expectativas del otro aspirante, Aníbal Fernández. Se podría descartar de plano, la hipótesis que intentan imponer muchos funcionarios, tratando de endilgarle la responsabilidad a elementos residuales de aquella dictadura con el claro objetivo de intimidar a los restantes testigos. En primer lugar, la declaración está firme y el objetivo cumplido. Además, si de escarmiento se trata, lo hubieran matado -y de forma horrorosa- antes de prestar su declaración. Si el mensaje es para los demás testigos, ya hubieran hecho aparecer el cuerpo."

Todos coinciden, pero entonces, ¿quién se llevó a López?
En medio de la incesante catarata de informaciones sobre la supuesta desaparición de Luis Gerez, apareció en los medios un interesante -aunque breve- testimonio que pasó totalmente inadvertido para la sociedad: un gestor llamado Jorge Scanio aseguró haber visto a Jorge Julio López el 1º de octubre de 2006 durante una visita a la estancia San Genaro, de Monte, adonde había ido por pedido de un cliente, para verificar si estaba ocupada.
Lo interesante de la noticia es que el gestor afirmó que López estaba en mal estado y rodeado de un grupo de personas armadas **(4).** Alfredo Divinicenzi, el periodista que logró el testimonio de Scanio, sostuvo que esos dichos *"salpican a los gobiernos nacional y provincial."*
¿Quiénes eran los hombres armados? Según el último testimonio recogido por quien escribe estas líneas, el responsable de la operación fue un ex funcionario muy cercano al kirchnerismo.
"Es evidente que las personas que ocultaron a López con toda seguridad han contado con toda la logística y el suficiente poder económico, político e impunidad judicial para tenerlo escondido el tiempo que sea necesario, sin sentirse incómodos por la recompensa de $ 200.000 y hoy aumentada a $ 400.000 ofrecida por Solá, capaz de fisurar los códigos de silencio de cualquier aparato delictivo. El ex subsecretario de Estado Luis D'Elía cuenta con una especie de SIDE paralela para este tipo de eventos, compuesta por algo más de 300 hombres armados, con sus correspondientes credenciales de portación de arma de guerra y suministro de municiones otorgados por el RENAR, además de disponer de elementos sofisticados para realizar escuchas telefónicas, cámaras ocultas y otras tareas propias de la actividad.

Como consecuencia directa del secuestro de López, más de 300 policías de la bonaerense fueron pasados a retiro. Si querés saber sobre el albañil Jorge Julio López, preguntále a D'Elia."

Concluyendo
Mientras el *"misterio López"* sigue sin resolverse, los medios parecen ir destinando cada vez menos cantidad de espacio a su cobertura, dejando que la actualidad más trivial fagocite lentamente al interés público sobre esta cuestión.
Al mismo tiempo, los grandes diarios hacen el juego al Gobierno al difundir información irreal sobre la supuesta búsqueda del testigo. El kirchnerismo ha salido a *"vender"* al periodismo que la Policía Federal tiene destinadas a la pesquisa 15 brigadas (alrededor de 75 oficiales y suboficiales) y que la Bonaerense asignó a varios de sus equipos especializados y proveyó toda la tropa necesaria para los infructuosos rastrillajes.
De la misma manera, se asegura que la SIDE *"tiene equipos dedicados a trabajar a tiempo completo sobre las pistas existentes, a buscar nuevas y a realizar todas las escuchas telefónicas imaginables."* Algo realmente poco creíble.
Más preocupante que las mentiras oficiales es la idea de imaginar un Gobierno que utiliza sus recursos para actuar como si fuera una verdadera *"mafia".* Ya nadie cree lo sucedido con Gerez, pronto caerá la mentira sobre López. ¿Qué vendrá después? Mejor no imaginarlo...

Christian Sanz

(1) **Las llaves aparecerían poco después en el jardín de la casa de López. Aún no se pudo determinar si fueron arrojadas el día en que desapareció o posteriormente.**
(2) **Cuando el ex comisario asegura que la operación se "les fue de las manos", se refiere a que López habría fallecido en medio de su cautiverio.**
(3) **Esta oración es llamativa por el énfasis en asegurar que ninguna fuerza de seguridad conocida se utilizó para el operativo. Esto coincide con otro de los testimonios recogidos para esta nota que carga culpabilidad en la figura de un ex funcionario K.**
(4) **También agregó que uno de los primeros en saber la noticia fue el ministro del interior, Aníbal Fernández.**

CURIOSIDADES DE LA NUMISMÁTICA. ALFONSO XIII

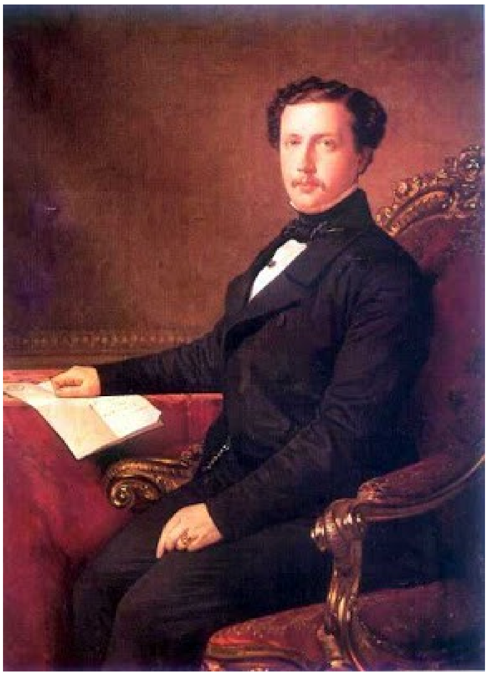
Alfonso XIII fue rey desde su nacimiento, en 1886, como hijo póstumo de Alfonso XII, y bajo la regencia de su madre, María Cristina de Habsburgo-Lorena, hasta su mayoría de edad en 1902.

Su padre, el rey Alfonso XII (1857+1885) era hijo de Isabel II y, teóricamente, de don Francisco de Asís de Borbón, notoriamente afeminado, cosa que dio pie a las chuflas de los humoristas satíricos, que le llamaban "Paquito Puntillas"

Paquito Puntillas
es de pasta flora
y orina en cuclillas
como una señora...

Y refiriéndose a Alfonso XII se decía*:*

No parece el rey hijo de su madre
y bastante menos, hijo de su padre.



Isabel II y Francisco de Asis Borbón, pintados por Madrazo

Alfonso XIII: "El pelón"

Alfonso XIII: "El pelucón"

Alfonso XIII: "El tupé"

Según la iconografía y su peinado, las monedas fueron bautizadas como "el pelón", "el pelucón" y "el tupé", como aún se las denomina entre los numismáticos.

Durante muchos años, los billetes españoles se imprimieron en Inglaterra, en la empresa Bradbury Wilkinson & Company, de Londres. A la dinastía reinante en España, emparentada con la dinastía reinante en Inglaterra por alianzas matrimoniales, no le debió de parecer urgente para la seguridad nacional que nuestra moneda se acuñara en territorio español.

Billete de Alfonso XIII, año 1927

En 1927 se acuñó este billete de Alfonso XIII, cuando la monarquía ya se tambaleaba, sostenida apenas por la Dictadura del General Primo de Rivera (1923-1930), al que luego volvió la espalda con esa deslealtad regia que llaman "borbonear".

Después de las elecciones municipales del 14 de abril de 1931, con el triunfo de los republicanos, el rey Alfonso XIII se exilió. Desposeyó de sus derechos dinásticos a su primogénito, don Jaime, sordomudo, en favor de don Juan de Borbón, *"hijo de rey, padre de rey y nunca rey".* Vivió en el exilio en París, en Fontainebleau, y en Roma, donde murió en 1941.

Billete de Alfonso XIII, resellado por la República en 1931.

La República no retiró de la circulación este billete, y para validarlo estampó un sello en la cara del monarca, y esta rareza numismática ha triplicado su valor entre los coleccionistas.

Felicidades por el artículo de hoy, sumamente interesante, me llevo a buscar información sobre los billetes en México, que alguna vez se imprimieron en Estados Unidos.

Muy curioso. No sabía lo de la acuñación en el Reino Unido.
La verdad es que todos los borbones se parecen, debió ser de corta eyaculación, pero de ser fue.
Supongo que está mal eso de arremeter sobre un hombre las culpas de sus antepasados. Es como si a nosotros nos dijeran que somos culpables del genocidio indio en Sudamérica. Y encima nos lo dicen los descendientes de los verdaderos culpables, lo que ya es la leche, ¿no te parece?

La Gatita siempre escribe cosas muy interesantes, es muy desprendida ella.

Pues a mí me tocó sufrir la pesadilla numismática del siglo XXI español: perder un billete de 500 euros.

Tuve fortuna y lo recuperé al día siguiente: estaba allí tirado, bajo la mesa de la oficina donde trabajaba, doblado a la mitad.

Me dio una idea del compromiso del personal de limpieza. Hombre, llevado por mi natural y espontánea bondad, en lo primero que pensé fue en una película de ciencia ficción en la que lo dejaron exactamente en el mismo lugar donde lo encontraron, tras limpiar.

Cosas veredes: el suelo estaba sucio, allí no había limpiado nadie. Además, el personal susodicho estaba bajo sospecha, porque habían faltado cosas semanas antes...

Simplemente tuve suerte.

Y, ahora, un besito y a dormir felizmente, reina. ¿O no te estabas quedando dormida? ¿no? estaré perdiendo facultades...

Señor mío: La gente que maneja billetes de 500 euros ya son, de por si, sospechosos.
Gente hamposa, traficantes, buscados por Interpol.
Lo de su suerte... no hay tal.
Simplemente es que no lo tragan a usted las limpiadoras ni aun dejando doblones de oro tras sus pasos.
Y, además, es usted un chismoso acusica.

MI AMIGO GODOFREDO

Mi amigo Godofredo mira a los que son más altos que él, levantando la cabeza, y a los que son más bajitos, también, que ya es mérito.

A las mujeres, las envuelve en el papel Albal de su trato veneciano y las deja así como impermeabilizadas para la historia. Y la historia suele estar envuelta en sábanas de lino y homenajes epidérmicos.

Godofredo es uno de esos hombres que una no imagina perdiendo los papeles en una pasión incandescente. Sin embargo, tiene ese aire de tribuno distante, mesurado, amante del orden, que incita a las mujeres a despeinarlo, deshacerle su cama hecha con primor, arrugarle las sábanas y llenarle el baño de salpicaduras. Y ese es el secreto de su larga cohorte de amantes... No hay otro.

Las que hemos llegado por la esquina de la amistad, nos encontramos con un hombre de delicadeza proustiana, tan preocupado por no desmerecer en nuestras expectativas que raya en la crueldad mental, tan rematadamente inolvidable como amigo que resulta una pesadilla tratar de llegarle al zancajo. Y entonces, nos alistamos con sus incondicionales sin más remedio, y andamos diciendo que es una maravilla.

Pero la verdad es que existe en él un lado de inaudita mezquindad: se ha negado diplomáticamente a fabular que hemos tenido una historia de cama turbulenta, y me ha

dejado el desairado papel de ser la única mujer de su entorno, menor de ochenta años, que no puede presumir de haber sido su amante aunque sea una vez, aunque sea mentira... Y eso es mala leche.

Gatopardo.

Más que mala leche es leche ausente. También está ausente la imagen y el link no funciona, lleva a una página que grita FORBIDDEN.

Vamos, que me has dejado a medias. Hubiera preferido que fabularas que he intentado seducirte sin lograrlo que no quedarme a media "eyalucubración".

De todos modos ¿desde cuándo se necesita el permiso de alguien para difundir un rumor? ¿eh?

Pues ese amigo tuyo, Godofredo, tiene un albornoz igualito a uno que tuve yo (¿o el

blanco es el tuyo?).
Es igual, no debo ser yo (seguro) porque yo trato muy bien a mi chica y no soy nada mesurado.
¿Le has amenazado con airearlo en el "Hola" o en el "Tomate"?
Suerte.

LOS NIÑOS DE MORELIA

Nada como la despiadada mirada y el diagnóstico de los niños que llegaron a México hace setenta años, acompañados por un grupo de maestros españoles, a los que habían prometido que podrán ocuparse de la educación de sus alumnos, y un refugio digno, a salvo de la guerra civil. Nada de eso se cumplió. Al mismo llegar, cuatrocientos cincuenta y seis niños entre cuatro y doce años fueron separados de sus maestros, internados en régimen semicarcelario, separados por sexo en dos antiguos seminarios, con una severa disciplina militar, y en condiciones de supervivencia extremas, gracias a la vieja e inveterada corrupción, que enriquecía a los responsables a costa del presupuesto destinado a la alimentación y necesidades básicas de los niños, que venían en condiciones precarias de salud, sin reservas después de un año de guerra y una travesía en el *Mexique*.

En estas condiciones, murieron y desaparecieron niños que nadie pareció echar de menos, y algunos tuvieron la suerte de fugarse y no ser devueltos a su encierro, y pueden narrar sin ira y sin piedad lo que significan los afables discursos que ofrecían su melosa ración de buenos sentimientos, según es costumbre en México, adonde se da la mayor proporción de gobernantes émulos del padre de los Karamazov, malos y sentimentales.

Para acabar de condimentar su estancia, aquellos niños (entre los cuatro y los doce años, no lo olvidemos*), recibieron todo el rechazo y los ataques que su condición de "rojos" y "comunistas" pudieran inspirar, como el *discurso furibundo de Manuel Zorrilla ante la protección que se brindaba a niños extranjeros y ″rojos″*. Esa parva de chiquillos

hambrientos, como respuesta a tan píos propósitos, apedrearon las iglesias de Morelia y a los representantes de la carcundia moreliana que habían acudido a misa.

Aquellos hijos del demonio tuvieron ocasión, a lo largo de su vida, de comprobar que la sumisión y la bondad no suele dar frutos con los opresores, y quien sobrevivió lo hizo gracias a mantener una actitud beligerante, algo que parecían haber olvidado los descendientes de los insurgentes de la revolución mexicana. Los supervivientes de los llamados "niños de Morelia", protagonizaron un motín tras otro, y se convirtieron en un problema de orden público, del que tuvo que ocuparse directamente Lázaro Cárdenas. Lo resolvió cesando al sádico director y carcelero, y suavizando las condiciones de encierro y supervivencia, hasta que, poco después, se cerraron los dos establecimientos, el destinado a las niñas y el de los niños, y fueron dispersados con destinos inciertos.

Los exiliados españoles con una formación y un estatus académico, y los representantes del Gobierno legal de la República en el exilio no se ocuparon, ni mucho ni poco. de aquella partida de niños facinerosos, que poco podían servir a su prestigio intelectual.

La historia edulcorada del México acogedor, hospitalario, benefactor de los vencidos de la guerra española es acogida con carcajadas sarcásticas por los supervivientes de los niños de Morelia. Porque ellos también fueron los destinarios de la política de exterminio institucionalizada contra el pueblo mexicano, y, quizás por eso se sienten unos gachupines tan mexicanos como el que más, y siempre estuvieron en pugna contra el poder.

Gatopardo- Atenco somos todos,2007

* Justificando el cierre de los albergues y la negación de toda ayuda desde diciembre de 1939, Indalecio Prieto, cuya escasa simpatía por los niños de Morelia se trasluce en su correspondencia con Ávila Camacho, acusaba a estos refugiados de acudir *"ya talluditos"* a México *"sin duda bajo la atracción de tener aquí pagado el albergue sin hacer nada ni someterse a disciplina alguna".* Indalecio Prieto a González, Ciudad de México, 18 de agosto de 1942, en Archivo General de la Nación, Fondo Ávila Camacho, leg.460/2.

Estremecedora historia que desconocía.

Me sorprendió mucho lo que cuentas porque mi padre estudió en Morelia, internado en la escuela México - España, donde a donde fueron enviados esos niños españoles.

Lo que hoy escribes poco tiene que ver con lo que me padre me ha contado sobre el tema.

Si bien es cierto que las condiciones en el internado eran duras bajo estándares actuales, en aquella época se consideraba que el trato que recibieron los niños españoles era de privilegio. Esos niños recibieron techo digno, alimentación adecuada y una educación muy superior a la que podían aspirar los niños mexicanos de aquel entonces.

Hablar de "supervivientes" y " destinatarios políticas de exterminio" refiriédonse a los niños de Morelia es equivocado por decir lo menos.

Estoy seguro que muy pocos de esos niños que ahora son hombres mayores se ostentarían como "sobrevivientes de los niños de Morelia". No quiero ni pensar los motivos que podría tener alguno para hacerlo.

Todos ellos fueron o son supervivientes de la guerra y de la vida. Merecen nuestro respeto al igual que todos aquellos que de forma generosa los acogieron.

Autor: Atenco somos todos

Estimado Ramón Mier: Tenemos, pues, idénticas fuentes de información:las mías fueron el grupo de niños de Morelia supervivientes, que ya adultos que pusieron nombre y apellidos a los cuatrocientos cincuenta y seis niños que llegaron a Veracruz, que durante años han seguido investigando y reuniéndose, y respaldaron lo que escribió Emeterio Payá Valera, en "Los niños españoles de Morelia : el exilio infantil en México", prologado por Dolores Pla Brugat, coordinadora del grupo de antropólogos e investigadores del proyecto: "El exilio republicano español en América Latina", autora de "Los niños de Morelia: un estudio sobre los primeros refugiados españoles en México" /2a ed. México, publicado por el Consejo Nacional para la Cultura y las Artes,Instituto Nacional de Antropología e Historia : Embajada de España,Cooperación Española, 1999.
Y, por último, le añado el testimonio que usted mismo podrá contrastar con los supervivientes: los niñas que llegaron a Morelia, que habían recibido una educación laica, mixta, como sus compañeros, con las mismas asignaturas, sabían a los nueve años más de Matemáticas, Ciencias Naturales, Gramática, etc. que las profesoras que

les asignaron, y que se esmeraron por formarlas para que pudieran trabajar como "sirvientas en casas respetables" enseñándoles a coser, limpiar, responder con humildad, sin mirar a los ojos del interlocutor, trabajar en labores de hogar, etc.
Respecto a los maestros que les asignaron a los niños, se sentían ofendidos y repartían castigos porque su ignorancia desataba la hilaridad de sus educandos.(A los maestros que llegaron con los niños para continuar su educación no se les permitió ejercer. Hay cartas suyas en las que cuentan el bajo nivel de formación de los maestros mexicanos. (Caso que no parece haberse solucionado a la vista del porcentaje de trabajadores de la educación que ha sido capaz de a superar el examen para impartir clases en las escuelas públicas)
El robo de enseres y de gran parte del presupuesto destinado a los niños fue un hecho que obligó a cesar a los dos primeros directores.
Ruego lea los documentos desclasificados de la época.
Los niños de Morelia tampoco recibieron la ayuda que recibieron los exiliados españoles del núcleo amparado por el Gobierno de la República, que administró los fondos provenientes de la venta del tesoro nacional que llegó a México en el Vita, y del que no se hizo ni siquiera inventario, y a la fecha actual, se desconoce como se administró y se utilizó. Lo único que se sabe es que se crearon colegios de élite para los hijos de los españoles próximos al círculo de los dirigentes, y sin embargo no destinaron ningún presupuesto para subvencionar la educación ni la supervivencia de los niños de Morelia.
Un saludo cordial

Idéndinticas no son las fuentes estimado Atenco. Las suyas están mucho mejor documentadas que las mías.

Mi fuente es mi padre, lo que me ha contado sobre lo que allá vió y vivió y sobre lo que del asunto ha leído.

Sin embargo tras leer su nuevo comentario y releer su texto siento que debo decir lo siguiente:

No hubo una política de exterminio en contra de esos niños, y si la hubo falló miscerablemente. Supongo que entre los enceres robados se encontrarían las cámaras de gas y que por eso despidieron a los directores.

Pido disculpas por la broma de mal gusto, pero debo insistir en la imprudencia del uso de la palabra "exterminio".

De su propio texto puede puede deducirse que SI existía un genuino interés del gobierno Mexicano por el bienestar de esos niños. De no ser así ¿porqué cesar a directores ladrones y no dejarlos seguir impunes? ¿porqué el mismísimo presidente de la república, el genral Cárdenas intervino personalmente para mejorar las condiciones de los niños?

Es verdad que fueron objeto del rechazos y el desprecios, pero tamién recibieron el apoyo de muchos. Hay que recordar que en aquella época había tanto sipmatizantes del franquismo como de la República en México.

En cuanto a la calidad de la educacion baste decir que nadie puede ofrecer más de lo que tiene. Sin duda debió haber habido maestros ignorantes y abusivos. Como usted mismo apunta las deficiencias de la educación en México existían entonces y quizás no han hecho más que agravarse.

Mi padre tuvo que padecer malos maestros, pero tambiént tuvo la fortuna de recibir enseñanzas de maestros capaces y dedicados cuyas enseñanzas fueron fundamentales para que él pudiera abrirse paso en la vida y salir de la pobreza. Para esos maestros no tiene más que respeto y admiración, maestros que fueron, dicho sea de paso los mismos que enseñaron a los niños de Morelia.

Preparaban a las chicas para ser sirvientas y a los chicos para que realizara oficios de baja estima, ¿no era eso común en aquella época? En aquellos tiempos ni en las escuélas para "niñas bien" se les enseñaba para que llegaran a ser presidente de la nación. Insisto en que hay que ver las cosas en su cotexto histórico.

Esos niños se salvaron sufrir en carne propia los horrores de la guerra y pudieron en México encontrar una patria nueva y recibir en la escuela México - España una educación mejor que la que procuraba el gobierno mexicano para sus propios ciudadanos.

El México hospitalario, acogedor y benefactor hacia los vendidos de la guerra española sí existió. Lamentablemente existió al mismo tiempo que el México barbárico, abusivo, cruel, retrógrada, machista y chauvinista que hasta la fecha existe.

Esos niños sobrevivieron a la guerra y al segundo México del que hablo en buena medida gracias al primero.

Ponga usted donde dice México, España, y verá que no hay diferencia alguna. Los hijos de los vencidos en la guerra civil, cuyos padres habían sido fusilados o estaban en prisión, fueron internados en hospicios regidos con una disciplina casi militar, eran habituales los castigos físicos, el hambre, el frío, y recibieron una educación para que aprendieran a no mirar a la cara al que manda, para ser trabajadores "de poca estima" y sirvientas, y de vez en cuando encontraron quien no fue cruel y algún maestro digno de ese nombre. Y los que no murieron minados por las condiciones extremas que les había tocado en suerte, sobrevivieron y llegaron a desenvolverse en la vida.
Pero en todos existe el mismo síndrome: no les gusta contar su experiencia, e idealizan a quienes se portaron bien con ellos, y los recuerdan con total gratitud.
Y en España, como me imagino que ocurre en México, existe un porcentaje de canallas y de seres bondadosos, pero entre los que mandan no suelen cundir los últimos.
Y, por cierto, yo me tuve que enterar de la causa de la cojera de mi abuelo, debida a una paliza por haber ido a buscar comida en los cubos de la basura, y fue porque me lo contó su compañero de correrías, que también se llevó una paliza, pero no le rompieron ninguna pierna. Mi abuelo sólo dijo: "¡Olvídalo, y no sigas dándole vueltas a aquello!"
No contar las malas experiencias no quiere decir que no hayan existido. Quiere decir que la mente nos protege olvidándolas.

Como no soporto que se haga daño a un niño, no puedo comprender a quien lo utiliza de uno u otro modo o a quien lo lastima.

No es necesario que la historia sea tan dramática, me basta ver que los usan de escudos políticos en manifestaciones, de pelota de tenis en los divorcios o de marioneta en los templos.

¡Dejen en paz a los niños!

Yo también desconocía esta faceta de la historia ya que siempre se nos ha contado de otra manera. Pero como dice Aurora cambiemos Mexico por España y veremos que en los años de ls postguerra a los hijos de los vencidos se les trató como a apestados. Fueron muchos los niños que en aquellos hospicios regidos por las "damas" de la Sección Femenina de la Falange fueron dados en adopción sin contar con el beneplacito de sus familiares.
Siempre pierden los más débiles, en este caso y en muchos los niños.

LEER LAS HISTORIAS Y SER HIJA DE UNA DE LAS NIÑAS DE MORELIA, ES COMO FORMAR PARTE DE UN MUNDO EXTRAÑO Y ESTAR VIENDO UNA PELICULA DE FICCION, QUE CASI NO SE PUEDE CREER, LO QUE ES VERDAD, ES QUE CUALQUIER GUERRA, DEJA HERIDAS TAN PROFUNDAS, QUE PERSIGUEN AUN, A LOS DESCENDIENTES DE LOS QUE VIVIERON UNA GUERRA, SI, SON SOBREVIVIENTES, Y A VECES, SOBREVIVIENTES CON DESVENTAJAS, PORQUE AUNQUE HAYAN HABLADO DE LAS VIVENCIAS BUENAS O MALAS, HAY COSAS QUE SUFRIERON, QUE NINGUNO SABEMOS,COSAS QUE AFECTARON SUS VIDAS, SUS MENTES, SUS ALMAS,Y QUE EN MUCHOS CASOS, VEMOS EL RESULTADO, DE LO QUE ESAS VIVENCIAS HICIERON EN SUS VIDAS,Y EN LO QUE ACABARON SIENDO EN SU EDAD MAS ADULTA, YA DE ANCIANOS, LO DIGO POR MI MADRE, PORQUE SE QUE SE GUARDO COSAS DE ESAS VIVENCIAS, QUE AFECTARON SU MENTE, Y LA LLEVARON A LA DEMENCIA SENIL, DEMASIADO TEMPRANO, NADIE SE ACORDO DE ELLOS, SINO HASTA 70 AÑOS DESPUES, COMO DICE EL REFRAN...., MAS VALE TARDE QUE NUNCA, PERO POR DESGRACIA PARA MI MADRE, YA NO PUEDE DISFRUTAR DE LO QUE HOY EL GOBIERNO ESPAÑOL ESTA HACIENDO PARA COMPENSAR UN POCO LO QUE PERDIERON, Y MUCHO MENOS, LOS QUE YA MURIERON

Mi madre fue una niña de la Guerra Civil Española. La vivio, la sobrevivio estando en campos de concentración para españoles que huían de su patría hacia Francia (La tierra

de la libertad?). Murio hace pocos años en el México que la recibió en 1950, siendo ya una joven. Heredo a sus hijos y nietos (y quien puede saber cuantas generaciones más) la demencia que le ocacionó el ver casi morir a su padre en el paredón de fusilamiento. Arrastró tras de sí el alcoholismo al cual su propia madre fue arrojada tras ver morir a otro de sus hijos bajo la metralla de la aviación alemana cuando cruzaron los Pirineos hacia Francia. No fue el único caso en la familia, su hermana también sufrió en su mente los horrores que le dejarón los recuerdos de la guerra.

Emeterio Payá Valera tenía ocho años cuando llegó a México, en 1937. Y siempre vivió en Morelia desde que llegó.
En el curso 19656-57 ya tenía 28 años, así es que difícilmente podía pasar por un niño de primaria: ha de ser un caso de coincidencia de nombre y apellidos.

Increíble! A mi parecer el autor, en su miopía histórica desconoce (o ignora cínicamente) el carácter de la conquista y virreinato Español durante medio siglo en México (o Nueva España)..."política de exterminio institucionalizada" solo un imbécil escribe tal barbaridad acerca de el esfuerzo por el gobierno de un pueblo, que a pesar de haber sido LITERALMENTE masacrado, esclavizado, explotado, subyugado, atracado, etc. Por Españoles rescató y dio albergue no solo a los "Niños de Morelia," si no que dio apoyo económico y armó a las fuerzas Republicanas en su lucha contra el Fascismo. Y, por si fuera poco, abrió sus fronteras a cientos de miles de Españoles quiénes, de haberse

quedado en España hubieran sido encarcelados, torturados, y/o asesinados por el gobierno Franquista.

Monstruos, ladrones, clérigos y burócratas existen en todo el mundo, y los maltratos y abusos que sufrieron estos niños son imperdonables, como los crímenes de los Españoles en America DURANTE SIGLOS.

Y a poner los hechos en una balanza: 500 años de Imperio y todo lo que esto implica, contra los descendientes de aquellos indígenas que los Españoles subyugaron, mal logrando la intención de salvar a niños Españoles, víctimas de una guerra civil barbárica. La mayoría de los cuáles sobrevivieron y sus descendientes claramente están agradecidos a Mexico (y muchos son, orgullosamente Mexicanos). No estamos hablando de la "Lista de Schindler," pero ¡Jo! que México y España son países hermanos A PESAR de realidades históricas trágicas. Pero el descaro de usted es descomunal. ¿ "política de exterminio institucionalizada."? Repito solo a un imbécil se le ocurre.

¡Que Vivan México y España!, y que Dios nos salve de retrogradas como usted.

Cuando alguien se remonta a los 500 años de dominio español, venga o no venga a cuento, suele ser un descendiente de los gachupines metido a heroico patriota mexicano, que -como por casualidad- son los que mandan y tienen todos los privilegios. Como sus ancestros.

Los mexicanos de pura cepa siguen siendo esquilmados, segregados, perseguidos y diezmados y no acaban de ver la diferencia entre ser jodidos por los de ahora o por los de antes.

Saludos cordiales.

Me enferman que la gente se pase criticando sin dar soluciónes a todos estos tipos de problemas como siempre es mas facil decir en que estamos mal a poner una posible solucion :D .. y si yo estudie la primaria en el INTERNADO ESPAÑA-MÉXICO y tengo muy lindos recuerdos de allí, por que yo si me portaba bien y nunca me castigaron soy de una familia humilde y gracias a que allí en el internado si comia 3 veces al día y estudiaba, mi desarrollo de adulta fue mejor de lo que habria sido si no hubiese tenido la oportunidad de entrar allí, por que en mi casa no teniamos para comer una dieta balanceada con los almenos suficientes nutrientes para no estar anemica, :D y siempre fui buena estudiante. Claro no dudo que en ese tiempo las cosas fuesen diferentes y hayan abusado en distintos sentidos de los ñinos, lo importante es crear mejores ciudadanos para que ese tipo de circunstacias no se repitan, abase de buena educacion, y valores honestos.
amo a mi México y creo que como en todos los paises ahy gente honesta y deshonesta, con valores y sin valores.

Yo tuve la gran fortuna de haberme educuado en el Instituto Luis Vives, con maestros de la talla de Don Juan Bonet, Luis Tapia y Bolivar, Marcelo Santalo, por mencionar a algunos; sin embargo en México nuestras autoridades son algo fantasiosas y realizan la historia de acuerdo a los devenires politicos de la ocasion; una de mis Tias fue Balbina Ortega (llego en el Mexique) y si es cierto los trataban peor que a militares y si la ultraderecha mexicana y española se encargaro de re-educar a varios. Es obvio que

muchos de mis compatriotas se siguen pensando "conquistados", cuando en verdad no fue eso lo que paso, hay que ver el futuro y leer libros como los de Jorge Castañeda.

Mi abuelo, Jesus Yañez Ruiz, tambien fue uno de los Niños de Morelia. Recientemente fui a España y consegi sus documentos. Mi abuelo fallecio en el 2006 pero las historias que contaba nos sorprendieron. El llego a Mexico a los 11 años y el se trajo a su hermano menor con el. Como lo conto, hiban a ser separados por los soldados porque su hermano era el ultimo que iba a ser mandado a Rusia. Mi abuelo lo abrrigo y lo "escondio" en su abrrigo y el soldado que estaba contando se dio cuenta pero los mando a los dos a Mexico.

Buenas a todos. Estoy pasmada, por más no decir ENCABRONADA:
Creo que desvirtuar la historia para justificar otra historia o sacar a colación una historia no es válido. Cuando se utilizan ironías, como en este caso, para justificar cualquier tema, al final hay que ofrecer datos duros que las aclaren y expresen claramente lo que fueron o no fueron los sujetos de las ironías. Puedo decir sin lugar a dudas que los "Niños de Morelia" y sus hijos estamos "HARTOS" hasta le cansancio de que los usen, unos y otros, para abanderar sus necesidades, entiéndase por necesidades las de cualquiera, ya sea un político o como en este caso... no lo sé, pero si quería usted sacar a colación el tema del "Tesoro del Vita" no necesitaba hablar y desvirtuar la historia de los "Niños de Morelia" deduzco que usted no debe ser historiador ya que no es nada riguroso con los tiempos en que los hechos suceden, además de no ser preciso y emplear juicios de valor que sólo son eso y por cierto muy personales. Quisiera comenzar por aclarar ciertos puntos:
Primero: No creo que la mirada de los niños en la fotografía sea despiadada, excepto por uno de ellos que frunce el rostro y que más tarde traicionaría al grupo -alguien a quién siempre se le dio apoyo-, los demás muestran el rostro de niños agobiados y agotados, como el de Averio, provenían de una despiadada guerra civil. No creo que la fotografía que mi padre conservó por tantos años, copió y regalo a muchos de sus compañeros o a la prensa de todo el mundo pueda ser el origen de un diagnostico de algún tipo, no podemos ser tan simplistas con la historia. Por último ¿sabe usted cuándo se tomo la fotografía, como para inferir lo que está infiriendo a partir de ella?
Segundo: Cuando usted habla de que a los maestros españoles se les prometió que podrían ocuparse de la sus alumnos no se cuál sea la fuente, y si la fuente es el escrito de alguien que no haya sido directamente uno de los maestros puedo casi asegurar que no es fiable porque yo tengo otros informes de primera voz y estoy hablando de varios de los maestros en persona.
Tercero: En cuanto al refugio digno y seguro a salvo de la guerra civil, los niños si estuvieron a salvo de la guerra civil eso es evidente y en cuanto a refugio digno, las instalaciones a su llegada eran impecables, de lo mejor que el Gobierno de México podía brindar en aquella época, tenían dormitorios y baños separados: los más pequeños, las niñas y los niños, además comedor, cocina con todo lo necesario, salones de clase, gimnasios, piscinas, cine, y salones de talleres con todo lo necesario, muchos aprendieron oficios que les sirvieron para toda la vida, así, a su llegada las instalaciones eran inmejorables.
Cuarto: Para su información las listas tanto la del Gobierno de México como la publicada en la revista "Ayuda!" tienen graves errores, en nombres, en edades y en procedencia -la cuál además no implica su lugar de nacimiento- había niños menores de seis años y de hasta dieciséis años (los menos pero los había).
Quinto: Sí, fueron separados de sus maestros, ¿porqué?. Los maestros comenzaron nuevas vidas en México y los alumnos se fueron integrando al país, si esto fue de provecho o no, la historia lo diría, el porcentaje de hijos de los "Niños de Morelia" profesionistas es más alto que el promedio de profesionistas de cualquier población de países "desarrollados" para la misma generación.
Sexto: El régimen no era semicarcelario era un internado como había otros en México, principalmente de educación socialista pero con un régimen que al principio fue muy relajado para niños provenientes de una guerra, régimen que después se hizo más estricto, podría decirse semi-militar no usaban uniforme, no los instruían en el uso de las armas pero si les tocaban diana para levantarse y poder llevar un orden sobre sus actividades y control sobre los niños que efectivamente eran de carácter español -muy diferente al de los niños mexicanos-, fuerte para los estándares mexicanos, inquietos y con traumas de la guerra que, entre otros, les hacían llorar y esconderse bajo las mesas al oír cualquier avión por sospechar un bombardeo.
Séptimo: La comida era buena a pesar de ser muy diferente a la que ellos conocían.

Octavo: Los niños no venían en “precarias condiciones de salud, sin reservas” tuvieron que pasar un examen médico antes de ser aceptados para su inscripción -por sus padres o tutores- para “el viaje”, no venían sin “reservas” ya que no eran huérfanos y créalo o no sus padres los alimentaban, no se aceptaban niños enfermos o con “precarias condiciones de salud, sin reservas”. En el Mexique no pasaron hambre, se comieron las latas de leche condensada de los botes salvavidas no por hambre, eran un dulce para ellos y una travesura lógica con cerca de quinientos niños abordo de un barco por varios días.
Noveno: Con el tiempo, efectivamente la corrupción acabó con las buenas condiciones de los colegios, y también hay que considerar que para 1939, después de abril, los refugiados españoles adultos empezaron a llegar y NUNCA se responsabilizaron por los NIÑOS que llegaron a México por un convenio entre el “Gobierno de la República Española” y el “Gobierno de la República Mexicana”. A México llegó el “Tesoro del Vita”, el cuál NUNCA ayudo de forma significativa a los NIÑOS.
Décimo: Algunos niños murieron, sí, como Francisco Nebot, el primero por asirse de unos cables de electricidad al intentar saltar la barda del colegio de las niñas para abrir la puerta a sus compañeras que llegaban tarde al colegio. Efectivamente también algunos se enfermaron o accidentaron y murieron y otros se escaparon, mi padre entre estos últimos.
Décimo primero: Me imagino que usted es español por lo que no creo que tenga derecho a usar la frase de Karamasov sobre todo teniendo en cuenta a los gobernantes que ha habido en España a los cuales podríamos etiquetarlos de la misma manera ya que de los “Niños de Morelia” eran responsables sobre todo los políticos del “Gobierno de la República Española en el Exilio” y si usted es mexicano no veo porque necesita USAR a los “niños de Morelia” para atacar a los políticos mexicanos mejor USE a los niños mexicanos, como ya lo mencioné estamos hartos de que USEN a los “Niños de Morelia” para abanderar cualquier causa.
Décimo segundo: Le recuerdo que había niños menores de seis años y hasta de dieciséis y sí, había grupos en desacuerdo pero también había grupos de apoyo de buena parte de la población, en México había tanto simpatizantes franquistas, así con minúscula, como Republicanos, así con mayúscula.
No eran una “parva de chiquillos hambrientos”, no le consiento a usted ni que metafóricamente se refiera USTED A MI PADRE O A SUS COMPAÑEROS, QUE SIEMPRE HA CONSIDERADO HERMANOS, COMO ANIMALES para desatar sentimientos que apoyen su causa, si es usted consistente no emule al padre de los Karamasov.
Décimo tercero: Para su conocimiento las apedreadas no fueron “las iglesias de Morelia” fue una iglesia de Morelia colindante con el colegio -que efectivamente había sido varios años atrás un seminario- y lo fue en respuesta a que unos niños mexicanos primero apedrearon a los “Niños de Morelia” desde el campanario de la iglesia, es decir, la respuesta de los “Niños de Morelia” no tuvo nada que ver con el discurso porque los “Niños de Morelia” no lo oyeron, sólo respondieron a sus agresores desde el mismo patio en el que recibieron las pedradas, como comprenderá sólo apedrearon la pared sin alcanzar al campanario -las piedras no caen hacia abajo igual que van hacia arriba sobre todo cuando quienes las arrojan son unos niños-, NUNCA apedrearon a persona alguna pero la prensa utilizó el episodio describiéndolo en forma amarillista, es decir, UTILIZANDO a los “Niños de Morelia” para sus fines personales.
Décimo cuarto: Las libertades literarias que se toma usted para con mi familia y para con la familia de muchos de los que aquí le han escrito son insultantes para mi familia, creo que de ninguna forma las merecemos y sobre todo nuestros padres y madres que son hijos de españoles Republicanos su sarcasmo al referirse a los “Niños de Morelia” como hijos del demonio, entre otros adjetivos usados no son nunca aclarados en su texto y si son muy agresivos.
Décimo quinto: Soy hija por un lado de la Guerra Civil Española y por el otro nieta de la

Revolución Mexicana y estoy segura que usted no tiene derecho a insultar a ninguna de las dos luchas, ni a sus muertos porque no creo que usted las conozca a fondo.
Los descendientes de los milicianos de la Guerra Civil Española y de los insurgentes de la Revolución Mexicana no hemos olvidado de ninguna manera ninguno de las dos luchas, tenemos muchos muertos en nuestra familia para olvidarlas pero tal vez hemos aprendido que las armas no son la mejor forma de combatir a los opresores ya que muchas veces con las armas se pierde más de lo que se gana y con la muerte se pierde todo.
Décimo sexto: ¿De qué supervivientes de los “Niños de Morelia” habla usted?
Décimo séptimo: ¿De qué motines que se convirtieron en un problema “de orden público” habla usted?, los “motines” fueron dentro de los muros de la escuela, ¿cuál orden público?, ¿leyó usted en orden la bibliografía que menciona?.
Décimo octavo: Los colegios nunca se cerraron por completo de hecho sigue existiendo el internado “España-México” en Morelia en otra ubicación. Cuando al pasar los años los cuarenta niños españoles que llegaron más pequeños terminaron la primaria fueron trasladados a casas hogar en la ciudad de México para que pudieran seguir sus estudios secundarios, y por cierto asistieron al colegio Madrid y al colegio Luis Vives, así que no “fueron dispersos con destinos inciertos”, los grandes que no se habían escapado estaban en internados en otras ciudades de provincia o en casas hogar en la ciudad de México para continuar con sus estudios. Las casas hogar fueron exigidas por el General Lázaro Cárdenas al ”Gobierno de la República Española en el Exilio” claro que no duraron mucho tiempo porque el ”Gobierno de la República Española en el Exilio” las desapareció pocos años después y lanzó a la calle a los muchachos con cincuenta pesos y un colchón.
Décimo noveno: Nuevamente los insultos, que de toda forma lo son: “Los exiliados españoles con una formación y un estatus académico, y los representantes del Gobierno legal de la República en el exilio no se ocuparon, ni mucho ni poco. de aquella partida de niños facinerosos, que poco podían servir a su prestigio intelectual”.
La primera afirmación es cierta pero ¿de que niños facinerosos habla? No entiendo el sarcasmo que insulta a los que en aquella época eran niños indefensos, no sólo no lo entiendo, me molesta sobremanera podría usted intentar decirlo de otra manera, de forma de no agredir al nombre de los niños, pero no lo hace y en la mente de las personas que no conocen el caso queda clara la idea de que los niños eran facinerosos y de NINGUNA FORMA ES CIERTO, esta usted hablando de un colectivo.
¿Que tal la idea de que todos los españoles van a la universidad vestidos de flamencos con navaja en mano?, o ¿qué los mexicanos van a la universidad vestidos de charros y con pistola en mano?. No todos los “Refugiados Españoles” tuvieron oportunidad de ayudar, algunos fueron tan olvidados en México por la élite política española del “Gobierno de la República Española en el Exilio” como los “Niños de Morelia”, claro! la diferencia era que eran adultos y que venían casi todos con sus familias y los “Niños de Morelia” eran niños y niñas desarraigados de SU FAMILIA, porque todos la tenían al salir de España, desarraigados por decisiones de la élite política del “Gobierno de la República Española en el Exilio” desarraigados y luego olvidados por el Gobierno que los llevó a México un país extraño para ellos, las familias Republicanas confiaron en el Gobierno que hablo de este viaje como un “viaje de colonias vacacionales” que se acostumbraban en España, viaje del cual regresarían los niños y al mismo tiempo se librarían de la guerra por unos meses mientras se ganaba la guerra, Gobierno que no cuido a los niños, el tesoro más grande de una familia y Gobierno que no los regreso al seno de su familia. ¿Quiénes fueron más responsables los políticos mexicanos o los españoles?.
Vigésimo: No se si usted se haya visto en el exilio alguna vez pero “La historia edulcorada del México acogedor, hospitalario, benefactor de los vencidos de la guerra española” es en gran parte cierta, se les brindó a los Refugiados Españoles hospitalidad en todos los sentidos. Ahora, los “Niños de Morelia” son un tema aparte, el más digno y

ejemplar de todo el llamado “Exilio Español”, ellos nunca se han considerado parte de ese “Exilio” porque el “Exilio” no los hizo parte de él, ni siquiera se tomó la molestia de documentarlos y me refiero a papeles de identificación para todos los niños, algo básico, el Gobierno de México tuvo que nombrarlos “Hijos adoptivos del pueblo de México” para poder documentarlos ya siendo adultos. Algunos regresaron a España y de aquellos que no regresaron hay, como en una gran familia, todo tipo de historias la mayoría salieron adelante por sus propios medios y formaron familias que han contribuido con el desarrollo de México, las carcajadas sarcásticas no las he visto por ningún lado no es un tema para reírse mucho menos para carcajearse sarcásticamente y créame usted que conozco a muchos de ellos, la mayoría deposito en mi padre su confianza en muchos aspectos, él fue su vocero por más de treinta años. Sufrieron, Sí, lucharon, Sí, están agradecidos con México y no como una idea abstracta, Sí, recuerdan a España, Sí ¿pero qué exiliado no recuerda su país de origen?, ¿qué exiliado y qué hijo de exiliado no tiene una doble nacionalidad en su ser?. No se a cuantos “Niños de Morelia” entrevistó, tal vez entre ellos esté mi padre, pero no reconozco su nombre... no lo sé, se esconde usted bajo el nombre de “Gatopardo” o de “Atenco somos todos,2007” es muy fácil escribir como lo hace usted, así, escudado en el anonimato.
No se de que “política de exterminio institucionalizada contra el pueblo mexicano” habla usted, ¿en México tenemos pobreza? Sí, y en España ¿no la hay?, ¿y las áreas de chabolas?, ¿y las condiciones de rezago de la raza gitana, entre otros?.
Y aclaremos algo: los “Niños de Morelia” NUNCA se han sentido gachupines porque para su conocimiento en México los gachupines son los españoles explotadores, los “Niños de Morelia” nunca fueron explotadores, se integraron a México, LA MAYORÍA SE HICIERON MEXICANOS, SON MEXICANOS Y ESPAÑOLES y que yo sepa ninguno estuvo en pugna contra el poder, me gustaría que si usted sabe de alguno me de el dato concreto porque es muy fácil hablar así, “al aire” y haber si pega o simplemente lo desliza y ver si con el tiempo se convierte en realidad, le repito que yo sepa ninguno estuvo en pugna contra el poder NUNCA, SIEMPRE TRABAJARON POR UNA VIDA MEJOR Y DE PROVECHO, NO NOS HABLE USTED DE LUCHAS CONTRA EL PODER PORQUE NUESTRAS FAMILIAS SUFRIERON LA GUERRA CIVIL, EL DESARRAIGO FAMILIAR, LA MUERTE EN LA LEJANÍA, EL EXILIO Y SUS CONSECUENCIAS POR MUCHOS AÑOS.
Vigésimo primera: De Idalecio Prieto mejor ni hablar, de algunas de las fuentes bibliográficas que usó sería bueno preguntarles porque prefirieron ensuciar o investigar el nombre y memoria de los “Niños de Morelia” y no a Indalecio Prieto, ¿Porqué no investigaron sobre “El TESORO DEL VITA”?, ¿les tocaba muy de cerca?, ¿qué los motivó? o ¿qué intereses hubo detrás de sus publicaciones en el momento de su publicación?, probablemente hay mucho de lo que no esta usted bien enterado o está mal informado y ¡POR FAVOR! ¡No nos cite la Wikipedia!, en cambio Amaro del Rosal si debería ser más leído, sobre todo en España pero esto parece ser una capítulo olvidado de la historia ¿qué no interesa saber que paso con esa parte del “Tesoro de España”?, que interés hay de que esta historia no sea contada? y ¿porqué utilizar la memoria de los “Niños de Morelia” sarcásticamente para poner a la luz el “Tesoro del Vita”?, ¿necesita usted desprestigiar a los “Niños de Morelia” con sus comentarios sarcásticos para infundir sentimentalismos y sacar el tema a colación?, ¿qué no pudo hablar directamente del “Tesoro del Vita” y difundir el libro de Amaro del Rosal? Si le interesa el tema porque no habla directamente de él y difunde su trabajo, ¿porque necesita USAR a los “Niños de Morelia” como bandera para hablar del tema que le interesa exponer a la luz? Como ya lo asenté al principio “Puedo decir sin lugar a dudas que los “Niños de Morelia” y sus hijos estamos “HARTOS” hasta le cansancio de que los usen, unos y otros, para abanderar sus necesidades” tenga el valor de exponer sus temas sin USAR a los “Niños de Morelia” y sin adjudicarles adjetivos ofensivos -sarcásticos ¡Ja!- como los que empleo en su texto. Los “Niños de la Guerra” simplemente por ser eso,”Niños de la Guerra” merecen un mejor trato.

Por otro lado para aquellos que requieran información confiable sobre los “Niños de Morelia” sean o no hijos de los “Niños de Morelia” mi correo es maarandam@yahoo.com. A. Aranda.

De la misma foma que mi padre era herrero y eso no me capacita ni legitima para pontificar sobre la industria metalúrgica hispano-mexicana, porque, desgraciadamente, eso no se transmite por vía seminal... no creo que su padre le transmitiera la cátedra de "los niños de Morelia"...

Sea claro y directo al escribir su texto.
Es usted intencionalmente ambiguo. Esto le permite una salida segura a cualquier comentario.
Si tiene una opinión comprométase con ella, si no la tiene trate de hacer una presentación balanceada apelando a otras fuentes. Busque datos duros de otras fuentes.
Considere que es un grupo de mas de 500 personas y pueden existir otras tantas opiniones y perspectivas.
Un dato que podría servirle... desde siempre, en las reuniones anuales del grupo, la frase “Gracias México” ha sido repetida en forma emocionada por la mayoría de los asistentes.
Finalmente, el conocimiento que tengo sobre la historia y personalidad de los Niños de Morelia no viene solamente de mi padre.
Si alguna vez se informa como lo he hecho yo en forma personal con muchos de ellos y sus familiares se dará cuenta que muchas de las ideas que usted presenta en forma tan barroca e inegablemente agresiva no tienen fundamento alguno o están severamente distorsionadas.
Así entenderá porqué no solo yo, sino también los Niños de Morelia y muchos de los hijos de los Niños de Morelia nos sentimos tan molestos cuando alguien trata de usar su nombre para apoyar una causa, atacar a otra, o simplemente para armar barullo y ganar algo de público en forma barata. Las "viudas de" y los "hijos de" son plagas aquejadas de verborrea incontinente, edulcorante y oportunista, poco dignas de consideración.

Da igual que sean viudas o hijos de escritores, de represaliados o de víctimas de enfermedades raras... Marean hasta el hartazgo por ser hijas y viudas de... Autor: Lo que cuenta Alfredo González Olascoaga

http://de10.com.mx/detalle901.html

Alfredo González Olascoaga: entrevista:

¿Cómo fueron aquellos días en México?

Fue horrible desde que cogimos el barco hasta los primeros años en México. Yo era un niño, no tenía ni 10 años, y ya no tenía papás; la situación en el barco era temible, si no peleabas por la comida, no comías. Estuvimos varios años en un internado sin recibir el

cariño de un padre, hasta que un día Emilio y yo decidimos escaparnos con la intención de encontrar a nuestros padres. Fue en aquel momento cuando realmente descubrimos que la vida podía ser aún más cruel de lo que ya era. En un principio no teníamos para comer, en casi ningún lugar nos cogían para trabajar, por el simple hecho de ser extranjeros, donde nos daban la oportunidad nos pagaban lo mínimo, apenas nos alcanzaba para comer y dormimos muchos días en la calle.

Tu vida ha estado llena de sufrimiento…

Sí, toda mi infancia fue así, crecí solo. Tuve la fortuna de que en un viaje que hice a la Ciudad de México, una familia se preocupó por mí, me dieron de comer y me ofrecieron hospedaje, además de trabajo, pero eso fue tras vivir varios años en la calle. No sabía leer, ni escribir, no sabía nada. Tenía miedo de todo, cuando esta familia se me acercó tuve mucho miedo, no sabía si irme con ellos o no, pero como tenía tanta hambre decidí hacerlo."

Nunca he pretendido, ni por asomo, hablar en nombre de los "Niños de Morelia". ¿Esas son todas las palabras que tiene para defender su posición?, ¿con ataques personales infundados?.

El autor debería de entrevistar a varios niños de Morelia para ver si los recuerdos de Don Alfredo González Olascoaga son los de la mayoría o presentan impresiciones en el tiempo, este niño de morelia se escapó de la escuela, los que escaparon de la escuela sufrieron HAMBRE fuera de la escuela. Existen películas de la época con las instalaciones y servicios de la escuela a la llegada de los niños.

¿Otra "hija de" o "viuda de" o la misma?

El artículo no se ha basado en "peliculas" propagandísticas del PRI, ni las autoridades republicanas en el exilio, sino y cito a "Atenco somos todos", autor de este artículo

publicado en Gatopardo: las fuentes son "el grupo de niños de Morelia supervivientes, que ya adultos que pusieron nombre y apellidos a los cuatrocientos cincuenta y seis niños que llegaron a Veracruz, que durante años han seguido investigando y reuniéndose, y respaldaron lo que escribió Emeterio Payá Valera, en "Los niños españoles de Morelia : el exilio infantil en México", prologado por Dolores Pla Brugat, coordinadora del grupo de antropólogos e investigadores del proyecto: "El exilio republicano español en América Latina", autora de "Los niños de Morelia: un estudio sobre los primeros refugiados españoles en México" /2a ed. México, publicado por el Consejo Nacional para la Cultura y las Artes,Instituto Nacional de Antropología e Historia : Embajada de España,Cooperación Española, 1999.
Y, por último, le añado el testimonio que usted mismo podrá contrastar con los supervivientes: los niñas que llegaron a Morelia, que habían recibido una educación laica, mixta, como sus compañeros, con las mismas asignaturas, sabían a los nueve años más de Matemáticas, Ciencias Naturales, Gramática, etc. que las profesoras que les asignaron, y que se esmeraron por formarlas para que pudieran trabajar como "sirvientas en casas respetables" enseñándoles a coser, limpiar, responder con humildad, sin mirar a los ojos del interlocutor, trabajar en labores de hogar, etc.
Respecto a los maestros que les asignaron a los niños, se sentían ofendidos y repartían castigos porque su ignorancia desataba la hilaridad de sus educandos.(A los maestros que llegaron con los niños para continuar su educación no se les permitió ejercer. Hay cartas suyas en las que cuentan el bajo nivel de formación de los maestros mexicanos. (Caso que no parece haberse solucionado a la vista del porcentaje de trabajadores de la educación que ha sido capaz de a superar el examen para impartir clases en las escuelas públicas)
El robo de enseres y de gran parte del presupuesto destinado a los niños fue un hecho que obligó a cesar a los dos primeros directores.
Ruego lea los documentos desclasificados de la época.
Los niños de Morelia tampoco recibieron la ayuda que recibieron los exiliados españoles del núcleo amparado por el Gobierno de la República, que administró los fondos provenientes de la venta del tesoro nacional que llegó a México en el Vita, y del que no se hizo ni siquiera inventario, y a la fecha actual, se desconoce como se administró y se utilizó. Lo único que se sabe es que se crearon colegios de élite para los hijos de los españoles próximos al círculo de los dirigentes, y sin embargo no destinaron ningún presupuesto para subvencionar la educación ni la supervivencia de los niños de Morelia.
Un saludo cordial ".

Hola a todos yo soy el sobrino de Emeterio Payá Valera, la verdad incomoda que a veces personas sin escrupulos se pongán a escribir lo que a ciencia cierta en estos tiempos nadie sabe, lo único que se yo es que cuando estaban en la Escuela "ESPAÑA-MEXICO" tanto sufrieron como aprendieron a vivir sín sus padres y cuando los padres al fín pudieron llegar a México ya no les hacián falta a todos esos niños, porque ya habián pasado muchos años y la edad avanzaba, muchos saludos a todos que por alguna circunstancia sabemos un poco de lo que paso en aquellos tiempos.

Soy un periodista danés haciendo un documental sobre la visita del FC Barcelona a México en 1937, cuando llegaron a bordo del mismo barco - Méxique - como los 'Niños de Morelia'.
Quería conocer a algunos de estos niños refugiados y preguntarles si recuerdan haber

viajado con los jugadores de Barcelona a bordo del barco.
Y, por supuesto, al mismo tiempo, contar la historia de los 'Niños de Morelia' a una gran audiencia europea.
¿Sabe usted cómo contactar a los niños refugiados que aún viven?
Estaré en México del 10 al 23 de abril.

CARTAS DEL ABATE DON JUAN ANDRÉS A SU HERMANO DON CARLOS ANDRÉS, EN QUE LE COMUNICA VARIAS NOTICIAS LITERARIAS

El gusto por la simplificación y la superficialidad anticlerical nos induce a olvidar que los jesuitas formaron parte de la élite cultural y la deuda que tenemos con ellos. La Compañía de Jesús, denigrada y atacada a lo largo de su historia, fue prohibida por el Papa, y por los monarcas católicos, como el Rey Carlos III de España, que mediante un ignominioso decreto, apresó y expulsó de sus dominios , entre el 29 de marzo y el 2 de abril, a los sacerdotes jesuitas, los despojó de sus propiedades y sus enseres, y los embarcó rumbo a Italia , uno de los pocos países de acogida, junto a Prusia y Rusia. Una vez más la razón de Estado, como antes con los judíos y los moriscos, desarraigó de nuestro país una generación fértil de ideas y de proyectos, y aquellos sacerdotes, malheridos en su lealtad al Vaticano, traicionados y perseguidos por sus aliados, sufrieron todas las penalidades, pero continuaron con su ávida curiosidad intelectual, enriqueciendo el siglo que les tocó en suerte.
Esta primera carta, que reproduzco, procedentes de la Biblioteca Virtual Cervantes, da idea aproximada de la criminal necedad y la acrisolada ingratitud borbónica, porque su hermano, al mantener correspondencia con un jesuita, arrostraba penas durísimas, *aplicables a cuantos mantuviesen correspondencia con los jesuitas, y a todos los que hablasen o escribiesen públicamente contra la decisión real o sobre la Compañía*.

Carta I del abate don Carlos Andrés y Morell a su hermano.

Querido Carlos: En mal punto doy principio al cumplimiento de la promesa que te he hecho en varios correos, y que nunca he podido ejecutar, de irte dando noticias literarias, y suplir de algún modo con largas cartas el gusto que no puedo aún lograr de tu compañía y conversación. Empiezo ahora con la triste noticia de la muerte de tres ilustres literatos, con todos los cuales, más o menos, he tenido alguna relación. Estos son Mr. Saussure de Ginebra, el abate Spalanzani profesor en Pavía, y el Dr. Galvani médico y profesor en Bolonia. Mr. Saussure era gran físico y naturalista: empezó a darse a conocer con varios descubrimientos, e invenciones físicas que fue publicando, o en conclusiones que proponía en las escuelas, y academia de Ginebra, o en los diarios, y papeles periódicos de su patria, de Francia y de Alemania; pero lo que le hizo respetar como un oráculo de los naturalistas fue su grande obra de los *Viajes a los Alpes*. Nacido en la falda de los Alpes, acostumbrado desde la niñez a pisar las montañas, y hacer cada año un viaje a algunas de las más altas, habiendo atravesado catorce veces por ocho partes diferentes la cordillera de los Alpes, examinado las montañas de la Suiza, y gran parte de las de Francia, Inglaterra y Alemania, visitado con particular estudio las de Italia, Sicilia, e islas adyacentes, pasado casi la mitad de su vida sobre los montes entre los eternos yelos de algunos de ellos, y los volcanes de otros, contemplando las tierras, las rocas, las piedras, las plantas, y las producciones de todos, haciendo nuevas experiencias y observaciones, y repitiendo las hechas, sobre lo que quedaba alguna duda, no dejando pasar la cosa mas pequeña, que no la observase y examinase hasta conocerla perfectamente, comenzó a dar a luz el fruto de sus viajes en un grueso tomo en cuarto en 1779, y continuó después en otro en 1786, haciendo esperar otro, que ha salido finalmente acompañado del cuarto en 1796.

No creas, engañado por el título, que la obra contenga solo conocimientos de piedras y peñascos, descripciones de nieves y de neveras, y observaciones mineralógicas, y de historia natural: es un tesoro enciclopédico de infinidad de noticias químicas, físicas, botánicas, zoológicas, mineralógicas, y aun fisiológicas, hidrostáticas, meteorológicas, y de todas las ciencias naturales. Desde luego con la ocasión de su lago de Ginebra hace mil experiencias y observaciones originales sobre las aguas: al ver tantos con el bocio entorpecidos en una incorregible estupidez, da noticia de los crinones, y la primera razonada y distinta que hayan visto los fisiólogos, y por la cual se movió después el célebre anatómico Malacarne a hacer la anatomía, y darnos la descripción anatómica y médica de aquellos infelices individuos de la especie humana, abandonados, y casi desconocidos hasta que Saussure, y Malacarne nos los han hecho conocer. Una infinidad de nuevos instrumentos, o de mejoras en los ya usados, nuevas experiencias y variaciones, y mayor perfección y exactitud en las que ya antes de él se habían hecho, la estructura de las montañas, la naturaleza de las piedras, la faz y las entrañas de la tierra, y un nuevo mundo, por decirlo así, no visto, ni aun imaginado por alguno se halla en aquellos cuatro tornos de sus viajes a los Alpes, que pueden llamarse la bibliotheca de las montañas, y aun casi de todo el globo terráqueo. Yo tuve la satisfacción de verle en 1791, cuando había tantos años que se esperaba el tomo de continuación de sus viajes, y hablándole sobre esto me dijo que deseaba hacer antes un viaje a España para ver y gozar de Sierra nevada. Estas sierras nevadas, sierras morenas, y otras sierras, collados y montañas eran sus ciudades, palacios, galerías y jardines, y todas las delicias de sus viajes. También deseaba mucho hacer una visita, y ofrecer su respeto y veneración a nuestro célebre Don Antonio Ulloa, a quien llamaba el *Néstor de las naturalistas*, y con quien se correspondía enviándose mutuamente memorias y regalos de historia natural. No parece que pudo cumplir sus deseos, y no uno, sino dos tomos ha publicado después en 1796 sin haber visitado a Sierra nevada, que tantos atractivos tenía para su docta curiosidad. Las revoluciones acaecidas en Ginebra le expusieron al odio de alguno de los partidos, y deseó establecerse en otro país, donde pudiera gozar

de más quietud. Me escribió entonces el abate Spalanzani que deseaba ir a Pavía con algún establecimiento en aquella universidad; pero las circunstancias de los tiempos no lo permitieron. Vi después en algunos diarios literarios que había ido a París, donde enseñaba en una de aquellas escuelas, creo centrales, y el mes pasado oí decir su muerte, que no sé si ha sido en París, o en Ginebra, ni tengo más noticias de la muerte, ni de la enfermedad que la ha ocasionado. Era de edad no avanzada, teniendo solos 58 años, y mostraba una fuerte complexión, y robusta salud. Nació en 1740: a los 20 años hizo oposición a una cátedra de matemáticas, y a los 22 logró una de filosofía. Su casa era de las mejores de Ginebra, y tenía otras dos de campo muy buenas en las playas del lago con aire de las magníficas quintas de Italia, y en todo se veía un señor hacendado y rico. Su museo de máquinas físicas muchas de invención suya, y de historia natural, era muy estimable, y llamaba la atención de los eruditos forasteros, de quienes lo veo muy alabado. Ha instruido a un hijo suyo en química, física, e historia natural, y lo ha ido acostumbrando a los viajes de las montañas, como él mismo lo refiere; y en efecto el hijo ha publicado ya varias observaciones, y obritas suyas, y se ha adquirido crédito entre los físicos y naturalistas.

No sé qué tiene aquella ciudad, que produce tantos, y tan excelentes literatos. En pocos años ha perdido dos naturalistas de los más sobresalientes en toda Europa, Bonnet, y Saussure, y no muchos años antes había perdido a Trembley. Vive aún De Luc, que es lector de la reina de Inglaterra, y famoso físico, y naturalista, y el año pasado fue nombrado profesor de filosofía, y geología en la universidad de Gottinga. Senebier, sujeto distinguido en las ciencias naturales por su obra del arte de observar, y por varias investigaciones y observaciones que ha publicado con descubrimientos importantes sobre la influencia de la luz, sobre algunas plantas, sobre la digestión y generación, sobre los puntos tocados por el abate Spalanzani en sus obras, que él ha traducido en francés con prólogos y notas muy útiles, y sobre varias otras materias físicas.

Este tiene además mucha erudición, de que no suelen abundar los físicos y naturalistas. Como ha seguido la carrera de la Iglesia, y ha sido ministro, o cura de una parroquia, ha estudiado la teología, y el curso de erudición que esta pide. Su primera producción literaria que yo sepa es una disertación de la poligamia. Nombrado después bibliotecario de Ginebra abrazó la erudición bibliográfica y literaria, y publicó luego un *Catálogo razonado de los manuscritos de la biblioteca de Ginebra*, y poco después una *Historia literaria de Ginebra*, y en un diario literario de aquella ciudad ha ilustrado varias lápidas, y otros monumentos de antigüedad que en ella se encuentran, y ha manifestado una erudición muy universal. Te hablo de este con más distinción, porque he tenido con él más relación y correspondencia epistolar. Ahora después de la primera sublevación de Ginebra abandonó aquella ciudad, y se retiró a Rolle, de donde no he tenido de él otras noticias que las que he visto en los papeles públicos, y en las obras que ha dado a luz.

A más de este es nombre famoso entre los físicos el de Pictet, su *Ensayo sobre el fuego* está lleno de miras originales, que abren nuevo campo a los físicos, y bastaría aquel opúsculo para darle lugar entre los más distinguidos. Pero tiene varias otras producciones muy estimables y en medio de sus investigaciones profundas y originales se ocupa con mucho provecho de la Europa en comunicarle las obras importantes que salen en Inglaterra, y formar en lengua francesa, de uso más universal, una *Bibliotheque brittanique*, que cuenta ya muchos tomos. No quiero dejar de nombrarte un teólogo Mr. Cleparede, que en una obrita contra Rousseau, *Consideración sobre los milagros del evangelio*, hace ver su juicio, y su filosófica y teológica erudición.

El nombre solo de Necker recuerda un ginebrino, que ha hecho gran ruido en todo el mundo como ministro económico y político, y no lo ha hecho poco entre los literatos con sus escritos. Lo hace también grande con los suyos Mallet du Pan, tratando con mucha fuerza y vivacidad las materias que al presente llaman la atención de toda Europa. No acabaría si quisiera ir nombrando a Bertran, Le Sage, Trembley, hijo o sobrino del

famoso Trembley, Picot, y varios otros, que deberían tener lugar si se quisiera hacer un catálogo de los escritores ginebrinos; pero no hago tal, y solo por incidencia al participarte la muerte Saussure he dejado correr un poco la pluma para darte alguna noticia de la literatura de la patria de aquel grande hombre, de la que tal vez tendrás poca.

No es menos grande, y por un lado lo es aún mucho más, el difunto Spalanzani. El arte de observar y experimentar parece llevado a la perfección en las experiencias y observaciones de Spalanzani. Aquella viveza de ingenio y de imaginación para ver desde luego en cada materia cómo se ha de entablar la observación o la experiencia para hacerla útilmente, y conocer por ella la verdad que se desea; aquella paciencia y flema de hacerla, y repetirla más y más veces, variarla, aumentarla, disminuirla, volverla y revolverla por todos lados, sin dejarla de las manos hasta haberla apurado bien; aquella penetración y agudeza de mente para advertir a la primera vista lo que sobra, lo que falta, y hallarle luego pronto remedio; aquella vigilancia y atención para no pasar por alto las más pequeñas, y al parecer despreciables circunstancias; aquella solidez y exactitud de juicio para sacar de ella las verdaderas consecuencias, y desechar las arbitrarias e inciertas; aquella prudente y sabia reserva de ceñirse y contenerse en los términos que la observación o la experiencia prescribe, sin dejar dar un paso más adelante a la inquieta vivacidad del ingenio; y en suma aquella lógica penetrante y aguda, severa y sólida, que se ve en las investigaciones y descubrimientos de Spalanzani, ha sido la admiración de los filósofos imparciales sus coetáneos, y lo será de los venideros, y el ejemplar de los físicos y naturalistas, que querrán hacer el conveniente estudio de la naturaleza.

Noble elogio de Spalanzani son a mi parecer los tomos de cartas del celebrado Bonnet. La primera obra de Spalanzani, o a lo menos la que empezó a darlo a conocer universalmente, fue su traducción con notas importantes de la obra de la *Contemplación de la naturaleza* de Bonnet, y ésta le dio ocasión de entrar en comercio epistolar con aquel gran maestro de los naturalistas. Éste al principio le trata como discípulo, y le hace conocer su superioridad: poco a poco va creciendo la estima, y le mira como igual, hasta que al fin llega a consultarle como superior y maestro. En efecto, sobre las mismas materias que había ilustrado Bonnet supo él hacer nuevos descubrimientos, y extendió sus investigaciones a otras muchas no tratadas por Bonnet, ni otro alguno, sino enteramente nuevas y originales, y con razón pudo decir el mismo Bonnet, que más verdades había descubierto en pocos años Spalanzani, que academias enteras en medio siglo.

Varias veces he considerado allá en mi interior a aquel gran filósofo hora paseando por los fosos, sentado junto a un lago, o a un estanque, moviendo y manejando aquel lodo, viendo y reviendo, examinando y contemplando los gusanillos, y pequeños insectos que en él habitan, y viviendo, por decirlo así, con aquellos animalillos, que comúnmente se desprecian, y que apenas los conocen aun los mismos naturalistas; hora metido dentro de su cuarto llena de sapos, ranas caracoles, lagartijas, y otras sabandijas semejantes, rodeado de gallinas, palomas, perros y gatos, estudiando en todos ellos con utilísimas experiencias los más secretos arcanos de la naturaleza, y no he sabido resolver si era más de admirar su paciencia para permanecer tanto tiempo en aquel género de vida, o su talento y habilidad para saber sacar de ella tantas verdades, y tantos conocimientos de la naturaleza. Catorce, y más años ha vivido por fosos y pantanos en busca de los animalillos infusorios; 2027 son a lo menos las ranas y sapos que ha cortado, y abierto en el momento en que estaban unidos para su generación, y otros tantos, o tal vez más antes o después de él; infinitas pruebas ha hecho dando de comer a palomas y gallinas ya con piedrezuelas, ya con tubitos de plomo, y manejando después, y examinando sus excrementos, y en cualquier punto que quería tratar no cesaba un momento de hacer, repetir y variar sus experiencias y observaciones.

Yo le vi en Mantua, donde se detuvo dos días para favorecerme con su compañía, y

como entonces llevaba no sé qué ideas sobre la diferente salubridad de los aires, y del uso del eudiómetro, en vez de paseos y visitas repetía varias veces las experiencias con un eudiómetro que traía consigo en el viaje, y con que aun por el camino las hacía donde le parecía conveniente. ¡Qué ruido no movía estos años pasados buscando murciélagos para hacer con ellos varias pruebas, de las cuales no ha dado cuenta al público, y por ello no sabemos aun las resultas! Esta inquieta actividad, y curiosa paciencia le han valido tantos preciosos descubrimientos, de que están llenas sus obras.
No sé a quien debemos admirar más, o a Mr. de Saussure trepando por peligrosos riscos, metiéndose entre peñas, donde no se veía sino algún poco de cielo, y algunos cuervos, puesto sobre las cimas más altas de las montañas cubiertas perpetuamente de helada nieve, y allí, adonde apenas llegan algunas águilas, o algún otro rarísimo pájaro, formar su cabaña, y plantar su estudio, y con picos y martillos anatomizar los peñascos, con los barómetros, termómetros, y otros instrumentos físicos dar tormento a la naturaleza, y hacer experiencias físicas y meteorológicas, que ningún otro mortal había podido, ni tal vez podrá hacer, y dominando de aquella inmensa altura todo el globo terráqueo dar a los hombres, que tan bajo de sí veía, lecciones de historia natural, y de física, que estaban reservadas a su infatigable aplicación; o al abate Spalanzani hora sepultado en fosos y pantanos, revolviendo lodos, acariciando gusanillos, hora cerrado en su cuarto como en una arca de Noé con sus sapos y ranas, con sus caracoles y lagartijas, con sus palomas y gallinas, perros y gatos, y con varias especies de animales, dar de comer a unos, hacer el rufián a otros, cortar en pedazos algunos, rehacer a otros los pedazos cortados, quitar la cabeza a unos, y hacérsela renacer, dejar a otros por muertos, y hacerlos revivir, y consultarlos todos para aprender de ellos verdades desconocidas, y hacerlas conocer a los otros hombres.
Son extraños los gustos de los filósofos, y a los más de los hombres parecerá la vida de estos de quienes hablamos extravagante ridiculez, o melancólica locura; pero lo cierto es que ellos con tales ocupaciones pasan días más alegres, y gozan deleites más puros, y más sólidos y sinceros divertimientos, que los ociosos y poltrones del mundo en sus teatros, saraos, regodeos y pasatiempos, y son infinitamente más útiles a la humanidad.
Spalanzani ha variado sus divertimientos naturalísticos, y ha hecho muchos viajes de mar y tierra, en el Mediterráneo, en el Adriático, por Francia, por los Suizos, por toda Italia, y las más de sus islas, especialmente la Sicilia, y las Eolias. Seis tomos ha dado a luz de sus viajes a las dos Sicilias, y a las islas Eolias, en los cuales, aunque principalmente ha tomado por objeto ilustrar las producciones volcánicas, ha tratado otras muchas materias curiosas, y de mucha utilidad. Ahora estaba poniendo en limpio, para darlo también a la imprenta, su *Viaje a Constantinopla*, en que, según varias materias que le oí decir trataba en él, era preciso que hubiese cosas muy dignas de la atención de los naturalistas, y de todos los filósofos, y eruditos. Pero la muerte nos ha privado de esta, y de varias otras producciones literarias de aquel ilustre maestro.
Su edad era más adelantada que la de Saussure, y tocaba ya, o había cumplido los 70 años, pues me acuerdo que en agosto, o Setiembre de 1795 me dijo qué tenia 66, pero estaba tan fresco, y era de complexión tan robusta, que hacía esperar muchos más años de vida, y de pública instrucción, si un insulto de apoplejía a principios del mes pasado no le hubiera cortado la carrera que tan gloriosamente seguía. Su patria era Scandiano, villa distinguida en los estados de Módena: fué profesor en la universidad de Módena, y allí empezó a darse a conocer de suerte que llamó la consideración del conde de Firmian, ministro plenipotenciario de la Lombardía austríaca, para convidarle con una cátedra, y distinguido sueldo en la universidad de Pavía, donde ha enseñado por largos años, y donde por último le ha cogido la muerte.
En sus viajes ha hecho preciosas colecciones para el museo de historia natural de la universidad de Pavía, y al mismo tiempo las hacía también para uno suyo propio que tenía en su casa paterna de Scandiano bajo la custodia de una hermana suya, que me dicen contiene muy preciosas raridades, y piezas de mucho valor, y que ahora quieren

ponerlo en venta sus herederos. A más del *Viaje de Constantinopla* que tenía ya casi pronto para la impresión, estaba trabajando para la sociedad italiana, en cuyos tomos tenía ya impresas otras memorias; estudiaba sobre el gas de los planetas, y ocupaba en varias investigaciones importantes su infatigable actividad.
No era del calibre de Saussure, y de Spalanzani, pero era sujeto de mucho mérito el difunto Dr. Galvani. Era profesor estimado en la universidad de Bolonia, buen médico, y buen físico; pero poco conocido fuera de allí hasta que las ranas, o el descubrimiento de la electricidad animal, que su penetración le presentó al ver casualmente producirse algunos movimientos en las ranas ya muertas al tocarlas un cuerpo eléctrico, llevó su nombre por toda la culta Europa. Publicó su descubrimiento con mucho fondo y solidez de doctrina, y luego, como suele suceder en las novedades importantes, se vieron salir muchas explicaciones, confirmaciones, impugnaciones y defensas, censuras y elogios; y en poco tiempo se formó una biblioteca de opúsculos, que se publicaron en pro y en contra de la electricidad animal; pero bien presto quedó triunfante la verdad, y ahora la electricidad, que en Francia veo llamarse con el nombre de *Galvanismo*, forma un ramo de física, que llama el estudio y la atención de los físicos y de los médicos, y que hará inmortal el nombre del Dr. Galvani.
Los españoles D. Ramón Rialp, mis discípulos D. Gaspar Sánchez, que has conocido ahí de paso para Teruel, y D. Joseph Ferrer, que está en Barcelona, y algunos otros eran de los más asiduos concurrentes a sus experiencias y lecciones, y él mismo confesaba que se había aprovechado no poco de sus luces y advertencias. No le he visto una vez en casa de Sánchez, y Ferrer, adonde vino para favorecerme, y con las faldriqueras cargadas de ranas para hacerme ver aquellas experiencias, y explicarme la teoría, de que yo entonces aún no tenía idea, y realmente me pareció, cual lo había oído celebrar, un hombre docto y modesto, en quien resplandecía igualmente el saber que la virtud.
El año pasado al proponer a los profesores el juramento de odio a la monarquía el Dr. Galvani fue uno de los que estimaron más perder su cátedra, que gravar su conciencia con un juramento que no creía poder hacer. No se puede negar que sea digno de mucho elogio quien sacrifica honores y emolumentos temporales por no exponerse a faltar a su conciencia; y en efecto, sin querer por esto ofender a los otros, los que se han negado a este juramento han sido profesores de notoria probidad, y de talentos sobresalientes, y he oído hablar con mucha edificación del célebre matemático, Dr. Canterzani, que ha sacrificado cátedra, presidencia de la academia, y otros honores y emolumentos, y se ha reducido a una privada estrechez; de la famosa poetisa y grecista Clotilde Tambroni, que por el mismo motivo ha abandonado su cátedra de griego, y otros provechos, y aun la patria, y se ha acogido a esa ciudad, como sabes; y del médico Dr. Utini, y de todos los otros que han hecho semejantes sacrificios. A buena cuenta el religioso Dr. Galvani se ha adquirido a tiempo este mérito delante de Dios, pues apenas han pasado siete u ocho meses cuando le ha llamado a la otra vida a coger el fruto de su virtud y religiosidad.
Pero basta de muertos, y ya que hasta ahora por noticias literarias solo te las he dado de muertos, quiero darte una al contrario de una obrita que me han regalado del arte de prolongar la vida humana. Su autor es el Dr. Hufeland, profesor de medicina en la universidad de Iena, y el traductor el Dr. Careno, médico italiano, que está en Viena, como has visto en mi carta sobre la literatura de aquella ciudad. Verdaderamente toda la medicina no es otra cosa que el *arte de prolongar la vida humana*, y el poner este título a un tratado particular hace esperar cosas nuevas y particulares: la universidad de Iena es una de las más famosas de Alemania, y por consiguiente de Europa en las presentes circunstancias, y entre los profesores de aquella universidad uno de los más célebres es el Dr. Hufeland, a quien por su singular fama el conde Wilzeck, cuando era ministro plenipotenciario de la Lombardía, hizo cuanto pudo para traerle a Pavía a la cátedra de clínica que habían ocupado Frank, Tissot, y Borsieri; y tanto lo especioso del título de la obra como la fama del autor todo prometía más de lo que me ha presentado

la misma obra.
Esta es de dos tomos en 8º dividida en dos partes, el primero contiene la parte teórica, y el segundo la práctica. A lo menos en lo que mas fácilmente puede entrar mi juicio no veo el método y orden de las materias en la mejor disposición. La parte teórica empieza con la destinación de esta su arte macrobiótica, y aquí viene con los egipcios y griegos, gerocómica, gimnastíca, San Gemain, Mesmer, Cagliostro, y otros tales, que parece debían entrar más en la parte práctica que en la teórica, y al contrario la mitad de la segunda parte es el examen de los medios que abrevian la vida, lo que parece debía haber tenido más propiamente su lugar en la teórica que en la práctica, y así varias otras cosas las va metiendo como le vienen, y ha de repetir muchas veces en la práctica lo que ha dicho en la teórica.
Por más que en el prólogo insista mucho en que esta su arte macrobiótica es diferente de la medicina, y de la dietética, poco o nada dice que no esté comprehendido en la dietética, o higiena. Aun entrando en la materia me parece que sin ser médico puedo juzgar que no la trata con la mayor felicidad. Algunos puntos que toca son poco generales para entrar en un arte semejante; por ejemplo entre los medios, o mejor diría motivos de acortar la vida, uno es la onanía moral, otro el suicidio, y entre los de prolongarla la conservación de los dientes, y la limpieza de la piel. No dudo que sean verdaderos unos y otros, si bien lo de la onanía moral podrá ser muy raras veces; pero ¿son acaso cosas que merezcan tratarse en particular en un arte de prolongar la vida humana? Por lo general lo más de lo que dice realmente a propósito para esto es lo que se halla en casi todos los que escriben del modo de conservar la salud, y lo que comúnmente dicen en la conversación aun los que no son médicos, sobriedad, movimiento y ejercicio del cuerpo, tranquilidad y contento de ánimo, dormir bien, esto es, quietamente, y el tiempo necesario a la propia complexión, comer moderadamente en cuantidad y cualidad, y otras tales que ya sabemos. Otras que quiere poner de suyo no sé qué utilidad tengan; como por ejemplo ¿qué haremos para tener un buen origen físico? Tendremos el que nos ha tocado al nacer, y paciencia. Conservar el verdadero carácter que cada uno tiene es otro medio que propone para vivir largamente, y aquí habla de los que han de mudar de carácter según el papel que hacen; todo lo que no veo que tenga una inmediata influencia con la larga vida. Sin embargo en la diferente duración de la vida de los príncipes, de los literatos, y entre estos de los filósofos, poetas y otros, de los monjes, y ermitaños, de los marineros, cazadores, labradores, soldados, y otros empleos, en la determinación del tiempo de las diferentes vidas, en los mismos medios ya sabidos de abreviar, o de alargar la vida, y en varios otros artículos trae erudición y doctrina, que creo pueda merecer el estudio de los médicos.
Esta obra que salió en Alemania el año 1796, y en Pavía el pasado 98, me trae a la memoria un papelito suelto, que cinco, o seis años ha publicó estando en Mantua un médico toscano gran viajador, que había corrido por Francia, Inglaterra y Alemania; y aun en Italia no podía estar fijo en una ciudad, sino que iba siempre pasando de una a otra, el Dr. Vallí, que en Inglaterra publicó en inglés algunos opúsculos, que le dieron honor; en Mantua un papelillo sobre la electricidad animal, que no contenía más que una precisa relación de experiencias suyas enteramente originales, y así otros en Padua, y otras ciudades; este pues sacó a luz un opúsculo del modo de evitar la vejez, el cual, aunque no sé si podrá ser de mucha utilidad, es ciertamente más original, y más curioso que el de Hufeland. No lo tengo presente, porque siendo un pequeño cuaderno fácilmente se habrá traspapelado en la transportación de mis libros: en general me acuerdo que examinaba en qué consiste la vejez, que es en la falta de un fluido, y en la sobra de materia terrea, y proponía una bebida, que iría disolviendo la parte terrea sobrante, y restableciendo el fluido que se pierde, todo esto, propuesto con brevedad, claridad y precisión de términos fisiológica y química, hacia un libro, que, aunque muy pequeño, y tal vez para el uso de la vida poco útil, era curioso y docto.
Ya que he empezado a hablarte de libros de medicina no será noticia literaria fuera de

propósito la que he leído en un viajero alemán Christiano Luis Lenz del estado de la medicina en Suecia y Dinamarca, Gothemburg, según este dice, tiene tres excelentes médicos Engelhard, Dubb, y Karlander. El profesor Saxtorf, uno de los más doctos y versados en la obstetricia, la enseña en un famoso y celebrado hospital que hay en Copenhague para las mujeres que van de parto. Las universidades de Upsal, y de Copenhague, como también la academia de esta, presentan gran número de ilustres profesores no sólo en la medicina, sino también en las ciencias que le pertenecen, como botánica y química, que se cultivan cual en ninguna otra universidad.
Los jóvenes estudiantes asisten a las lecciones de los profesores cinco, seis y aun siete años, y se instruyen, bien en la teórica antes de darse a la práctica, y después de graduados para ganarse crédito deben viajar. Así lo han hecho Murray, Thumberg, Akrel, Sparrman, Callisen, Winsloo, y otros muchos. He leído los viajes de Thumberg y de Sparrman con mucho gusto por la variedad de noticias que dan no sólo geográficas, sino de historia natural, botánica. lo que hace ver los conocimientos de que estaban bien provistos desde su juventud aquellos médicos, cuando emprendieron sus largos viajes nada menos que por África y Asia. Algunos hacen estos viajes a sus costas, porque varios sujetos de buenas y ricas casas se dan al estudio y profesión de la medicina, otros a costas del rey, de la universidad, o de algunos señores particulares, que los quieren proteger, o se empeñan por el honor y provecho de la nación. Aquellos médicos instruidos en las lenguas se hacen llevar los libros y diarios literarios que salen en otras naciones, y se aprovechan de los descubrimientos que se hacen en todas ellas.
Con esta ocasión, y cabalmente hablando de los médicos alabados en este viaje, he visto la reflexión de un literato, que observa el error en que están varios, de que a un literato poco dinero le basta, y que mientras se dan gruesos sueldos y pensiones a cualquier empleado, y a cualquier criado, parece que se eche a la calle el más mínimo emolumento que se de a quien profesa las letras. Un literato, dice, que sea realmente digno de este nombre, necesita de comodidad, y alguna abundancia por el bien de las ciencias que cultiva: necesita un amanuense para no perder su precioso tiempo en copiar y poner en limpio sus escritos; necesita los diarios literarios de otras naciones para saber los nuevos descubrimientos y nuevos libros; necesita muchos de estos libros que se han de hacer venir de lejos con mucho gasto; necesita de gran correspondencia epistolar con otros literatos; necesita a veces de instrumentos y de experiencias; necesita también hacer a las veces algún viaje; y necesita mil otras cosas, en que se emplearía útilmente el dinero, que tantos otros de grandes sueldos no saben emplear sino en vicios y vanidades.
¿Pero adonde vamos con los médicos de Suecia y Dinamarca que tanto alaba el alemán Lenz? Con más complacencia me volveré hacia nuestros médicos españoles con mil parabienes por haber empezado a publicar sus memorias la Real Academia Médica Matritense, de cuyo primer tomo, aunque dado a luz en 1797, sólo poco ha tenido noticia por los extranjeros, y he visto con mucho gusto hacerse un cumplido extracto, y los debidos elogios a una memoria de tu amigo D. Antonio Franseri sobre una dificultad de respirar periódica, que manifiesta el influjo de la luna en el cuerpo humano. Más por extenso he podido leer la disertación médica sobre el cólico de Madrid del Dr. D. Ignacio María Ruiz de Luzuriaga, y me pareció en su género cosa perfecta. No conozco personalmente a este autor; pero vi años atrás un pequeño opúsculo suyo que me envió de París nuestro amigo Cavanilles, que tanto honor da a nuestra nación, sobre la descomposición del aire atmosférico por el plomo, y aunque cosa brevísima y de pocas paginas, me llenó mucho, como también a algunos químicos de Mantua, a quienes lo hice leer, y no dejé de hacer mención de él en mi obra de la literatura en el capítulo de la química. Con esta prevención he leído con ansia esta disertación luego que me ha venido a las manos, y me la he bebido toda con gran placer. Aquel espíritu de observación, aquella vista penetrante aquella atenta y pausada reflexión, aquella variedad de conocimientos, con que de la cama del enfermo puede pasar a los jarros, y

a las ollas de la cocina, y hacer servir la historia natural y la química a la medicina, son las que constituyen un hombre grande, y me hacen esperar que Luzuriaga dará nuevo lustre a su facultad, y a nuestra nación.

Aunque es ya sobrado larga esta carta, quiero alargarla algo más, y darte noticia de una obra italiana de un español, de la cual tal vez no la tendrás aún. Esta es del abate Don Vicente Requeno sobre el restablecimiento de la música de los griegos y romanos, impresa aquí el verano pasado, y no bien concluida del todo la impresión cuando el autor partió para Zaragoza, y pocos o ningún ejemplar perfecto se pudo llevar consigo, por lo que me persuado que poca noticia se podrá tener ahí de ella. En dos tomos en 8º comprehende la materia, reservándose el publicar ahí otro, si tiene medios para hacer las pruebas que aquí no le ha sido posible ejecutar. Empieza con la historia de la música antigua, y ésta desde Jubal, o se puede decir desde el principio del mundo, en lo que no puede dejar de haber mucho de arbitrario, y de propia imaginación; pero viniendo después al tiempo de los poetas griegos va mostrando cómo se unían en cada uno de ellos la música y la poesía; como gran parte de la diversidad de la poesía provenía de la de la música; y cómo la decadencia de la música vino de dividirla de la poesía, y quererla hacer parte de la matemática, tratándola con cálculos y proporciones, de que ella no necesita.

Entra después a examinar los escritores de música griegos, y aun los pocos romanos que tenemos, y expone la doctrina del antiguo Aristógeno, de quien nos quedan aún tres libros, bien que algo alterados en las ediciones que se han hecho de ellos, la de Arístides y Quintiliano, lo poco que dicen Plutarco, Sexto Empírico, y Macrobio, la doctrina de Claudio Tolomeo, de Nicomaco, Bacchio el mayor, y Gaudencio, la de Boecio, Euclides, no el geómetra, Alipio, S. Agustín, Marciano Capela, Psello, y Briennio, y en todos ellos va distinguiendo lo bueno, que en los más es muy poco, de lo malo, y falso, o inútil aunque tal vez no sea falso. Donde es de observar que Briennio, aunque tanto más moderno, es uno de los que hablan más ajustadamente, y con más exactitud y claridad. Dada la historia entra a explicar los sistemas diferentes de la armonía de los griegos, y explica más largamente el sistema ecuable, que fue el más generalmente seguido por los escritores, y propone un instrumento de los antiguos llamado canon, del que da un diseño, que él ha hecho trabajar, y con el que ha hecho varias pruebas, sobre las cuerdas, las consonancias, y todo el sistema de la música griega. A más de los instrumentos examina el canto, que dice dividían los griegos en métrico, armónico, y rítmico, y largamente examina aparte lo que es el ritmo, sus pies, sus mutaciones, y todo lo que le toca.

Yo no entiendo la materia para poder dar mi juicio, sólo observo que este punto del ritmo de la música antigua debe ser muy obscuro y enredado pues todos los escritores hallan dificultad en entenderlo, y te diré para gloria de nuestra nación, que en este tiempo han trabajado tres españoles para ilustrar la música antigua, y el ritmo; y me persuado que todos tres le habrán dado cada uno por su parte sus luces particulares. La obra de Requeno está ya expuesta al público; los otros dos son D. Esteban Arteaga, cuya felicidad bien conocida en tratar todas las otras materias que ha emprendido, puede ser una segura prenda de la que le habrá asistido igualmente en tratar esta que deseamos ver cuanto antes publicada, y D. Buenaventura Prats, cuyo manejo de libros y códices éditos e inéditos, y pericia en la lengua y erudición griega me hacen esperar que su obra haga olvidar las de los Meimbomios y Donis, y dé nuevo lustre y extensión a este ramo de la literatura griega. Si a estos tres añades a Don Antonio Eximeno, que compuso su obra, que puede llamarse clásica, del origen, y de las reglas de la música, y al abate Pintado, que publicó una gramática de la música, te causará tal vez admiración que tantos españoles hayan casi a un mismo tiempo empleado sus estudios en la música; pero podrás tener el gusto de pensar que sus trabajos en esta parte han sido, y serán honrosos a nuestra nación. Te hablaré finalmente, antes de levantar la mano de esta carta, de otro español, de quien no tengo conocimiento, ni he hallado alguno que lo

tenga, y que merece ser conocido por su celo por las letras, por el establecimiento literario que ha emprendido, y por su propio mérito literario. En un tiempo en que se han destruido tantas ilustres academias y sociedades literarias, un español en Italia ha querido establecer una, que puede servir para tener en pie la cadente literatura. Este es D. Eduardo Romeo conde de Vargas, el cual hace algunos años que está en Italia, y ahora vive en Siena, donde, según he oído, se trata sin lujo, pero con decencia, y está muy retirado metido en sus estudios, sin ser conocido personalmente sino de muy pocos aun en Siena.

Ha publicado algunas obritas en italiano; pero no he visto sino su *Saggio dell' epigrama greco*, impreso en Siena en 1796, y dedicado al conde de Bernstorf ministro de estado del rey de Dinamarca. De este librito saco tres noticias tocantes al autor, primera, que ha viajado por Europa, habiendo estado en Copenhague, y con algún decoro, pues podía tratar de cerca a aquel ministro, como dice él mismo: *nel soggiorno che io feci cosi d' appresso alla vostra gloria*. Te copiaré una cláusula de la dedicatoria, que tal vez podrá darte alguna vislumbre para conocer al autor, que yo no conozco. Dice así: *il sistema d' un' energica neutralita, col quale avete procurato alla Danimarca tutte le dolcezze della pace, sostenuto il commercio, accresciuto lo splendore delle arti, che vi hanno trovato un asilo, ha sparso ancora sopra di me il suo benefico influsso.* Segunda, que a lo menos a la mitad del año 1796 vivía ya en Siena, pues la data de la dedicatoria es: Siena 10 Luglio 1796, y parece natural que algún tiempo antes hubiera llegado allá, y mucho más que se hallara en Italia, pues podía escribir en esta lengua en prosa y en verso con tanta facilidad. Tercera, que sea un caballero culto, como lo muestra todo el discurso del libro, y esté versado en la lengua griega, como se echa de ver en las traducciones que hace de los epigramas griegos.

Este pues D. Eduardo Romeo conde de Vargas, movido del celo de mantener el buen gusto en la literatura, pensó en establecer una sociedad literaria de 40 individuos, que concurriesen a este intento, y a lo menos cada dos años enviasen una disertación para insertarla en las memorias que se imprimirían, y cada año a lo menos un artículo para el diario, en que se publicarían las observaciones literarias de los socios sobre los libros y novedades literarias que irían saliendo. Como el fin de esta academia es formar una íntima unión entre los principales doctos de Italia, cada socio podrá contar sobre el interés que todos los otros se tomarán en suministrarle las luces que podrá desear en cualquier género de literatura en que componga alguna obra.

Me hizo el honor de convidarme a ser uno de los 40, y me alegaba para empeñarme la fuerza de la patria común; pero como yo no pensaba en quedarme aquí sino para atender a la impresión del último tomo de mi obra, le di gracias por la honra que me hacía, y me excusé de no poderla aceptar. He tenido con todo algunas noticias posteriores de los adelantamientos que ha ido haciendo esta empresa, de los presidentes, y una especie de jueces o censores que se han nombrado, y del tomo que se imprimía, y saldrá luego a luz, o tal vez a éstas horas habrá ya salido.

Aunque el autor reside en Siena, el diario, o las observaciones literarias y las memorias, o disertaciones de la sociedad se imprimen en Florencia, tal vez por la mayor facilidad de la transportación de los libros impresos. El secretario de la sociedad es el abate Jayme Sacchetti. Aquí hay dos socios, el Sr. conde Cerati, el cual tiene además no sé qué otro empleo, y el célebre P. Pagnini.

Tú ves que la empresa es grande, y muy loable. Un particular en un país extraño formar de toda la Italia una academia, establecer sus reglas o su código, nombrar sus empleos, recoger los escritos, pasarlos por un justo juicio, imprimirlos, y cargarse con las penas, cuidados, fatigas y gastos que ha de causar todo esto es cosa que no se ve frecuentemente, y que debe ser de mucho honor al español que la ha emprendido, y la lleva adelante con felicidad. El Señor le bendiga, y pueda su academia satisfacer el loable intento de su fundador, y ser el apoyo, y el esplendor de la literatura, que va tan decaída, y se ve tan obscurecida con despreciables librejos, e infames producciones.

Creo que tendrás ya bastante carta; no sé si será esta suerte de noticias las que tú deseas: te he escrito lo que me ha venido a la pluma, no para formarte un diario literario, sino solo para entretenerme contigo un poco, y sacudir la molestia y fastidio que me causa este bendito índice de toda mi obra, que me detiene tanto tiempo. Si puedo el correo que viene te hablaré de más libros nuevos, y procuraré contentar de algún modo tu loable curiosidad, que es común a otros muchos, según veo en las cartas que me escriben. Sabes cuanto deseo complacerte en todo, y que soy siempre &c.

Te copio aquí lo que dice La Fontaine del padre jesuita Antoine Escobard(o Escobar)en particular, pero lo digo de esa chusma en general:
"Veut-on monter sur les
célestes tours?
Escobar suit un chemin de velours,
Il ne dit pas qu'un peut tuer un homme,
qui sans raison nous tient en altercas,
pour un fétu ou bien pour une pomme,
Mais qu'on le peut pour quatre ou cinq ducats!

ROMANCE DEL ALBACETEÑO Y LA GATA ENCABRITADA

Nacido yo en Albacete,
  de paso por Aragón,
topéme con una cabra
   de gatuna condición.
- Qué buscas o qué demandas
   tan lejos de tu mansión,
que esto es coto cerrado
   y non puedes pasar, non.
- No vengo en busca de guerra,

que vengo de paz en son,
a pegarnos buena hebra
y a reírnos un montón.
- Mientes como bellaco,
que traes pistola, non flor.
A quien así viene armado
no le concedo mi amor.
- Me quede ciego si miento,
me atrape una maldición,
que eso es que estoy contento,
y non es pistola, non.

Ese a modo de pistola
con que muestra su alborozo,
me demuestra por si sola
la amistad de la que gozo.
Y se infiere del tamaño,
la calidad de su estima,
que viendo como está el paño,
es cosa que se escatima.
Y viéndolo tan buen mozo
mi contento y mi alegría
surgen así, sin rebozo,
Y en ripiado se lo advierto
y en rimado se lo pongo:
¡cuando quiera, lo pervierto!

Pues yo, a veces, me acuerdo de Gloria y de lo poco que se conocen sus poemas...

No dejan escribir.

Trabajo en un periódico
pude ser secretaria del jefe

y soy sólo mujer de la limpieza.

Sé escribir, pero en mi pueblo
no dejan escribir a las mujeres.

Mi vida es sin sustancia,
no hago nada malo.

Vivo pobre.

Duermo en casa.

Viajo en metro.

Ceno un caldo
y un huevo frito, para que luego digan.

Compro libros de viejo,
me meto en las tabernas,
también en los tranvías,
me cuelo en los teatros
y en los saldos me visto.

Hago una vida extraña.

JC: si quieres verme lanzar sapos y culebras, ponme delante un "poema" de Gloria Fuertes, que es un tongo literario de principio a fin, digno de los semianalfabetos que la auparon, gracias a su tierna amistad con una americana multimillonaria, que no sabía ni papa de español, y que consideró necesario ofrecerle un puesto de lectora en EEUU y una fama de poetisa en España.
Hágame el favor de no ponerme caquitas literarias de Gloria Fuertes en esta bitácora, que por menos provocación que eso he estado yo en la cárcel.

ja,ja,ja, no hay forma de cogerla con las uñas replegadas. En fin, no conocía la fama de "poetisa" de la Fuertes, yo creía que se lo conocía por sus ripios para niños de la "caja tonta", pero tiene algún poema serio que a mí me gusta, con su permiso, claro. Perdón por colgarlo, seré como "...una sombra que se pavonea y se agita por un momento sobre el escenario... y desaparece"

No era mi intención glosar a nadie, ¡pardiez!. Pero los duelos no me asustan, de echo tengo uno pendiente con Edueardo Mendoza en la plaza Cataluña el próximo Sant Jordi, aunque aún ne ma ha mandado aún a sus poderosos padrinos, el cobarde. A mi tampoco me gusta cuando glosa a periodistas de El Mundo como héroes de la democracia por destapar el Gal cuando su jefe, Pedrojota, fue uno de sus inductores según cuenta en sus memorias el delincuente Galindo. Lo de... "¡Tiene que ver todo ! Porque a M. M., filántropa norteamericana, que le dio todas las oportunidades para que G. ¡HOLA!

Amiga o amigo que con esto del los seudónimos no sé si estoy hablando con una persona, personas o un colectivo. Que me encanta tu blog y coincido con muchas de las cosas que pones en el, además me gusta como escribes y me siento cercano a ti en la defensa que haces de la "Fiera" porque yo también me he encontrado solo defendiéndola en más de un foro. Pero nada más contactar contigo han sido todo una suerte de equívocos que no he llegado a entender. Primero el tal Voltariano que no sé si eres tu o un amigo,me da caña por lo que colgué sobre la censura al programa de TV Saló de Lectura, después lo de "las caquitas literarias", después el chorreo por el mail de BARSOOM que, quizás me expliqué mal, pero sólo tenia la función de informar de esta iniciativa, como tu informas en el blog de poemas o libros que te interesan. Lo último es ese aire chulesco y amenazador de... "que sea la última vez... " en fin, que uno también peina canas y los gatos no le asustan. Aparte, no me conoces para decir que yo "gloso a autores mediáticos", siempre he echo todo lo contrario y, si eres subscriptora de la "Fiera", tendrías que saberlo. El que me guste un poema de la Fuertes o sea un fan de las novelistas de Mallorquí, no me hace más tonto que tu, aunque parece que es eso lo que quieres demostrar. En fin, que seguiré leyéndote y mándandote cosas como me pediste, si me lo permites, pero no entiendo esa violencia gratuita que os gastáis con los que, en un principio, se presentan como amigos. Como yo no me escondo tras seudónimos ni equívocos, ya sabes donde estoy para lo que quieras.

BAGDAD EN LLAMAS. BAGHDAD BURNING

El artículo que transcribo a continuación está escrito por Riverbend, seudónimo bajo el que se esconde una joven irakí de 26 años, que escribe desde Bagdad el blog Baghdad burning y relata lo que ocurre en su país bajo el régimen impuesto por la ocupación norteamericana. Un grupo de voluntarios va traduciendo al español sus artículos, y los

publica en Bagdad en llamas
Su libro, "Bagdad en llamas ", recopilación de sus primeros artículos se publicó en España en el año 2006, en una mala traducción, con un estupefaciente desconocimiento del español, en la que refulge el descuido del lenguaje y el desprecio a la sintaxis, aspectos sólo achacables a la Editorial Laertes, que espero quieran subsanar en las siguientes ediciones.

CUANDO FALLA TODO LO DEMÁS... por Riverbend

... Ejecutar al dictador. Es así de fácil. Cuando los soldados americanos mueren a docenas, cuando el país que estáis ocupando amenaza con romperse en países más pequeños, cuando hay milicias y escuadrones de la muerte vagando por las calles y habéis puesto en el poder a un grupo de Mulláhs – ejecutar al dictador.
Todo el mundo esperaba este veredicto desde el mismo primer día del juicio. Hubo un breve intervalo en el que, con el primer juez, se creía que quizá fuese un juicio coherente en el que los irakíes pudiesen oír explicaciones y ver lo que pasó. Eso pronto terminó con el primer testigo falso de la acusación. Los hechos que se sucedieron fueron tan ridículos, que incluso hoy son difíciles de creer.
El sonido desaparecía de repente cuando la defensa o uno de los demandados se levantaban para hablar. Oíamos a los testigos pero no podíamos verlos – ocultos detrás de una cortina, sus voces eran cambiadas. Personas que se suponía que habían muerto en el incidente de Dujail se descubría que estaban muy vivas.
Juez tras juez eran llamados al tribunal porque los de la corte eran vistos como demasiado justos. No condenaban inmediatamente a los demandados (ni aunque fuese por el interés de los medios de comunicación). La joya más brillante fue el último juez que trajeron. Su reputación sólo competía con la de Chalabi, un ladrón y asesino bien conocido que huyó a Irán para escapar no de la condena política sino de la ira de su padre después de que le robase a éste el restaurante que dirigía.
Así que todos sabíamos el resultado que saldría (Maliki estuvo en la tele 24 horas antes del veredicto diciendo a la gente que “no se regocijaran demasiado”). Creo que lo que ahora mismo me sorprende es la absoluta estupidez del actual gobierno Irakí. La elección del momento es ridícula, ¿justo antes de las elecciones al congreso? ¡Qué oportuno para Bush!, Irak, hoy, está en su peor momento desde la invasión y el comienzo de la ocupación en Abril de 2003, hoy en día parece una luna de miel. ¿Es realmente el momento de ejecutar a Saddam?
Estoy más que un poco preocupada. Es la última carta de Bush. Las elecciones llegaron y pasaron y se puso en el poder a un grupo de extremistas y ladrones (¡no, no...! me refiero a Bagdad, no a Washington). La constitución, que parece haberse ahogado en el río de sangre Irakí desde las elecciones, ha sido olvidada. Sólo se desentierra cuando uno de los Títeres quiere hacer pedazos el país. La reconstrucción es una aspiración de otro tiempo. Os juro que ya no queremos edificios y puentes, seguridad y un Irak no dividido es más que suficiente. Las cosas se deben estar deteriorando más allá de lo imaginable cuando Bush necesita usar la carta “Ejecutar al Dictador”.
Irak no ha estado tan mal en décadas. La ocupación es un fracaso. Los diferentes gobiernos pro-americanos o gobiernos pro-Irán han fracasado. El nuevo ejército Irakí es una broma mortal. ¿Realmente es el momento de convertir a Saddam en un mártir? Las cosas están tan mal que incluso los Irakíes a favor de la ocupación se retractan de su inicial y frenético “NOSOTROS AMAMOS A AMERICA”. Laith Kubba (que se parece a Mr. Catfish por su gran boca y constante apariencia estúpida) estuvo hace poco en la BBC diciendo que esto era precisamente el comienzo de la justicia, que la gente que hoy es responsable de la pérdida de vidas también se enfrentará a la justicia. Parece haber olvidado que él fue uno de los que apoyaron la guerra y la ocupación, y un importante miembro de uno de los asesinos gobiernos proamericanos. Pero la historia no olvidará a

Mr. Kubba.
Irak vio manifestaciones en contra y a favor del veredicto. Los manifestantes pro-Saddam fueron atacados por el ejército Irakí. Así de libres son nuestros medios de comunicación hoy: los canales que mostraban las manifestaciones a favor de Saddam han sido cerrados. Las fuerzas de seguridad Irakíes rápidamente los saquearon. Bienvenido al nuevo Irak. Aquí tenéis algunas imágenes de las cadenas Salahiddin y Zawra:

Cadena Zawra. El subtítulo dice: Baghdad: el canal Zawra vía satélite ha detenido la emisión por orden del gobierno.

La pantalla verde de Salahiddin, que apareció de repente, dice: canal vía satéite Salahiddin

.

El canal Sharqiya anunciando las últimas noticias: Dos canales, Salahiddin y Zawra, clausurados.
Las fuerzas de seguridad saquean las oficinas de las emisoras.

No tiene que ver con el hombre (los presidentes viene y van, los gobiernos vienen y van). Es la frustración de sentir que todo el país y cada uno de los y las irakíes de dentro y fuera están a la merced de la política estadounidense. Es la rabia de sentirse como una simple pieza de ajedrez que es movida adelante y detrás a su voluntad. Es el agravante de tener un gobierno tan ciego e insensible a las necesidades de su gente que ni siquiera les parece necesario cumplir con las formalidades o aprobar una ley. Y están los muertos. Los miles de muertos y moribundos, con Bush ahí sentado, sonriendo con satisfacción y mintiendo sobre el progreso y la victoria en un país en el que todos los y las irakíes que están fuera de la Zona Verde están perdiendo.
Otra vez... El calendario de todo esto es impecable, dos días antes de las elecciones al congreso. Y si no lo ves, lo siento, eres un estúpido. Veamos cuántas veces aprovecha esto como un “éxito” en sus próximos discursos.

Una nota final. Leí en algún sitio que algunas familias de soldados estadounidenses muertos están visitando el Norte de Irak para ver “por lo que sus hijos e hijas han muerto”. Si esa es la meta de la visita, entonces, “Señoras y señores, a su derecha el ministerio Irakí del Petróleo, a su izquierda está la refinería Dawry... Cada uno de ustedes obtiene esto: una bolsa regalo que contiene un póster a color 3 x 3 de Al Sayid Muqtada Al Sadr (larga vida y prosperidad), una camiseta del Ayatollah Sistani y un mapa a escala de Irak redibujado con la República Islámica del Sur de Irak. Además... ¡eh, tú! Tú, la mujer que está detrás! ¿Eso que veo es un mechón de pelo? ¡Cúbrete o quédate en casa!”.
.
Y eso es por lo que han muerto.

Sí, es muy interesante y necesario conocer de primera mano lo que allí está pasando fuera de los circuitos mediáticos yankis (y adláteres).
Además, es tan expresivo que se puede soslayar la imperfección de la traducción en aras a conocer e intentar entender lo que, de verdad, sucede.
Buen trabajo, Gata.
Un fuerte abrazo.

No defenderé a Saddam ni diré que estoy en contra de que se le hubiera aplicado la pena de muerte.

Sin embargo diré que el juicio fue una farsa, que su muerte lo único que logra es proteger a sus cómplices de antes, durante y después de las guerras.

Hoy por todas partes del mundo duermen más tranquilos empresarios, funcionarios gubernamentales y de todo tipo de instituciones multilaterales porque ha muerto Saddam.

No se ha servido a la justicia. La cuerda ha roto por lo mas fino y los complices del carnicero del Bagdad a ambos lados del atántico no deben temer por lo que Saddam podría haberle dicho al mundo a cambio de salvar su vida.

LE CONDAMNÉ À MORT, DE JEAN GENET

Grabación sonora del poema "Le condamné à mort" de Jean Genet (1952)

Obra radiofónica, encargada por el GRM (groupe de recherche musicale), realizada y compuesta por André Almuro, fundador del movimiento "sentationniste", colaborador de Breton, Cocteau, Casares, Clementi, etc...

Texto recitado por Mouloudji. mp3, 25 minutes.
Siento tener que confesar que se ha perpetrado alguna que otra traducción de este poema emocionante, y lo destrozaron, por lo que, si no saben francés, es mejor privarse que leerlo traducido al español, porque el francés de Jean Genet no se aprende en l'Alliance Française ni en la Sorbonne, sino en Belleville, en la Goutte d'Or, o en los antros de la Porte de Clichy... y el español para traducirlo no se aprende en los claustros de la universidad ni saqueando bibliotecas, ni recurriendo al lenguaje cuartelero, paupérrimo y soez, que trasluce la ancestral miseria sexual hispánica.

LE CONDAMNÉ À MORT

A la mémoire de Maurice Pilorge, assasin de vingt ans

Le vent qui roule un cœur sur le pavé des cours,
Un ange qui sanglotte accroché dans un arbre,
La colonne d'azur qu'entortille le marbre
Font ouvrir dans ma nuit des portes de secours.

Un pauvre oiseau qui tombe et le goût de la cendre,
Le souvenir d'un œil endormi sur le mur,
Et ce poing douloureux qui menace l'azur
Font au creux de ma main ton visage descendre.

Ce visage plus dur et plus léger qu'un masque,
Et plus lourd à ma main qu'aux doigts du réceleur
Le joyau qu'il convoite; il est noyé de pleurs.
Il est sombre et féroce, un bouquet vert le casque.

Ton visage est sévère: il est d'un pâtre grec.
Il reste frémissant aux creux de mes mains closes.
Ta bouche est d'une morte et tes yeux sont des roses,
Et ton nez d'un archange est peut-être le bec.

Le gel étincelant de ta pudeur méchante
Qui poudrait tes cheveux de clairs astres d'acier,
Qui couronnait ton front des pines du rosier
Quel haut-mal l'a fondu si ton visage chante?

Dis-moi quel malheur fou fait éclater ton œil
D'un désespoir si haut que la douleur farouche,
Affolée, en personne, orne ta ronde bouche
Malgré tes pleurs glacés, d'un sourire de deuil?

Ne chante pas ce soir les « Costauds de la Lune »!
Gamin d'or sois plutôt princesse d'une tour
Rêvant mélancolique à notre pauvre amour;
Ou sois le mousse blond qui veille à la grand'hune.

Et descend vers le soir pour chanter sur le pont
Parmi les matelots à genoux et nus tête
L'ave maris stella. Chaque marin tient prête
Sa verge qui bondit dans sa main de fripon.

Et c'est pour t'emmancher, beau mousse d'aventure
Qu'ils bandent sous leur froc les matelots musclés.
Mon Amour, mon Amour, voleras-tu les clés
Qui m'ouvriront ce ciel où tremble la mature

D'où tu sèmes, royal, les blancs enchantements
Qui neigent sur mon page, en ma prison muette:
L'épouvante, les morts dans les fleurs de violette....
La mort avec ses coqs; Ses fantômes d'amants...

Sur ses pieds de velours passe un garde qui rôde.
Repose en mes yeux creux le souvenir de toi.
Il se peut qu'on s'évade en passant par le toit.
On dit que la Guyane est une terre chaude.

O la douceur du bagne impossible et lointain!
O le ciel de la Belle, ô la mer et les palmes,
Les matins transparents, les soirs fous, les nuits calmes,
O les cheveux tondus et les Peaux-de-Satin!

Rêvons ensemble, Amour, à quelque dur amant
Grand comme l'Univers mais le corps taché d'ombres
Qui nous bouclera nus dans ces auberges sombres,
Entre ses cuisses d'or, sur son ventre fumant,

Un mac éblouissant taillé dans un archange
Bandant sur les bouquets d'œillets et de jasmins
Que porteront tremblants tes lumineuses mains
Sur son auguste flanc que ton baiser dérange.

Tristesse dans ma bouche! Amertume gonflant
Gonflant mon pauvre cœur! Mes amours parfumées
Adieu vont s'en aller! Adieu couilles aimées!
O sur ma voix coupée adieu chibre insolent!

Gamin ne chantez pas, posez votre air d'apache!
Soyez la jeune fille au pur cou radieux,
Ou si tu n'as de peur l'enfant mystérieux
Mort en moi bien avant que me tranche la hache.

Enfant d'honneur si beau couronné de lilas!
Penche-toi sur mon lit, laisse ma queue qui monte
Frapper ta joue dorée. Écoute il te raconte,
Ton amant l'assassin sa geste en mille éclats.

Il chante qu'il avait ton corps et ton visage,
Ton cœur que n'ouvriront jamais les éperons
D'un cavalier massif. Avoir tes genoux ronds!
Ton cou frais, ta main douce, ô môme avoir ton âge!

Voler voler ton ciel éclaboussé de sang
Et faire un seul chef d'œuvre avec les morts cueillies
Ça et là dans les prés, les haies, morts éblouies
De préparer sa mort, son ciel adolescent...

Les matins solennels, le rhum, la cigarette...
Les ombres du tabac, du bagne et des marins
Visitent ma cellule où me roule et m'étreint
Le spectre d'un tueur à la lourde braguette.

La chanson qui traverse un monde ténébreux
C'est le cri d'un marlou porté par la musique.
C'est le chant d'un pendu raidi comme une trique.
C'est l'appel enchanté d'un voleur amoureux.

Un dormeur de seize ans appelle de bouées
Que nul marin ne lance au dormeur affolé.
Un enfant reste droit contre le mur collé.
Un autre dort bouclé dans ses jambes noués.

*

J'ai tué pour les yeux bleus d'un bel indifférent
Qui jamais ne comprit mon amour contenue,
Dans sa gondole noire une amante inconnue,
Belle comme un navire et morte en m'adorant.

Toi quand tu seras prêt, en arme pour le crime,
Masqué de cruauté, casqué de cheveux blonds,
Sur la cadence folle et brève des violons
Égorge une rentière en amour pour ta frime.

Apparaîtra sur terre un chevalier de fer,
Impassible et cruel, visible malgré l'heure
Dans le geste imprécis d'une vieille qui pleure.
Ne tremble pas surtout, devant son regard clair.

Cette apparition vient du ciel redoutable
Des crimes de l'amour. Enfant des profondeurs
Il naîtra de son corps d'étonnantes splendeurs,
Du foutre parfumé de sa queue adorable.

Rocher de granit noir sur le tapis de laine
Une main sur sa hanche, écoute-le marcher.
Marche vers le soleil de son corps sans péché,
Et t'allonge tranquille au bord de sa fontaine.

Chaque fête du sang délègue un beau garçon
Pour soutenir l'enfant dans sa première épreuve.
Apaise ta frayeur et ton angoisse neuve,
Suce son membre dur comme on suce un glaçon.

Mordille tendrement le paf qui bat ta joue,
Baise sa tête enflée, enfonce dans ton cou
Le paquet de ma bite avalé d'un seul coup.
Etrangle-toi d'amour, dégorge, et fais ta moue!

Adore à deux genoux, comme un poteau sacré
Mon torse tatoué, adore jusqu'aux larmes
Mon sexe qui te romps, te frappe mieux qu'une arme,
Adore mon bâton qui va te pénétrer.

Il bondit sur tes yeux; il enfile ton âme
Penches un peu la tête et le vois se dresser.
L'apercevant si noble et si propre à baiser
Tu t'inclines très bas en lui disant: "Madame"!

Madame écoutez-moi! Madame on meurt ici!
Le manoir est hanté! La prison vole et tremble!
Au secours, nous bougeons! Emportez-nous ensemble,
Dans votre chambre au Ciel, Dame de la merci!

Appelez le soleil, qu'il vienne et me console.
Étranglez tous ces coqs! Endormez le bourreau!
Le jour sourit mauvais derrière mon carreau.
La prison pour mourir est une fade école.

*
Sur mon cou sans armure et sans haine, mon cou
Que ma main plus légère et grave qu'une veuve
Effleure sous mon col, sans que ton cœur s'émeuve
Laisse tes dents poser leur sourire de loup.

O viens mon beau soleil, ô viens ma nuit d'Espagne

Arrive dans mes yeux qui seront morts demain.
Arrive, ouvre ma porte, apporte-moi ta main,
Mène-moi loin d'ici battre notre campagne.

Le ciel peut s'éveiller, les étoiles fleurir,
Et les fleurs soupirer, et des prés l'herbe noire
Accueillir la rosée où le matin va boire,
Le clocher peut sonner: moi seul je vais mourir.

O viens mon ciel de rose, O ma corbeille blonde!
Visite dans sa nuit ton condamné à mort.
Arrache-toi la chair, tue, escalade, mords,
Mais viens! Pose ta joue contre ma tête ronde.

Nous n'avions pas fini de nous parler d'amour.
Nous n'avions pas fini de fumer nos gitanes.
On peut se demander pourquoi les Cours condamnent
Un assassin si beau qu'il fait pâlir le jour.

Amour viens sur ma bouche! Amour ouvre les portes!
Traverse les couloirs, descends, marche léger,
Vole dans l'escalier, plus souple qu'un berger,
Plus soutenu par l'air qu'un vol de feuilles mortes.

O traverse les murs; s'il le faut marche au bord
Des toits, des océans; couvre-toi de lumière,
Use de la menace, use de la prière,
Mais viens, ô ma frégate une heure avant ma mort.

*

Les assassins du mur s'enveloppent d'aurore
Dans ma cellule ouverte au chant des hauts sapins,
Qui la berce, accrochée à des cordages fins
Noués par des marins que le clair matin dore.

Qui grava dans le plâtre une Rose des Vents?
Qui songe à ma maison, du fond de sa Hongrie?
Quel enfant s'est roulé sur ma paille pourrie
A l'instant du réveil d'amis se souvenant?

Divague ma Folie, enfante pour ma joie
Un consolant enfer peuplé de beaux soldats,
Nus jusqu'à la ceinture, et des frocs résédas
Tire d'étranges fleurs dont l'odeur me foudroie.

Arrache on ne sait d'où les gestes les plus fous.
Dérobe des enfants, invente des tortures,
Mutile la beauté, travaille les figures,
Et donne la Guyane aux gars, pour rendez-vous.

O mon vieux Maroni, ô Cayenne la douce!
Je vois les corps penchés de quinze à vingt fagots
Autour du mino blond qui fume les mégots
Crachés par les gardiens dans les fleurs et la mousse.

Un clop mouillé suffit à nous désoler tous.
Dressé seul au dessus des rigides fougères
Le plus jeune est posé sur ses hanches légères
Immobile, attendant d'être sacré l'époux.

Et les vieux assassins se pressant pour le rite

Accroupis dan le soir tirent d'un bâton sec
Un peu de feu que vole, actif, le petit mec
Plus émouvant et pur qu'une émouvante bite.

Le bandit le plus dur, dans ses muscles polis
Se courbe de respect devant ce gamin frêle.
Monte la lune au ciel. S'apaise une querelle.
Bougent du drapeau noir les mystérieux plis.

T'enveloppent si fin, tes gestes de dentelle!
Une épaule appuyée au palmier rougissant
Tu fumes. La fumée en ta gorge descend
Tandis que les bagnards, en danse solennelle,

Graves, silencieux, à tour de rôle, enfant,
Vont prendre sur ta bouche une goutte embaumée,
Une goutte, pas deux, de la ronde fumée
Que leur coule ta langue. O frangin triomphant,

Divinité terrible, invisible et méchante,
Tu restes impassible, aigu, de clair métal,
Attentif à toi seul, distributeur fatal
Enlevé sur le fil de ton hamac qui chante.

Ton âme délicate est par de là les monts
Accompagnant encor la fuite ensorcelée
D'un évadé du bagne, au fond d'une vallée
Mort, sans penser à toi, d'une balle aux poumons.

Élève-toi dans l'air de la lune ô ma gosse.
Viens couler dans ma bouche un peu du sperme lourd
Qui roule de ta gorge à tes dents, mon Amour,
Pour féconder enfin nos adorables noces.

Colle ton corps ravi contre le mien qui meurt
D'enculer la plus tendre et douce des fripouilles.
En soupesant charmé tes rondes, blondes couilles,
Mon vit de marbre noir t'enfile jusqu'au cœur.

Oh vise-le dressé dans son couchant qui brûle
Et va me consumer! J'en ai pour peu de temps,
Si vous l'osez, venez, sortez de vos étangs,
Vos marais, votre boue où vous faites des bulles

Ames de mes tués! Tuez-moi! Brûlez-moi!
Michel-Ange exténué, j'ai taillé dans la vie
Mais la beauté, Seigneur, toujours je l'ai servie,
Mon ventre, mes genoux, mes mains roses d'émoi.

Les coqs du poulailler, l'alouette gauloise,
Les boîtes du laitier, une cloche dans l'air,
Un pas sur le gravier, mon carreau blanc et clair,
C'est le luisant joyeux sur la prison d'ardoise.

Messieurs je n'ai pas peur! Si ma tête roulait
Dans le son du panier avec ta tête blanche,
La mienne par bonheur sur ta gracile hanche
Ou pour plus de beauté, sur ton cou mon poulet....

Attention! Roi tragique à la bouche entr'ouverte
J'accède à tes jardins de sable, désolés,
Où tu bandes, figé, seul, et deux doigts levés,

D'un voile de lin bleu ta tête recouverte.

Par mon délire idiot je vois ton double pur!
Amour! Chanson! Ma reine! Est-ce ton spectre mâle
Entrevu lors des jeux dans ta prunelle pâle
Qui m'examine ainsi sur le plâtre du mur?

Ne sois pas rigoureux, laisse chanter matine
A ton cœur bohémien; m'accorde un seul baiser...
Mon Dieu je vais claquer sans te pouvoir presser
Dans ma vie une fois sur mon cœur et ma pine!

*

Pardonnez-moi mon Dieu parce que j'ai péché!
Les larmes de ma voix, ma fièvre, ma souffrance,
Le mal de m'envoler du beau pays de France,
N'est-ce pas assez monseigneur pour aller me coucher
Trébuchant d'espérance.

Dans vos bras embaumés, dans vos châteaux de neige!
Seigneur des lieux obcurs, je sais encore prier.
C'est moi mon père, un jour, qui me suis écrié:
Gloire au plus haut du ciel, au dieu qui me protège
Hermès au tendre piéd!

Je demande à la mort la paix, les longs sommeils,
Les chants des Séraphins, leurs parfums, leurs guirlandes,
Les angelots de laine en chaudes houppelandes,
Et j'espère des nuits sans lunes ni soleils
Sur d'immobiles landes.

Ce n'est pas ce matin que l'on me guillotine.
Je peux dormir tranquille. A l'étage au dessus
Mon mignon paresseux, ma perle, mon jésus,
S'éveille. Il va cogner de sa dure bottine
A mon crane tondu.
*
Il paraît qu'à côté vit un épileptique.
La prison dort debout au noir d'un chant des morts.
Si des marins sur l'eau voient s'avancer les ports
Mes dormeurs vont s'enfuir vers une autre Amérique.

***

J'ai dédié ce poème à la mémoire de mon ami Maurice Pilorge dont le corps et le visage radieux hantent mes nuits sans sommeil. En esprit je revis avec lui les quarante derniers jours qu'il passa, les chaînes aux pieds et parfois aux poignets, dans la cellule des condamnés à mort de la prison de Saint-Brieux. Les journaux manquent d'à propos. Ils commirent d'imbéciles articles ponr illustrer sa mort qui coïncidait avec l'entrée en fonction du bourreau Desfourneaux. Commentant l'attitude de Maurice devant la Mort le journal l'Œuvre dit "que cet enfant eut été digne d'un autre destin". Bref on le ravala. Pour moi, qui l'ai connu et qui l'ai aimé, je veux ici, le plus doucement possible, tendrement, affirmer qu'il fut digne, par la double et unique splendeur de son âme et de son corps, d'avoir le bénifice d'une telle mort. Chaque matin, quand j'allais, grâce à la complicité d'un gardien ensorcelé, par sa beauté, sa jeunesse et son agonie d'Appollon, de ma cellule à la sienne pour lui porter quelques cigarettes, levé tôt il fredonnait et me saluait ainsi, en souriant: "Salut Jeannot du matin!" Originaire du Puy de Dôme il avait un peu l'accent d'Auvergne. Les jurés, offensés par tant de grâce, stupides mais pourtant prestigieux dans leur rôle de Parques le condamnèrent à 20 ans de travaux forcés pour cambriolage de villas sur la côte, et le lendemain, parce qu'il avait tué son amant Escudero pour lui voler moins de mille francs, cette même Cour d'assises condamnait mon ami Maurice Pilorge à avoir la tête tranchée. Il fut exécuté le 17 mars

1939 à Saint-Brieux.

La polisemia de algunas palabras pueden inducir a equívoco, aunque difícilmente se pueda llegar al cúmulo de despropósitos del traductor que humildemente se atrevió a romper significados y significantes, ritmo y contenido, por pura ignorancia, en una de las muy penosas traducciones que he consultado:
" Sur mon cou sans armure et sans haine, mon cou
Que ma main plus légère et grave qu'une veuve
Effleure sous mon col, sans que ton cœur s'émeuve
Laisse tes dents poser leur sourire de loup."
Cou, dos veces repetido: es cuello, que en español se aplica a la zona que hay entre la cabeza y el torso,(que este traductor traduce por pescuezo en un alarde de sordera, y también al cuello de una prenda de ropa, que en francés es "col", no collar. "Effleurer" es rozar, no acariciar; "Poser" es "poner", no depositar, y de resultas el malhechor ha traducido esto:
"Sobre mi pescuezo sin armadura y sin odio, mi pescuezo
Que mi mano más ligera y grave que una viuda
Acaricia bajo mi collar, sin que tu corazón se conmueva,
Deja a tus dientes depositar su sonrisa de lobo."

Y todo lo demás, por el estilo.
Saludos cordiales

¡ADEU! AL SALÓ DE LECTURA

Hace un tiempo comentaba con un amigo los poquísimos programas sobre libros que hay en la televisión. En aquel momento yo le hablé de un sencillo pero magnífico programa que hacían en la televisión municipal de Barcelona, BTV, dirigido y presentado por el periodista mallorquín Emilio Manzano. El programa, con un Ondas y el Nacional de Periodismo entre otros muchos premios, tenía la virtud de contagiar la emoción que sus colaboradores/lectores expresaban al presentar sus libros que, por lo general, no eran de los que aparecen en las listas de los más vendidos. Después Manzano, llamado por el entonces presidente de la Generalitat Pasqual Maragall, se fue a ocupar un cargo en el Instituto Ramón Llull y Marina Espasa, asistente de dirección, tomó las riendas del mismo algo titubeante y sin el empaque de Manzano pero con el mismo espíritu y contenidos de siempre. En las luchas de despachos de las últimas elecciones autonómicas Manzano fue sustituido por Joseph Bargalló en la dirección del Ramón Llull, ojo a este dato, quizás aquí este la madre del cordero.

Pues nada, el otro día me sorprendí cuando viendo el programa me di cuenta de que se estaban despidiendo, pero no por las vacaciones navideñas, se despedían para siempre. Dieron un repaso a los 5 años de emisión donde pudimos ver a Martin Amis, Gunter Grass, Susan Sontang, Jhon Irving, Adam Zagajewski y un montón de autores, algunos grabados en sus países, fue impagable ver a Patti Smith recitando un poema de juventud desde una terraza neoyorquina, por ejemplo. También pasaron a lo largo de los años por su salón los Panero, los Goytisolo, la Matute y Pitol, Pombo, Vila-Matas, Volpi y una larga lista de escritores de toda condición y pelaje pero, lo atractivo de la fórmula, es que la segunda parte del programa estaba dedicada enteramente a los lectores, cualificados eso sí, que nos comentaban sus lecturas desde diferentes puntos de vista, desde una arquitecta, un traductor, un crítico de TV o un filólogo entusiasta de la cultura popular por poner sólo unos ejemplos ya que eran muchos los colaboradores.

Llegó el final del programa de despedida y Marina Espasa, que nunca se hizo con las formas de una presentadora al uso (ni falta que le hacía) por carencia de tablas y de lecturas, supongo, se creció como nunca y nos soltó un discurso valiente y lúcido contra sus antiguos jefes del Ayuntamiento de Barcelona, pero antes Manzano le dijo una enigmática frase: “A ti te ha tocado pagar algún pecado mío”. Marina recordó el “slogan” municipal que en forma de anuncio repiten las televisiones catalanas: “Barcelona: La mejor tienda del Mundo”

Claro, dijo Marina, si somos una tienda para que queremos derecho a la vivienda si en las tiendas no se vive, para que queremos cultura si lo que nos interesa es vender, para

que queremos una televisión al servicio de los ciudadanos si las tiendas están al servicio de los tenderos… En fin, que recordó el déficit cultural de este consistorio que apuesta por un modelo de ciudad / tienda / parque temático / destino de vacaciones y negocios /marca comercial /. Que promueve ordenanzas municipales contra el incivismo que, en algunos casos, son de dudosa legalidad democrática, que cierra una escuela de circo autogestionada como La Makabra o salas centenarias como La Paloma. Marina nos recordó que estábamos en una televisión que pagamos todos y terminó con este llamamiento:

"…si los responsables de la tienda (el ayuntamiento) cierran los ojos, lo que tenemos que hacer los ciudadanos es abrirlos, organizarnos y luchar"

Claro que el invento de BTV como una televisión urbana que miraba y daba voz a los ciudadanos es una cosa que uno, ya viejo en estas historias, no se creía pero, mientras los burócratas duermen, siempre hay espacios para la creatividad y la revuelta.

Pero los tenderos despertaron y los teléfonos móviles comenzaron a sonar en los coches oficiales y llegó la censura, sí amigos, el último programa del "Saló" que, como era costumbre se emitía en redifusión todos los sábados, por "cuestiones de programación" como dijeron los directivos de BTV, se ha caído de la parrilla y miles de seguidores del programa se han quedado sin verlo. No, no les gustó el discurso de Marina, discurso que hoy se puede conseguir en la red por obra y gracia de los lectores que seguían el programa, en esta dirección:

http://www.youtube.com/watch?v=Uo2qn-KsIxY

Pienso al hilo de todo esto: Si estamos regidos por tenderos (botiguer les decimos aquí) … ¿Por qué no se eligen en la Cámara de Comercio, en los Bancos, en las Juntas de Administración de las Empresas Constructoras, etc.?, después de este ingenuo pensamiento seguro que mi amigo Kevin Vázquez me diría: "Pero gilipollas, sí eso mismo es lo que pasa, se eligen y dirigen desde esos sitios"

En fin, el Saló de Lectura fue un novedoso referente en la forma de entender un programa de libros en la televisión, alejado de esas capillas para amigos donde se devuelven favores políticos y que tanto abundan en las televisiones públicas. La literatura ha perdido un espacio, uno más en esta vorágine mercantilista de la cultura pero, mientras nos acompañen las fuerzas, estaremos aquí para combatirlo y denunciarlo. ¡Adeu! Saló de Lectura.

CARTA AL DIRECTOR PUBLICADA EN "EL PERIÓDICO DE CATALUNYA" EL 31 DE

DICEIMBRE:

EL "SALÓ DE LECTURA" QUE NUNCA SE REEMITIÓ
Emili Manzano
Barcelona

La dirección del canal municipal BTV decidió hace unas semanas poner fin a la existencia de Saló de Lectura, el programa literario que yo fundé en octubre del 2001 y que dirigí y presenté hasta abril del 2006, al desvincularme de él para poder aceptar el encargo del Prsident Maragall de liderar otro proyecto institucional consagrado a la difusión cultural.

El programa quedó en manos de mi equipo, bajo la dirección de Marina Espasa, garantizando así la continuidad de los criterios de calidad, rigor e independencia. Les ahorraré mis consideraciones sobre el cierre del programa y los motivos expuestos por parte de la dirección de la cadena para justificarlo: El presunto desgaste de la fórmula. Cuando dicha fórmula no era otra que la lectura atenta de los textos y la conversación civilizada entre autores y lectores. Pero la dirección de BTV ha decidido censurar la habitual redifusión de los sábados por la mañana del último Saló de Lectura, emitido en directo el 27 de diciembre, y en el que, con la corrección y seriedad que la caracterizan, su directora se despidió haciendo unas legítimas observaciones sobre el modelo de ciudad hacia el que nuestras autoridades municipales parecen querer llevar Barcelona y sobre el papel que debería tener una televisión pública como BTV, financiada con los impuestos de los ciudadanos.

La expresión de estos pensamientos es la causa de que el programa no llegara el pasado sábado a una gran parte de nuestros espectadores, que hace años lo ven en formato de redifusión. Aunque gracias a la iniciativa espontánea de unos espectadores está a su disposición, vía Internet, este programa de despedida en su integridad.

MONJITAS, PATANES, HAMPONES Y EXTREMEÑOS (1)

"Conocerlos es quererlos"

Una de las muchas ventajas de ser rico es que no hay que ponerle límites al mal gusto. Nada hay que le duela más a un español que una magra cuenta corriente constriñendo sus delirios estéticos y sus ambiciones de relumbrón. La cosa llega a tragedia cuando, teniendo posibles y futuros, no tiene dónde comprar esa farola enana para la terraza, ese traje de lentejuelas con relamé, ese visón coloreado. En fin, cuando no tiene a mano a El Corte Inglés.
Para nuestros amigos de fuera de España: El Corte Inglés está constituido por una serie

de deposiciones arquitectónicas con la misma alegría y espíritu funcional que una cadena de tanatorios. Su insistencia en la bombilla, guirnalda, espumillón y otras jacarandas luminarias tiene sus orígenes, no muy lejanos, en una España donde sólo había una bombilla por casa, pero muchos piojos por cabeza. De esa época deriva también los trajes de boda y mortaja de sus vendedores, las faldas tubo de tergal de sus empleadas y ese olor (único en Europa) a sobaquillo escabechado en almidón que impregna todos los almacenes.
Extremadura quiere un Corte Inglés. Y el Corte Inglés quiere estar en Extremadura. Uno no se limpia la roña de la pobreza para reivindicar la sobriedad y la elegancia. Y el Corte Inglés tiene la vulgaridad como mascarón de proa de su empresa. Lo que prometía ser una unión perfecta de intereses se ha transformado en una astracanada digna de figurar en el repertorio de timos, pillerías y bufonadas del suelo patrio. La historia, que dura ya tres años, es la siguiente:
En 2003, Juan Carlos Rodríguez Ibarra, presidente socialista de Junta de Extremadura (región que aún recibe cuantiosos fondos de compensación de la Comunidad Europea) propone a El Corte Inglés que se establezca en Cáceres. Se inician negociaciones con un intermediario listo llamado Jesús Alarcón, dueño de la empresa Estudios Urbanísticos y Medioambientales. Este constructor, simultáneamente, negocia con el alcalde de Cáceres, Saponi, del Partido Popular las condiciones y repartos de beneficios de la operación.
El terreno sobre el que se va a construir el Corte Inglés ocupa 25.000 m2 del centro de Cáceres (ciudad declarada Patrimonio de la Humanidad) y pertenece a la Orden de la Carmelitas Descalzas. Las razones que explican la tímida discreción y el piadoso recogimiento de estas monjitas durante la trapisonda de negociaciones de venta las referiré más adelante.
En un primer momento, el listo intermediario se propone comprar el terreno a las monjitas, revenderle un trozo al Corte Inglés, construir él más de un centenar de pisos y pagar al Ayuntamiento una miseria para que firme los papeles y legalice una operación que atenta contra todas y cada una de las normas de urbanismo.
Y entonces es cuando Rodríguez Ibarra y Saponi deciden aliarse contra su intermediario. La Junta de Extremadura decide crear, ex-nihilo, una empresa constructora (Urvipexsa) y encargarse de la operación, de las monjitas y de prepararle la finca a los señoritos de El Corte Inglés. Hay algún pequeño problema. Un concejal del PP dimite, escandalizado de la corruptela; el PSOE se empatilla en Cáceres y se niega a aprobar el proyecto. *Pas de problème*. Ibarra ofrece a Saponi un concejal manso del PSOE para que el alcalde del Partido Popular consiga los votos necesarios para aprobar el proyecto. A fecha de hoy, Ibarra y Saponi están discutiendo si me lo das en billetes o en especie. Los extremeños mordiéndose las uñas, pero felices, porque ésta sera la última Navidad sin El Corte Inglés.
Hasta aquí una historia más de trapicheo de baja estofa en este país de bellotas. Sin embargo, hay dos hechos que encierran su misterio: El Corte Inglés no dice oste ni moste y las carmelitas ni amén.
No hay que leer a Camillo d'Ausilio, ni perderse entre legajos ni pergaminos para saber que la orden carmelita ha sido uno de las congregaciones de la tropa católica más querulante y amiga del fraude (terrenal y divino). A sus seculares pleitos contra agustinos y jesuitas sólo les faltó la intervención de *Santa Lupara* para hacerlos modelo de diplomacia siciliana. Pero hoy la Orden Carmelita sólo aspira a hacer caja y a que Dios les conceda el don de la invisibilidad. El rosario (nunca mejor dicho) de condenas por pederastia y abusos sexuales que, en Estados Unidos, esta cayendo sobre esta orden es de tal magnitud que el peligro de quiebra económica es indudable. El Vaticano se ha negado a pagar los millones de dólares que los tribunales americanos han estipulado como compensación económica a las víctimas de los hijos del Carmelo. Así es que la Orden Carmelita tiene que hacerse cargo de la factura de sus corrupciones

sexuales. Traduzco la noticia de Associated Press que el servilismo de la prensa española nos ha ocultado:

> " Viernes, 27 de Octubre de 2006 LOS ANGELES.-
>
> La Archidiócesis de los Ángeles y una Orden Religiosa de la Iglesia Católica tendrán que pagar diez millones de dólares (7.900.000 euros) a varias personas como compensación a los abusos sexuales que cometieron algunos sacerdotes, según declararon los abogados de los demandantes.
> La Orden Carmelita pagará la mayor parte de la indemnización a las siete víctimas, dos de las cuales denunciaron que sufrieron abusos sexuales durante sus estudios de secundaria en los Ángeles. La Archidiócesis pagará el 5%, informó el portavoz de la Iglesia.
> El abogado de la Iglesia Católica de los Ángeles, J. Michael Hennigan, declaró: "Todos estos acuerdos previos nos animan y esperamos que ayuden a resolver los siguientes".
> Entre los acusados se halla Dominic Savino, de 67 años, un carmelita que trabajó durante varios años como profesor y administrador en el Crespi Carmelite High School, y John Knoernschild, ex-director de esta escuela. También está acusados otros dos miembros de la orden, pero que no están asociados al colegio.
> John C. Manly, abogado de las víctimas, felicitó a los carmelitas por "dar la cara y hacer lo correcto", pero añadió que ninguna cantidad de dinero podría subsanar el daño infligido por el abuso sexual.
> En el año 2002, los Carmelitas, que tenían a su cargo la escuela, cesaron a Savino como director y le suspendieron temporalmente sus funciones de sacerdote, después de tener conocimiento de las acusaciones por abusos sexuales.
> Dominic Savino llegó a Crespi como asesor a tiempo parcial. Anteriormente había trabajado en una escuela de Secundaria en Kentucky y había sido director de la comunidad carmelita en Roma. En 1986, dejó Crespi para realizar el doctorado en psicología y volvió a la escuela en 1995 como psicoterapeuta, según publico Los Angeles Times en su edición del viernes.
> Además de estos siete causas judiciales contra carmelitas, hay más de 560 casos en el Sur de California de personas que han denunciado haber sufrido abusos sexuales por sacerdotes catolicos. Los litigios llevan años sin resolverse mientras docenas de abogados intentan llegar a un acuerdo.
> En Marzo pasado, la orden franciscana de California fue la primera en admitir pagar una indemnización por abusos sexuales en Los Angeles. Esta indemnización fue de veintiocho millones de dólares (22.300.000 euros) a veinticinco víctimas" **(1)**

Los Carmelitas tienen ante si la hecatombe económica que ha supuesto para la Archidiocesis de Boston el pago de indemnizaciones por violaciones y abusos de sus sacerdotes a niños. Sólo en el año 2005 tuvo que pagar más de ciento cincuenta millones de dólares. Y las denuncias continúan...
En el año 2006, la Archidiócesis de Portland se ha declarado en quiebra, al tener que pagar setenta y cinco millones de dólares por delitos de pederastia y abusos sexuales. Por los mismos crímenes, la archidiócesis de Los Angeles ha tenido que pagar sesenta millones de dólares más; la Archidiócesis de Milwaukee dieciséis millones seiscientos cincuenta mil dólares; la de Spokane carenta y cinco millones setecientos mil dólares y la de Kentucky ochenta y cinco millones y hay centenares de demandas aún por resolver... **(2)**

La red financiera que inventó la Orden Carmelita (que también tiene sus problemas con la justicia norteamericana) la Little Flower Society y la reconversión de sus conventos en hoteles de lujo (Cadena Domus Carmelitana), parece que no son suficientes para cubrir los pagos a víctimas de sus crímenes. Así que, al igual que ha hecho la Diócesis de Bostón con el campus de Brighton del Boston College, varias parroquias y la residencia del Cardenal (por no insistir en los dos millones de dolares de donaciones para ancianos que ha derivado a condenas por pederastia),**(3)** ha empezado a vender propiedades por todo el mundo.
En España, la Orden Carmelita (ya bregada con un historial de ventas turbias, como la que hace de sus terrenos en Vigo a Basilio Martínez Serodio) va de escándalo en escándalo urbanístico. En Caravaca (Murcia), el Convento de San José , fundado por santa Teresa de Jesús y sede de la orden durante más de cuatro siglos, ha sido vendido y va a transformarse en un complejo hotelero. Ha pasado completamente inadvertido, pero no dejen de mirar el escandaloso trapicheo de las monjitas carmelitas de Grajal y las de Medina de Rioseco y sus misteriosos tres benefactores en la venta del Monasterio de San José de Medina de Rioseco. Conseguir, además, que un organismo tan absolutamente meapilas como la Junta de Castilla y León las multe por "llevarse" bienes del Patrimonio Cultural sin aviso ni permiso, es hazaña sólo digna de estas siervas de Cristo. (Sin duda que intentaban emular la gesta de sus hermanas concepcionistas cuando fueron detenidas por la Guardia Civil de Pastrana aligerando a Patrimonio de 400 obras de arte). En Pamplona el Convento de las Carmelitas, en la calle Salsipuedes, se transformará en un hotel de lujo. **(4)** En fin, que la vida disoluta está cara.
Gracias a Dios, en auxilio de esta Orden han acudido dos enviados del Altísimo: El primero en forma de Legionarios de Cristo , quienes, en vista del manifiesto amor que la Orden Carmelita profesa a la infancia, han contratado a un ramillete de monjitas en su Fundación Villaggio dei Ragazzi porque *"Seguramente, esta presencia materna entre los niños y adolescentes contribuyó en mucho al mejoramiento del proyecto formativo integral que buscamos ofrecer "*
El segundo angel custodio de estas florecillas teresianas ha sido (no podía ser otro) Giulio Andreotti , que como *"un faro de salud y amparo en las tempestades de la vida"* ha regalado ejemplares de su revista 30Giorni a la congregación. ¡Ah, don Giulio!

> *Bello egli è tra cavalieri,*
> *com'è il cedro alla foresta:*
> *in bataglia egli è tempesta,*
> *é campione in giostra e amor*

Parroquianos, voy a echarme un whisky y otro día les mostraré las enaguas de El Corte Inglés y los refajos de la Fundación Areces.

Ya sabes que me chifla El Espía con su mezcla de periodismo de investigación-denuncia y novela negra de realismo sucio (y digo "sucio" porque la corrupción y la suciedad que denuncia es real y esta oculta por tierra encima).
Se podrían formar varios libros con estos reportajes y en Estados Unidos le darían el Pulitzer o dos tiros por la espalda. Ojalá que esto segundo no ocurra nunca porque hacen mucha falta intrépidos periodistas-detectives así.
Dale un fortísimo abrazo y otro para tí.

El PGM será debatido este jueves en sesión plenaria extraordinaria, con este único punto en el orden del día, refiriéndose al mismo el equipo de Gobierno como lo que será “sin duda, el proyecto estrella de la legislatura” para la ciudad de Cáceres.

En este sentido, el Alcalde ha manifestado durante su visita a las dependencias nuevas de la planta baja del edificio Valhondo, que espera que el nuevo documento sea aprobado con el apoyo de todos los grupos políticos.

En este sentido ha hecho un llamamiento a la responsabilidad de los partidos, “que pasa por apoyar el Plan, el plan que marcará el desarrollo y el futuro de esta ciudad para los próximos años”.

También ha señalado que si él estuviera en oposición apoyaría el nuevo plan como ya lo hizo cuando apoyó el primer plan estando él en la oposición.

Con respecto a las peticiones de información de las actas de las más de once sesiones de la comisión informativa de urbanismo que ha solicitado el concejal de Izquierda Unida, Santiago Pavón, el Alcalde le ha acusado de "querer frenar y torpedear la aprobación del plan al mismo tiempo que le pide generosidad política para apoyar el proyecto que definirá la ciudad del futuro".
Cabe recordar que en la comisión informativa del pasado viernes se aprobó de manera provisional el PGM, con los votos a favor del PP, la abstención del PSOE, que alegó que se reservaba el voto para el Pleno al considerar que faltaban documentos y el voto en contra de IU.

Por su parte el concejal no adscrito, Felipe Vela ha manifestado en los medios de comunicación su decisión de votar a favor del PGM, en el que se encuentra la estructuración del solar de Las Carmelitas con la que se muestra de acuerdo.

En este sentido, como ya anunció Saponi, se creará una unidad discontinua para calificar el solar de Las Carmelitas y la operación urbanística de El Corte Inglés y las cesiones de terrenos se determinará en el momento oportuno de su gestión que podría coincidir con la aprobación definitiva del Plan.

Si el PGM fuera aprobado este jueves habrá un periodo de alegaciones, un mes de exposición pública, vuelve a la comisión para estudiar esas alegaciones y posteriormente se envía a la Junta de Extremadura para su aprobación definitiva.

Izquierda Unida alega motivos para no celebrar el Pleno

El portavoz de Izquierda Unida, Santiago Pavón, ha solicitado al Presidente de la Comisión Informativa de Urbanismo, José Antonio Villa, que le facilite las convocatorias debidamente firmadas de las siguientes sesiones de la comisión de urbanismo:, 21 y 29 de junio y 6, 13, 21, 24, 25, 26 y 27 de julio y 6 y 7 de septiembre de 2006.

Según señala Pavón en estas convocatorias se han discutido alegaciones al nuevo PGM, y si no existen las convocatorias señala que "creemos que no es posible celebrar el Pleno Extraordinario del 28 de los corrientes para la aprobación provisional y segunda exposición pública del Plan General de Urbanismo".
ESTRUCTURACIÓN DEL SOLAR DE LAS CARMELITAS
La parcela de 12.000 metros cuadrados va a pasar a tener una edificabilidad de 60.500 metros cuadrados repartidos de las siguiente manera: 10.000 m/2 para el nuevo colegio; 25.500 m/2 para El Corte Inglés; 8.000 m/2 para usos terciarios y 17.000 m/2 para uso residencial.

Cesiones que obtendrá el Ayuntamiento: el 15% del excedente rotacional; el 15% del excedente de uso terciarios y el 35% del excedente residencial; además del 10% correspondiente a vivienda libre residencial.

Yo conocía del Corte Inglés por esa cancion de la Macarena, que no es más que otra prueba de que el mal gusto puede ser altamente contagioso.
Aqui en México pasa algo similar con los "Palacio de Hierro" y "Liverpool", tiendas departamentales atiborradas de mercancia "de marca" donde la gente puede vaciar sus bolsillos y llenar su ego presumiendo de cuanto pagaron por una prenda con nombre de diseñador impreso en la etiqueta.
Un abrazo querida gata.

Gatita después de casí un mes alejado del mundanal ruido de los ordenadores llegó y me encuentro con esta mezcolanza del templo del consumo, las bellotas y la orden carmelita.
Nada mejor para estas fechas de consumo y poca oración. Aquí en Valencia cuando montaron el primer Corte Inglés los papanatas locales también dijeron que era lo mejor para la ciudad y acudían en masa a ver las primeras escaleras mecánicas. Para construirlo desmontaron piedra a piedra una vieja capilla que ahora está en un barrio del extrarradio. Pero hubo un viejo noble que no quiso vender su palacio y los jodio ya que tuvieron que desistir de hacer la obra como querían y el palacio ha quedado encajonado entre dos moles de ese modelor urbanístico que se extiende por las tierras de España.

MIS HÉROES 1)

Mi héroe Martín Serrano Herrera, director del Diario Tribuna (México)

"Siempre hay una filosofía para justificar la falta de valor"-decía Camus-, y habrá que añadir que esa clase de filosofía jamás modificó el mundo, no eliminó la mugre mental, ni dulcificó la existencia humana.
Los héroes genuinos no son musculosos e invencibles, no tienen el gesto hosco y fiero, ni resisten una buena paliza sin despeinarse. Son frágiles, tienen más derrotas que victorias, caen a plomo cuando los derriba la fuerza bruta, y parecen tener algún contencioso con el peine y los peluqueros; pero vuelven a estar en la brecha una y otra vez, dispuestos a que les zurren por defender lo que piensan, lo que creen, y lo que aman.
He tenido la suerte de cruzarme en mi vida con muchos seres humanos a los que admirar. Uno de ellos es Martín Serrano, un periodista que dirige Diario Tribuna en una trinchera, en primera línea de combate. Hartos de sus artículos contando que el entonces Gobernador Alemán Velasco y sus escuadrones de la muerte estaban claramente asociados con el crímen organizado, y con el narcotráfico, le robaron la maquinaria con la que imprimía su periódico. No paró hasta que pudo señalar y fotografiar a los que le habían robado. Y con ellos, denunció al que dio la orden, al Gobernador. Le hicieron un plante los repartidores del periódico, mitad por miedo y mitad para sacar tajada en una situación de crisis agónica, y sabotearon la distribución. Tuvo varios atentados, y algunos bestias que creyeron haberlo matado de una paliza, le dejaron la sonrisa ladeada y algo estropeado el perfil griego.
¿Que qué hace la policía? Es un secreto que os puedo contar sin traicionar mis fuentes: nada confesable, nada legítimo, nada legal ni que tenga que ver con su protección y la persecución de los criminales. ¿Y las autoridades responsables de las Fuerzas de Seguridad? Pues son los que los mandan,y ellos obedecen. La última ha sido tumbarle su página web, con una carta al nuevo Gobernador, Fidel Herrera, pidiendo justicia, así es que le cambiaron las contraseñas, y le colgaron un ejemplar de su diario de mayo, medio descoyuntado, hasta que, por último, colocaron un cartel diciendo que ese dominio está dado de baja. Ahora publica Diario Tribuna en blog .
Estamos hablando de México, donde la primera fuente de divisas proviene de los que huyen de su país, cruzan el desierto de Sonora, cruzan a nado el Rio Grande, sortean las patrullas de fronteras, a los cazadores de "*ilegales*", para encontrar el trabajo más duro, el peor, el que ningún estadounidense haría, pero imprescindible para una buena parte de la economía norteamericana, y para garantizar la supervivencia de sus familias en México, que dependen de sus remesas de dinero.
Según el Banco Mundial, *la pobreza en México se mantiene en niveles inaceptablemente altos , y afecta a mas de la mitad de los mexicanos.*
-Alrededor de 53 por ciento de los 104 millones de habitantes están en esta situación, definida como un nivel de consumo por debajo de las necesidades mínimas de alimentos y de otras necesidades consideradas básicas.
-La décima parte mas rica de la población gana mas de 40 por ciento de los ingresos totales
-La décima parte mas pobre solo obtiene 1.1 por ciento.

-Cerca del 24 por ciento de la población es considerada "extremadamente pobre", es decir, con un ingreso insuficiente incluso para una nutrición suficiente.
Hablamos de México, la Arabia Saudí de América: una minoría de sátrapas, compinchados con el narcotráfico, ha institucionalizado la criminalización de quienes reivindiquen mejoras sociales, laborales, o pidan, estrictamente, que se respete los derechos humanos. La invención de cargos contra ellos, las detenciones arbitrarias, las desapariciones de los que no logran sobrevivir a las torturas, el asesinato, la intervención del Ejercito petrechado contra la población desarmada, es lo habitual desde hace muchos años, mientras que sus gobernantes firman todos los papeles que les presentan los organismos internacionales en cuestión de derechos humanos.
Hablo de un país en donde el 10% de los policías de la AFI (Agencia Federal de Investigaciones) está expedientado formalmente por graves delitos. Cualquier ciudadano sabe que es más fácil ser robado, chantajeado, extorsionado, secuestrado con el beneplácito y la colaboración de buena parte de los policías que ser defendido por ellos.
En México, donde atentan, hacen desaparecer, secuestran y asesinan impunemente a la población, que ha logrado el triste record de ser, después de Irak, el país donde asesinan a más periodistas, y en el Estado de Veracruz, donde se da la cifra más alta de atentados de todo México, Martín Serrano Herrera, flaco, frágil y cabezota, sigue empeñado en contar lo que está pasando.
Y en una pausa, a las tantas de la noche, me manda unas líneas por e.mail, con la jerga desdramatizadora de los periodistas y de los cirujanos, en lenguaje casi telegráfico dice: "*Seis secuestros*", "*Están ardidos*", con uno de sus comentarios bienhumorados y entusiastas, e intercambiamos bromas delirantes, urdimos planes descabellados, porque la risa es nuestro común puerto de atraque. Y hay motivo para sonreir sabiendo que sigue vivo e íntegro, porque saber que existen personas así me caldea el corazón y me reconcilia con la humanidad.
Así es que os lo aviso ya para que no hagáis planes conmigo: en la próxima reencarnación, sin esta pila de años que tengo ahora, en cuanto tengamos edad de padrear, le voy a proponer que sea mi novio.

Musa de mi inspiración:

En tanto no sea yo el ratón, estaré a tu disfrute en todas las reencarnaciones venideras tal y como ahora lo estoy. Pero, vida mía, mucho me temo que sería en otro Universo porque a este seguro que pronto se lo lleva la tiznada con el más atroz de todos los

males habidos, y que a la vez les da origen: la desgraciada corrupción.
Mientras, sigamos la lucha hasta más allá de nuestras capacidades, que ya ves que si se puede.

Aparte: el que hayas destrozado mi de por si jodida reputación no me avergüenza mas que la pena que me da porque nuestro México, y en lo particular Veracruz, presuman tan bajo perfil ante el orbe... al tiempo que las ratas que nos saquean, tan como si nada.

¡Eso sí me puede!

No me extraña que Martín Serrano sea tu héroe, es el de muchos seres humanos y debería ser el de todos.
Hay que tener todo muy buen puesto para seguir en las espantosas circunstancias en las que transcurre su trabajo y su lucha.
Ánimo y adelante.
Un abrazo muy fuerte a los dos.

Apreciable Gatopardo
En efecto, COINCIDO contigo, en que MARTÍN SERRANO HERRERA, es un periodista veracruzano que quiere vivir y apenas sobrevive en la ciudad de Xalapa, capital del estado de Veracruz en nuestro Amado México; que es un sobreviviente de varios atentados en contra de su persona, de su vida, de su trabajo profesional y de su patrimonio; que es difícil pensar que aceptemos desde ahora como un destino inevitable, que nunca tendrá justicia; que es vergonzoso tener que pensar, que puede llegarle antes de que se le imparta JUSTICIA otro intento más de "ajusticiarlo"; por eso, su caso merece ser elevado a un nivel de mayor atención en niveles en donde se invoque la solidaridad nacional e internacional de seres humanos convencidos y solidarios para que ANTES DE QUE LO MATEN, se exija, respeto a las leyes nacionales y a los tratados internacionales que obliguen al gobierno mexicano y al mismo gobierno del estado de Veracruz a impartirle justicia y restituirle sus derechos y patrimonio.
Porque celebro que coincidamos, para que haya más elementos de valoración en este EJEMPLAR CASO DE INJUSTICIA, quiero compartir con tus lectores AL FINAL DE MI COMENTARIO algunas partes sustantivas de lo que les escribí: al GOBERNADOR del estado de Veracruz, A LOS COMPAÑEROS PERIODISTAS Y TRABAJADORES DE LOS MEDIOS DE COMUNICACIÓN ASÍ COMO A LA OPINION PÚBLICA INTERNACIONAL, en junio de este casi acabado 2006, PIDIENDO JUSTICIA PARA MARTÍN SERRANO HERRERA, en la llamada CUARTA CARTA A FHB, en mi columna periodística “Prospectiva Política”.
A manera de síntesis concluía:
…

“Señor Gobernador
En espera de que nuestro compañero (NO VAYA A SER PRIVADO DE SU VIDA Y/O AGREDIDO POR QUIENES YA LO HAN GOLPEADO Y AMENAZADO); no siga siendo victima de las injusticias e incongruencias en que ha estado luchando desde el 14-15 de febrero del 2001, cuando atentaron en contra de su patrimonio y posteriormente de su vida en los días 8 de mayo del 2003 y 22 de mayo del 2004 de lo cual se derivaron 10 demandas penales, sin que se le respeten sus derechos en la procuración e impartición de justicia; valoro que su intervención por Ley y con sentido humano, habrá de restaurar la protección y el respeto a los derechos humanos y ciudadanos de nuestro compañero Martín Serrano Herrera.”
Ante la falta de respuesta clara y la ausencia de Justicia, estamos en este tema.
En el mismo contexto, como MARTÍN SERRANO HERRERA se ha salvado de más de un atentado en contra de su vida, de su trabajo profesional y de su patrimonio, no le permiten espacios de actividad periodística-empresarial que le genere ingresos, pues él y su familia solo de eso viven, lo que me lleva a concluir, mitad en broma y mitad en serio, que como no lo han matado en varias ocasiones, a golpes, ahora lo quieren matar de hambre. NO DUDO QUE en algún momento se declare en HUELGA DE HAMBRE, para arriesgar todo al invocar JUSTICIA EN INSTANCIAS DE NIVEL nacional e internacional en su caso; tal vez, pensando que eso pueda impulsar el que tenga una más seria atención por parte de las instancias que imparten Justicia y de ser posible concluya en su favor todo este atentado en contra de sus derechos constitucionales en nuestro país. Lo que no cancela el riesgo de que concluya con su vida.
Estamos frente a un EJEMPLAR CASO DE INJUSTICIA, que debe ser conocido y reiterado en todas las páginas informativas e institucionales posibles de Internet y en todas las páginas de todos los diarios posibles; y hacerlo llegar a todas las instancias nacionales e internacionales para lograr la JUSTICIA en favor de un ser humano, un periodista y toda su respetable familia.
Por ultimo, he recibido comentarios de algunos lectores de querer proponer a Martín Serrano Herrera como candidato a un premio internacional o nacional, por su férrea lucha desde un provinciano espacio en los medios de comunicación publicando verdades contundentes de malos gobiernos y casi 6 años reclamando JUSTICIA, lo cual me parece acertado, y ojala no ocurra en Memoria, porque sé que puede ocurrir en vida hermano, en vida... .
• “Cuarta carta a FHB (Fidel Herrara Beltrán)
Señor Gobernador
Compañeras y compañeros periodistas
Compañeros trabajadores de los medios de comunicación
A la opinión pública internacional
Por este medio, los invito a reflexionar sobre un caso de injusticia, en contra de un representante de los medios de comunicación, en el cual su gobierno tiene una importante oportunidad para enmendarlo.
Cuando recientemente, en el pasado mes de abril, la Comisión Estatal de los Derechos Humanos del Estado de Veracruz, solicitó a su gobierno que disponga las medidas cautelares necesarias para preservar la integridad física del periodista Martín Serrano Herrera, misma que respondió la Secretaría de Gobierno del Estado de Veracruz con el oficio SG-DJ/220605, mediante el cual no se negó a garantizar sus derechos ciudadanos al propietario y director general del periódico Diario TRIBUNA, que se edita en la ciudad de Jalapa; nuestro compañero y Amigo, Martín Serrano Herrera, no imaginaba que sus reflexiones sobre el valor de la acción de la Justicia en su favor, tendrían serias contradicciones internas y terribles confusiones.
Era la primera ocasión que se piden este tipo de medidas a favor de un comunicador veracruzano, y la primera vez desde aquél 8 de abril del año pasado cuando fue asesinado a balazos el propietario de La Opinión de Poza Rica, Veracruz, nuestro Amigo

y compañero (QEPD) Raúl Gibb Guerrero. Cierto Martín Serrano Herrera, no es el único periodista que debía ser protegido por su gobierno, hay algunas compañeras y compañeros periodistas que lo necesitan y se les proporciona para salvaguardar su integridad física y la de su familia.
Seguramente usted tiene conocimiento que en el desarrollo del proceso de investigación e intensa búsqueda insaciable de Justicia que reclama Martín Serrano Herrera, se encontró con adversidades que rebasan la comprensión del sistema de procuración e impartición de Justicia en el gobierno de Veracruz; sin duda que no por culpa de usted, pero inevitablemente es usted, por el puesto de gobernador que desempeña, en quien recae la responsabilidad de evitar que se cometa otra grave injusticia en contra de nuestro compañero, al igual que en contra de cualquier ciudadano.
Me dirijo a usted respetuosamente, porque sé que usted valora elevadamente su responsabilidad y no evade su compromiso de garantizar legalmente, como titular del Poder Ejecutivo del estado de Veracruz, el respeto a los derechos humanos y civiles de todos los veracruzanos.
Me dirijo a todas y todos compañeras y compañeros periodistas y trabajadores de los medios de comunicación, porque sé que es sincero y limpio nuestro compromiso moral, y es reciproco para ser solidarios con todos quienes sufren o pudiéramos sufrir agresiones o injusticias en el desempeño de nuestro trabajo o en el ejercicio de la libertad de expresión.
Para procurarles la mejor información sobre la injusticia que nuestro compañero reclama, considero conveniente citar brevemente y reproducir, a continuación, la demanda interpuesta por él, en contra del Licenciado Emeterio López Márquez, Procurador de Justicia del Estado de Veracruz y la Licenciada JULIA FLORES TEOBA:
"…..al actuar de la manera que lo hizo dejando de velar por las leyes que le imponen la protección a las víctimas de un delito como acontece en mi situación, y DEJARME EN COMPLETO ESTADO DE INDEFENSIÓN sobre hechos que fueron valorados en un principio como constitutivos de delito, y además de actualizar CON SU CONDUCTA EL DELITO DE INCUMPLIMIENTO DE UN DEBER LEGAL, actualiza el delito de ABUSO DE AUTORIDAD…".
Señor Gobernador
En espera de que nuestro compañero (NO VAYA A SER PRIVADO DE SU VIDA Y/O AGREDIDO POR QUIENES YA LO HAN GOLPEADO Y AMENAZADO); no siga siendo victima de las injusticias e incongruencias en que ha estado luchando desde el 14-15 de febrero del 2001, cuando atentaron en contra de su patrimonio y posteriormente de su vida en los días 8 de mayo del 2003 y 22 de mayo del 2004 de lo cual se derivaron 10 demandas penales, sin que se le respeten sus derechos en la procuración e impartición de justicia; valoro que su intervención por Ley y con sentido humano, habrá de restaurar la protección y el respeto a los derechos humanos y ciudadanos de nuestro compañero Martín Serrano Herrera.

Martín Serrano Herrera: demuestras una vez más que eres valiente hasta la temeridad cuando te preocupa la imagen que dan en el mundo los mafiosos que gobiernan México, y no mi amenaza para la próxima reencarnación.

Dinosaurio: se puede decir más alto, pero no más claro que tú.
Reynaldo: ¿Y si cambiamos la huelga de hambre del flaco Serrano por unas enchiladas, unos guacamoles, tortillas, y unas especialidades de esta abuela, para estar fuertes y hundir en la miseria a los corruptos?
Es que en mi pueblo, cuando queremos ganar, no nos castigamos a nosotros mismos, sino a los adversarios.
Yo le prometo que haremos justicia si nos cuidamos de tomarla.

Te encontré hace poco, compartimos nuestra querencia "feroz" y de muchas otras causas que nos preocupan a los eternos "perdedores" como yo. Lo de Martín que pones en tu blog lo he mandado a mis amistades, el único patrimonio que vale la pena, gracias por la información.

Me gustas como gata guerrera cuando debates con esos petimetres que sólo alaban lo que la industria cultural les dicen que alaben. En fin, que decir Gatopardo, que me tienes rendido a tus pies y espero que nadie se ponga celoso. ¡Salud! y felicidad para ti y los tuyos.

Sintiéndolo mucho, he de rectificarte: los únicos "eternos perdedores" que existen son los que no luchan, y, en ese caso, difícil veo que tengamos amigos comunes. Otra cosa es que la batalla esté reñida, que nos llevemos algunas cicatrices de recuerdo, pero a ellos les hemos acertado con algunas pedradas bien dirigidas, y aún no nos han quitado la sonrisa ni las ganas de pelear. Además, tenemos aliados impagables, mientras que nuestros enemigos sólo tienen los que pueden comprar, y esos vendidos no tienen ni media bofetada dialéctica.
Gracias por los piropos, Javier, motivados por tu benevolencia, ya que no por mis mérito.

ALIANZA

Es hermoso saber que sobrevives,
y ensalzas el ciego impulso que nos une
más allá de la piel y las palabras,
más allá de la duda razonable.
Somos, mi amigo imaginario,
mi leal cooperante,
tan tibios, tan inermes, tan desnudos,
tan frágiles, tan poco reverentes
como todos los que han sobrevivido
y han sido vencidos muchas veces.
Y, en la grisalla atroz, sobre el hedor a vómito,
restalla esta alianza.
como una acre blasfemia sonriente
más allá del silencio.

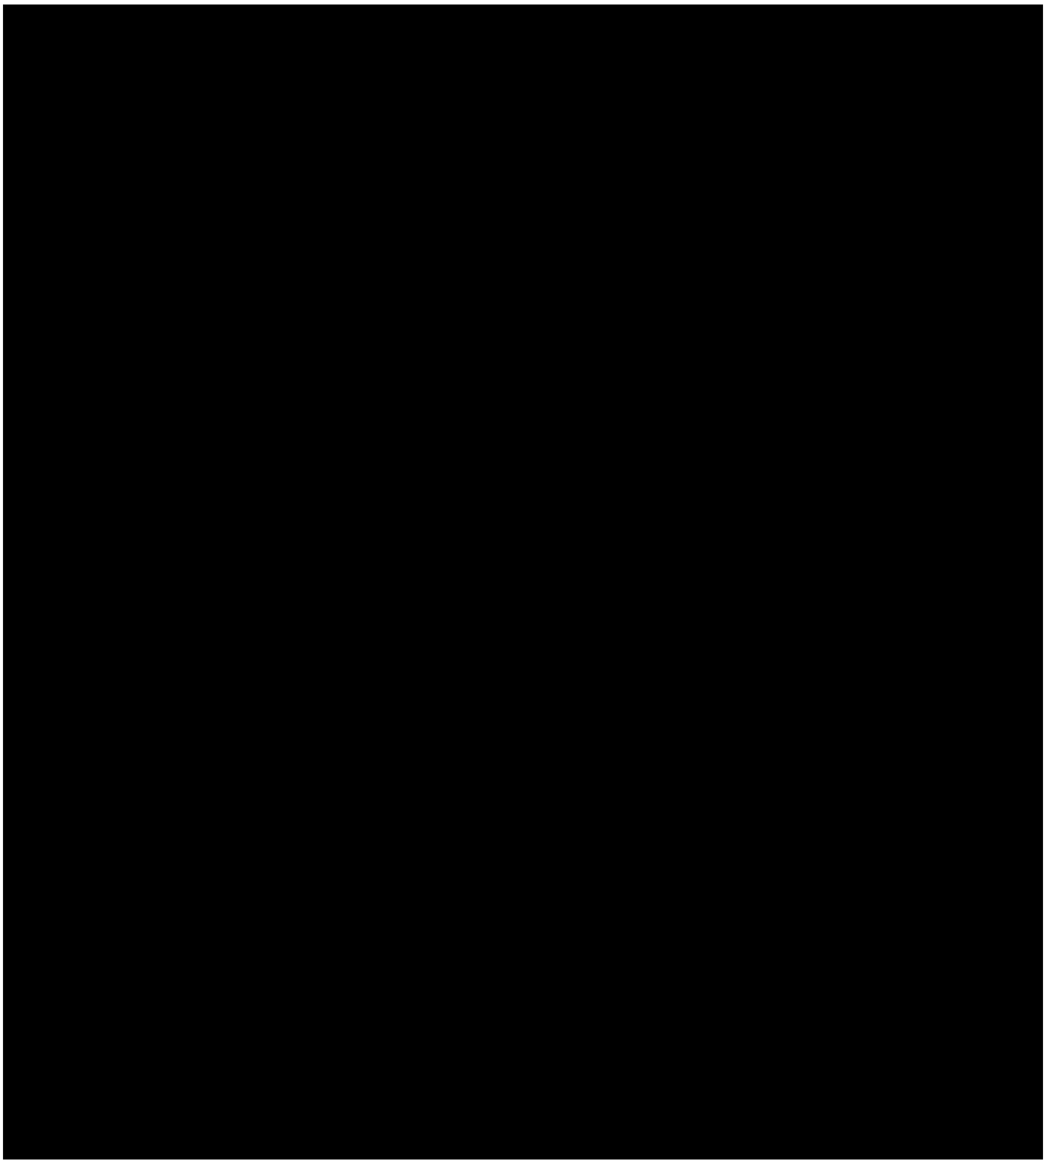
ORSAI ENTREVISTÓ A DON PEDRO J. SORIANO.



Este artículo, ha sido publicado en Las Provincias/ Alicante, el 12 de diciembre de 2006, firmado por Pedro J. Soriano (Ruiz) que fue representante de Organización del Sindicato Profesional de Policías Locales y Bomberos),(S.P.P.L.-C.V) y actualmente es representante sindical de la Agrupación de Policías Locales de Comisiones Obreras (CC OO) de Alicante y columnista de Las Provincias.
Clicad en las letricas azules para leer la entrevista que mi admirado Orsai hace a Pedro J. Soriano, y, de paso, leed hasta el final su emocionante historia.
Yo, que no se puede decir que sea el colmo de la sensibilidad, he llorado leyéndolo, y escuchando la entrevista, y aún se me saltan las lágrimas mientras escribo esto.
Y me ha dado un escalofrío de orgullo patrio saber que hay humildes Policías Locales con ese arrojo, ese temple, esa profunda comprensión de lo que significa internet, escribir... aunque se explica *revuelto como nido de caranchos*, *con más agachadas que el tero*, hay que reconocer que es *bravo como pulga de tapera,* su admirable estulticia se *destaca como mosca en leche*, ha dejado el artículo original *más esparramao que un hormiguero patiao*. Y *seguidor como perro de sulky*, se ha sentido *como perro en cancha de bochas*, *más ñato que perro ratonero* y *serio como perro en bote* en la

entrevista.
Leanlo, por favor. Y no se les olvide poner a Hernán Casciari, **Orsai,** en sus enlaces, porque es inmenso, absoluto, total, talentudo, y sobre todo, el puñetero es divertido.
De nada. Ya saben que me gusta ser útil.

El director de Las Provincias le ha escrito a Hernán Casciari diciendo que, tan él como el director de la sucursal de Alicante, con completamente ajenos y que le ha echado una bronca y no le van a publicar más cosas al policía amigo de lo que no es suyo. Lo podéis leer en los comentarios de Orsai.
Y claro, si los directores son ajenos a lo que se publica en los periódicos de su digna dirección, si a eso se le suma que escriben cartas con un estilo que parece adquirido haciendo atestados de la Guardia Civil, ¿por qué nos vamos a extrañar que un semianalfabeto se haya hecho en su pueblo con una cierta popularidad como escritor? ¿por qué me voy a extrañar de que haya gente que me haya mandado colaboraciones para Gatopardo, entre las que se incluye un texto mío?
Esto de jactarse de ser escritor y echador de media docena de polvos sin sacarla debe tener un morbo que aún no he logrado comprender.
Blind, no tientes la suerte, que visto lo visto, nos podemos encontrar un perro de Sulky en el Gobierno en cualquier momento.
Ah, señor Pendón Volteriano, qué buenos tiempos, qué de carcajadas le debemos a Corcuera, qué personaje, parecía la caricatura de un guionista delirante, como don Pedro J. Soriano sin ir más lejos.

A CÉSAR VIDAL

No me mueve, ¡ay, Dios!, para ofenderte
el rostro que te tienes merecido,
ni el presumir de lo que nunca has sido,
falto de títulos que puedan defenderte.

Muéveme, sí, el hecho de saberte
digno de que te llamen malnacido,
pues, a fuerza de ser un resentido,
tu pluma lo que toca lo pervierte.

Calla, César, que puede serte caro,
si insistes tú en ir de hijo de puta,
pues en tu albarda pesa el equipaje.

Ya que eres en Historia tan ignaro,
deja el pasado en paz, cambia de ruta,
dédicate a los toros... o al encaje.

Pero esta deriva provocadoramente basta con la que escoras en este final de año tu bitácora, sí que me excita, perniciosa escribidora. Me dan ganas, por decirlo en pocas palabras, de darte dos bofetadas bien dadas, plas-plas, como si dijéramos, ¿entiendes? zas-zas, anverso y reverso, dos tortazos en una misma acción siblime y ejecutada con soltura wolffiana. Te diré una cosa: si me encuentro en una habitación a solas con este hombre, me protegeré, pues tengo en gran estima mi virginidad trasera. Si le escucho más de 10 minutos, reconozco que me dan ciertas náuseas, porque no soporto a los sabihondos, pero de ahí a difamarle de ese modo, hay todo un trecho. ¿Qué te ha hecho a ti este pobre hombre? Querida agüela,

Desde que te leo (casi dos añitos ya) he notado cierta inquina por determinados autores que sacan "lo mejor de ti". En un fabuloso ejercicio de egocasting (gran neo-palabro patrocinado por El País) esos mismos autores también me han hecho vomitar litros de jugos gástricos. Tú ya sabes de lo que hablo, no sólo de César Vidal, también tienes por ahí a Bucay, Coelho...

En fin, a lo que voy: así no vamos a ningún sitio (excepto a por la úlcera sangrante). Debemos empaparnos de otro espíritu y abrazar una filosofía que fomenten el amor, la comprensión hacia el otro, el diálogo, y que alejen la crítica, el insulto y la profusión de bilis. Al fin y al cabo, todos "semos" animalitos del señor.

Y aún te digo más: a estos señores hay que admirarlos. Así como lo oyes, sin remordimientos y con propósito de enmienda. Porque César Vidal, en el fondo, es el superhombre (y no el de Niechtze). ¿Cuantas personas en el mundo mundial son capaces de publicar al ritmo al que lo hace este genio de las letras? Sólo cuando en un año sea capaz de publicar 6 libros 6 de unas 400 páginas de media podré hablarle de tú a tú.

Ah, y Feliz Navidad, que creo que no te lo había dicho.

Eduardo González Calleja, científico titular del Instituto de Historia del CSIC y profesor asociado en la Universidad Carlos III de Madrid, dice en "Revista de Libros" (sobre el libro de César Vidal "Checas de Madrid"):
Lamentablemente, no puede decirse lo mismo de la obra de Vidal, cuya falta de originalidad arranca desde su mismo título, tomado de una novela del periodista de ABC Tomás Borrás —el inventor del «complot comunista» de la primavera de 1936 (5)— que ni siquiera aparece aludida en la bibliografía final. Estamos ante un ejemplo señero del «método» de confección de libros que ha dado notoriedad a este escritor: una porción de páginas de relleno que envuelve la inanidad total a la hora de tratar el tema que es presunto objeto de análisis (sólo se dedican 26 páginas a la actividad «chequista» en

Madrid de un total de 364); un aparato «crítico» repleto de notas improcedentes o de relleno, con siglas que quizá pertenezcan a fuentes ignotas, con una bibliografía contextual que se exhibe pero que no se emplea, trufada de títulos deliberadamente poco accesibles al lector español, que se citan de forma incompleta o que no aparecen en la relación final. El repertorio bibliográfico, con obras repetidas o redundantes, asignaciones falsas, inserciones inexplicables y olvidos clamorosos (6), es un caos absoluto que hu-biera hecho las delicias de Southworth.

Los apéndices documentales son otro ejemplo contundente de esta falta de seriedad y de criterio: el número I (relación de checas de Madrid) aparece repetido literalmente en el texto y sin alusión alguna a las fuentes empleadas para su confección; el número II es una «antología documental» tan peregrina que repite sistemáticamente párrafos ya introducidos en el cuerpo de texto; el número III es una mera transcripción del martirologio depositado en el santuario de la Gran Promesa de Valladolid; y el número IV (relación de asesinados) es un listado pretendidamente alfabético, que revela su absoluta inutilidad al estar plagado de errores (véase a título ilustrativo las entradas 578, 719, 2186 o 3664), no señalar el lugar y la fecha de las ejecuciones, y no citar las fuentes para su elaboración, como tuvo el decoro de hacer Rafael Casas de la Vega en su catálogo de víctimas, que Vidal vampiriza descaradamente (7).

Pero la obra no plantea sólo reparos formales que la hubieran hecho inaceptable como simple trabajo de curso, sino problemas de fondo que proceden en primer lugar de una visión profundamente distorsionada de la historia de España. Este autoproclamado «liberal» desarrolla la «tesis» de que las matanzas organizadas en zona republicana fueron el resultado de un proceso revolucionario que se inició «a fines del siglo XIX» y que, tras su derrota provisional en 1917 y 1934, logró el triunfo a partir de 1931; victoria que incluía «por definición» la práctica de exterminio de segmentos enteros de la sociedad. Este proceso revolucionario transecular habría sido protagonizado, en informe cargamontón subversivo, por la consabida amalgama «rojo-separatista» de comunistas (¡ya a comienzos del siglo XX!), republicanos «de clase media» (sic, pág. 46), anarquistas «partidarios de la acción directa» (sic, pág. 48),socialistas cuya actuación habría sido invariablemente ilegal durante décadas, y los «denominados nacionalismos», especialmente el catalán, cuya trayectoria histórica, a decir del autor, «encajaba mal en un proceso modernizador de signo liberal». Según parece, el catalanismo nunca sintió reparos en «acabar con un sistema político que se oponía a la consecución de sus metas» (pág. 45), especialmente el muy radical Cambó, que habría urdido en fecha indeterminada una «alianza vasco-catalana» para que el sistema constitucional saltara por los aires (pág. 50).

Pero la antología del disparate no se detiene ahí: la oposición se convierte en responsable de la proclamación de la Dictadura; Azaña se habría hecho republicano en 1930; los firmantes del «Pacto de San Sebastián» (a los que acusa de intentar derribar el orden constitucional, olvidando el «pequeño» detalle de su suspensión desde septiembre de 1923) se transformaron automáticamente en el primer gobierno de la República; la masacre de Arnedo habría sido un «motín armado socialista»; la huelga general campesina de junio de 1934, una «ofensiva revolucionaria»; y la izquierda en bloque habría provocado el «golpe de Estado nacionalista-socialista» de 1934. Como culminación de todo ello, tras el 18 de julio, el Frente Popular habría confirmado esa «cosmovisión antisistema y antiparlamentaria que incluía entre sus características las del exterminio del adversario considerado como tal a segmentos íntegros de la población» (pág. 78), ya que las matanzas las realizaron «organizaciones que desde hacía décadas consideraban moralmente lícita la eliminación física del adversario político» (pág. 81). En fin, un puro dislate, que no es sino la reiteración de la vieja tesis teleológica catastrofista urdida por la derecha ultrarreaccionaria decimonónica de la democracia como antesala del comunismo. Un argumento que, como es bien sabido, utilizó largamente el franquismo como baza de legitimación del golpe militar de 1936,

pero al que Vidal da una vuelta de tuerca más al pretender la homologación de estos asesinatos con el Holocausto judío.
Haría bien este autor en reconsiderar la tipificación del genocidio a la luz de las últimas aportaciones de la historiografía europea sobre el tema (8). En todo caso, su afirmación resulta difícilmente sostenible cuando se constata que a la represión «incontrolada» causada por la guerra y la revolución en sus primeras semanas le sucedió una justicia popular «institucionalizada» que trató de atajar las manifestaciones más arbitrarias y sangrientas de aquélla, «normalizando» el aparato represivo al hilo de la evolución militar y política de la zona republicana (9). No se trata de minusvalorar la represión indudable que existió en el bando republicano, sino de contextualizarla y explicarla en sus características, estructura y actuación. Es en ese aspecto donde nos llevamos una última decepción. El autor no explica la evolución de estos centros de detención y tortura en ese necesario contexto histórico, exhibiendo nuevos documentos o proponiendo perspectivas de análisis renovadas (cosa que hace Javier Cervera en su libro sobre la «quinta columna» madrileña (10)), sino que opta por la consabida descripción de los crímenes, con sesenta años a sus espaldas, empleando como citas de autoridad la Historia de la Cruzada, los testimonios de ex comunistas como Castro Delgado o Hernández (mientras que los de Prieto o Azaña son insidiosa y sistemáticamente rechazados) y el libro La dominación roja en España. Causa general instruida por el Ministerio Fiscal, que es «saqueado» de forma tan inmisericorde que nos podemos lamentar de la perpetración de un último «fusilamiento» en masa. Ni que decir tiene que, en su opción por destacar la truculencia de los asesinatos sobre la explicación de las estructuras del terror, Vidal no se detiene un momento en considerar los dilemas metodológicos que muchos especialistas se han planteado a la hora de explotar el ingente fondo documental de la Causa General, cuyo origen eminentemente punitivo exige una previa labor de depuración y crítica de informaciones y cifras, cruzando datos con la prensa, los testimonios orales, las memorias de personajes, los registros civiles o los archivos políticos (11).
En definitiva, Vidal no deja «al descubierto» las cárceles republicanas, sino su incompetencia para tratar con solvencia este tema. Es un exponente más de esa producción bibliográfica paralela (difícilmente se puede hablar de historiografía) de la Guerra Civil que tanto fascina al profesor Payne, pero que en su apuesta por la denuncia histérica antes que por el análisis sereno dificulta que el tema de la represión política se encamine hacia su definitiva normalización historiográfica."

Para más información, pongo en enlace clicando en mi nombre, el post de Bouba en su blog, assumint.blogspot.com, dedicado a las "hazañas" de este infatuado y fatuo César Vidal.
¿Qué les pasa a Gallardón y a Vidal en un ojo, que lo tienen a media persiana?
Por cierto, muy bueno el soneto, insuperable como siempre.
Profesor Widemann: fui alumna suya, y tengo sus epigramas, que no pude devolverle en su momento. Se los enviaré adonde me diga.
Saludos cordialísimos.

Estimado señor: El problema pudiera ser no "ser un hombre facha" sino "una facha de hombre". Y no es que ponga yo en duda que es usted un facha. Acepto su palabra de

caballero de que lo es. Es más: si alguien dijera lo contrario, aduciría yo ciertos indicios que apuntan a tal definición:
1º El facha amaga y no da. Empieza amenazando como un matón y termina coqueteando como una demimondaine, cuando huele que le van a estropear la cara.
2º Escora irremisiblemente en su cosmogonía hacia los cuartos traseros con epicentro esencial en los esfínteres pudendos.
3º Su ideología populista le hace frecuentar las fórmulas de tratamiento más tabernarias , sea para dirigirse a una dama, como es Gatopardo, o a un octogenario, como lo soy yo.
En fin, señor mío, que me ha alegrado usted el día: es reconfortante saber que el PP no lo tiene en sus filas ni yo entre mis "admiradores"

Geraldín, cielo.
Deja tus ejercicios de estilo para mejor objetivo, bollito, que estás pinchando en hueso. Encriptarse de esa manera para parecer mundano es tan triste que casi me da la risa. Si es verdad que eres octogenario, lo disimulas de fábula, bobo, pareces un jovenzuelo tratando de ocultar su (de)formación logsiana. Y si eres incapaz de ver más allá de donde has visto, cariño, no es culpa mía, te lo juro. Culpa a la sociedad o algo de eso que seguro que has hecho toda tu vida, que yo te apoyo, corazón. Epero créeme: estás más despistado de lo que parecía por el soneto, pero tranquilo, que no me preocupa en absoluto y no pienso en sacarte de tu estúpida burbuja.
Me pregunto si tanta inquina no será envidia y que, en el fondo, te gustaría ser César Vidal. Eso, sin duda, sería un síntoma preocupante de senilidad que, por ser buena persona, voy a desechar.

Contesto brevemente a tu torpe enumeración, Geraldito,
No soy facha, aprende a leer, mendruguito, y a interpretar lo que se escribe. Y eso de "el facha amaga y no da", ¿de dónde lo has sacado? Porque a mí me han dado unas cuantas veces, casi tantas como han amagado.
Lo del escoramiento, la cosmogonía y los cuartos traseros, corazón, es tan enternecedoramente idiota, que de verdad me cuesta creer que lo hayas escrito. Pensabas que era gracioso, ¿verdad? caca, culo, pedo pis y todo eso. Pobrín...
Y no tengo ideología, como tú, querido, sino ideas. A lo mejor esa tontería es lo que, fundamentalmente, nos diferencia. Lo siento por ti, cielo.

Respecto a tu idea de que soy distinta, si te refieres a que yo profeso la untuosa piedad indiferenciada que engloba a los enemigos de la humanidad, estás equivocado: lloro amargamente por la pérdida de una vida, sea la de un ser humano o la un gorrión apedreado; pero celebro alborozada la muerte del asesino. Descorchemos o no, alcoholes embotellados sean del tipo que sean, lo pasado pasado está... el bicho al agujero y ahí se debe quedar, aunque bueno creo que lo iban a incinerar, lástima que para ello estará muerto y no vivo como no le ocurrió a más de un detractor. En cualquier caso, ahora lo que interesa es que los respectivos poderes judiciales se apropien de toda la plata que el gachó tiene repartida por ahí y no dejen ni una chica, ni siquiera lo que les corresponda legítamente a sus herederos (viudisisísima desolada y afligida de pelo escaldado color lombarda-SaraMontiel y gafas ray-ban, incluida), por aquello de los intereses generados.
Si eso ocurre, entonces sí que brindaré y cogeré la papa gorda; aunque los gobiernos se lo gasten en putas y cocaína como parece ser que sucedió con la directiva de los gal en este país.

Y celebrar una muerte es de mal gusto, siempre que no sea una cosa del tipo de la celebración de la muerte que hacen los indios Kechu-Apiantoc, de por allí cerca, que lo que celebran es el tránsito a lo que ellos, infelices, piensan que va a ser una vida mejor.
Pero qué quieres que te diga. No hace falta decir bobadas, así que no me digas más bobadas, que te pierdes agüela. Es de muy mal gusto (y el cava es de peor gusto, monada) y yo sé que eres distinta. 2.) QUE NO VUELVA A SUCEDER.

Transcripción literal de las páginas 1-10 del informe de la FEMOSSP, silenciado por el Gobierno Fox y publicado en EE UU, en el National Security Archive, **archivo PDF**

3. EL MOVIMIENTO ESTUDIANTIL DE 1968

3.1. Lo que explica el surgimiento del movimiento estudiantil

3.1.1. Los cambios en política social y educativa afectan a sectores populares combativos de la sociedad

Concluida la II Guerra Mundial, México se alinea ideológica y estratégicamente con la política de Estados Unidos en el contexto de la Guerra Fría. Abandona el proyecto de autosuficiencia y de modelo económico nacionalista. Cierra los internados de Chapingo y el IPN, varias escuelas normales rurales y reprime a las organizaciones estudiantiles que buscaban democratizar sus espacios educativos. Modifica la orientación socialista de la educación por una orientación más liberal**1)**. En los niveles medio superior y superior se deja el modelo que buscaban privilegiar el desarrollo y la ampliación de la matricula de educación superior a los sectores marginados y prioriza el apoyo a las carreras liberales por sobre las técnicas. Para controlar los movimientos sociales, se reforman en 1951 las leyes que tipifican el delito de disolución social en el Código Penal y se encarcela bajo estos cargos a los primeros presos políticos. Es entonces cuando emerge la resistencia estudiantil y obrera. Las organizaciones estudiantiles se fueron fortaleciendo en su lucha a lo largo de la década de los 60. Cuando la represión gubernamental se extiende contra otros grupos como el movimiento nacional de huelga de médicos en 1965, la protesta estudiantil también rebasa los recintos escolares.

A. La primera movilización estudiantil del IPN en 1942
Manuel Ávila Camacho frena la política agraria y le da un viraje a la política nacionalista de Cárdenas que apoyaba los sectores empobrecidos. Los dos grandes pilares educativos que servían a estos propósitos, las Escuelas Normales Rurales (ENR) y el Instituto Politécnico Nacional (IPN) dejan de ser proyectos estratégicamente relevantes para el régimen. Intenta cerrar las normales rurales que formaban a los maestros como agentes de cambio frente a las necesidades de los sectores más pobres de la población

y promovían el reparto agrario. De igual modo, el IPN deja de recibir el apoyo necesario para el desarrollo de tecnología para la industria nacionalista. Esta relación del maestro rural y del profesionista técnico que apoyaran y participaran al lado del obrero en sus luchas reivindicativas no sólo dejaron de ser parte del proyecto del Estado sino que, quienes se involucraron en estas tareas, comenzaron a ser considerados agitadores subversivos.
En 1942 la administración de Ávila Camacho disminuye la partida presupuestal destinada al IPN, promueve una iniciativa de reforma a los artículos 91 92 y 93 de la ley orgánica del Artículo 3º constitucional para negar el carácter de educación superior y profesional a la enseñanza técnica y, ese mismo año emerge el primer movimiento estudiantil del IPN.

1) "La educación que imparta el Estado – federación, estados, municipios- tenderá a desarrollar armónicamente las facultades del ser humano y fomentará en él, a la vez, clamor a la patria y la conciencia de solidaridad internacional, en la independencia y la justicia." Ibíd. p. 192

Ante la intención de desaparecer al IPN los estudiantes se lanzan a la huelga el 4 de Marzo de 1942. Su pliego de demandas es,

1. La expedición de la ley orgánica del IPN, que legalmente legitime su existencia como institución de educación superior.
2. Expedición por parte de la SEP, de títulos profesionales para los egresados del IPN
3. El cumplimiento del programa de reformas materiales a los edificios del instituto.
4. Construcción de las nuevas escuelas técnicas ya proyectadas e incluidas en las diferentes partidas aprobadas por el Ejecutivo.
5. Presupuesto asistencial.

El Secretario de educación pública, no acepta el carácter educativo del movimiento, se niega a negociar con los huelguistas y ordena suspender las becas de todos los que participan en él. Ante esta cerrazón política se organiza una manifestación el 6 de marzo, cuyo recorrido partiría del Casco de Sto. Tomás al Zócalo de la ciudad de México. "A las 18:00, al llegar a la esquina de Madero y Palma, la policía les cierra el paso y dispara sobre la multitud. Una mesera y 20 estudiantes quedaron tirados en la calle. Al día siguiente los periódicos informan de la muerte de 4 estudiantes, entre ellos Socorro Acosta, asesinada a hachazos por el cuerpo de bomberos y denuncian que los cadáveres han sido ocultados" **2)**
Tras la represión, se desata una campaña de desprestigio del movimiento argumentando que es una maniobra organizada por los comunistas y declara que José Díaz Sandi, dirigente del movimiento es miembro del PCM. Diputados y senadores, testigos presenciales, declaran que la agresión vino de los policías y exigen justicia para el movimiento.
Los estudiantes organizan una parada frente al Palacio Nacional y son recibidos por Ávila Camacho quien reconociendo la justicia del movimiento, dispone que se conceda personalidad jurídica, administrativa y técnica al IPN y se hagan las reformas legales conducentes a asegurar el ejercicio profesional de los egresados del IPN. La huelga se levanta el 13 de Marzo.

B. Otras demandas estudiantiles
La Escuela Nacional de Maestros se lanza a la huelga, en julio de 1949, exigiendo:

a) Aumento de becas para los estudiantes.
b) Atención a las necesidades de la escuela.

c) Libertad de ideología para los maestros."**3)**

Los estudiantes de todas las escuelas normales rurales de la República agrupados en la Federación de Estudiantes y Campesinos Socialistas de México (FECSUM), realizan una huelga el 22 de marzo de 1950, exigiendo al Estado atención a sus exiguas condiciones de vida. La huelga, que duró 34 días, es levantada cuando a la SEP se compromete a incluir esta demanda estudiantil en el nuevo presupuesto.

2) **Ibíd. p.191**
3) **Ibíd. p.193**

Los estudiantes politécnicos se lanzan a la huelga, el 12 de abril de 1950. Las promesas hechas por Ávila Camacho no habían sido cumplidas y los problemas se agudizaban. Cada año llegaban de provincia oleadas de estudiantes llamados 'gaviotas', que ya se habían convertido en un serio problema. Se trataba de jóvenes desamparados, hijos de campesinos u obreros, que deseaban estudiar en el Instituto y solicitaban becas y albergue en los internados destinados a los estudiantes de provincia. Dormían debajo de las instalaciones del Estadio Deportivo y esperaban a que los estudiantes internos terminaran de comer para lanzarse a las sobras que ellos dejaban. La Secretaría de Educación Pública acuerda clausurar el Instituto Politécnico Nacional el 23 de mayo. La lucha se recrudece y el estado cede el 28 del mismo mes.
La cercanía geográfica entre el Instituto Politécnico Nacional y la Escuela Nacional de Maestros, así como la composición del estudiantado –mayoritariamente masculino en el IPN, y femenino en la ENM-, propiciaron que hubiera una cercanía afectiva entre ambas escuelas. En 1950 la ENM y el IPN se unen en apoyo mutuo para hacer valer sus demandas. La unión hace la fuerza, "22,000 estudiantes se movilizan, se consiguen mil raciones alimenticias y la renuncia del director del IPN Alejandro Guillot. La huelga se levanta después de 46 días." **4)**

C. La Ciudad Universitaria, sede de la UNAM
En 1954 las facultades de la UNAM que ocupaban el Centro de la Ciudad de México se reubican en su nueva sede de Ciudad Universitaria. Mientras que el Centro pierde la vitalidad que le inyectaba el estudiantado en las tertulias de las calles, en las librerías de usado y en el bullicio mismo que le daba carácter festivo, el nuevo escenario alienta con mayor vigor el imaginario colectivo de pertenencia a una generación de vanguardia, abierta al mundo, sedienta de cultura, y libertaria. La Revista de la Universidad y Radio Universidad sirven de catalizadores. Es el modernismo que se instala en la Universidad. Es poesía, teatro, música, cine y reflexión crítica de la situación política. Es marxismo, psicoanálisis, arte moderno. Es jazz, es cine. Es Juan José Arreola y Octavio Paz, es Leonora Carrington y Juan Soriano, es Carlos Fuentes y Tomás Segovia, es Alejandro Jodorowski. La Difusión Cultural que fue ejercida "en cien años sin libertad de expresión política y artística, es el 'territorio libre' regido por el anhelo de estar al día" **5).**
La composición de su matrícula se constituía con menos de un 10% por hijos de obreros y campesinos. La asignación presupuestaria que se le asignó a la UNAM contrastaba con la drástica reducción del presupuesto al IPN, a Chapingo –que también cerró su internado-, y a las escuelas normales rurales cuyo alumnado claramente provenía de los sectores populares y cuya formación estaba dirigida a crear bases de autonomía tecnológica y de apoyo a campesinos y obreros. Este sector de estudiantes denunciaba su carencia de recursos frente a "las ostentosas obras de Ciudad Universitaria". El doble rasero con el que el gobierno federal apoyó diferenciadamente a las instituciones de educación superior, motivó un antagonismo entre los estudiantes de la UNAM y del Poli que, en su expresión más lúdica, se confrontaba en el clásico partido de fútbol americano entre los 'Burros' del Poli y los 'Pumas' de la Universidad, pero que también

tenía expresiones de enfrentamiento de clase social.

D. Huelga de 1956 del IPN

Las Escuelas Prácticas de Agricultura estallan la huelga en 1956, y seis días después, el 11 de abril de 1956, el IPN. Al movimiento se adhieren los estudiantes de todas las escuelas normales rurales del país, más tarde el movimiento se generaliza a todas las escuelas superiores gubernamentales **6)**
Organizados a través de la Federación Nacional de Estudiantes Técnicos (FNET), los estudiantes del IPN presentaron un pliego petitorio de 13 puntos cuyas principales demandas eran: 1) Aprobación de una Ley Orgánica y cambio de director del Instituto, 2) Construcción de instalaciones y otras demandas materiales; 3) Ampliación de las becas. La situación del IPN con sus ya viejas demandas era bastante desesperada. La migración producida por la crisis del campo, el espejismo de que la educación sería la polea en la movilización social y el crecimiento demográfico explosivo del país, repercutían en la sobre saturación de la matrícula del IPN. Una cantidad enorme de jóvenes estudiantes que asistían a clases no tenían cupo en el internado, dormían bajo las escaleras de los edificios y comían las sobras de la ración que recibían los becados. Para entonces, el IPN contaba con 3,500 becarios y un internado, al que asistían también 1500 estudiantes 'gaviotas', sin becas. La huelga del Politécnico fue conducida por la Federación Nacional de Estudiantes Técnicos (FNET) afiliada a la Confederación de Jóvenes Mexicanos (CJM) afiliada al PRI, aunque los principales dirigentes militaban en el PPS.
El número de estudiantes en Huelga es de más de cien mil. El 56/ 06/ 06 las autoridades educativas llegan a un acuerdo con las direcciones estudiantiles de las escuelas normales rurales y prácticas de agricultura. Casi todas las demandas planteadas son concedidas y la huelga es levantada. A mediados del mismo mes de junio de 1956 la SEP concede la mayor parte de las peticiones de la Escuela Nacional de Maestros, logrando que dicha escuela suspenda también el movimiento huelguístico. El gobierno logra, con promesas de solución, que de las cinco instituciones claves en huelga, queden sólo dos, el IPN y la Normal Superior. El movimiento pierde fuerza. El gobierno presenta, entonces, una propuesta de solución que es demasiado vaga y no responde a las demandas de los politécnicos. Sin embargo la FNET tiene que aceptarla debido a que el movimiento está bastante debilitado. El 21 de junio los estudiantes levantan la huelga sin haber logrado su pliego petitorio**7)**, pero mantienen la demanda de que renuncie el director del IPN, Dr. Hernández Corzo, a lo que se accede y se nombra a Alejo Peralta como nuevo director general del IPN.
Aprovechando un incidente que se produjo entre Alejo Peralta y los estudiantes politécnicos, al no aceptar estos últimos el tipo y la forma en que fueron designados los funcionarios administrativos del internado, en la madrugada del 23 de septiembre de 1956, "1 800 soldados de los Batallones 2º., 8º y 24º., del glorioso Ejército Nacional, al mando de tres generales de división y bajo la supervisión del propio Secretario de la Defensa, ocupan las instalaciones del Instituto Politécnico Nacional". Esta operación conocida como la "Operación P", es apoyada por el Cuerpo de Granaderos y por la Policía Judicial"**8)**.

6) **Martínez, 1983: 202.**
7) **56/ 04/ 11 Se inicia la huelga en el IPN. Las demandas principales son: 1) Aprobación de una Ley Orgánica y cambio de director del instituto, 2) Construcción de instalaciones y otras demandas materiales; 3) ampliación de las becas (De la Garza; 1986, 18).**
8) **Ídem, 207.**

El internado es clausurado definitivamente y los apoyos son sustituidos por un sistema

de becas individuales **9)**. De esta manera se cierran las puertas de la educación superior a miles y miles de jóvenes de extracción popular.
Días más tarde el dirigente de la FNET, Nicandro Mendoza es detenido por veinte agentes de la Policía Judicial, y al día siguiente hacen lo mismo con el Secretario General, Mariano Molina. Ambos son procesados por el delito de disolución social e internados en la Penitenciaria de Lecumberri**10)**. No sólo el edificio del internado, sino también el Casco de Santo Tomás, quedan bajo el control del ejército**11).**
Con el encarcelamiento de los dirigentes de la FNET, el gobierno decidió introducir la estructura de mediación como mecanismo para controlar estos centros educativos –los arreglos y decisiones se toman a espaldas de los estudiantes, encargada del control del estudiantado y de la delación policíaca de disidentes políticos al interior de IPN-, de esta forma la FNET fue cooptada y pasó a ser considerada una organización estudiantil "charra" en la que se hace evidente su corrupción.
También en la UNAM se fomentaron las sociedades de alumnos, que mantenidas por las administraciones universitarias, se convertirían en grupos de "porros", grupos de alumnos con capacidad para romper mítines o perseguir y golpear a estudiantes que manifestaran su inconformidad con el proyecto político que se impulsaba desde el gobierno. En las universidades Puebla, Sinaloa, Chihuahua, Guadalajara y Nuevo León, operaba la FNET con estudiantes fósiles a los que les otorgaba prebendas por sabotear todo intento de organización independiente del estudiantado. El gobierno, a través de autoridades universitarias, financiaba Sociedades de Alumnos en las que cooptaba sus líderes y mantenía 'becados' grupos numerosos de 'porros', que utilizaba según sus necesidades. La antigua Federación de Estudiantes Socialistas de Occidente, convertida en Federación de Estudiantes de Guadalajara (FEG), pasa una situación parecida de cooptación, al desplazarse la dirección al aparato estatal, sólo que ésta llegó al grado de constituirse como grupo paramilitar.
El 6 de octubre de 1956 se formó el Consejo de Estudiantes Técnicos, en defensa del Instituto Politécnico Nacional, constituido democráticamente con la participación de tres delegados por cada escuela, cada uno de ellos nombrado en asamblea. La FNET, que era el organismo oficial de la institución, tenía un solo voto**12)**. Nótese la similitud de la conformación del CNH en agosto de 1968.

E. Luchas estudiantiles y universitarias
Las luchas estudiantiles y universitarias que se dan en provincia durante este periodo son, igualmente, golpeadas con medidas represivas, incluyendo la intervención del ejército contra los estudiantes, el desprestigio en contra de los participantes y la justificación de la acción del Estado, en la concepción de la guerra fría, tildándolas de comunistas.

La Universidad de Guerrero
En 1960 el gobierno del Estado convierte el Colegio del Estado en la Universidad de Guerrero. Tres meses después, el Congreso Local aprueba su Ley Orgánica. Dado el carácter autoritario del gobernador, el General Caballero Aburto, la Universidad fue creada con un organigrama muy vertical y sin autonomía. El sector estudiantil que, en su huelga de 1956 y 57, había logrado en el Colegio del Estado órganos paritarios de gobierno, consideró que con esta Ley Orgánica perdía conquistas ya ganadas.

Ante la inconformidad estudiantil que encabezó la Federación Estudiantil Universitaria

Guerrerense (FEUG) con demandas de autonomía y subsidios a la Universidad, el rector inició el hostigamiento a través del Pentatlón Universitario. El gobernador intentó resolver todo con el ejército, ante lo cual se inicia, el 20 de octubre de 1960, la huelga de la universidad a la que se unió la normal de Ayotzinapa. **Lucio Cabañas** fue entonces nombrado presidente de huelga en la normal.
Cuando el gobernador mete el ejército a la Universidad, ya tenía otro movimiento que pedía su renuncia, el de la Asociación Cívica Guerrerense, en la que participaba Genaro Vázquez. Esta política represiva de Caballero Aburto unió los dos movimientos, el de los cívicos que denunciaban las tropelías del gobierno y el estudiantil por la autonomía universitaria. Para acallar este movimiento, el Gobernador recurrió a la intervención de la policía y el ejército para reprimirlo en repetidas ocasiones.
El 6 de noviembre de 1960 soldados del 24º BI y la policía reprimieron una marcha de más de cinco mil personas en Chilpancingo con el resultado de dos personas gravemente heridas y 25 golpeados. El 16 de noviembre de 1960 se produjo una nueva represión en Acapulco con un saldo de 23 heridos y 200 detenidos. El 25 de noviembre el ejército sitió la universidad, dispersó la asamblea permanente instalada frente al palacio de gobierno, y detuvo a un centenar de personas.13 El 9 de diciembre de 1960 la policía dispersó a balazos una manifestación; las familias se refugiaron en un pórtico de donde fueron sacadas a culatazos con un saldo de más de 30 detenidos (CU, 1994:18). El 11 de diciembre de 1960 en Atoyac la policía dispara en contra del mitin convocado por el Frente Revolucionario Zapatista, matando a una persona e hiriendo a varias; a pesar de lo cual el mitin no se dispersa sino que aumenta su presión hasta liberar a los detenidos, entre ellos a Lucio Cabañas. El 30 de diciembre de 1960 el gobernador ordenó intervenir al ejército en contra de la población que se congregó para exigir su renuncia en Chilpancingo. Soldados del 24º Batallón de Infantería dispararon en contra de la multitud de manifestantes dejando un saldo oficial de 15 muertos y decenas de heridos. El Congreso de la Unión decretó el 4 de enero de 1961 la desaparición de poderes y Caballero Aburto fue enviado a Centroamérica a una delegación diplomática.

La Universidad de San Nicolás de Hidalgo en Morelia, la Nicolaíta
En 1961 se promulgó una nueva Ley Orgánica que seguía contemplando la existencia de un Consejo Universitario Paritario y que el rector fuera nombrado por el gobernador. La nueva Ley orgánica intentó una orientación más progresista a la educación universitaria, resultado de una nueva correlación de fuerzas en la universidad, favorable a las corrientes de izquierda que permitió al Dr. Elí de Gortari llegar a la rectoría. La lucha interna en la universidad se intensificó y se extendió a la población. El gobierno intervino en la aprobación de una nueva Ley Orgánica que término con el cogobierno universitario y puso en manos de una junta de gobierno la designación de autoridades, con lo cual el rector se vio obligado a renunciar por "promover una ideología comunista". La destitución del rector provocó respuestas violentas de los estudiantes, la represión gubernamental **14)** y la encarcelación de maestros y líderes universitarios.**15)**

Cinco años después, el 66/ 10/ 01, estudiantes y ciudadanos de Morelia coincidieron en un movimiento en contra del alza en las tarifas del transporte público. En una primera manifestación de protesta resultó muerto a tiros el estudiante Everardo Rodríguez Orbe. Los estudiantes entonces estallan la huelga. El 8 de octubre, a petición del Congreso Local, la tropa, mandada por el general José Hernández Toledo, tomó la universidad y

detuvo a decenas de estudiantes**16)**, habiendo realizado previamente un desfile intimidatorio por las calles de Morelia, alegando una agitación comunista detrás de los hechos. Durante 3 años aproximadamente estuvieron presos el líder de la Central Nacional de Estudiantes Democráticos (CNED), Rafael Aguilar Talamantes, y el dirigente popular Efrén Capiz.**17)**.
A principios de 1968 se inició la **Marcha por la Ruta por la Libertad**, que esperaba conseguir la liberación de los presos políticos de de la CNED. Fueron recibidos en la ciudad de Salamanca por la CNC que les hostigó y obligó a dejar la ciudad. El ejército se moviliza para proteger las instalaciones de Petróleos Mexicanos y espera a la marcha en las inmediaciones de la carretera de Salamanca a Morelia. Llegan con un discurso paternalista y con camiones para regresarlos a sus ciudades de origen. No obstante que la Marcha se suspendió, dadas las condiciones, y aceptó las propuestas del ejército, se realizaron detenciones posteriores de varios dirigentes de la misma: Rolando Waller Ruelas, J. Encarnación Pérez Gaytán, Tercer Secretario del Comité Central del PCM; Armando Real Mena, Marcos Leonel Posadas, Marco Antonio Goytia Jiménez, líder de la Juventud Comunista de México y Hugo Ponce de León, miembro del Comité Central del PCM y director del periódico "La Voz de México"; Gabriel Ramos Millán, Jorge Véliz Gamboa. Por la tarde todos ellos fueron puestos a disposición de la PGR.**18)**

Sonora
En Sonora, durante 1967, los estudiantes protestaron por la imposición del gobernador. Este, solicita a las autoridades universitarias que "orienten al estudiantado de que no participe en actos extra universitarios que son aprovechados generalmente por grupos políticos."**19)** El estudiantado debe estudiar, no intervenir en el manejo de su sociedad. Puesto que los estudiantes no comparten esa idea y las protestas continúan, en febrero el ejército es utilizado para ocupar la Universidad. "Abundan los gases lacrimógenos, macanazos; embestidas de automóviles durante las manifestaciones."**20)** Hay detenciones, huelga y la Federación de Estudiantes de Sonora promueve nuevas manifestaciones para protestar por la ocupación de la universidad y por la detención de los estudiantes.**21)**

INFORME GENERAL DE LA FISCALÍA ESPECIAL PARA MOVIMIENTOS SOCIALES Y POLÍTICOS DEL PASADO
Transcripción literal del informe silenciado por el Gobierno Fox, y publicado en EE UU, en el National Security Archive, ***archivo PDF.***

1. Introducción
La Fiscalía Especial para Movimientos Sociales y Políticos del Pasado (**FEMOSPP**) fue creada con el propósito de cumplir con la recomendación 26/ 2001 de la Comisión Nacional de Derechos Humanos (CNDH) y otras relacionadas para investigar lo sucedido en los 532 casos de personas detenidas desaparecidas, y para dar una respuesta a la sociedad en torno a la acción del Estado respecto a los movimientos estudiantiles **1)** y a los movimientos armados que surgieron a finales de la década de 1960.
Los principales sectores de la sociedad que han mantenido viva la demanda de saber lo que pasó y la exigencia de que se castigue a los culpables han sido los directamente agraviados, los familiares de los desaparecidos –que a su vez se han convertido en las principales víctimas-, y los organismos defensores de los derechos humanos.
Al concluir esta investigación se constata que el Estado mexicano, a los más altos niveles de mando, impidió, criminalizó y combatió a diversos sectores de la población que se organizaron para exigir mayor participación democrática en las decisiones que les afectaban, y de aquellos que quisieron poner coto al autoritarismo, al patrimonialismo, a las estructuras de mediación y a la opresión. El combate que el Estado emprendió en contra de estos grupos nacionales –que se organizaron en los movimientos estudiantiles, y en la insurgencia popular- se salió del marco legal e incurrió en crímenes de lesa humanidad que culminaron en masacres, desapariciones forzadas, tortura sistemática, crímenes de guerra y genocidio –al intentar destruir a este sector de la sociedad al que consideró ideológicamente como su enemigo-.
El Informe aporta pruebas abrumadoras de tales crímenes, por lo que no se incurre en falta de objetividad si este trabajo, al presentar la sevicia que se tuvo en contra de

quienes se atrevieron a pagar el precio de lograr una sociedad más justa con su sufrimiento, su libertad y su vida,

- se une al duelo de los que murieron, de los que siguen desaparecidos, así como de sus familiares y de sus compañeros, haciendo votos para *¡que esto no vuelva a suceder!*, y si también,
- se une al canto libertario que motivó esta lucha y rinde homenaje a los héroes anónimos y a los que damos testimonio de que fueron vilipendiados por luchar para lograr una patria digna.

1) **El 30 de enero de 2002 la primera sala de la Suprema Corte de Justicia de la Nación resolvió el amparo interpuesto por los ex líderes del 68, ordenándole a la PGR la integración de la investigación de la masacre de Tlaltelolco, la cual le fue remitida a la FEMOSPP al día siguiente. Adicionalmente el 30 de abril de 2002 el Senado aprobó la Ley Federal de Transparencia y acceso a la Información Pública, que permitió la entrega de archivos de la SEGOB, SEDENA y DFS al AGN para su consulta.**

1.1. Mandato y procedimiento de trabajo

1.1.1. La Verdad y la Justicia

La sociedad mexicana tiene derecho a conocer la verdad y a que se haga justicia respecto a estos crímenes cometidos al amparo del Estado. La información de tales hechos ominosos se ha mantenido oculta, principalmente en los archivos de los órganos de seguridad del Estado –que han sido las policías políticas y el ejército mexicano-. Parte de esta información ha podido ser consultada. La documentación central y la más explícita en torno al tema no fue entregada al Archivo General de la Nación (AGN), fue negada por las instancias que la generaron o la aseguraron, no estuvo disponible para la consulta que requerimos, o fue destruida. No obstante, con la información obtenida se han podido reconstruir los hechos sucedidos y gran parte de la trama de la historia.
Los principales hechos que consideramos que deben ser esclarecidos, en respuesta a las demandas de la sociedad, es lo sucedido en torno al movimiento estudiantil de 1968 y las políticas de Estado que ocasionaron la represión del movimiento estudiantil, la suerte de los detenidos que fueron desaparecidos durante la llamada 'guerra sucia', el trato que recibieron los detenidos que fueron señalados de
apoyar la guerrilla y las políticas de contrainsurgencia que siguió el Estado mexicano llegando, incluso, a la ejecución extrajudicial de detenidos, así como los delitos de lesa humanidad que instrumentó en contra de su propia población.
La FEMOSPP tiene dos líneas de investigación en torno a estos hechos, la jurídica y la histórica. La jurídica tiene como principal objetivo la justicia; la histórica, la verdad de los hechos e interpretar lo que sucedió.
Informar a la sociedad lo que sucedió es mucho más que ofrecer un relato coherente de los hechos. Lo que pasó requiere, obviamente, de un marco interpretativo que sea acorde con el momento histórico referido y nos permita entender, en la actualidad, esos acontecimientos, y explicar por qué sucedieron. Este informe es sobre la verdad histórica en torno a estos temas.

1.1.2. Los informes

La respuesta a la sociedad respecto a la verdad histórica tendrá dos momentos que se refieren, por una parte, a la verdad global y, por otra, a la verdad individual. A la primera se le está dando en este Informe General que contiene la información más relevante en torno a las estructuras y metodologías de la represión ilegal y del contexto en el que se cometieron dichas violaciones, incluyendo además recomendaciones de política. Esta información tendrá un mayor desarrollo en los cuatro Informes Temáticos que integran la investigación.
El presente Informe se complementará con Informes Temáticos que profundizan lo contenido en este Informe General, y que son los siguientes:

1. Movimiento estudiantil y los hechos ocurridos el 2 de Octubre de 1968;
2. El 10 de Junio de 1971 y la disidencia estudiantil;
3. Los inicios de la guerrilla moderna en México
4. Insurrección popular y guerra sucia en el Estado de Guerrero;
5. Expansión de los movimientos armados en México y su aniquilamiento.

Cada uno de esos Informes Temáticos constará de

A. Un Encuadre Histórico de lo ocurrido, que presentará la historia narrativa de reconstrucción de los hechos sucedidos en cada tema de manera más amplia. Los aspectos sustantivos que la sociedad debe conocer. Lo que motivó el movimiento popular, las políticas seguidas por el Estado, la trama central de los hechos, las responsabilidades de quienes intervinieron por parte del Estado, las consecuencias de la represión en el movimiento popular.
B. Documentación que tratará sobre la verdad individual o específica de los casos concretos que busca esclarecer. Esta documentación, que le da el soporte a cada uno de los informes presentados, es la siguiente:
i. Directorio de los principales participantes y víctimas de los hechos;
ii. Elementos metodológicos y datos utilizados en la construcción de cada informe.

Este Informe General a la Sociedad presenta la parte sustantiva de lo sucedido y el contexto que permite explicar y analizar tales hechos. Son las respuestas que nos hemos dado a las preguntas que plantea el material que investigamos. Son las cuestiones que se destacan, en torno a las cuales se pueden generar procesos de crítica heurística, que nos permiten discutir temáticamente la falibilidad del juicio de esta tarea de historiar, que la propia sociedad nos ha encomendado, como problemas a los que históricamente nos enfrentamos para dar cuenta de la repetibilidad e irrepetiblidad de los procesos históricos de los que nos ocupamos. Es a partir de estos temas donde nos planteamos la fragilidad del acontecer social que ha devenido en tragedia, y también es desde donde prefiguramos las políticas que proponemos tomar en el futuro inmediato para fortalecer nuestra república en el marco de los valores que subyacen al derecho de los derechos humanos y al derecho internacional humanitario.

1.1.3. Método y líneas de investigación
Las principales fuentes de información utilizadas para esta investigación histórica fueron los testimonios y los documentos depositados en el AGN. Los primeros recogen la historia oral de la gente que fue víctima o testigo de lo sucedido en relación con estos temas, así como los datos aportados por quienes han recopilado información y tienen una opinión de lo acaecido. Las principales fuentes documentales que fueron consultadas, y de las que se obtuvo información para esta investigación, fueron los reportes elaborados en tiempo y lugar de lo sucedido por las policías políticas, así como las confesiones, declaraciones y relatos de quienes estuvieron vinculados directamente a los hechos. Adicionalmente, las fuentes documentales indirectas aportaron a la sistematización, tratamiento del tema y al análisis de los hechos que investigamos. Metodológicamente, la información contenida en entrevistas, libros y documentos que se consideró valiosa para la investigación fue recogida en fichas técnicas que se elaboraron por cada una de estas fuentes informativas. Tales fichas quedaron estructuradas en un formato de registros informativos que contenían información considerada útil para la investigación. Posteriormente, estos registros se
incorporaron a los instrumentos de sistematización y análisis, particularmente a los directorios de participantes y víctimas de los hechos, a las estructuras de mando de posibles responsables de los hechos, a los cronogramas y a las bases de datos que

contienen las estructuras de funcionamiento y los principales hechos en que participaron las organizaciones sociales que forman parte de esta investigación.
Estos datos sirven de soporte para la elaboración de los siguientes documentos:

- El Encuadre Histórico que, como historia narrativa reconstruye los hechos sucedidos en cada tema (que se presentará en mayo de 2006);
- Los Informes Temáticos que tratan principalmente la relación que se dio entre estos actores sociales y el Estado mexicano (se presentará, también en mayo) y, finalmente,
- El Informe General, que aquí nos ocupa.

1.1.4. El escrutinio de las fuentes informativas
Así como en la historia el rasgo distintivo que le puede dar coherencia a los hechos sucedidos es la intencionalidad que tuvieron, este mismo criterio debe tomarse en cuenta para establecer la confiabilidad de las fuentes documentales que manejamos. Este análisis forma parte de la crítica y de la hermenéutica a que fueron sometidas las fuentes informativas.
Es necesario tomar en cuenta que el ejército y la policía política –como organismos encubiertos de control, espionaje e inteligencia-, por su propia naturaleza no estaban para ofrecer abiertamente la información de lo que hacían y que, en la medida que incurrieron en gravísimos crímenes respecto a la gente que tenían ilegalmente bajo su custodia, intentaron encubrir tales hechos delictivos. Una de las razones por las que esta documentación se conservó es que la información allí contenida es clave para cumplir con la función de control político que tenían encomendada y que el sistema político la necesitaba para manejar la disidencia; sin embargo, se trata de una documentación elaborada para su propio consumo interno y, en caso de ser atisbada por terceros, está hecha para desinformarlos ya que, deliberadamente, falsea hechos clave.
La guerrilla, por necesidades de sobrevivencia, se hizo clandestina. La información que manejaban sus integrantes estaba compartimentalizada, muchos se conocían sólo por su ‘nombre de guerra’ y la mayor parte de ellos solo conocían parcialmente los hechos en los que participaban y no el manejo general de la organización. Conocían el daño que podían causar a su propia gente y a la causa que seguían al dar información verídica de cómo se organizaban y de las estrategias que seguían; sin embargo, la tortura a la sistemáticamente fueron sometidos para que dieran esta información, era tan cruel, tan sofisticada y especializada que, muchos terminaron dando información verídica, algunos murieron en la tortura y hubo también quienes lograron sobrevivir dando información falsa. Así pues, por ambos lados se buscaba ocultar, distorsionar o encriptar toda información que pudiera lesionar a integrantes de su organización o el trabajo que realizaban, por lo que se requirió que quienes participamos en la elaboración de estos informes aprendiéramos a manejarla distinguiendo información verídica de la falsa. De no hacerlo, arrastraríamos a quienes informamos a las falsedades a las que deliberadamente se nos buscaba inducir. Para complicar más las cosas, hay también información que está codificada o encriptada. En suma, al trabajar estos documentos, no se trata solo de sistematizar la información obtenida sino de analizarla minuciosamente, cribarla y, cuando es el caso, descodificarla.

1.1.5. La Verdad Histórica
La explicación e interpretación de los hechos sucedidos tiene que ver –entre otros factores-, con las relaciones sociales, con los proyectos políticos, con las estrategias seguidas para provocar el cambio social y con el modo de ejercer el poder.
Las relaciones sociales nos explican las contradicciones que generaron los conflictos; los proyectos políticos apuntan a la contradicción principal motivo de nuestro análisis; las estrategias seguidas para provocar el cambio social nos permiten construir la trama de lo acaecido a partir de una de las partes en conflicto y que motivó la acción del Estado.

Finalmente, el modo de ejercer el poder determina la presunta responsabilidad del Estado en crímenes de diverso grado y calibre –llegando a los de lesa humanidad-, y que son el objeto central del trabajo que se presenta en las dos líneas de investigación –la histórica y la jurídica-, que realiza esta Fiscalía. Los informes que se presentan seguirán esta trama de análisis que se derivará estrictamente de los hechos consignados.
Todo acontecimiento social forma parte de un proceso histórico en una concatenación que nos remite, por una parte a hechos que forman parte de la estructura histórica del tema que nos ocupa y a otros que, por lugar y tiempo, quedan fuera del foco de nuestro análisis. Por tratarse de 'movimientos sociales y políticos', en esta historia intervienen como actores sociales miles de gentes cuya participación queda, en la mayor parte de los casos, en el anonimato y, hasta donde se pudo reconstruir y se juzgó prudente, en un directorio personalizado que presenta algunos hechos o datos relevantes de estas personas. De manera más estructurada se presenta la intervención orgánica de diversos grupos sociales. Estas organizaciones tuvieron diverso grado de consolidación orgánica –en sus objetivos, políticas, estructura, membresía, relevancia de sus acciones-, cuyo seguimiento heterogéneo de acciones nos permitirá dibujar la trama de lo sucedido. Los hechos consignados respecto a grupos y personas –que con un proyecto alternativo de nación entraron en conflicto con el Estado-, no tienen la pretensión de ser exhaustivos, pero sí comprensivos del fenómeno social que se analiza.
Por el enorme caudal de información que existe en el AGN, hubo necesidad de establecer criterios para la búsqueda de la documentación que fuera más relevante. Hubo, sin embargo acervos enteros –como el de Presidentes-, que quedó prácticamente sin revisión y, otros acervos a los que sólo parcialmente se pudieron consultar. De la información revisada, que es también sumamente extensa, se obtuvieron registros de lo que pareció más importante. Como resultado de selecciones sucesivas de información, la que se brinda a la sociedad debe entenderse como parte de un universo constituido no sólo por materia, sino también por silencios que, por la vastedad de su contenido, se aboca a lo que se consideró esencial. Tanto la información presentada como los silencios contenidos tienen la intencionalidad de presentar con verdad lo acaecido, los hechos, circunstancias y situaciones que se encontraron.
Tratar de la verdad en este informe es rendir cuentas, con honestidad, de lo encontrado, del método seguido para buscar y para cernir la información, de las opciones tomadas para acercarnos al objeto de investigación desde una óptica que parte de los valores que subyacen a los derechos humanos y desde una convicción y ardiente pasión por la justicia. Hoy día es posible retomar esos temas denunciados para buscar la justicia y la verdad, y tratar de enmendar –así sea tardíamente-, algunos agravios cometidos contra cientos de víctimas, en un contexto mundial que ha desarrollado instrumentos y mecanismos que posibilitan el castigo por las graves violaciones al derecho internacional humanitario y a los instrumentos del derecho nacional e internacional en materia de derechos humanos.

1.1.6. El carácter de esta investigación, en el marco de los Derechos Humanos

Debe quedar claramente establecido que esta investigación no tiene el carácter persecutorio respecto a los hechos presuntamente delictivos en que pudieron incurrir las personas y los grupos que aquí se analizan como opositores al Estado. Para ello, las autoridades que tuvieron a su cargo la persecución de los delitos, en el tiempo en que estos se cometieron, tuvieron la oportunidad de hacerlo. Esta Fiscalía no se creó para subsanar, de manera supletoria, la investigación de aquellos delitos cometidos por opositores al régimen, sino para investigar la presunta responsabilidad del Estado al perseguir tales delitos fuera del marco legal establecido, incurriendo en gravísimos crímenes que han quedado acreditados. Así pues, aunque la rebelión se considere un derecho y la política de desestabilización que estos grupos siguieron –como fueron los

secuestros, asaltos bancarios y asesinatos cometidos-, hayan sido graves delitos que debieron ser castigados conforme a derecho, esta verdad jurídica no es la que corresponde sustentar a esta Fiscalía y la referencia a estos hechos como verdad histórica forma parte sustantiva de estos informes porque de otra forma no se entendería la trama de lo sucedido, ni se podría interpretar la acción del Estado.

1.2. El Informe

Este Informe consta de dos partes y tiene un capítulo final de conclusiones y recomendaciones. La primera parte consta de seis capítulos que se abocan a la parte interpretativa de los movimientos sociales del informe. La segunda parte consta también de otros seis capítulos que presentan un análisis de los principales crímenes cometidos, de los mecanismos que el Estado utilizó para desvirtuar la legitimidad del poder y de la intervención de la sociedad civil en relación con la verdad y la justicia que se espera de la acción del Estado.

1.2.1. Los movimientos sociales y políticos

Las tesis centrales que resumen el estado de la cuestión en los temas que conciernen el trabajo de investigación histórica se presentan, en cada uno de los cuatro temas enunciados, en el inciso inicial denominado encuadre interpretativo. A continuación se presenta un desarrollo inicial de las contradicciones que se analizan. Se inicia por presentar el motivo de la lucha por parte de las organizaciones populares, estudiantiles y guerrilleras en tres momentos subsecuentes, cuando se preparan las condiciones, cuando emerge la contradicción y cuando ésta se resuelve en cada uno de los cuatro casos. A continuación se presenta la acción del Estado en cada fase del desarrollo de los movimientos sociales que se analizan.

Encuadre general

La Segunda Guerra Mundial y la Guerra Fría que la sucede, marcan las nuevas condiciones que definen el alineamiento de México al bloque capitalista que es dominado por Estados Unidos. A nivel mundial hay un cambio de paradigma político. Muchos pueblos que sufren dominación por colonización interna o externa se rebelan. El sistema de colonias llega a su fin. Surge el nuevo imaginario de asaltar el poder para modificar las relaciones sociales. Advienen las guerras de liberación nacional. En México, el control del capital y del mercado ocupa un lugar más determinante en la conformación de las relaciones sociales que la posesión de la tierra. El Estado se convierte en guardián y promotor de la inversión privada. La '*estructura de mediación'* resulta más eficaz como mecanismo de control social que la *'estructura de cacicazgo'*. El ejército se mantiene como el fiel de la balanza con cuyo peso se decide quien tiene la fuerza política hegemónica con el poder de dirimir los conflictos que se suscitan.

Los orígenes comunes que tienen los movimientos sociales y políticos que se analizan

(a) En México, el movimiento social es mediatizado y corporativizado por el Estado. Los sectores campesino, obrero y popular son organizados como *'estructuras de mediación'*. La defensa legítima de los intereses de los trabajadores se penaliza en un ordenamiento legal que la criminaliza. Las organizaciones sociales que el Estado no logra mediatizar son tratadas como subversivas; sus líderes son encarcelados acusados de este nuevo delito o son eliminados selectivamente. La represión de que fueron objeto los sectores combativos, la huella de impotencia que estas organizaciones dejaron en sus agremiados por no defender sus intereses –ya sea porque fueron corrompidas o porque fueron reprimidas-, el descrédito de las organizaciones sociales que eliminaron a sus dirigentes más honestos y, los sindicatos del sector público y gubernamental que terminaron por corromper las propias organizaciones educativas o productivas o de servicios dieron como resultado un escenario de desencanto y desmovilización con un

poder de organización independiente prácticamente nulo.
(b) El Estado abandona las políticas nacionalistas, las de proyecto alternativo – como la concepción socialista en la educación, la autonomía alimentaria y la tecnológica-, así como la incorporación de los sectores más desfavorecidos a la educación y a los medios de producción; y las reemplaza por un alineamiento político y una mayor dependencia económica. Para asegurar la docilidad de los sectores populares, afianza las estructuras de mediación –con el '*charrismo*' y el corporativismo-, e introduce modificaciones legales que le permitan mantener la estabilidad para la inversión privada criminalizando a los luchadores sociales que pasen del umbral de la gestión al de la resistencia pacífica.

La confrontación de dos proyectos políticos de sociedad
(a) El movimiento estudiantil de 1968 marca una inflexión en los tiempos políticos. La lucha popular de resistencia –con la tradición del IPN-, se potencia con las demandas libertarias y de democratización que dominaban el imaginario mundial –que animaron la participación de la UNAM y de la intelectualidad moderna-. El pliego petitorio que aglutinó la movilización popular contenía ambas demandas. Por otra parte, el imaginario social que ciertos maestros rurales promovieron –de transformar la sociedad modificando las relaciones sociales en condiciones más justas-, ofrecía un potencial explosivo al entrar en contacto con campesinos que sufrían los efectos más despiadados de los mecanismos de explotación, al cobrar conciencia de su situación y de la viabilidad del proyecto político con su participación. Estos componentes, con el ingrediente de una experiencia de resistencia frente a la represión violenta del Estado, desencadenaron procesos políticos que, en muchos lugares del país, emergieron como movimientos armados con una estrategia de guerrilla moderna.
(b) El Estado maneja el movimiento estudiantil de 1968, aplicando sus mecanismos de control y disuasión que solía utilizar frente a la disidencia social. Este movimiento tomó una fuerza inesperada y se organizó como fuerza independiente con la legitimidad de plantearse como interlocutor. Ante la perspectiva del régimen de que se trataba de un movimiento independiente, contestatario y que recurría a la resistencia civil, lo caracterizó como subversivo y, en lugar de encontrar formas de atender las legítimas demandas, optó por reprimirlo y aniquilar su dirigencia y al sector que consideró más combativo. La configuración de la hegemonía que el grupo político tenía, ligó los intereses del régimen con los de los caciques y grupos empresariales contra los que se organizaban los sectores populares y no dudó en reprimir –utilizando al ejército como fuerza de ocupación interna-, en lugar de atender las legítimas demandas de justicia. Esta relación estructural devino en confrontación armada cuando estalló la rebelión. El escalamiento del uso de la fuerza para resolver los conflictos sociales y la responsabilidad del Estado en crímenes de lesa humanidad
(a) Los movimientos sociales agotaron la vía de la gestión y de las vías institucionales y cívicas antes de pasar a las formas de resistencia pacífica. La gestión no dio los resultados que estos movimientos requerían, la participación cívica trajo consigo el fraude cuando se trató de participación electoral, así como la manipulación de sus organizaciones, convirtiéndolas en estructuras de mediación, cuando se trataba de organizaciones productivas o gremiales. Las formas de resistencia pacífica fueron consideradas como actos subversivos a los que el Estado trató con violencia. Cuando los sectores más radicalizados optaron por la violencia como respuesta a la represión, que porque llegaron a la conclusión de que habían agotado las vías pacíficas para lograr sus propósitos. La guerrilla moderna surgió con el planteamiento de acumular fuerza, tomar el poder y modificar las relaciones sociales en una visión utópica de sociedad más justa. Al tomar las armas, las otras formas de lucha pacífica son abandonadas porque se consideraron ineficaces. La táctica de la guerrilla, desde el momento en que se plantea el uso de las armas, y por los actos que realiza, de desestabilización y confrontación, implica caer en la ilegalidad y cometer delitos de diversa índole y gravedad. Quien

incurre en esos actos es consciente de que está sujeto a las leyes de guerra y a las leyes civiles y penales cuando es detenido. Sin embargo, cuando el Estado transgrede la ley y se convierte en criminal, las leyes a que está sujeto quien es aprehendido pueden ser atroces y requieren de una moral excesivamente alta para continuar en la lucha y no incurrir ellos mismos a las prácticas de las que son víctimas.

(b) El Estado mexicano fue cerrando los caminos de solución a las demandas, problemas y conflictos que debía resolver por la vía administrativa de la gestión, de la administración pública y de la procuración y administración de la justicia. Al no hacerlo, provocó que se utilizaran vías de resistencia pacífica para presionarlo al cumplimiento del servicio público. Cuando criminalizó esta forma de actuar y escaló la violencia a los encarcelamientos masivos, a las masacres y a la utilización de la fuerza pública –incluido el ejército-, como mecanismos de dominación y represión de su propia población cierra los caminos de solución pacífica a los mismos. Frente a la rebelión, el Estado debe ceñirse al cumplimiento de la legislación nacional e internacional en materia de derecho humanitario, estado de excepción y derechos humanos. Cuando el Estado rebasa los límites de la legalidad y confronta al delito con el crimen y, haciendo recurso del monopolio que tiene al uso de la fuerza la utiliza en contra de su propia población, la escala y la lleva al nivel del genocidio, el Estado queda sujeto a las responsabilidades de su acción criminal en delitos, violación a los derechos humanos y crímenes de lesa humanidad. Esta actuación criminal del Estado es la que se documenta.

1.2.2. Plan de la obra

El informe se integra con dos encuadres, uno interpretativo-histórico y otro analítico. En el primero se analizan las contradicciones existentes entre los actores sociales y el Estado mexicano, dentro del movimiento popular estudiantil de 1968 y 1971, los inicios de la guerrilla moderna en México, la guerra sucia en el estado de Guerrero y la expansión de los movimientos armados.

Movimiento estudiantil de 1968

El movimiento estudiantil de 1968 tiene tres apartados. En el primero, se analizan los cambios en política social y educativa que afectan a sectores populares combativos de la sociedad, los mecanismos que utiliza el Estado para ejercer su control sobre los diversos movimientos estudiantiles existentes, así como los tiempos políticos y las condiciones que generan el movimiento estudiantil. En el segundo, se analiza la consolidación y auge del movimiento estudiantil, dentro del cual se desarrolla su emergencia como movimiento social, su consolidación, su fuerza, hasta lo acontecido el 2 de octubre en la Plaza de las Tres Culturas, en Tlaltelolco. En el último, se analiza la forma en que es desarticulado el movimiento estudiantil y sus derrotas tácticas y estratégicas

El 10 de junio de 1971 y la disidencia estudiantil

El 10 de junio de 1971 y la disidencia estudiantil igualmente es analizada en tres fases. En la primera, se analiza el resurgimiento del movimiento estudiantil a partir de la disolución del CNH y la creación del CoCo. En la segunda, se pone de relieve la intolerancia del Estado a la disidencia estudiantil, la decisión del Estado de crear y capacitar un grupo paramilitar, los Halcones, para el control de la disidencia social, y para contener las expresiones populares públicas, cerrando los caminos pacíficos a la disidencia. En la última, se interpreta la forma en que se soluciona la contradicción existente entre el movimiento estudiantil y el Estado mexicano, expresado en el uso de la violencia el 10 de junio, el debilitamiento del movimiento estudiantil como forma de expresión de la oposición, el recrudecimiento de la guerra sucia y el paso a la lucha guerrillera.

Inicios de la guerrilla moderna en México
En los inicios de la guerrilla moderna en México se analizan los factores que explican el surgimiento del movimiento armado en México, el papel del movimiento espartaquista y de la Conferencia de la OLAS, las luchas reivindicativas y la política represiva del Estado, posteriormente, la decisión de tomar las armas del Grupo Popular Guerrillero en 1964 y, finalmente, el surgimiento y disolución del Movimiento 23 de Septiembre.

La guerra sucia en Guerrero
El capítulo de la guerra sucia en Guerrero analizan, primero, los factores que explican el surgimiento armado, entre ellos, la organización popular frente al poder de los caciques, la lucha cívica frente a la tiranía del general Caballero Aburto, la organización reivindicativa y la represión. Segundo, el conflicto armado en Guerrero, el agotamiento de las vías pacíficas, la implantación de la guerrilla y los planes de contrainsurgencia desplegados en su contra. Tercero, se analiza la forma en que se resuelve el conflicto armado, los mecanismos utilizados para derrotar y aniquilar las fuerzas guerrilleras y opositoras, la ruptura del tejido social y la resistencia de la sociedad civil, así como la vigencia de las demandas populares y el ejército como instrumento de ocupación interna.

Expansión de los movimientos armados
El último capítulo del encuadre interpretativo-histórico se dedica a la expansión de los movimientos armados. Primero, se explican los movimientos universitarios, la Juventud Comunista de México y los movimientos reivindicativos de los que se originan diversos grupos armados. En seguida se interpreta la estrategia asumida para implantar la guerrilla, la unidad del movimiento guerrillero y la contrainsurgencia desplegada para contener dicha expresión. En tercero, se analizan los mecanismos contrainsurgentes empleados para combatir y aniquilar a la Liga Comunista 23 de Septiembre y demás organizaciones armadas, su derrota militar y política, el aniquilamiento de sus integrantes, los logros políticos del movimiento y la destrucción de evidencias que incriminan a funcionarios públicos en crímenes de Estado.

Crímenes de lesa humanidad
El encuadre analítico contiene seis apartados. El primero presenta los crímenes de lesa humanidad cometidos durante la guerra sucia, donde se analizan la violación de derechos humanos por funcionarios públicos al desarrollar la lucha contraguerrillera urbana y rural. Los delitos de genocidio, de desapariciones forzadas, las masacres, las ejecuciones extrajudiciales, la tortura sistemática, la violación sistemática a garantías individuales y procesales y, finalmente, la violación de los derechos fundamentales a los sectores más vulnerables de la sociedad.

Crímenes de guerra
El segundo es dedicado a los crímenes de guerra. Este capítulo aplica, exclusivamente a un periodo de la 'Guerra Sucia' en Guerrero, a partir de la cual la guerrilla logró el control de guerra de movimientos en la región y el ejército adoptó la guerra de contrainsurgencia, hasta el aniquilamiento de los guerrilleros y de su principal base de apoyo. En este capítulo se documenta la participación de las fuerzas armadas en detenciones arbitrarias; desapariciones forzadas; tortura y tratos crueles; atentados contra la dignidad personal, violación y atentados al pudor; homicidios, toma de rehenes; pillaje, amenazas de cometer crímenes de guerra; campos de concentración en el cuartel de Atoyac, Base Aérea Número Siete y Campo Militar Número Uno, Actos de terrorismo como estado de sitio a las comunidades, hambre como método de guerra en contra de civiles, ruptura del tejido social; extrema sevicia; masacres, ataques

indiscriminados como bombardeos aéreos; y la perversión de la justicia militar.

Criminalización de la víctima por parte del gobierno
El tercero es dedicado al análisis de la criminalización de la víctima por parte del gobierno, en particular los casos de los presos políticos, perseguidos políticos, exiliados políticos y eventos en que los participantes fueron atacados por fuerzas de seguridad e inculpados por ello.

Mecanismos que el estado utilizó para deslegitimar su poder
El cuarto analiza los mecanismos que el Estado utilizó para corromper el poder.
El papel del plan DN-II del ejército; la adopción de la doctrina de seguridad nacional y estrategia de contrainsurgencia por el ejército; la militarización de la policía, su utilización en la contrainsurgencia. Impunidad; grupos paramilitares; caciquismo; patrimonialismo; estructuras de mediación; disociación entre Justicia y legalidad; cooperación internacional para implantar el terrorismo institucional.

Derecho a la verdad, al duelo y al reconocimiento del honor de los caídos en la lucha por la justicia
En el quinto, se analiza el derecho a la verdad, al duelo y al reconocimiento del honor de los caídos en la lucha por la justicia; el derecho de los familiares de conocer la suerte actual o final del desaparecido y, en su caso, de que se le reintegren sus restos; el derecho de la sociedad a conocer lo que sucedió; el derecho a la reparación del honor; el derecho a la reparación del daño

Luchadores sociales y organismos de demandan verdad y justicia
En el sexto se analiza la actividad desplegada por los luchadores sociales y organismos que demandan verdad y justicia; la tarea realizada por los familiares, los organismos de derechos humanos, los organismos públicos de derechos humanos y la Comisión de Trabajo para el Esclarecimiento de la Verdad Histórica, de la FEMOSPP.

Conclusiones y recomendaciones
En el último, se proponen Conclusiones y recomendaciones.

Es espeluznante y desde el fondo de mi alma quisiera que la aseveración con la que inicias este post se cumpliera, pero, ajuzgar por los acontecimientos, no es así: está sucediendo ya.
Bravo, Gatopardo. Esto tiene que salir a la luz, ser divulgado; y tenemos que empaparnos de ello para que nadie -mediático o no- pueda nunca cerrarnos los ojos ante esta realidad ni atrofiarnos las neuronas con el estado de bienestar -y malmorir en secreto-. Cerrar los ojos a esto, pase dónde quiera que pase es hacerse complice.
Un entrañable abrazo.

Hannah, no es una aseveración mía, sino el título que le dieron los que redactaron el informe.
Don José, ya sabe que suelo estar mal informada, por lo que le ruego cuando lo presentó oficialmente el entonces Presidente Foox, que prometió hacerlo público el 15 de abril de 2006, y no acabo de encontrar mención alguna en las Actas.
Gracias anticipadas.

La versión oficial, es que no se ha hecho "público" por completo, debido a que podría afectar el curso legal de los que estarán perseguidos.

La primer versión de la publicación se encuentra en la página de la PGR en el apartado de la FEMOSPP (www.pgr.gob.mx)

Otra liga:
http://mx.news.yahoo.com/s/17112006/7/mexico-recibe-pgr-informe-hist-rico-femospp.html

En lo que sí estoy de acuerdo, es que los resultados de la FEMOSPP fueron pobres, y mal logrados. Saludos!

Qué bueno, don José, que tengamos su explicación de por qué se tijereteó un poquito el informe, "debido a que podría afectar el curso legal de los que estarán perseguidos", porque yo andaba desinformada con lo que dijo el entonces presidente Fox, que aseguró a la BBC que "el caso de la Guerra Sucia del pasado está cerrado y que no habrá más investigaciones porque la Suprema Corte de Justicia ya liberó a los acusados de toda responsabilidad."
Respecto a la página web de la PGR, donde se reproduce "parte" del informe, reto a los lectores que lo busquen, lo encuentren, lo pasen a word, como hice yo, y en herramientas, le den a combinar y comparar con el informe que salvó y subió a Internet el National Security Archive para comprender qué le ha interesado al Gobierno preservar.
Efectivamente, en el enlace yahoo news, dice que la PGR ha recibido el informe, y supongo que es todo lo que se pensaba informar a los mexicanos.
Sí que es pobre el resultado si esperábamos la instrucción sumarial que los jueces mexicanos han tenido a bien no hacer, o una investigación policial que la Policía mexicana ha tenido a bien entorpecer.
Saludos cordiales

POR SI A ALGUIEN SE LE HA PASADO POR LAS MIENTES FELICITARME LA NAVIDAD

Nunca he podido superar la grima que me provoca el énfasis, las emociones extremadas, las manifestaciones de alegría delirante, de dolor gemebundo, la falta de contención y de estoicismo, y -cómo no- el repelús por las navidades.
No sé a quién se le ocurrió estipular unas fiestas en diciembre para revolcarnos en la cursilada, la estética "pompier", y las sonrisas, ay, abrochadas a la boca con tan poca gracia y tan poca alegría como las que me lanzaría una dentadura postiza sumergida en el vaso. Y no es eso todo: vaya donde vaya, habrá villancicos, lucecitas y adornos a cual

más hortera, más cursi, más delirántemente feo. Habrá gente que compra como si esperaran un asedio, que se recreará en los preparativos en los que, año tras año, fingen olvidar que existen los parientes inoportunos, las susceptibilidades, la obtusa percepción de lo que es adecuado y conveniente regalar, el límite para comer, beber, cantar, decir chistes viejos y frases insustanciales, y fingen que celebran la Navidad con la familia.
Y sin puñetero discernimiento, me felicitan la Navidad, incluso me invitan a celebrarla con ellos quienes saben a ciencia cierta que no soy cristiana, que soy enemiga de aguantar a la familia, sea propia o ajena, y, aunque sepan que, para colmo, les suelo rociar, en consecuencia, con una de mis demostraciones de ingenio lapidario. Sólo hay una razón para que insistan: es el espíritu navideño: esa empalagosa melosidad adobada con sacarina hipócrita, que la mayoría confunde con la amabilidad.
Por todo lo que antecede, les ruego que no me toquen los ovarios con felicitaciones hasta el mes de febrero, que sí que lo celebro. Pero no le doy la lata a nadie.
Gracias anticipadas.

Reciba mi más sincera y cordial felicitación por estas fechas tan entrañables, de encuentro familiar y recuerdo de los seres queridos, mi carísima amiga.
Es tiempo de concordia y regocijo, de felices coros navideños por las calles y de alegría entre los literatos, como siempre.
Hemos de celbrarlo con anís y polvorones ¿qué le parece si organizamos un encuentro navideño para poder deleitarnos con la sensible lectura de poemas florales y aguilanderos de producción propia para mayor gloria de nuestra virgunal Señora y nuestra tierra?
La emoción me embarga, casi tanto como a usted.

¡Que Dios la bendiga, felices pascuas, que viva Frank Capra!

Querida abuela,

Vengo con un poco de prisa. No me ha dado tiempo a leer tu (seguro que) interesante post, pero aún así, no quiero desperdiciar esta oportunidad para desearte una muy feliz Navidad y un próspero Año nuevo. No te excedas con los mantecados y espero que con los tuyos vivais en compañía el espíritu de estas fiestas.

En la puerta de mi casa
voy a poner un petardo,
"pa" reírme del que venga,
a pedir el aguinaldo.

Pues si voy a dar a todo,
el que pide en noche buena,
yo si que voy a tener,
que pedir de puerta en puerta.

Arre borriquito, arre burro arre,
anda más deprisa que llegamos tarde.
Arre borriquito vamos a Belén,
que mañana es fiesta
y al otro también.

¡Ánimo gatopardo! Hay que gastar mucho para que la economía no languidezca.

Querida Yaya,

Y yo que me había abierto un hueco en mi apretadísima agenda para desde un ordenador de verdad saludarte felicitándote estas fiestas... y yo sin acordarme de la apatía que te causan a ti estas fechas y todo lo que conllevan. ¡Cascarrabias!

Pero tengo que diferir contigo, a mi me encanta la Navidad. Es la única época del año, en la que me gusta ir al centro de mi ciudad y ver las calles llenas de gente andando de un sitio para otro, el olor a castañas asadas en cada esquina, la decoración navideña, la 5º planta del Corteinglés del Duque que es donde ponen todos los juguetes y llevarme allí el tiempo que haga falta toqueteándolo y probándolo todo. ¿Y qué me dices de las caras de los niños?
Y que conste, que aún añoro el famoso CortiLandia, de hecho cada vez que voy a Madrid en estas fechas, voy a verlo; lo que pasa que cada año va menos gente y está más cutre.
Aún recuerdo cuando lo ponían en Nervión y el Duque, y me llevaba mi madre.

No sé, aunque la felicidad que aparentemente irradia la mayoría de la gente sea fingida o adquirida por las fechas, a mi me gusta; no lo puedo evitar, me hace sentir más en casa aún.

Al menos aquí, la gente cuando sale sobre las 8 de la tarde al centro, parece que se olvidan durante unas horas de sus responsabilidades, problemas y demás amargaeras diarias. Me gusta ver la sensación de tranquilidad en la cara de aquellos y aquellas con los que me cruzo; y eso solo ocurre en esta época, auque sea fingido... a mi me vale; el resto del año, todo son prisas generalmente y eso que aquí solemos ser más tranquilos que en otras ciudades.

Saludos a tod@s. Y gracias por acordarte de mi, yaya, yo no he dejado de hacerlo ni un solo post ;) Caerá un mail en breve y te pondré al tanto de todo, todo y todo. Besos

MA Aguilar: mi querido director y editor, e incluso amigo, reciba a la recíproca un apretón escrotal con gran algazara en los dídimos.
Puagh, cariño, no vayas con esas prisas que lo mismo te llevas inadvertidamente la cartera de algún parroquiano.

Sí, ya les mandé la carta a los reyes para que se vayan al exilio y dejen paso a la República.
Dinosaurio, tuve la suerte de nacer de una col en asuntos familiares que requieran un mínimo de concesiones, como la Navidad, así es que no he tenido que pasar esos trámites de belencitos y demás; pero sólo de verlos en las tiendas y en las calles, me empalago. Que te sea leve, compinche.

¡Joder! ¡A mí me sucede lo mismo! Esta época me parece ma-ra-vi-llo-sa. Es una delicia, compartir lo bonito del año, con todos los seres queridos, familiares cercanos o no, en esta época. La navidad, me dijeron por ahí, enriquece el espíritu, pues es el día en que debemos recordar somos hombres, existe un Dios, y nos eligio para el perdón de nuestros pecados... Asi que ¡felicidades! Recibe un legionario abrazo, Jajajaajajajaja!

Me ha encantado el dibujo de Cupido y tu texto cargado de buenas intenciones y amor hacia el prójimo.

En estas fechas navideñas es fácil encontrar quien sonríe y felicita por compromiso, pero no lo es tanto dar con alguien pleno de sinceridad, que te desea lo mejor para estas fechas y te aconseja cómo disfrutarlas con armonía.

Es maravilloso también y mi corazón salta de alegría al ver cómo la gente te felicita, demostrándote su cariño. Luego, tú les contestas con expresiones ásperas pero con dedicación y buenas intenciones, advirtiéndose en tí un cálido espíritu navideño.

Te deseo con toda mi alma que esta navidad sea muy especial para tí.

Yo creo que las navidades son un pretexto más de los muchos que tengo para pasarmela de fiesta en fiesta.
No se me amargue, ni ahora ni nunca y si la felicitan (Aqui en México la felicitación va ligada a un abrazo) usted dejese querer.
Por mi parte sólo lemando una abrazo muy sabrosón (No incluye felicitaciones para no provocar su ira) y tambien un beso, bueno en europa siempre se dan dos, son menos tacaños que por aca, o dos, que se por estos lasdos del oceano se le quiere mucho con navidad o sin ella.

Para mí son totalmente indiferentes estas fiestas. Tampoco me considero cristiano ni de ninguna otra religión.
Pero tengo muchos amigos que siguen la tradición, aunque en realidad para la mayoría ya tenga muy poco de religión y se quede en una ocasión de atracarse a comer y hacer otros extraordinarios.
Como me felicitan de buena fe, pues yo a ellos, en bloque a todos al no poder discriminar si hay alguno como tu.
Como verás en la tarjeta que te he enviado tampoco hay en ella nada que haga alusión a la religión, sólo algo bonito (o he tratado de que lo sea) compuesto por mí mismo.
Retiro, para ti, lo de felicitaciones y lo sustituyo por un cordial saludo.

Don José: creo que si fuera un abrazo "legionario" iría acompañado de corbata siciliana, y no me queda bien con mi fondo de armario.
Trini: justamente la provocación está del otro lado, dando la barrila con la Navidad, con la Semana Santa, y con esos atropellos antiestéticos, que imponen.
Felipe: hasta el momento no nos hemos unido los que nos irrita y empalaga la absoluta idiotez de los celebrantes; que se preparen como sigan tocándonos las narices, que somos mayoría.
Monocamy: ni con juegos de palabras trago.
Antonio, Espartako: supongo que es algo difícil para quien sigue la senda de la costumbre y los sentimientos pret à porter comprender que hay quien no los tiene.
Fabrizio: no me amargo, sólo me irrita y desprecio las muestras de amabilidad ficticia, cosa que no es nuestro caso.
Wolffo y Lee Tamargo: la capacidad de comprender lo que expreso meridianamente claro es obvia, por lo que no es preciso que os lo explique otra vez: pudiera ser que sobrepasara vuestra comprensión lectora.
Esbrújulo: Querido Esbrújulo: justamente, como es un envío impersonal, que no tiene

en cuenta a quien va dirigido, sino que es motivo para mostrar tus sentimientos estándar de lo que se supone que es "algo bonito", y como estéticamente está muy alejado de mi percepción de la belleza, me permito no tenértelo que agradecer.
Al margen de que hayas ignorado olímpicamente cómo pienso y lo que creo, cosa imprescindible en las relaciones humanas, te deseo lo mejor.
Natalia: Créeme que mi serenidad y mi afecto no dependen de las más de quinientas felicitaciones de navidad que he recibido a pesar de haber dejado claro lo que pienso de las celebraciones religiosas a lo largo de setenta años. Lo cual es algo irritante.
Y si reflexionas, verás que hay motivo para que te preguntes cuál es el fundamento de esa irrefrenable necesidad de ser amables a plazo fijo, y no para darme consejos adivinando amarguras donde sólo hay capacidad de pensar y sentir con independencia.
Un abrazo a todos

ELEGÍA AL PINTOR BENJAMÍN PALENCIA

Para César Mallorquí , que nos ha pedido perentoriamente a sus lectores que escribamos para él, para corresponder al trabajo que se toma en desasnarnos .

E. suele hacerme encargos extraños, pero normalmente se limita a pedirme que lo llame a una hora, haciéndome pasar por la secretaria de un jefazo que exige su presencia urgente. Me imagino que así sus novias no se enfadan cuando sale corriendo después de haberles prometido un fin de semana en barco o en Baqueira. Esta vez fue algo todavía más absurdo:
-*Necesito que que vayas a un homenaje a Benjamín Palencia.*
-*¿Y se puede saber qué pleito tengo que definir, ni qué vieja sacar de pila allí?*
-*Es que me han pagado las dietas para que vaya y haga la crónica. Pero ya que estás allí, házmela tú. Ya sabes: ditirámbica. Y te debo una.*
Y ése es el motivo por el que, provista de cierta seriedad impostada, acudí a una casa viejísima en el centro, traspasé el portal oscuro, a tientas, a pique de matarme, subí por una escalera llena de desconchados, con los techos inalcanzables, desde los que cae la luz cenital de unas bombillas de 15 W, tapizadas de cagadas de moscas. Después del entresuelo, en el primer piso, *La Casa de la Mancha*: sillas de skay, plegables, ocupadas por unas cuantas personas de edad provecta, con gafas de todos los modelos y todas las graduaciones.
Cuando llego, está hablando con un tono enfervorizado, Tita, una mujer vestida de india de Holliwood, en ante y flecos, con cara de fuina e inmensas gafas. Traza el eje Picasso-Dalí-Benjamín Palencia, convencida de que sólo una mala uva internacional ha colocado en el último lugar a su paisano. Y aclara que ella jamás ha esperado a su muerte para colocarlo en el primer puesto. Lo dice con el mismo énfasis belicoso que un buen día comentó el *"Informe Hite sobre la sexualidad"* diciendo que ella iba al escusado, pero que no por eso se le ocurriría escribir un libro sobre esas desagradables ocupaciones, y que la señorita Hite, en honor a su sexo, debería buscar otras fuentes de inspiración.
Después, esta muerte y este entierro son glosados con voz estentórea por Isabel, una mujer vestida con un traje de chaqueta, modelo y color de azafata de Iberia de la primera hornada, con el aditamento de cuarenta kilos sobre la media nacional. Su opulentísima pechera no desvanece mis sospechas de que se trata de un hombre disfrazado. Habla con ademán enérgico, voz enronquecida por la emoción -o la cazalla- y afirma que el exilio fue un truco para promocionar la pintura de los que, desde destierros dorados, vituperaron a España.
Benjamín Palencia se quedó porque era un patriota, amaba a España y nunca quiso dar pábulo a los extranjeros para denigrarla. Regala al auditorio con una descripción del entierro en Madrid, que fue como un entierro de pueblo, de Barrax para ser más exacta, donde la gente se para en las esquinas, se suma al cortejo al saber quien es el muerto y

la circulación se interrumpe en signo de respeto, con una emoción popular apoteósica que ya quisieran muchos… ¡Madrid lloró!
El siguiente orador parece no haberla oído y dice que el entierro fue desolador, que fue uno de esos entierros de Madrid en que se pierde el cortejo, se pierde el muerto, y en el cementerio entierran los cadáveres de tres en tres. Luego, habla del gran instinto paternal de Benjamín, y de la pena que debió de ser para él no tener hijos propios, viendo el cariño y el interés que siempre testimonió a sus hijos. Algunos intercambiamos miradas de entendidos; otros, incómodos, petrifican el gesto. El orador continúa, más inocente que el asa de un cubo, contando, en plan papá en la inopia, deliciosos detalles entrañables de Benjamín hacia los hijos adolescentes que, ingratos, como todos los jóvenes, no parecían valorar el privilegio de su afabilidad.
A continuación habla un individuo que hace pausas dramáticas en cualquier punto del discurso, sin importarle qué parte de la oración sea; lo mismo le da el pasmo en una partícula adverbial que en un pronombre, y entonces fija la mirada, avanza la mandíbula, palmea en el aire, Todos han mencionado de manera elíptica, con eufemismos de cuerpo presente, la petulancia de Benjamín Palencia: él se tira sin red, y habla de su arcangélica humildad, y no como otros, diabólicamente orgullosos. Pues bien, Benjamín Palencia tenía muy presente cual era su valor y actuaba en consecuencia, sabiendo que era un hombre egregio, por eso, con una naturalidad encantadora, nunca iba a los toros sin entrar por la puerta de autoridades y en cualquier lugar reclamaba su puesto de privilegio, pero no porque despreciara al pueblo llano. Decía que Dios lo había escogido entre tantos y con su comportamiento era a Dios a quien glorificaba, dándole todo el honor de su pintura y de su paleta, y si no quiso jamás pasar por un don Nadie fue para que no se dejara de rendir ese tributo al Altísimo. Le ha faltado decir: *«...el que conquistó toda España, el más leal, é el más verdadero, é el más franco, é el más esforzado, é el más apuesto, é el más granado, é el más sofrido, é el más omildoso, é el que más temie a Dios, é el que más le facía servicio, é el que quebrantó é destruyó á todos sus enemigos, é el que alzó y ondró á todos sus amigos...»*
Al ponente le gustaría que quedáramos convencidos de la franciscana humildad de Palencia y no de su archidemostrada petulancia. Y quedará frustrado, como si lo viera.
A mí Benjamín Palencia no me gustaba como pintor, ni como dibujante, ni como teórico del Arte, y como persona sólo desataba la hilaridad que me provocan los fatuos y lo infatuado.
Escribí una crónica según los cánones. E. me comentó:
-Cuando la lean, van a llorar de emoción todos los amigos de Benjamín Palencia.
Es una pena que no los tuviera, porque me quedó más cursi que un guante, y emotiva hasta la náusea: una elegía insuperable.

La prueba del nueve en pintura es cuando, en las reproducciones, el cuadro mejora. Y Benjamín Palencia es de esos. He visto cientos de cuadros con paisajes de pintores de batalla, de los que los fabrican a destajo, que tenían más gracia y menos amaneramiento que B. Palencia.
De todas maneras, la historia de la pintura en mis manos sufriría drásticos tijeretazos, en los que eliminaría a Dalí, por ejemplo, y me quedaría tan ancha, porque me parece un rebuscado sin chicha. Y el 90% de los que ARCO mima, los pondría a pan y agua.
Como persona era un fatuo, egocéntrico, pura filfa, que es lo peor que puede ser una persona.
Sí, anoche hubo movidas raras; pero no sé qué sería.

Mi primer impulso era, sin duda, decir: qué pelmazo que era el pobre Benjie, en plan bromita, ¿sabes? como haciendo que conocía al ser imaginado por ti; luego empiezo a leer los comentarios y me doy cuenta de que el tío existe, o existía, más bien, y pienso, pues miro sus cuadros y quedo como dios; luego veo que Trini lo ha hacho por mí, y a mí Trini, he de decir que me cae de cine. Así que, por no entrar en polémica con nadie, he optado por ahorrarme la visita a mi querido Benjie, porque no quiero definirme entre tú, Gata adorable, y Trini, porque os quiero a ambas. Aunque a ninguna tanto como a mí mismo, y eso lo encontraréis las dos natural, porque a mí me quiere todo dios.
Así que me iba a limitar a decir que cuando leía la reseña del último orador, se me representó el Zeta, ya sabes, pero luego he visto que decía palabras en su discurso desdichado que ZP sería incapaz de pronunciar ni leyendo.
Así que sólo me queda aplaudir tu estilo de cronista satírica, que me gusta un huevo, y que apuesto que es mil veces más brillante que la crónica oficial.
Oye, Gato, ¿has pensao en escribir? Porque no lo haces mal, colega, podrías empezar por un diario de esos on-line, blog, se llaman... ¿lo has pensao?

CARTA A FIDEL HERRERA BELTRÁN, GOBERNADOR DE VERACRUZ

Las amenazas y atropellos que sufren los periodistas de México, como Martín Serrano Herrera, director del Diario Tribuna de Veracruz, se han concretado ahora tirándole abajo su página web http://www.diariotribuna.com/ siguiendo un viejo truco en México, contra quienes son críticos, investigan la corrupción y la denuncian, que consiste en amenazarlos, y callarlos por las buenas o por las malas, circunstancial o definitivamente.

Para romper el cerco contra Diario Tribuna, os pedimos que multipliquéis su denuncia, y demostremos a quienes han institucionalizado la violencia, el secuestro y el asesinato, que callar a uno hará que cientos y miles de bloggers reproduzcamos en nuestras bitácoras la denuncia. Porque es lo menos que podemos hacer ante la valentía y la escalofriante integridad de los periodistas mexicanos, absolutamente solos ante las instituciones, los políticos, el crimen organizado y los sicarios.
El texto de la carta de Martín Serrano Herrera al Gobernador, que os pido copiéis y reproduzcáis en vuestra bitácora es:

AL LIC. FIDEL HERRERA BELTRÁN
Gobernador Constitucional del Estado de Veracruz. Presente.

Gobernador:
¿Acaso esperas a que yo *caiga* para salir a declarar que ahora sí, en nombre de tu investidura, se va a actuar?
Ya muchos comunicadores veracruzanos fueron masacrados. ¿O todavía no te es suficiente?
Para nosotros son demasiados. Y nos avergüenza mucho que Veracruz sea considerado primer lugar nacional en crímenes contra periodistas.
Respetuosamente, en numerosas ocasiones he demandado tu intervención, y hasta hoy solo contabilizo agravios. Incluso desde junio recabé tu firma en una carta signada por el colega Reynaldo Castro Melgarejo, y

te haces omiso. También los llamados de la comunidad internacional para que procedas en este asunto y otros que ofenden a comunicadores veracruzanos te son indiferentes.
En mi caso las denuncias penales: FESP/ 589/2006/I en contra de tu procurador Emeterio López Márquez; 1135/2005, que avientan de Agencia en Agencia del Ministerio Público; y otras querellas, duermen en brazos de la infamante impunidad que reina en nuestro Estado.
Y para remate, la noche de este jueves 24 de Noviembre del 2006, de parte de tu secretario particular, Erick Lagos Hernández, he recibido MUY DELICADAS AMENAZAS, transmitidas por el vocero oficial Alfredo Gándara Andrade a través de uno de sus subalternos.
Otra vez se me ha exigido que no cuestione a los miembros de tu gabinete y que los deje hacer, qué total qué me importa; sencillamente, que falte al deber y compromiso de informar; ofertándoseme a cambio unas migajas de publicidad de tus actividades como mandatario pero… que para acceder a estas les entregue una Certificación Notariada de la línea editorial de mi periódico **Diario TRIBUNA**, que incluya el tiraje, el perfil del público que nos interesa, lugares específicos en los que circulamos, y la cobertura.

O que me atenga "a las consecuencias" inmediatas o de largo plazo y alcance. ¡INDIGNANTE!
¿Sí vas a esperar a que yo *caiga*?

Me parece una costumbre absurda taladrarle las orejas a las chicas siendo aun tan pequeñas, marcándolas ya definitivamente con un determinando ya de antemano cómo debe ser su vida de acuerdo con un rol femenino o masculino (cuando el género en realidad tiene más de cultural y social que otra cosa). Costumbres anticuadas de las que muchas veces ni siquiera somos conscientes. Yo debo ser de las pocas mujeres que conozco que no lleva pendientes. (No tengo agujeros. Noto cierto tonillo escéptico en su forma de hablar de ciertos artistas modernos...¿acaso está usted dudando de que un artista es una persona que repite muchas veces que lo es?¿No le parece bien el concepto de artista total, entendido como aquel que posee creatividad para decir frases epatantes en los momentos adecuados, sensibilidad para posar con gracia ante los medios de comunicación, estilo para elegir las fiestas adecuadas para hacer contactos?

PINTOR: ¡PINTA Y CALLA!

Pepe Cerdá tiene la misma socarrona acometida cuando pinta, cuando habla y cuando escribe; y sigue siendo el mismo gigante hospitalario que acogía a sus amigos y a los amigos de sus amigos en París, y les obsequiaba con sus contundentes andanadas contra los aldeanos del Arte.
Pepe escribe cosas como ésta en su bitácora Pintor:¡pinta y calla! :

La decoración y el arte

"Me llama una persona que dice estar muy interesada por mi trabajo. Por no andarnos con eufemismos, que me quiere comprar diez papeles para decorar un hotel. Hasta ahí no hay problema. Le digo que acabo de hacer una exposición de acuarelas y que elija. Me dice que ya las ha visto, pero que no le gustan por ser demasiado realistas. Vaya. Le digo que tengo otros trabajos más antiguos...Me dice que ya los conoce y que no le interesan porque son muy oscuros..Ajá..Y a partir de aquí se desparrama: Me dice que lo que quiere son unas pinturas de 70 x 50, con colores calientes, ni abstractas del todo, ni figurativas del todo ¿?, que yo ya sabré...Que por si me puede ayudar me da la colcha de las camas, y el estuco de la pared. Yo le escucho entre divertido y moderadamente atónito (este tipo de llamada la he tenido cientos de veces), y como soy alérgico a decir que no, lo despacho con un: veré lo que puedo hacer...que seguro es ; nada de nada.
La decoración es una de las más graves enfermedades del arte. Este concepto, tan extendido, de "tener gusto" para la casa, teledirigido por las revistas de decoración que pueblan nuestros quioscos, es un desastre para las artes plásticas. Siempre van con tres cursos de retraso. Son las revistas de decoración de hace tres décadas las que enseñaron a aquella burguesía madrileña de "loden" y canana, que había que descolgar los cuadros tardo-barrocos y colgar Tapiés en su lugar (o sus sucedáneos, naturalmente). Ahora están en el tardo-pop-madrileño-ochentil, (quince años de retraso), que es exactamente lo que me pedía mi interlocutor de hace un rato. Y él no tiene la culpa, me dice lo que le ha dicho el decorador, que es el que sabe. Lo que no termino de entender que parte le interesa de mi trabajo, tal y como se ha presentado... Misterios insondables de las obras de Arte."

Así es que soy asidua lectora suya, y me divierto con su estilo desnudo de artificios, tan

difícil; pero, sobre todo, me dejo embobar con sus irreverencia y su lucidez, tan raras en este mundillo de bienaventurados soplagaitas, infatuados. Y como no soy la única que se alegrará, os lo cuento:
La Biblioteca Aragonesa de Cultura presenta en Ibercaja Zentrum (Joaquín Costa 13, Zaragoza) el martes, 28 de noviembre 2006, a las 20 horas, su cuadragésimo sexto volumen: *"Pintor, pinta y calla"* de Pepe Cerdá.

De nada, ya sabéis que me gusta ser útil.

Misterio ninguno, señor Cerdá. El pobre hombre sólo pretendía solicitar de usted lo que no sabe explicar, como cuando usted le explicaba no sé qué logaritmos tubulares al fontanero, cuando le indicaba cómo le gustaría que fuera la cisterna de usted.

Por cierto, me encanta el segundo cuadro, el del paso de cebra.

Gracias, Gatita.

Es parecido a quienes encargan libros por metros para que les hagan juego con la decoración del salón. Y no es un mito urbano, yo he conocido a gente así y también a gente como el que cuenta Pepe y un pintor amigo mío tuvo que pintar así más de un cuadro en los años 70 para poder comer esa semana.
No olvidemos entre los escritores a los "negros".
Creo que es muy buena señal para el artista poder decirle a ese señor con dinero que se vaya a El Corte Danés a encargarlo.

Pues señor pintor ¡Al cliente lo que pida! que al fin y al cabo creo que Miguel Angel, Da Vinci y otros muchos hicieron concesiones en su tiempo para poder vivir, trabajaron por "encargo" y seguro que tuvieron que mejorar a sus modelos. pero si se puede dar el lujo de rechazar un trabajo ¡Felicidades! En cuanto a que no entiende que parte del trabajo suyo le interesa al cliente, por lo que he podido leer, debe ser la firma ¡Y eso siempre es un halago!
Plenamente de acuerdo con lo de los decoradores, en general quieren y muchas veces logran imponer gustos que a la larga resultan sosos, es igual que los modistos, como la mayoría son homosexuales (conste que no tengo nada en contra de las preferencias sexuales de cada quien) y no les gustan las mujeres pues han impuesto la moda de las mujeres que parecen un palo de escoba, para ellos mientras más feas se vean ¡mejor! y actualmente no está "in" apreciar un cuerpo femenino sensual y curvilineo. ¡Nada que este mundo esta loco!

Hay mucha gente que pinta sobre encargo, aun hay imitadores por encargo de pintores antiguos... como en las pelis de falsificadore. También hay quien copia con precisión absoluta óleos antiguos sobre encargo y se gana muy bien la vida con ello.
Hace tiempo, en una casita en medio del Alt Ampurdá conocí un grandioso pintor, grandioso por su alucinante pintura, por su realismo introvertido. No vende ni uno, no se atreve a perderlos y, para ello, pinta sobre encargo para las consultas de médicos y clínicas muy conocidas.
Ya ves... ha encontrado su fuente de ingresos y lo que daría yo por poseer uno de los que tan celosamente guarda.

MARTÍN SERRANO HERRERA, DEL DIARIO TRIBUNA, DE MÉXICO, A LA OPINIÓN PÚBLICA NACIONAL E INTERNACIONAL

Diario TRIBUNA Expresión de la realidad

EL DIRECTOR DEL DIARIO TRIBUNA DE MÉXICO A LA OPINIÓN PÚBLICA NACIONAL E INTERNACIONAL

Durante más de cinco años en Veracruz la Justicia ha sido obstruida y se nos ha negado, porque en nuestra calidad de periodistas no nos plegamos a los caprichos ni consentimos las atrocidades que se perpetran desde el Poder Público. No nos callamos; y advertimos que nunca lograrán acallarnos, aunque en numerosas ocasiones han intentado reducirnos a la nada.
En esta entidad de la Federación se sigue padeciendo al régimen autoritario; no se tiene un gobierno democrático. Aquí a las instituciones las han confundido con feudo particular, y las utilizan como instrumento represor en contra de quienes, como nosotros, rechazamos ser cómplices de las corruptelas. La arbitrariedad es holística para los de afuera, en tanto que a los de adentro, divina gracia.
El que suscribe, Martín Serrano Herrera , a través de esta Carta Abierta, enérgicamente reitero mi demanda de Justicia, misma que exijo desde hace más de un lustro cuando, desde el gobierno que encabezaba el capo Miguel Alemán Velasco , se instrumentaron acciones con el claro propósito de acallar nuestra voz crítica que era discordante con las canallescas acciones de saqueo y total perjuicio al pueblo veracruzano.
Desde el Diario TRIBUNA , del cuál soy fundador, propietario y director general, señalamos ilícitos que a cobijo de la encomienda gubernamental aun se cometen. En represalia, la noche del 14 de febrero del año 2001 a madrugada del día 15, las instalaciones de este periódico fueron saqueadas y arrasaron la maquinaria de impresión. En el recuento de daños, se eslabona ya una larga cadena de atropellos en contra nuestra. Varias veces han atentado contra mi vida y en contra de mi patrimonio, sin embargo cada querella que interpongo ante las Agencias del Ministerio Público, es una denuncia formal que no pasa del cajón de los olvidos, y no porque no haya elementos que acrediten la responsabilidad penal, sino porque invariablemente los nombres que aparecen y que las investigaciones judiciales si se realizaran confirmarían, son los de miembros de la delincuencia organizada que detenta los cargos públicos mas importantes en el organigrama oficial del Estado de Veracruz.
Como botón de muestra de la asquerosidad, refiero el día en que un Juzgado Federal me concedió el Amparo 727/ 2005 para que se procediera conforme a Derecho en una querella contra el exvocero y personero de Miguel Alemán Velasco, quien directamente y por terceros me transmitió amenazas de muerte, y que el Agente del Ministerio Público al cual se revocó una mala determinación que los Magistrados del Tribunal estatal habían respaldado también, me advirtió que cuántas veces le mandataran proceder judicialmente, otras tantas lo haría en contra de mis intereses, sincerándose con la expresión de que “no podrás con ellos, porque son mafiosos...”
También refiero, entre muchos expedientes más, la causa penal 177/2006, donde un

juez que libró órdenes de aprehensión y se lograron dos detenciones, al verificar que resultan involucrados exintegrantes del gabinete de Alemán Velasco y éste, dispuso la excarcelación de los indiciados y tiempo después el Procurador estatal Emeterio López Márquez firmó un desistimiento judicial para que se me dejara en estado de indefensión jurídica por parte de la representación social, lo cual constituye delictivos tipificados en la legislación penal que me llevaron a denunciarle formalmente, siendo radicada en el fuero común la indagatoria ministerial número FESP/ 589/ 06/ 01, que no avanza.
Hay otra motivación --quizá de mayor peso--, para que el expediente judicial177/2006 haya sido manoseado tan descaradamente: que en Autos se conjuntan, establecen y consignan elementos que también podrían llevar al esclarecimiento del homicidio del que fuera director del periódico “La Opinión de Poza Rica”, Raúl Gib Guerrero , ultimado por sicarios el viernes 8 de Abril del 2005 en las inmediaciones de Papantla, Veracruz. Y es que en Fojas de esta Causa Penal se revela una línea de investigación que “extrañamente” nadie ha querido atender, donde actuales funcionarios estatales son mencionados por nombre y apellidos.
Mientras tanto, enmedio de este cúmulo de irregularidades consecuentadas desde el fuero gubernamental, nuevamente gano una batalla en terrenos del Poder Judicial de la Federación, al ordenarse por un Tribunal Colegiado de Circuito la entrada de una demanda de Amparo contra la perversa resolución del juez referido en líneas precedentes. Una victoria que sin duda, y si se actuara en estricto apego a Derecho, nos aproximaría a la reclamada JUSTICIA.
En esta ciudad de Jalapa, Capital del Estado de Veracruz, a finales del año 2005 un expediente mas fue radicado en una Agencia del Ministerio Público del fuero común habilitada como Fiscalía Especial para Delitos Cometidos en Agravio de Periodistas , sustentándose el mismo en un razonamiento jurídico de la Procuraduría estatal y del cual Yo mismo no conocía su existencia, donde se plantea que el exgobernador “Miguel Alemán Velasco, José Alejandro Montano Guzmán, y otros”, son presuntos responsables de atentados contra Martín Serrano Herrera, director de Diario TRIBUNA. Dicha Indagación Ministerial tiene como antecedente hechos criminales que datan del 22 de mayo del año 2004, cuando varios sujetos con apariencia como la de los elementos de las corporaciones policiales me atacaron a mansalva hiriéndome hasta dejarme semi-inconsciente. Este caso fue denunciado en una Agencia Ministerial común donde lo archivaron casi de inmediato. Extraoficialmente me enteré que luego apareció en la Fiscalía Especializada en Delitos Cometidos por Servidores Públicos, de donde lo enviaron a la de Periodistas para que duerma el sueño de los justos.
La Razón histórica, legítima, legal y jurídica tengo, mas no la Justicia, que se me niega sistemáticamente. Con limpieza las batallas se han ganado en la instancia federal, pues en el ámbito local la realidad supera a la ficción y la indecencia se desborda. El estado de Derecho sigue siendo chueco, y a la fuerza de la verdad la combaten prostituyendo las instituciones que deberían servir para fines nobles, no para guarecer intereses malsanos de facción y grupos mafiosos.
De manera ridícula, temeraria y perversa, durante los ya casi seis años que desde el Poder Público se ordenó aniquilarnos como entidad periodística, las denuncias penales que he interpuesto han sido manipuladas para no restituírsenos en nuestros derechos.
Yo podría "gritar en el desierto" llamando a cerrar filas para que no se reediten casos como éste de atropellos e impunidad contra periodistas en Veracruz, México, pero no lo haré. Solo dejo constancia de que hasta el final sostendré mi exigencia de JUSTICIA A SECAS y un nunca jamás a la represión.

EJECUTAN A OTRO PERIODISTA EN VERACRUZ

De varios impactos de balas nueve milímetros, dos de ellas en la cabeza, fue ejecutado el director de la revista Testimonios, Roberto Marcos García, especializado en temas policiacos, justo cuando regresaba de una entrevista en la comandancia del agrupamiento marítimo Fluvial y Lacustre, perteneciente a la Secretaría de Seguridad Pública. Los hechos ocurrieron cerca de las 13:00 horas.
Los primeros reportes indican que el reportero viajaba a bordo de su motocicleta marca Honda tipo Titán cerca de la comunidad La Matosa, perteneciente al municipio de Antón Lizardo, sobre la carretera Veracruz-Alvarado, cuando repentinamente fue embestido por un vehículo PT Crusier color gris aparentemente con placas del Distrito Federal, de donde salió un sicario para ejecutarlo a balazos.
El vehículo fue localizado abandonado precisamente en la comunidad La Matosa, y tiene reporte de robo con violencia del 31 mayo 2006. Según informes de diversas agencias, en el lugar del atropellamiento fue hallada una facia con placas 639 BTA del Distrito Federal, que pertenecerían al PT Cruiser.
Estos hechos se dan a 48 horas de que fuera ejecutado también el conocido ganadero Cirilo Vázquez Lagunes, por parte de un comando armado.
¿Ahora que dirán las autoridades sobre la muerte del periodista? Cuando mataron a Raúl Gibb el 8 de abril de 2005 en Poza Rica, corrieron el rumor de que tenía malas relaciones con grupos mafiosos. Cuando mataron al cronista y periodista de Tierra Blanca, Hugo Barragán Ortiz, le achacaron que era por sus inclinaciones sexuales. A Roberto Marcos García de seguro le van a decir que estaba inmiscuido en el crimen organizado. (CAVCH/ Diario TRIBUNA)

Estos sicarios "oficiales" no contentos con sus crimenes intentan manchar el buen nombre de los asesinados con rumores para que la gente dirija la mirada hacia otro sitio.
Me recuerda cuando aquí, durante el franquismo, la Brigada Politico-Social detenía a alguien y las gentes pensaban "algo habra hecho".

JOSÉ MANUEL NAVA: EXCELSIOR: ASALTO FINAL

Texto leído por José Manuel Nava, ultimo periodista asesinado en México, en la presentación de su libro:"Excelsior. El asalto final", publicado por Edamex :

"A pesar de todo, o tal vez por esos logros, enemigos internos y externos trabajaban sin cesar para que El Búho no pudiera levantarse.

Tal vez, y lo dije en muchas ocasiones en reuniones y asambleas en la Cooperativa, el peor enemigo de Excélsior estaba en casa, lo teníamos dentro, saboteando una rotativa prendida de alfileres que funcionaba solo gracias al talento y entrega de trabajadores leales; destruyendo las ya de por sí destartaladas computadoras con las que trabajábamos, robándose desde los focos, hasta literalmente excusados y lavabos de los baños que no se como simplemente arrancaban de suelos y paredes en los sanitarios y sacaban de las instalaciones sin que nadie se diera cuenta… o bueno, eso se nos decía.

El desmantelamiento de las instalaciones de Excélsior se dio sin que nadie, misteriosamente, se diera cuenta. Esos enemigos internos, vendidos a quienes ambicionaban apropiarse de Excélsior y de sus bienes inmobiliarios, entre ellos la mejor esquina de México, la Esquina de la Información lograron que se le diera al Búho lo que

yo llamo el “picotazo mortal” en enero de este año 2006.

Creo que ese “picotazo” está dramáticamente reflejado en el óleo de Jacqueline Juárez, que es la portada del libro y que generosamente donó para la publicación de este trabajo. La portada, como pueden apreciar, muestra a una serie de buitres que zopilotearon a Excélsior.

Algunos de ellos eran charlatanes tan cómicos como patéticos. Recuerdo a uno de ellos, dueño de dos o tres estanquillos de comida y que tenía un asombroso parecido con el Pingüino de Batman, que nos presentó una propuesta de compra escrita a mano, en hojas arrancadas de un cuaderno de espiral y que seguramente redactó sobre las rodillas en alguna micro camino al periódico. Pues ese hombre logró mantener en vilo al Consejo de Administración durante meses cuyos miembros inexplicablemente creían que la propuesta era seria. Otro fué un ex policía que decía querernos comprar por una cantidad estratosférica, 500 millones de dólares, pero que no tenía ni para comprarse zapatos nuevos. Al final sus cheques fueron de hule.

Uno sí contaba con los recursos económicos y con la infraestructura para adquirir Excélsior y con él todas sus valiosísimas propiedades. Ese es el que, en la portada de Jacqueline Juárez, está representado como el buitre que logra dar el “picotazo mortal”, el que aniquila al Búho en una operación claramente orquestada y facilitada desde los más altos niveles del gobierno federal.

El gobierno tenía una estrategia despiadada y bien definida. Se trataba de dejar que Excélsior se consumiera solo en agonía. Todo tenía que parecer el resultado natural de un deterioro constante producto de las intrigas y pleitos internos y de sus enormes pasivos fiscales y de su inhabilidad, propiciada en gran parte por el propio gobierno, para hacer frente a sus gastos más elementales como la compra de papel, tintas y otros insumos fundamentales para la producción del diario y, a veces, cuando se podía, pagar una mísera “ayuda de nómina”, como se le llamaba, a socios y trabajadores de apenas 700 pesos semanales. Eso, claro, cuando se podía… y muchas, muchas veces ni eso se podía. Al final, la muerte del Excélsior clásico fue efectivamente producto de sus conflictos e intrigas internas, pero con mucha ayuda del exterior.

A mí, como director, me parecía extremadamente sospechoso que por más que trabajáramos con el gobierno para llegar a acuerdos que abordaran la problemática de fondo de la empresa, nunca, jamás, se pudo aterrizar uno solo de esos acuerdos, aunque fuera el más pequeño de ellos. Siempre, invariablemente, surgía un obstáculo de último minuto que echaba todo abajo. Una revuelta interna de quienes se empeñaron en destruir a la cooperativa, una extraña complicación técnica, incumplimientos de los miembros del Consejo de Administración, siempre nos fue imposible entablar una negociación seria y fructífera con el gobierno federal.

La problemática del periódico era complejísima. Aparte de nuestros pasivos laborales, que ascendían a más de 150 millones de pesos, teníamos pasivos fiscales con la Secretaría de Hacienda que excedían los 3,000 millones de pesos; pasivos con el Seguro Social que también excedían los 50 millones de pesos, pasivos con el Infonavit que se acercaban a los 10 millones. Es decir, una deuda tan solo con el gobierno federal, que excedía el valor total de la empresa. La reacción de los funcionarios con los que abordamos esta problemática tan compleja, como de urgente solución, era por decirlo en términos blandos, de indiferencia, displicente, sin ninguna voluntad real de tenderle la mano a una empresa de interés social.

Que diferente fue su reacción, su colaboración, cuando la Sociedad Cooperativa de

Responsabilidad Limitada se convirtió en Sociedad Anónima. Ya en manos del gran capital, los pasivos fiscales parecieron evaporarse como por arte de magia en su enorme mayoría. Al Seguro Social se le pagó una fracción de lo que se le debía en realidad y en cuestión de menos de dos semanas, la problemática que durante años nos atormentó y para el gobierno había sido irresoluble, pasmosamente se resolvió. El propio secretario de Hacienda lo dijo en una ocasión. “De Excélsior ni me hablen, ese problema no tiene solución”. Pero era irresoluble tratándose de nosotros, los trabajadores de una empresa de interés social. Para nosotros, las puertas del gobierno federal estaban cerradas a piedra y lodo. Para el gran capital, les fueron abiertas de par en par y con alfombra roja.

Las condiciones en que se da la transferencia de la propiedad de Excélsior al Grupo Empresarial Ángeles, propietaria del Grupo Imagen, el que absorbió Excélsior, evidencian una cercanía cuando menos inusual, nebulosa, opaca, con la llamada pareja presidencial. Este tipo de operaciones simple y sencillamente no prosperan sin la bendición de la Presidencia de la República. La operación, por cierto, ha sido ya denunciada en tribunales por un grupo de cooperativistas convencidos de que fuimos víctimas de venta fraudulenta.

Recuerdo que en 2004, invité al presidente Fox a que visitara las instalaciones de Excélsior con ocasión de nuestro aniversario el 18 de marzo, pero la respuesta de Los Pinos fue un tajante e inmediato no. Me explicó el entonces secretario particular y vocero del presidente, Alfonso Durazo, que Fox no podía visitar Excélsior sin comprometerse a visitar todas las sedes de los periódicos en cuando menos la Ciudad de México. Confieso que me sentía un poco incómodo de invitar al Presidente de la República a nuestras instalaciones que estaban tan deterioradas después de muchos años sin mantenimiento y de sabotaje de nuestros enemigos internos. Los pasillos lucían lúgubres a media luz; muchas de las áreas de trabajo, particularmente en la zona de talleres, estaban simplemente a oscuras porque no teníamos para comprar miles de focos que simple y sencillamente desaparecían cada vez que se cambiaban.

El mobiliario hubiera muy bien podido servir como leña –y recuerdo que así lo describió el dueño del Grupo Empresarial Ángeles-, simple y sencillamente leña. El equipo de cómputo eran piezas de museo. En fin, no era el recinto más digno para la visita de un Presidente de la República. Sin embargo, pensé que tal vez viendo las condiciones en que operábamos, en que producíamos un buen periódico, el Presidente se sensibilizaría ante nuestra terriblemente difícil situación y ordenaría que el propio gobierno dejara de apretarnos el cuello sin ahorcarnos totalmente, pero sí lo suficientemente fuerte como para apenas permitirnos respirar y a veces, ni eso. Pienso que esa era la mayor de las crueldades: llevarnos al borde de la muerte y después dejarte en agonía. Y el ciclo se repetía constantemente.

Sin embargo, poco más de un mes después de que Excélsior, o el Nuevo Excélsior, como se le llama ahora pasara a manos del capital privado, el Presidente Fox y su esposa visitaron las instalaciones sin sentirse de ninguna manera obligados a visitar las de otro diario. Recuerdo que uno de los trabajadores bromeo al decir que tanto Fox como su esposa habían ido a ver lo que habían comprado. ¿Bromeó realmente? Quien sabe.

El Seguro Social, esa magnifica institución sin lugar a dudas con que contamos los mexicanos, fue el elegido obvio para desencadenar el brutal hostigamiento contra la cooperativa. Nunca renegamos de nuestras deudas, pero era el propio Seguro Social el que no nos permitía allegarnos los recursos necesarios para poder pagar, cuando menos parcialmente, nuestros retrasos con el Instituto. Se ordenó una agresiva intervención a

la Caja General que literalmente nos ahogaba. Los viernes eran una verdadera pesadilla, ya que el interventor del Seguro Social, quien tenía que autorizar todos los egresos de la caja y pagos de insumos, simplemente desaparecía. Vivíamos, o mejor dicho agonizábamos, al día y nuestro proveedor de papel nos exigía todos los viernes pago por adelantado del papel necesario para tirar el diario durante tres días. En no pocas ocasiones estuvimos a punto, a minutos de no salir porque con los camiones cargados con los rollos de papel esperando fuera del periódico, el interventor del Seguro Social no aparecía y sin su firma, evidentemente, no se nos aceptaba un cheque. La angustia era verdaderamente feroz.

La intervención del Seguro Social tenía otro efecto particularmente insidioso, que era el de agudizar los conflictos y las tensiones internas con el consecuente agravamiento de la imposibilidad de controlar una empresa de esas dimensiones. La desesperación de muchos trabajadores, y trabajadores de los buenos y leales a la institución, llegaba a tales extremos de exigir el cierre definitivo del periódico, de declararse recurrentemente en paro y hasta de llegar a las agresiones físicas entre grupos rivales al interior de la cooperativa.

En su designio por hostigar a Excélsior, el Seguro Social llegó al extremo criminal de girar oficios a todos los clientes del periódico prohibiéndoles que se hicieran pagos a la cooperativa y que esos pagos se hicieran directamente al Instituto. Ya no me cabía la menor duda. La intención del gobierno era evidente.

Fue entonces cuando decidí apelar directamente al Presidente Fox y con el pretexto de una entrevista, la primera por cierto que concedía un Jefe del Ejecutivo a Excélsior en más de una década, le planteé directamente y con todo detalle la crisis del periódico y su dramático aspecto humano. A bordo del avión presidencial, en un vuelo de Guadalajara a la Ciudad de México en septiembre del año pasado, platiqué privadamente con el Presidente Fox y sin rodeos le dije que no debía permitir que fuera su gobierno el que diera la estocada final a una institución de repercusión nacional como era Excélsior.

Fox escuchó la exposición con mucha atención y no dudó en llamar a su vocero, el doctor Rubén Aguilar, para encargarle que se le diera atención al problema de Excélsior al más alto nivel.

—Quiero que Carlos —dijo refiriéndose al secretario de Gobernación, Carlos Abascal —, le entre al problema de Excélsior. Y que lo haga ya.

En un par de días se arregló una entrevista formal con el secretario Abascal. Parecía que al fin habría luz al final del túnel, pero no fue así. Para mi enorme sorpresa, me encontré con un funcionario hostil, áspero, sin ningún interés real por llegar al fondo del problema financiero y fiscal de Excélsior. Sí, no puedo negarlo, me escuchó durante largo tiempo sin una sola reacción en su rostro. Temía, como sucedió, que mis palabras estaban cayendo en oídos sordos. Evidentemente no existe un sordo más sordo que el que no quiere escuchar y el secretario Abascal no quería oír de nuestros problemas.

—¿Qué crees que dirán si te salvamos el periódico comprándoles publicidad?, me inquirió el secretario.

—¿Qué cree que dirán, señor secretario, si el gobierno promueve la desaparición de una institución como Excélsior? —le respondí.

La reunión con el secretario Abascal concluyó sin ningún resultado concreto. Ahora sabemos por qué. Los planes eran ciertamente otros.

Al interior de la cooperativa, por supuesto, las cosas no mejoraban. Muy por el contrario. Las intrigas y los rumores crecían día con día hasta que apareció un personaje que había ocupado la jefatura de información que ofreció comprar, y recalco comprar, la subdirección de Excélsior. La idea de la compra-venta de un puesto directivo en Excélsior, por cierto por ese mismo individuo, había flotado con anterioridad, pero fue evidentemente desechada porque los puestos no se compran.
Pero esta misma persona, en complicidad con un grupo de parientes que también trabajaban en la cooperativa, volvió a hacer el ofrecimiento de comprar la subdirección del diario por cuatro millones de pesos. Visitaba el área de Talleres a altas horas de la noche para tratar de convencer, como al final lo hizo, que él podía allegar al periódico los recursos necesarios para que todos cobraran.

Se acercaba una fecha particularmente peligrosa, que era Navidad, y la caja del periódico no tenía para cubrir el aguinaldo. Este personaje prometió que aparte de los cuatro millones de pesos que pagaría para que lo nombraran subdirector, él conseguiría fondos para pagar el aguinaldo.

Y es con ese argumento con el que se cocina la traición final contra la Cooperativa Excélsior. El Consejo de Administración, sin consultarlo con la Dirección General como ordenaban las bases, aceptó la oferta de compra de la subdirección del periódico por esos cuatro millones de pesos.

El viernes 9 de diciembre del años pasado, en una junta con socios y trabajadores no socios, que nosotros llamábamos juntas informativas, el presidente del Consejo de Administración, Armando Heredia Suárez, hizo el anuncio estando yo presente y sin saber absolutamente nada del plan de venta de una plaza directiva. Dijo que el Consejo de Administración había decidido aceptar cuatro millones de pesos por ese puesto y hasta con facilidades de pago. Se recibirían dos millones de pesos a mediados de diciembre y los restantes dos millones de pesos hacia finales de enero.

Yo escuchaba incrédulo que el Consejo de Administración hubiera caído en una práctica tan baja como la venta de plazas, pero eso sería parte del plan de remover al Director General porque yo no aceptaba con entusiasmo la venta del periódico, sino que creía que teníamos los recursos humanos y el compromiso de socios para sacar al periódico adelante, particularmente si aprovechábamos la inminente campaña política para reposicionar la credibilidad del periódico. La credibilidad de Excélsior quedó hecha pedazos seis años atrás cuando fue literal y abiertamente entregado al entonces candidato del partido oficial, es decir, al establecimiento político derrotado en el 2000.

Yo estaba firmemente convencido de que esa era nuestra oportunidad de oro para consolidar el reposicionamiento del periódico y conservar nuestro patrimonio, pero eso era algo que no se me iba a permitir hacer.

Sabía perfectamente que la venta de la subdirección resultaría ser un fraude redondo, como lo fue. El aspirante a la subdirección nunca pagó ni un solo centavo y apareció en el directorio con el puesto de subdirector solo unos cuantos días. El periódico estaba siendo manejado como la miscelánea de la esquina para acelerar el punto de quiebre.

En esa misma reunión del 9 de diciembre le pregunté privadamente al presidente del Consejo si la decisión que acababa de anunciar era firme y respondió que sí, que el nuevo subdirector tomaría posesión el miércoles siguiente, es decir, el 14 de diciembre,

una vez que diera su enganche de dos millones de pesos. Indignado, le pedí que nos reuniéramos en sesión de Consejo una vez terminada la junta informativa. En esas condiciones, no dudé un instante en decidir renunciar a la Dirección General.

En la reunión de Consejo expuse que ética y moralmente no podía aceptar la venta de una plaza directiva en Excélsior, algo que jamás sucedió en la institución y que aun menos podía aceptar que se manipulara y jugara con la necesidad de los trabajadores porque como lo sospechaba y en efecto sucedió, esos recursos jamás llegarían a la caja del periódico. Además, alguien presuntamente dispuesto a pagar cuatro millones de pesos por un puesto es porque va con la intención de lucrar con esa posición, es obvio.

Presenté entonces mi renuncia a la Dirección General, que era evidentemente el objetivo del presidente del Consejo, pero los consejeros me pidieron reconsiderar por el bien de la institución. Les pedí 24 horas para reflexionar y nos reunimos de nuevo el sábado 10. En esa junta acepté continuar al frente de la Dirección General con la condición expresa de que se respetaran las bases de la cooperativa y el reglamento de trabajo y que nadie usurpara las funciones de otros, como las había usurpado el Consejo al nombrar a un subdirector sin el conocimiento y consentimiento del director general.

Se me pidió reunirme con quien sería el subdirector y dije que lo haría una vez que pagara el enganche de dos millones de pesos, algo que sabía perfectamente no sucedería. Inmediatamente se propagaron rumores en el sentido de que yo bloquearía al aspirante a subdirector en su colecta de fondos y que pediría a todos los gobernadores del país que no lo ayudaran. Cuánto crédito me daban. Como si yo, aún siendo Director General de Excélsior, hubiera podido tomar el teléfono y simplemente ordenarles a 31 gobernadores que cerraran sus carteras cuando este señor los visitara. Y hacer todo eso en apenas tres días hubiera sido doble hazaña.
La realidad es que ya se sabía que esos recursos nunca llegarían, pero existía el compromiso contraído por el presidente del Consejo con los trabajadores de repartir los cuatro millones entre todos. El martes 13, cabalístico el día, ya tarde por la noche y a unas horas de que se tuvieran que desembolsar los primeros dos millones de pesos, que por supuesto no habían ingresado a la caja del periódico, el presidente del Consejo se vio atrapado en su propia trampa. La gente demandaba el pago y él tenía que salvar el pellejo.

El presidente del Consejo se comunicó telefónicamente conmigo para pedirme que fuera al periódico a hablar con la gente porque no querían trabajar y a entrevistarme con el aspirante a subdirector. Yo me negué rotundamente y le hice notar que ese asunto lo había originado él con el apoyo y conocimiento del gerente general y que por lo tanto afrontaran ellos su responsabilidad.

La respuesta fue la clausura totalmente ilegal de la Dirección General y la remoción, también ilegal, del nombre del director general del directorio del diario. Ese martes 13 de diciembre de 2005 el camino quedó libre para el asalto final.
Muchas gracias."

Este texto de presentación de su novela, ya es en sí mismo un relato de novela negra y una sentencia de muerte. El gran capital se las gasta así en todas partes. Más descarada y brutalmente donde puede y más sibilinamente donde no es que no pueda, pero le conviene ser más discreto.
Trágicamente, ahora, le está tocando a México, pero yo también estoy convencido de que es un ensayo, como lo fue nuestra guerra (in)civil.
No sé qué más decir, la pena me afecta. Me gustaría tener superpoderes contra la injusticia y el crimen político organizado. Pero sólo puedo confiar en la lucha del pueblo que, tarde o temprano ponga a los asesinos en prisión y les deje sin un céntimo de dinero ni de poder.
Abrazos.

Me uno al decir de Dinosaurio y también al sentir. Pero no dejemos que aquello de que el pueblo unido jamás será vencido, muera; ya sabemos que muchos lo querrían así, ya sabemos aquel refrán jesuítico ded "divide y vencerás", pero por mucho que se empeñen en hacernos creer marionetas indefensos e impotentes, ni lo somos ni lo seremos nunca. Podrán derramar nuestra sangre, podrán dejarnos anémicos como pueblo, pero jamás, jamás, segarán nuestras ideas, ni nuestros horizontes, ni nuestra fuerza para alcanzarlos; y matarán a uno de nosotros, y su sangre será semilla de mil y de cien mil. He dicho.
Os abrazo cómo pueblo que soy, con ese abrazo amplio y fuerte, pero sin pose ni arrumacos. A corazón abierto.

No conocí a José Manuel Nava, sin embargo lamento su pérdida y condeno su asesinato.

Resulta ingenuo esperar que se detenga a los responsables y se aclaren los móviles del crimen. Las autoridades locales y federales de procuración de justicia en México han

dado sobradas muestras de incompetencia y hasta de complicidad criminal.

La historia de la cooperativa Excelsior ejemplifica el rol perverso que el gobierno, cualquier gobierno, puede tener en las cooperativas independientemente de sus intenciones.

El cooperativismo para tener éxito como forma de organización productiva debe ser necesariamente independiente.

Me conmueve la integridad que es necesaria para luchar por salvar un periódico que están saqueando, del que arrancan hasta los lavabos, los focos, y en el que se espera el papel para imprimir, pendientes de un funcionario que se hace esperar...
Me pregunto si habrá un país en el mundo donde se haga un periodismo más digno que el de los periodistas mexicanos y que arriesguen más, y se me rompe el corazón saber cuánto talento y cuanto coraje está siendo condenado a muerte.
No creo que México merezca los sinvergüenzas que a los largo de los años han saqueado y esquilmado, aprovechándose del cargo; ha sido el campo de batalla donde se han probado todas las argucias político-financieras y la corrupción que importaron los aprendices del PRI en la democracia española. Que para eso Felipe González es el amigo del alma y socio de Slim.

Y, al hilo de tu reflexión última, ya has sido generosa llamando "democracia" a secas, a la española, que se las trae, también. Un libro de teorías realmente precioso.

La de 1812 era "la Pepa". Y la de 1978 es "la Choni".

No sé qué opinas tú pero, sin poner en duda que finalmente se imponga el sentido común, no creo que suceda pasado mañana. Se quedarán más por el camino, me temo. Ojalá que no.

No, Monocamy: en el Tema "Derechos Humanos" y el de "Sociedad civil" he dicho bastantes cosas, pero no "de juguete": no es mi estilo decir frases hechas. Dije, entre otras cosas, sobre las vallas contra los emigrantes que huyen del hambre y de la muerte de África, a los que abandonan enmedio del desierto sin agua ni alimentos, que espero vivir lo suficiente para ver en el banquillo del Tribunal Internacional de la Haya a Rodríguez Zapatero y Mohamed VI, acusados y condenados por crímenes de lesa humanidad. Y con ellos, a todos los que acataron sus órdenes y las cumplieron.
Y espero que los ciudadanos infectados por esta lepra moral, que miraron hacia otro lado y se encogieron de hombros, reciban el estigma de su cobardía hasta la cuarta generación.".
Y para mayor recochineo, firman un papel para protestar contra el muro que EEUU construye contra los inmigrantes mexicanos, porque con un poco de suerte, la comisión de mediación entre Argentina y Uruguay, significará sustanciosas ganancia para los Albertos, compañeros de correrías del Rey.

Entiendo. Bueno, yo es que le llamo "de juguete" porque ni hay una separación real de poderes, ni el judicial es independiente, ni tampoco somos todos iguales ante la ley. Y, por si fuera poco, la soberanía nacional es una quimera. Dura los 15 segundos que tardas en votar. Después de eso, eres un cero a la izquierda durante 4 años, así te eches a la calle con otros 20 millones de almas para pedir algo.

Si eso no es un juguete...

Hallan el cadáver apuñalado del ex director del diario mexicano "Excélsior"
jueves 16 de noviembre, 12:43 PM

México, 16 nov (EFE).- El periodista José Manuel Nava Sánchez, ex director del diario mexicano "Excélsior", fue hallado hoy muerto de dos puñaladas en su domicilio, situado en la colonia Rosa de la capital del país.

La Procuraduría (Fiscalía) Federal de Ciudad de México confirmó a Efe el hallazgo del cadáver de Nava, quien "presentaba dos heridas realizadas con arma punzo-cortante en el cuello y el tórax".

Nava fue encontrado esta mañana en el salón de su domicilio por la mujer encargada de las tareas domésticas, quien dio aviso a la Policía.

El periodista, quien fue durante 22 años corresponsal en Washington de "Excélsior", presentó anoche su libro "Excélsior, el asalto final", donde narra los últimos días antes de la compra, este año, del rotativo por parte del grupo Los Angeles, perteneciente al magnate Olegario Vázquez Raña.

Hoy mismo aparece un artículo de Nava en el diario "El Sol de México" en el que se refiere a las amenazas de boicot de la izquierda mexicana para impedir la toma de posesión del presidente electo, Felipe Calderón, el próximo 1 de diciembre.

"Cuando se llega a la violencia es porque la política ha sido rebasada y a pesar de las claras indicaciones que tenemos esperamos que ése no sea el caso de nuestro país", afirmó Nava en su artículo.

Nunca he sabido descodificar esos muñequitos para ágrafos que usan algunos.
En el Foro de la Presidencia de la República de los Estados Unidos de México está la noticia del asesinato de José Manuel Nava, ex-director del periódico Excelsior, vigésimo octavo periodista asesinado en el sexenio del Gobierno Fox. La copio a continuación, tal cual, y pongo la captura de pantalla en imagen de cabecera por si la borraran.
¿Alguien me puede explicar cómo se interpretan esos muñequitos que acompañan el texto? Si alguien sabe quién es don Rodolfo Rosas Escobar, el esforzado ciudadano que escribe la mayor parte de los mensajes en ese Foro, se lo puede preguntar. Y contármelo, porque estoy muy interesada.

Buenos días, Gatita.

Normalmente, los foros suelen tener la opción de permitir emoticonos, bien sea seleccionándolos de un panel, directamente, o asignados a una combinación de teclas.

A pesar de que los detestas, matizan los mensajes añadiéndole una pretensión de emotividad que, tal vez, no se desprende del texto, por no haber sido exitoso el intento, por parte del emisor, de impregnarlo. O, incluso, de impregnarla.

Por supuesto, el párrafo anterior tiene el único objetivo de encolerizarte, algo que me encanta porque te pones muy guapa.

Los emoticonos se usan en conversaciones o debates triviales. En ese foro, que parece controlado (intenté registrarme pero exigen aportación documental (vía fax)) no tienen sentido. Puede que se trate de un ataque de un hacker aburrido, sin más.

Eso es todo. Ya puedes arañarme.

Monocamy: El preámbulo explicativo sobre el significado de los emoticones en general me ha sido muy útil, y seguramente esa panda de botarates que ahora tienen sillón en la RAE los van a incluir pronto en la próxima edición del Diccionario.
Respecto a lo que yo preguntaba, qué significan estos muñequitos en concreto, sigo in albis, y profundamente preocupada si los hacker aburridos atacan y logran entrar al portal web del Gobierno de la República mexicana.

Me parece, Gata, que sabes muy bien qué son los emoticones y para qué se usan, por lo que creo que se trata de una pregunta retórica para enfatizar lo inadecuado (por decirlo de forma muy suave) y escalofriante que resultan esos emoticones en la noticia del asesinato de un ser humano.
Tengo que confesarte que yo tampoco lo entiendo. A lo mejor, es que no entendemos el macabro sentido del humor de los comentaristas de la página del foro de la república mexicana porque tenemos otra idea del respeto por la vida y por los derechos humanos. Pero también puede ser que "la vida no vale nada" y los que estamos tontos somos nosotros y las víctimas (en este caso los más de cien millones de mexicanos) y los listos son los graciosos que se descojonan de los asesinatos. ¡Quién sabe!

Verás, Dinosaurio: esos muñequitos con el dedo medio paradito, y el otro sacando la lengua en la noticia del asesinato José Manuel Nava, autor, nada más y nada menos, de un libro en el que acusa al Presidente de la República de mediar por intereses bastardos para hundir una cooperativa, presionando mediante los organismos estatales, y dejando sin efecto el cobro de la deuda del Seguro Social del Excelsior una vez que ha pasado a

manos privadas de uno de sus amigos (¿y socio?) significaría algo muy distinto si no estuviera en el FORO DE LA PRESIDENCIA DEL GOBIERNO DE MÉXICO:
1) Les vale madres y dejan la burla contra el enemigo que ha sido asesinado, bien a la vista.
2) No se han dado cuenta de lo que tienen ahí, y hablamos de un Portal de la Presidencia del Gobierno de México que se supone está para poder recibir las inquietudes de los ciudadanos.

El portal de la presidencia de la república es un desastre y lo ha sido desde hace mucho tiempo.

Al parecer, los responsables del mismo se tomaron muy en serio aquella desafortunada frase que Vicente Fox ha repetido a lo largo de todo el sexenio: "en democracia, todo se vale".

Es una verguenza.

Como se acaba de ver, los emoticones sirven para que la puñetera progresía pierda el tiempo psicoanalizando a Dama Gatopardo y no se atreva a decir que es un corte de mangas y un escupitazo al cadáver de Nava.
Sr. Mier: El portal de ese lupanar y nido de tahúres que es la Presidencia de Méjico es lo de menos.

EL GATO, EL LAGARTO Y EL GRILLO

Ello es que hay animales muy científicos
en curarse con varios específicos,
y en conservar su construcción orgánica,
como hábiles que son en la botánica,
pues conocen las hierbas diuréticas,
catárticas, narcóticas, eméticas,
febrífugas, estípticas, prolíficas,
cefálicas también y sudoríficas.
En esto era gran práctico y teórico
un gato, pedantísimo retórico,
que hablaba en un estilo tan enfático
como el más estirado catedrático.
Yendo a caza de plantas salutíferas,
dijo a un lagarto: "¡Qué ansias tan mortíferas!
Quiero por mis turgencias semihidrópicas
chupar el zumo de hojas heliotrópicas."
Atónito el lagarto con lo exótico
de todo aquel preámbulo estrambótico,
no entendió más la frase macarrónica
que si le hablasen lengua babilónica;
pero notó que el charlatán ridículo,
de hojas de girasol llenó el ventrículo,
y le dijo: "Ya, en fin, señor hidrópico,
he entendido lo que es zumo heliotrópico."
¡Y no es bueno que un grillo, oyendo el diálogo,
aunque se fue en ayunas del catálogo
de términos tan raros y magníficos,
hizo del gato elogios honoríficos!
Sí; que hay quien tiene la hinchazón por mérito,
y el hablar liso y llano por demérito.
Mas ya que esos amantes de hiperbólicas
cláusulas y metáforas diabólicas,
de retumbantes voces el depósito
apuran, aunque salga un despropósito,
caiga sobre su estilo problemático

este apólogo esdrújulo-enigmático.

(Por más ridículo que sea el estilo retumbante, siempre habrá necios que le aplaudan, sólo por la razón de que se quedan sin entenderle.)

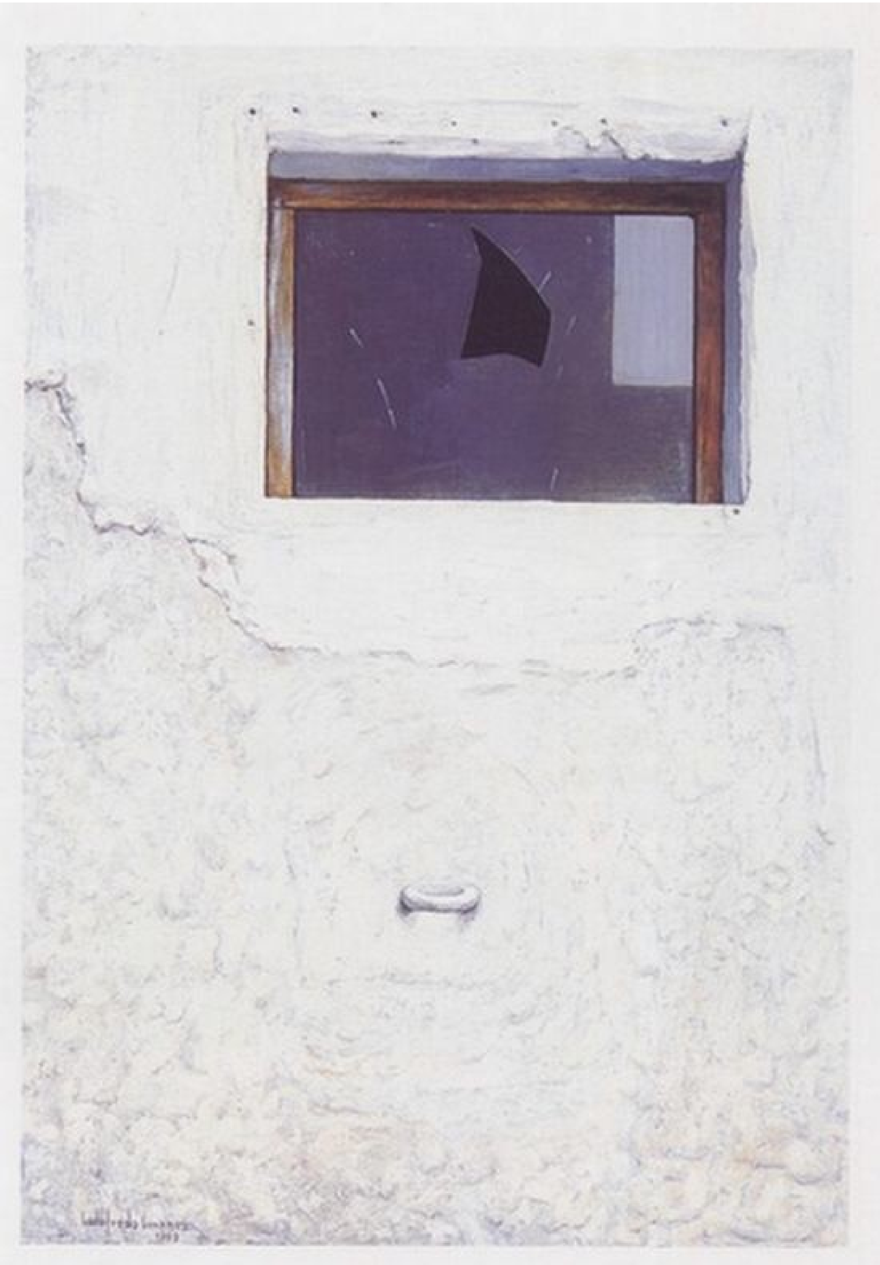
REALIDAD NOVELADA DE JOSÉ SÁNCHEZ ZOLLIKER SOBRE EDGAR ARROYO Y EL HERMANO INCÓMODO DE VICENTE FOX.



Cada día recibo un centenar de e.mail y no todos pretenden venderme Viagra, relojes Trolex o alargarme el pene. Algunos de mis corresponsales espontáneos me facilitan informaciones tendenciosas, más falsas que mi certificado de medidas 90-60-90 y mi diploma de Miss Camiseta Mojada. Y los remites suelen ser más falsos aún, porque, no sé cómo, los piratas informáticos pueden utilizar nuestro correo electrónico y nuestra libreta de direcciones para remitir mensajes. Es algo molesto no confiar a priori en que el remitente sea quien dice ser; pero a todo se acostumbra una.
Hay poco más de una docena de organismos y asociaciones que considero fiables,

bastante avezadas en los peligros de sabotaje informático, y muy rigurosas en sus informaciones, y el 9 de noviembre me llegó de una de estas fuentes dignas de crédito, una información sobre Edgar Arroyo, víctima de las insidias del clan Fox **, y la reenvié tal y como la había recibido, bajo el imperativo: *"Difunda esta información, sienta la satisfacción moral de un acto de libertad"* (Rodolfo Walsh, intelectual y periodista asesinado por la Junta Militar Argentina).
Mi admirado adversario y amigo, José Sánchez Zolliker, me contestó rapidamente, y me ofreció, en primicia informativa, lo que luego publicaría en su bitácora, Realidad Novelada, y que, desafortunadamente no podrán leer allí, porque hay a quien le ha molestado que se hagan las preguntas pertinentes sobre este raro asunto. Y digo raro, porque ha contado con la credulidad de quienes somos críticos acérrimos de la política y los enjuegues de la camarilla de Fox para avalar este asunto y difundirlo, y los costes del descrédito informativo sólo puede revertir en nosotros, al demostrar que somos unos pendejos o unos mentirosos. Porque al hacer las pertinentes comprobaciones para contrastar la información, confirmé punto por punto lo que ya no podrán leer en Realidad Novelada, porque se la han saboteado: así es que lo he recuperado de Bloglines para hacerlo público aquí:

El Clan Fox acusado de robo a un industrial en el libro "En el nombre de mi hijo"
Sun, Nov 12 2006 4:06 PM
Autor: Jose Sanchez Zolliker

Edgar Arroyo, "En el Nombre de mi hijo". Para él, significa su libertad. Para el Clan Fox, un negocio millonario...

Para el caso de que no conozcan este asunto:
Hace poco, un industrial de Aguascalientes, llamado Edgar Arroyo, denunció a los cuatro vientos que la Familia de Vicente Fox Quezada, Presidente de México, le ha querido robar -utilizando influencias y la fuerza del Estado- una patente por un medicamento que él inventó para salvar la vida de su hijo, José Andrés, a quien le descubrieron un extraño padecimiento genético-degenerativo de las mitocondrias (las células del cuerpo).
Según denunció Arroyo en prestigiados y distinguidos medios como Proceso, La Jornada, RadioFórmula y con Carmen Aristegui -quien le dio espacio en la radio y en su programa internacional de CNN en español-, tras el gran éxito obtenido con el medicamento, se acercó a él, Juan Pablo Fox Quezada (hermano del Presidente), quien le ofreció ampliar el "proyecto Andy" a la fabricación masiva, para según el Sr. Arroyo, compartirlo con México y enfermos del mundo de enfermedades de la Mitocondria y Cáncer.
Aparentemente, Juan Pablo Fox le llevó un cliente para comprar un terreno que Arroyo tenía en un paraíso de playa, con el fin de que a través de la venta se financiara el crecimiento del proyecto, pero al no querer vender Edgar Arroyo, se decide junto con Juan Pablo Fox a solicitar un crédito en Monterrey, por 10 millones de pesos dando como aval de pago ese mismo terreno.

Para no hacer el asunto más largo, el Sr. Arroyo dice que los Fox -con conocimiento del Presidente- y otros poderosos empresarios (se menciona por ahí a Alfonso Romo) intentaron apoderarse de forma ilegal de sus empresas, bienes y activos incluido tal terreno, y particularmente, de la patente del medicamento que salvó la vida de "Andy". .. Por defenderse, dice demandó a varias personas "poderosas" y la respuesta represiva del gobierno fue encarcelarlo sin conocimiento de causa, en Monterrey, Nuevo

León, demandado por Fraude.
El libro de denuncia, publicado por Editorial Grijalbo, fue escrito como “carta de despedida” para sus hijos en menos de cuatro días (¿?), debido a que el Sr. Arroyo fue encarcelado y temió por su vida, según dice, por la persecución de Estado de la que fue sujeto y las vejaciones y acosos de las que ha sido víctima.
¿Una historia más para documentar los excesos y abusos cometidos por la Familia Presidencial? ¿Una historia más que revela que Vicente Fox y familia, son capaces de complots para hacerse ilegalmente de un negocio millonario, a costa de vidas de inocentes…? ¿Una historia más que se suma a las de los hijos de Martha, una historia más que nos demuestra que México no ha cambiado?. Arroyo lo dice: él como muchos otros, votó por Fox y ahora estan decepcionados.

Duro, ¿no es cierto? Enterarse de estas cosas. Sobretodo cuando los medios de la tradicional izquierda, los *objetivos, responsables*, aquellos que hacen periodismo de investigación, le den este espacio de denuncia y nada suceda… ¿Saben porqué? Porque al menos de lo que yo he podido investigar, **¡todo indica es falso!**

Imagino mi afirmación, será triste noticia para los que quieren siempre identificarse con las causas del débil, del indefenso, y que por seguir sus emociones no “pierden el tiempo” en encontrar la verdad y no buscan, no investigan. Y de una vez, que quede MUY claro: **esto no es una defensa de los FOX. Es una defensa de la verdad.** Vean si no, algunos extractos de la investigación que realizó Ramón Mier, un vendedor de agroquímicos de Tamaulipas, en su blog:

Vendo agroquímicos, no soy periodista y por lo mismo no hago periodismo de investigación. Sin embargo, la semana pasada escuché una historia que me resultó tan difícil de creer que decidí hacer un poco de investigación en torno a ella.
Se trata de la historia de Edgar Arroyo quien acusa a Juan Pablo Fox Quezada, hermano del presidente Vicente Fox, de haber intentado apoderarse de forma ilegal y con el conocimiento y apoyo del presidente de sus empresas, varios de sus bienes y particularmente de la patente de un nutriente ultrasintetizado que él mismo desarrolló para salvar a su hijo de una enfermedad hasta entonces incurable.

Protengia, remedio a males inexistentes por sólo .75 dólares:
[…] Según Proceso “el investigador e industrial Edgar Arroyo” fue invitado a conocer al presidente Fox *“luego de hacer un descubrimiento que le dio celebridad internacional”*. Aparentemente fue una *“celebridad”* ultra secreta, pues las únicas referencias al Sr. Arroyo que arroja Google son hacia las notas de la Jornada, Radio Fórmula y Proceso así como a otros sitios donde se reprodujo lo publicado en ellas.
Por lo que hace a la enfermedad *“melliue mitocondria”* que es la que se afirma padecía el hijo del señor Arroyo tampoco pude encontrar información ni en Google ni en WebMd. Podría pensarse que se trata de una enfermedad tan, pero tan rara, que sería natural que no hubiera mucha información sobre la misma, pero más adelante en la entrevista se dice que otros 800 enfermos se han curado y que una empresa farmacéutica extrajera pagó 10 millones de dólares sólo por ver uno de los 24 capítulos de la investigación. Convenientemente se omite dónde y quienes realizaron el estudio de los 800 enfermos, el nombre de la empresa farmacéutica extranjera y como prueba de la efectividad de la cura se hace notar que el hijo del señor Arroyo hoy está sano, ¿habrá estado enfermo alguna vez de melliue mitocondria?
Y ahí, estimados lectores, es donde Ramón Mier le da en el clavo a este oscuro e “inofensivo” asunto, lleno de intrigas, abusos del débil en manos de ricos y poderosos, y demás adjetivos que hacen de toda publicación, un **best-seller seguro**.
Debo mencionarles, que yo mismo me interesé mucho del tema y me dediqué a

investigar a mayor profundidad el asunto que Ramon Mier hizo notar, y dedicándome a asuntos médicos, después de verificar y reverificar cada una de las fuentes que Mier utilizó, me decidí a consultar con más de 10 especialistas si es que tenían conocimiento de la existencia de tal enfermedad (***melliue mitocondria***). La respuesta fue unánime: NO.
Por ello, aún incrédulo, llegué a pensar que debido a que Proceso había sido el primer medio en tomar la historia, podría haber escrito mal el nombre de la enfermedad, y que otros medios al retomar la historia, copiaran el error como propio… Y resultó que no. De acuerdo con el mismo libro, con la fuente y el comunicado de prensa del Sr. Arroyo, así se escribe (es más, vuelvan a ver el vídeo que puse arriba y confirmaran que él le llama mellue mitocondria).
Así pues, aún no pudiendo creer que ni Proceso, ni la Jornada, ni RadioFórmula ni Cármen Aristegui, ni CNN en español hubieran hecho la tarea (¿no dicen pues, que son los medios de investigación por excelencia?), busqué por medios propios, cualquier posible variante del nombre, como melliua, mellue, melia, melio, melue, mellue, etc., no encontrando nada que sugieriera alguna similitud.
Hagan sino ustedes lo mismo en este enlace a google.
O en este otro, y comprobarán por sus propios medios, que efectivamente no existe mención alguna -salvo de algunas páginas de la Jornada, Proceso, etc., que han tocado el tema de la denuncia- de la extraña enfermedad (yo, a diferencia de Ramón Mier, no puedo creer que por más extraña que fuera la enfermedad de Andy, no sea posible que no exista referencia alguna en el Internet de nuestros días). Y lo mismo sucedió cuando lo busqué en otros idiomas, como en Inglés (que mitocondria se escribe mitochondrial), Francés, Italiano y Alemán.
Y tampoco -no sé ni porqué me molesté tanto para investigar el asunto - pude encontrar rastro ninguno de la extraña enfermedad en la Sociedad Norteamericana de Investigación de la Mitocondria (Mitochondria Research Society http://www.mitoresearch.org/), ni qué decir de la Wikipedia, enciclopedias médicas y por qué no, en el proyecto Mendelian Inheritance de la Johns Hopkins University, que es la más grande base de datos médicos que catalogan todas las enferemedades con componenetes genéticos (se incluyen las mitocondriales) conocidas a la fecha (va en su edición 13) como parte del proyecto del genoma humano de la National Library of Medicine de E.E.U.U. (pueden accesarla con el Entrez database searcher) que pueden consultar a través de este vínculo, que por si fuera poco, da automáticamente todas las variables de similitud alfanumérica de la búsqueda en cuestión.
Concluyo pues -salvo que alguno de ustedes sea tan amable de demostrarnos lo contrario- que la “rara enfermedad”, ¡ni siquiera existe!
Y retomo el artículo de Ramón Mier, que además, convenientemente encuentra la semejanza de la historia con la de la película Lorenzo’s Oil:
En cuanto a “Protengia”, que fue el nombre que le dieron al nutriente que curó al hijo del señor Arroyo solo encontré […que…] se vende como un nutrimento a base de proteína de pescado y […que…] “Protengia” es una marca registrada (no una patente como se afirma en Proceso) para un “macronutriente”, para una proteína. Ninguna mención a su capacidad para curar “melliue mitocondria” o ningún otro mal. No me sorprende pues que “Proyecto Andy” , nombre con el cual fue bautizada la iniciativa para “ponerlo al alcance de todos” (nobleza obliga) se encuentre, según la nota de Proceso “dentro de una empresa fabricante de galletas, leche malteada, golosinas, bebidas hidratantes y suplementos alimenticios”. […] Hace falta odiar intensamente a Vicente Fox y a todo lo que le rodea o ser muy estúpido para poder tragarse tantas patrañas. Al parecer Grijalbo estima que hay abundancia de personas que cumplen con alguno de estos dos requisitos o con ambos […]

Ojala cualquiera de esos que se hacen llamar periodistas, fueran tan éticos e inquisitivos

como Ramón Mier, pues como dije, él es el único ser -hasta donde yo sé- que se atrevió a investigar este asunto en un principio, a cuestionar la información de los medios "incuestionables", a no dejarse llevar por el sentimentalismo subjetivo de las causas del débil, del indefenso… requisito indispensable, para con objetividad, llegar a la verdad. ¿Qué es esto entonces?, ¿Un fraude? Al parecer, ese fue el cargo con el que fue encarcelado el Sr. Edgar Arroyo, que después de pagar su caución, se encuentra en lo que él llama libertad condicional… ¿Un golpe político para Fox orquestado por ahí? ¿Una estrategia para vender libros?
No lo sé (aunque puedo sacar mis conclusiones). Pero es terriblemente sospechoso. La duda se mantiene. En especial, porque utiliza la infalible receta para que odiemos al poderoso y queramos defender a una posible víctima, abuzando del espíritu del justiciero que seguramente terminará embarrado -y embarrando su prestigio- *en una estafa de un milagroso **elixir** de la vida, de un medicamento **curalotodo***.
Para concluir, sólo les dejo una **"extraña"** casualidad más. Cuando busqué en youtube el caso del Sr. Arroyo, encontré el vídeo que les puse que corresponde a una serie de 3, cuyos tags (etiquetas de búsqueda) son: Fox, Peje, Robo, GIA… Yo les pregunto. ¿Qué demonios tiene que hacer ese vídeo con un tag del peje? ¿Porqué los principales difusores de esta historia han sido medios promotores del peje?… **Yo por lo pronto, NO compraré el libro**.

Y sólo me queda desear que los técnicos informáticos sean capaces de poner en pie la bitácora de mi cuate José Sánchez Zolliker, y que nunca falte para ponernos en causa. Porque en un mundo donde todos estuviéramos de acuerdo, la falta de rigor sería terreno abonado.
Pido disculpas a quienes envié la información con el ruego de que la difundieran, fiada de la solvente honorabilidad periodística de las fuentes. Y es que en estas cuestiones, no hay que fiarse, sino comprobar la información, aunque venga avalada por Proceso, Reforma, Carmen Arístegui,la CNN... y un libro de Edgar Arroyo de 250 páginas, editado por Grijalbo.

Una duda. No será el señor Zolliker un heterónimo del señor Fontcuberta?. Y si es así, será el señor Arroyo un astronauta? En definitiva, murió Stalin envenenado por una sobredosi de protengia? Es Gatopardo Trotskista? Es Vicente Fox, en realidad, Ramon Mercader?

Y yo, seré Iker Jiménez?

Esas sagaces presuntas me las estoy haciendo a raíz de este asunto, pero con una variante al final, doblada en enfática exclamación:
¿¡Tanto se nota que soy mema y me creo lo que sea!?
Desde que uno de mis novios me explicó cómo había dejado a dos de mis mejores amigas preñadas sin que mediara contacto físico ni sexual, sino al tener una polución bañándose en la misma piscina que ellas, no me lo había vuelto a plantear con esta acritud.
¿Y dice usted que sospecha que pueda haberse posesionado de usted Iker Jiménez?
Pues bien, si dice usted cosas como "estamos convulsionados por el relato", vaya al cura de su parroquia y que le haga un exorcismo.
Respetuosamente.

Realmente yono tuve teimpo de investigar, la historia desde el inicio se me hizo extraña. Hay muchas cosas que se hacen con tintes politicos, no soy abogado y por tanto mis conocimientos de la leyes son limitados pero es igual con el caso de los abogados que ahora demandan a Fox por el no haberles pagado la defensa que de él hicieron hace seis años. Creo que si son tan buenos abogados saben que la exigencia de un pago si se

litiga por via administrativa prescribe al año y por via civil a los tres años si no ha mediado un reclamo oficial del mismo, es decir si no han interpuesto algun tipo de demanda y ahora pasados seis años los señores hacen esto tal vez sabiendo que la demanda no procederá pero por lo pronto ya salieron en radio televisión y demás medios.
Y mira que a mi Fox me cae gordisimo.
Un abrazo.

Ciertamente, Edgar Arroyo cuenta una historia a leguas inverosímil. Conociendo a Carmen Aristegui, me llamo mucho la atención la forma de realizar la entrevista en CNN; mostrando un inusual desenfado haciendo preguntas como novata sin cuestionar ni profundizar en ninguna de las afirmaciones de Arroyo, casi como si le hubieran dado una lista de preguntas a realizar. Tengo mas de 20 años trabajando en los medios durante los cuales he visto lo cotidiano que es que algún individuo o compañía compren tiempo aire para que se les realice una entrevista y aunque para el publico en general pueda parecer una entrevista espontánea o de reportaje, en realidad no lo es ya que se sigue una línea muy clara a favor de los intereses de quien paga por el espacio. Esto podría dejar en entredicho la ética y moral tanto del medio como del periodista pero ciertamente no siempre se hace una investigación para comprobar la autenticidad de la historia sobre todo cuando hay dinero de por medio y el contenido parece ser lo suficientemente espinoso como para generar “raiting” ya que el valor de este tema no es la novedad medica o científica sino la acusación, fundada o no, que recae sobre una figura que ha estado en el ojo del huracán durante tanto tiempo.

Pueden existir muchas investigaciones y articulos referentes a la veracidad de Edgar Arroyo y su historia, y los medios encargados de informarnos pueden hacernos la informacion desde su punto de vista y podernos afirmar lo que ellos quieran. Pero yo t pregunto a ti: Alguna vez has estado en una situacion como la que vivio Edgar al tratar con todos los medios de salvar a su hijo? porque yo creo que todos seriamos capaz de buscar hasta debajo de las piedras una cura para un hijo k se nos esta muriendo, gracias a la informacion q nos llega atraves de los medios tomamos parte de uno u otro lado pero yo te pregunto alguna vez has probado alguno de los productos y has sentido que te funcionan o no como para afirmar que sirven o no? yo si! y no soy mas que una persona no toma partido ni preferencias por nadie en especial simplemente sin prejuicios lo probé y me funcionó! Me gustaria que asi como das esa informacion de inverosimilidad a cerca de este producto y siendo tu punto de vista responsable por informar a tanta gente tambien presentes el testimonio de las personas que han tomado protengia y se han curado.

YO EMPECE A TOMAR PROTENGIA POR RECOMENDACION DE UNA AMIGA. AL POCO TIEMPO COMENCE A SENTIRME PEOR Y A DOLERME MUCHISIMO LAS ARTICULACIONES. LE PREGUNTE A MI AMIGA POR LA CAUSA DE ESTA DOLENCIA Y ME DIJO QUE ESO SIGNIFICABA QUE EL MEDICAMENTO ME ESTABA HACIENDO EFECTO. YO ESPERABA OTRO TIPO DE RESPUESTA, MAS PRECISA Y TECNICA PUES. CONSEGUI UNA DIRECCION DE CORREO ELECTRONICO DE LA COMPAÑIA Y LE HICE LA MISMA PREGUNTA AL AREA DE SOPORTE O ALGO ASI. ME CONTESTARON EXACTAMENTE LO MISMO QUE MI AMIGA. DE NUEVO UNA RESPUESTA TONTA MAS BIEN, ESTUPIDA. POR SUPUESTO, DEJE DE TOMAR PROTENCGIA Y MIS MALES CESARON EN 3 O 4 DIAS. QUEDE COMO ANTES, PUES.

POSTERIORMENTE ME PUSE A INVESTIGAR SOBRE ARROYO Y MI CONCLUSION ES QUE TODO ES UNA MENTIRA, DESDE LA EXISTENCIA DE LA ENFERMEDAD MISMA HASTA EL PREMIO NACIONAL DE BIOQUIMICA EN USA QUE DICE ARROYO RECIBIO.

Y DEFINITIVAMENTE, EXISTE GENTE QUE PUEDE PENSAR QUE SE CURO DE ALGO DEBIDO A PROTENGIA PERO QUIERO DECIRLES QUE ESO SE LLAMA EFECTO PLACEBO. Y YA NO VOY A DECIRLES QUE EFECTO ES ESE A LOS QUE NO LO SABEN ENTRE LOS CUALES ESTAN SEGURO LOS CREIDOS. SI QUIEREN SABERLO, TOMENSE LA MOLESTIA DE INVESTIGAR.

bien, para comenzar me parece un comentario (no una investigacion), lo que zolliker realizo, el declara que como es posible que no se sepa nada de una enfermedad rara, perdon disto de su punto pero ¿es que acaso se puede saber mas de las enfermedades conocidas que de las enfermedades raras?, si es por que se llamarian raras, ahora bien usted me dice que consulto en google o rayos estonces estoy perdido si a eso le llama investigar, usted habla del producto curatodo pero era solo para curar solo una enfermedad es decir es un mentiroso, se contradice o lo cura todo o solo cura una sola enfermedad, investigacion, ja ja ja, en primera el no digo que estuviera preso en monterrey si no en san pedro, gran error para un investigador, por que los datos que usted proporciona en primero son inexactos, segundo usted no defiende la verdad debiende a los fox y lo reafirma al decir que solo los que odian mucho a los fox apoyarian esto es decir si yo lo apoyo es decir al señor arroyo, ya soy un anti-fox por favor quien es usted para categorizar, yo podria decir que solo los que aman a fox estan en contra del señor arroyo, usted dice de los tags de internet y que acaso los tags los puso el señor arroyo, por favor usted es un foxista de hueso colorado y un desvergonzado, yo solo defiendo la verdad, por favor, investigue y cuando la investigacion tenga lugares y sucesos exactos (san pedro no monterrey) entonces le podre tomar en serio.

No tengo sitio Web, pero como ser pensante la historia no me sonó desde el principio. Estoy acostumbrado a escuchar de productos milagro para enfermedades incurables. Como médico, sería el primero en saltar de gusto porque todos esos remedios tuvieran efecto real. La triste verdad es que estafan familias y dan esperanzas falsas. Una

felicitación por la búsqueda en la red, que cuando se hace con una poca de metodología y con sinceridad, puede llegar a ser confiable. Es triste que la noticia la hayan difundido sin consultar lo básico Cualquier base de datos médicos de las que se han mencionado da al menos un mínimo de referencias de las enfermedades que si existen y que se soliciten en su buscador. Esta "rara" enfermedad, estoy convencido que no existe. Saludos cordiales.

Definitivamente no creo que sea coincidencia que todas las personas que yo conozco que han tomado este nutriente hayan tenido muy buenos resultados. Algo que no podian lograr con la medicina que les recetaban... Estoy hablando de personas con enfermedades cronicas.

conozco personalamente al señor Edgar Arroyo, y he tenido oportunidad de estar en la planta de GIA. Yo personalmente pensaba en todo esto como una tomada de pelo, y mi madfre me "obligó" a ir (tengo 31 años. Algunos conocidos que encontré ahí, enfermos de sida y cancer, estaban para dar su testimonio. Eso sin contar que yo mismo ví a doctores del estado de TExas muy interesados y haciendo preguntas científicas (si es que cabe el término) muy específicas a los doctores de la planta. La reacción de los doctores norteamericanos era de asombro, pues ninguna duda se quedó sin respuesta. No soy investigador, pero estuve ahí, y doy mi testimonio, si de algo sirve. Por otro lado, como explicaría que el producto no solamente se vende en Estados Unidos, sino que en muchos consultorios incluso lo recetan?. La FDA no ha hecho ningún escandalo al

respecto, y no creo que fuera inteligente que un doctor estadounidense pusiera en riesgo su cédula por mandar productos nocivos o inútiles a la gente, sabiendo lo que ganan ellos allá.

Independentemente de la historia que haya detrás de este proyecto, de los que la quieran creer y los que no, a pesar de los que insisten en poner el pie al talento mexicano con "argumentos" baratos y absurdos, Proyecto Andy ha mejorado la salud de miles de personas, tal como lo avala el DIF en diferentes ciudades, a través de Protocolos de investigación realizados en menores de 5 años. No se trata de ningún elixir de la vida ni de ningún medicamento curalotodo como lo mencionan anteriormente, sino de aminoácidos que mejoran la funcion de las membranas celulares y por ende al organismo, y si el Sr.Mier es tán inquisitivo y le gusta investigar a fondo, podría leer la tesis de Linus Paulin y la lógica biológica e incluso cualquier médico le puede hablar de esto. Existen también asociaciones de niños con Parálisis cerebral, síndrome de Down e incuso Autismo en los que con la ayuda de este nutriente que son coloides protéicos se ha logrado un gran avanze neurológico. Los testimonios de muchos de los padres con respecto a los avanzes de sus hijos a partir de la ingesta de este nutriente es claro y por si acaso están pensando que es para hacer puro negocio lamento decirles que en muchos de los casos los tratamientos son otorgados sin costo alguno sobretodo cuando la población es marginada y vive en paredes de cartón. Olvide comentar que la SEP en el estado de Puebla (y en otros más) ya ha autorizado la introducción de algunos de estos alimentos en sus coperativas y tiendas escolares por los resultados de las investigaciones realizadas y los beneficios en la población escolar, así mismo el DIF también ha realizado un convenio para poder otorgarlos a la población como parte de los desayunos. Repito esto en el estado de Puebla, aunque existen muchas otras ciudades, estados e incluso países que también se han incorporado al proyectado.

Hoy estuve en un evento en el Parque Niños Héroes (de MTY) y presentaron la información de ProteGIA; me sorprendió porque la reunión era para cosas de cuidado del medio ambiente y el reciclaje... nada que ver (según yo, con lo de GIA, salvo la forma [supuestamente de cultivarlo] pero bueno) el caso es que estuvieron platicando y afortunadamente nada mas fue hasta la parte del Multinivel (porque para los que no sepan, esta empresa ya desarrollo un plan de ese tipo) platicaron historias y todas me llamaron la atención:
- Colima, Colima premio nacional ó # 1 en aprovechamiento escolar
- Edgar Arroyo, viajara a Suiza a la tercia del premio Nobel
- etc
Aparte, me toco escuchar que les hacían un reportaje o mencionaban de los productos en el programa de Hits 106.1, con la conductora Adriana Díaz; al parecer le toco a MTY que vinieran a hacer promoción.

Yo he leído muchos comentarios en contra, de hecho la mayoría, y algunos otros a favor. Leí el libro y me quede con muchas dudas respecto al producto, ya que no se profundiza de manera científica, ni se muestran anexados ningún documento referente a los estudios realizados en pacientes de cáncer, etc.
Yo tengo 2 años padeciendo cáncer y he probado un poco de todo, cuando alguien te recomienda algún producto y te dicen que te va a ayudar, tienes la esperanza de que sea real y lo tomas. Con el tiempo aprendes a no confiar de todo y vas seleccionando lo que más confiable te paresa y mas te convenga. YO no creo que ninguno de éstos productos te curen al 100%, sin embargo creo que ayudan a mantenerte más fuerte y en mejores condiciones para seguir tomando tratamientos tan agresivos como los ya conocidos para el cáncer. tengo 2 meses tomando el producto PROTENGIA, sólo dos de sus frascos, uno de los cuales contiene omega 3, y otro contiene vitamina "c", extracto de semilla de uva y té verde. Sé perfectamente que ésto no me va a curar, aun que estén adicionados con la macroprotenina de origen marino que dice tener, mas pienso que me ayuda a estar nutrido. Si yo fuera investigador y tuviera conocimientos de medicina, química, bioquímica, agroquimica etc. no me empeñaría en investigar a ninguna de las personas que se mencionan y si es verdadero o falso lo que dicen y preferiría ir directamente al producto o a la fábrica y bajo estrictos métodos de investigación científica llegar a una conclusión real de lo que están hechos éstos productos y cual seria su capacidad para ayudar a enfermos y sanos. Gracias por permitirme el comentario! saludos!

Si bien hay quien dice que ha tomado el Protengia y le ha ayudado (lo cual no dudo), esto no es un medicamento ni está patentado, solamente se ha sometido la solicitud de patente, lo cual puede hacer cualquier persona que tenga alrededor de 7 mil pesos. Adicional, para quienes dicen que la FDA no dice nada y además que los médicos lo recetan, les comento que al no ser un medicamento, no tiene control por parte de la FDA ni de la COFEPRIS ni de ANVISA ni INVIMA ni ninguna otra autoridad sanitaria de América. Un médico te puede decir que te mastiques un chicle, pero eso no hace medicamento al chicle o que tomes más agua, y eso no hace un medicamento registrado al agua. Reitero que no critico ni niego que algunas personas se sientan mejor, pero la nota publicada en este blog no ataca las "propiedades curativas" del mentado producto, en este blog solo se aclara que la nota inicial es una mentira y hoy 7 años después lo sigue siendo al no existir una patente de este producto ni registro como medicamento. Solo es un producto milagro más que se aprovechó de una mentira para su comercialización al aparecer en varios noticieros y publicaciones de caracter nacional, sin importar a quién difamaron en el proceso, lo cual habla del carácter moral del individuo "altruista" que piensa solo en ayudar al prójimo.

A LA ABUELA GATA

Tus cuentos, gata, son una novela
de tu proteico ser, trozos de vida,
simulas que la pasas distraída
y águila eres que en el aire vuela.

Descubres todo lo que el mundo cela

y aunque yo te quisiera por querida,
en esta ingenua edad tan desvalida,
mejor será tenerte por abuela.

Cada relato tuyo es epigrama:
sentencioso, muy breve, pero agudo,
y con una moral que nos reclama,

pues quema siempre como interna llama,
incitando a gritar al que esta mudo,
y obliga a despreciar a quien nunca ama.

Por favor, descárguenlo, reprodúzcanlo y faciliten su difusión en DVD, y recuérdenlo cuando les digan que el conflicto de Oaxaca es por culpa de unos cuantos maestros revoltosos y violentos. Y que son una minoría.
Estos son los momentos previos: el ejercito, 4.500 soldados preparados para la guerra, armados y pertrechados, con tanquetas, atacó a la población, pero no pudieron vencerlos.
Reflexionen qué grado de desesperación puede mantener la resistencia de quienes, como dice Connie Sachs , sólo tiene palos, piedras, machetes, y botellas de gasolina para luchar.
Y de paso, vean el resto de los vídeos de Salón Chingón, que tengo en enlaces de portada desde el principio. Y comparen con las informaciones que nos dan y nos hacen tragar desde las grandes cadenas de televisión.

DOS ATÍPICOS COMPAÑEROS DE BITÁCORAS: LUIS MUIÑO Y DIEGO CATALÁN

El habitat del Unicornio, de Luis Muiño, fue la primera bitácora que conocí: allí acudíamos los más dispares personajes, y al hilo de sus artículos surgía algo difícil de definir y reproducir: con libertad y con humor, la mayoría de los participantes ofrecía su opinión sin centrarse en su bonito ego, tratando de expresar sus ideas sin pasar como una apisonadora por encima de las de los demás. Luis Muiño fue nuestro anfitrión y nuestro interlocutor, capaz de plantear con cada artículo una historia paradigmática que estimulaba nuestra imaginación y nuestra sed de saber y comprender. Un buen día cerró su bitácora, por imperativos de disponibilidad, y nos dejó en un duelo.
Luis Muiño es un psicólogo atípico, inclasificable, creativo, con un fino sentido del humor, y con una visión piadosa y realista de los seres humanos, adquirida como cooperante en Médicos Sin Fronteras, Médicos del Mundo, y en la Casa de Acogida para Niños Refugiados de La Merced, en los campos de refugiados durante la guerra de Kósovo, en los últimos terremotos de El Salvador; en el Equipo de Incidentes Críticos en Angola, y en la Unidad Móvil de Madrid que presta atención a prostitutas y a toxicómanos. Esta biografía y estas características vitales no son, reconozcámoslo, las de un psicólogo típico, ni la de uno de esos blogger apasionados por sus exquisitas deposiciones caligráficas; así es que saber que este rarísimo espécimen ha abierto otra vez El habitat del Unicornio es una maravillosa noticia, que comparto con alegría, sabiendo que siempre nos encontraremos con un estimulante artículo, tan imprevisible como su autor.
Y otro hallazgo de los últimos días es la bitácora El romancero de la Cuesta del Zarzal , que es, según explica su autor, *"una antología de romances de la tradición oral del siglo XX, que es parte de un proyecto ambicioso de poner en manos de todo el mundo lo que considero un patrimonio de la humanidad: el conjunto del archivo del romancero reunido por Ramón Menéndez Pidal y María Goyri, y por mí, con la colaboración de múltiples individuos e instituciones. (...) El proyecto consiste, de una parte, en la edición paleográfico-digital de toda la documentación del que denomino "Archivo del Romancero de la Cuesta del Zarzal" (formado por el "Archivo del Romancero Menéndez Pidal / Goyri" más el "Archivo Sonoro del Romancero Débora Catalán") y, de otra, en*

extraer de él una "corona radiata" del romancero oral del siglo XX (la presente antología), como anticipo de mi futuro libro, "Romancero y monstruo imaginado".
Su iniciativa, al recoger y plasmar los romances de la tradición oral, transmitida de padres a hijos, a lo largo de los siglos, al margen de la edición para eruditos y estudiosos, que se eternizan en análisis cifrados y de interés puramente académico, es un saludable intento que pone a nuestra disposición su exhaustivo conocimiento del Romancero, y su discernimiento crítico a la hora de presentarnos lo que forma parte de nuestra herencia cultural.
Diego Catalán, a quien retraté sin su permiso en *"Un gato en el Olivar de Chamartín, 1"* , y *"Un gato en el Olivar de Chamartín, 2"* , fue catedrático de Historia de la Lengua en las universidades de Canarias, Alemania, Wisconsin, California y Madrid, y tiene en su haber una asombrosa capacidad para saltarse todas las conveniencias sociales y de protocolo académicos, lo que lo ha convertido en un estupendo y divertido ejemplar de tábano cojonero de los eruditos, a los que da cien vueltas sin mucho esforzarse. Sus clases, su relación, y sus explicaciones han sido, para muchos, lo único apasionante de su paso por una Universidad adocenada y conformista.

Y como no: gracias. Muchas gracias...

Pero ya sabes que no existimos, coexistimos. Que no vivimos, convivimos. Y que por eso pensar no puede ser masturbarse las neuronas...El hábitat del unicornio, sea lo que sea aquello (que todavía no lo sé) sois tú y muchos más. Y también yo (aunque eso último, curiosamente, lo acabo de descubrir hace poco).

No conozco la blog de Diego Catalán, ahora iré a ver, pero si he leído a Luis antes de que cerrase su bitacora y desde luego desde ayer que me enteré, por su visita, que habia abierto de nuevo, cosa que me alegra enormemente.

De acuerdo, aunque de Diego, como Trini, conozco menos.
A Luis le conocí primero a través de Radio 5 y me enganchó porque desmitificaba todo lo que peor me caía de psicólogos y psiquiatras y porque habla "a ras de suelo".
Incluso su "inglés madrileño" me cae bien.
Abrazos a todos.

Querida Gata: Definitibamente la blogosfera crea nexos muy sólidos, se llega a conocer gente de diversos tipos, formas de pensar, diferente nacionalidad etc, algunos jamás se llegan a conocer en persona pero se llegan a querer como se quieren a los amigos que por circunstancias de la vida están distantes.
Tu recomendación es una carta de presentacion invaluable, asi que los visitare.
Un gran abrazo y por aqui ando de nuevo.

Lo de Luis es algo serio.
Hace mucho que lo leo, creo que casi del principio. Es de admirar, la verdad, como multitud de bitácoras que apenas conocemos, que pasan desapercibidas, por delante de nuestras narices y ni nos fijamos... Demasiadas. Nos centramos en unas pocas por falta de tiempo y perdemos mucho en ello.
Leo a Luis y muchos otros, y luego pienso que debería cerrar la mía, que solo estorba, distrae lo de veras interesante.

EL ÚLTIMO VIDEO GRABADO POR BRAD WILL, ACABA CON SU MUERTE

Brad Will era corresponsal de Indymedia , en Oaxaca. Quiso que se supiera lo que

piensan, viven y opinan los que no tienen quien los escuche. En su último vídeo grabó el relato del acoso incesante de los sicarios que secuestran y asesinan, pertrechados con armas de fuego a la gente que mantiene las barricadas, y las defienden con su rabia, su indignación, con palos y piedras frente a las balas. Brad Will iba armado con su cámara de vídeo y su deseo de ofrecernos el testimonio que nos hurtan en las televisiones oficiales. Y encontró la muerte.

Brad Will en Oaxaca, poco antes de ser asesinado.

Quince personas han sido asesinadas en Oaxaca desde que comenzó el conflicto hace casi seis meses. Durante las celebraciones del Día de los Muertos, la APPO colocó 15 ataúdes en una ceremonia de recuerdo. También se rindió tributo a otras treinta y dos personas desaparecidas durante el mandato del gobernador Ruiz.
El video de Brad Will dura 16 minutos, recoge los testimonios de gente del pueblo de Oaxaca, un ataque de sicarios armados, que disparan contra ellos, y termina justo cuando es herido de muerte.

Y estos son sus asesinos, sicarios a sueldo del gobernador Ulises Ruiz: Abel Santiago Zárate, regidor de Seguridad Pública, a la derecha, viste de camisa roja; la persona que aparece en tercer lugar
–de izquierda a derecha-, es un habitante de la colonia Felipe Carrillo Puerto

Aunque por culpa de mi viejo PC no he podido escuchar bien el sonido del video las imagenes son impresionantes, me ha impactado la de una mujer que decía "no somos maestros somos pueblo".
Al parecer ya han detenido a Santiago Segura, concejal del PRI y a Manuel Aguilar jefe de su escolta, pero todavía quedan tres que están huidos y, seguramente, protegidos por Ulises Ruiz que, al parecer, todavía ni ha dimitido ni ha sido cesado por Fox que se ha limitado a enviar el ejercito a aquella ciudad.
No son estas las imagenes que la prensa mundial nos ofrece de Mexico. A muchos no les interesa que esto se conozca.
Gracias por darlas a conocer.

Manuel Duarte Téllez probablemente el mas viejo luchador social de nuestro país con 100 años ocho meses de edad; activista sindical, ex-líder ferrocarrilero, ex-preso político en múltiples ocasiones. Nacido en el estado de Zacatecas, a los dieciséis años fue miembro de la Juventud Socialista y posteriormente del partido Comunista, lucho junto a Valentín Campa y Otón Salazar, después con Demetrio Vallejo; fundador del desaparecido Frente Zapatista de Liberación Nacional, consejero de nuevas luchas y actualmente adherente a la Sexta Declaración de la Selva Lacandona,; subió al cofre de la camioneta y dijo a los manifestantes:
¨hace ochenta años que me encontraba con una generación Joven, como ahora, pero esa generación ya no existe, ahora trabajo con las nuevas. Soy un estudioso de las ciencias sociales y les digo que este ciclo histórico esta llegando a su fin, es el momento de no discutir cuestiones locales, cuestiones de gremios o de ajustes internos. Ahora,

hay que discutir el cambio definitivo, un cambio de una nueva mujer, un nuevo hombre, cariñosos con sus hijos y con el mundo, educados y cultos. Todo esto lo van hacer ustedes y posiblemente yo todavía no me vaya a morir. Ahí van los compañeros de Oaxaca, ahí van todos los compañeros, ahí va el Subcomandante Marcos y 10 millones de indígenas que están apoyando y que se están movilizando junto a nosotros, como en la revolución, ellos que han sacrificado 500 años de lucha están con nosotros. Tenemos que cambiar el sistema ejecutivo, el legislativo y tenemos que cambiar el sistema judicial, que vaya el pueblo al presidente y los diputados vayan al pueblo¨
Ese es el pueblo del que habla esa mujer: curtidos en todas las batallas y hartos de sufrir injusticias.

Nuestro viejo conocido, el terrorismo de estado, se vista como se vista, siempre hace lo mismo: además de asesinar, dinamita a la también vieja democracia burguesa cuando ésta ya no le sirve a sus propósitos.
Sin embargo, la lucha popular debe ser nueva, como nos cuenta Aurora que dice Manuel Duarte. ¡Qué razón tiene! La lucha popular ahora consiste en transformar a la vieja democracia para copar el poder mediante el acceso de nuestros hijos a la educación y a cultura contra la vieja oligarquía que lo impide a balazos.
Adelante. Venceremos (si ellos no se cargan antes al planeta entero).

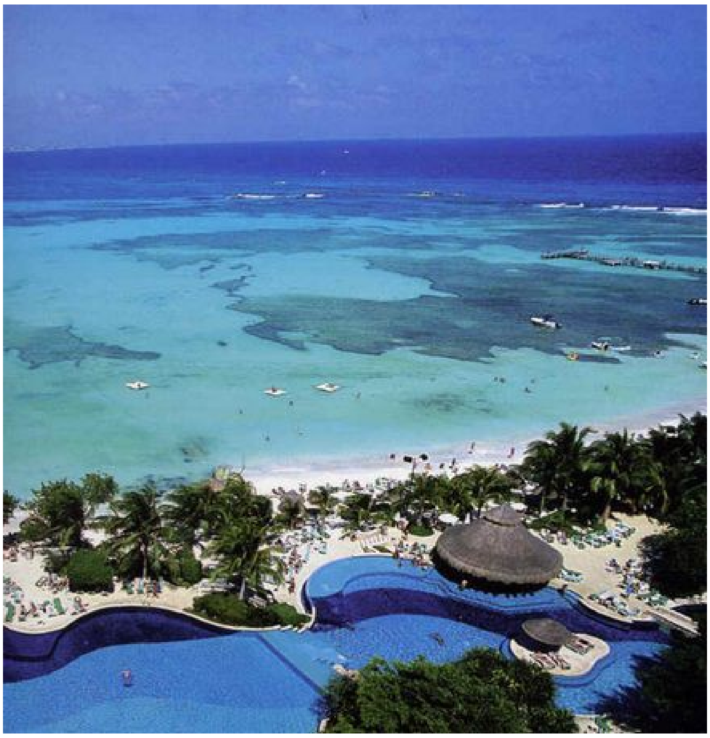
ESTE ES EL PARADISÍACO CANCÚN, MÉXICO, ADONDE VAMOS DE VACACIONES



No podríamos enterarnos del trato que reciben los ciudadanos mexicanos que acuden a una marcha pacífica contra la represión y la violencia policial, si no existieran los medios alternativos que informan de lo que ocurre, como Expresión Libre, y otros cuantos, cuyos periodistas corren el mismo peligro de ser secuestrados, desaparecidos, asesinados, que asumen quienes molestan a los poderosos en México.
Y el problema, que no se discutirá en la Cumbre Iberoamericana, la brutalidad institucionalizada contra los ciudadanos que protesten, reivindiquen o denuncien los atropellos, es la espita que puede desencadenar una guerra abierta, hasta las últimas consecuencias, porque para la mayoría de mexicanos no hay esperanzas ni otras expectativas que ser golpeados, masacrados, encarcelados, y privados de los derechos humanos más elementales.
Este es el Cancún paradisíaco que los turistas disfrutan: el paraiso también, de los pederastas, de los narcotraficantes, de los políticos cómplices y asociados con ellos, y el de una policía tan peligrosa y sádica como los delincuentes, que golpea, secuestra, y coloca pruebas falsas y actua al margen de la legalidad y con total impunidad. Como en Atenco. Como en Oaxaca.

Estas fotos demuestran que los manifestantes marchaban usando un solo carrril y jamás bloquearon el tránsito

Aqui se ve que el gobierno de Cancun fue quien bloqueó totalmente la circulación de la zona hotelera desquiciando el tráfico. Luego culparon a los manifestantes

¿Violencia proporcional y necesaria?

Salvajismo. Un sexagenario con la cabeza abierta y manos arriba

Ningún manifestante agredió en ningún momento a la policía

Arrestos de manifestantes pacíficos con lujo de violencia

Trato a los detenidos

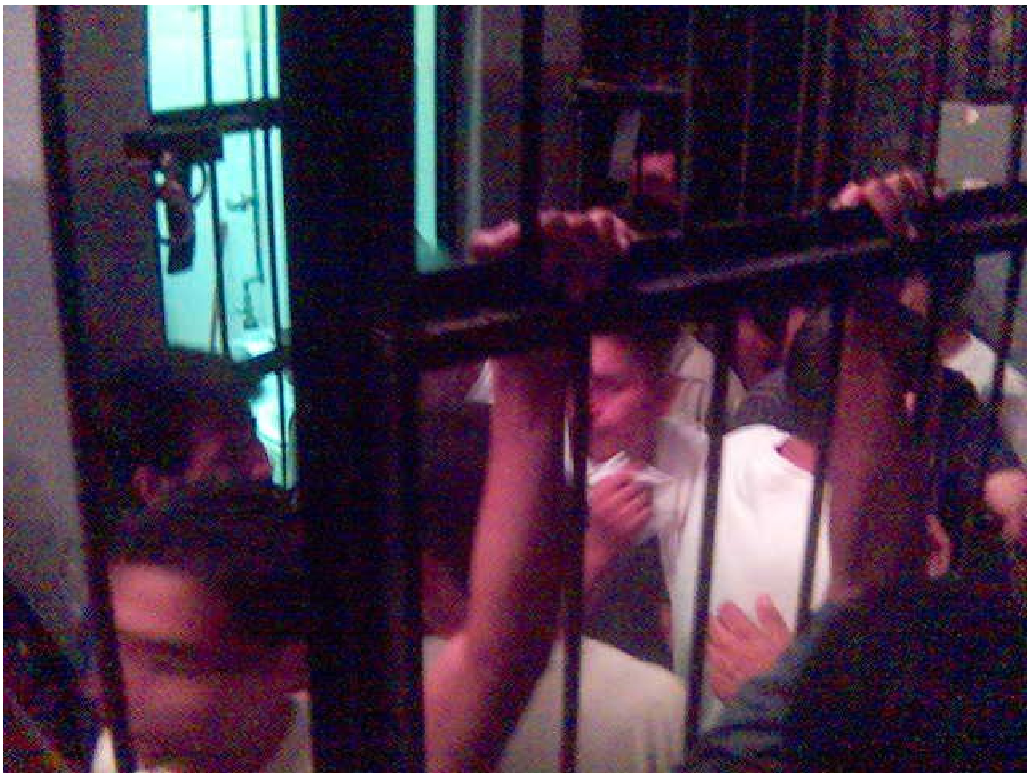


Foto enviada por un teléfono móvil: casi 500 detenidos hacinados

Más de 300 Mujeres detenidas ilegalmente, hacinadas, privadas de agua e incomunicadas durante 30 horas

Escucho en una emisora que en la Cumbre de Uruguay se ha aprobado una protesta contra la valla que la Administración Bush quiere levantar en la frontera mejicana. Dicha protesta ha sido firmada por Zapatero y el Borbón, o desconocen que en Ceuta y Melilla también hay vallas o tienen la cara tan dura como el cemento que inunda nuestras costas.
Cancún, Santo Domingo, Cuba... son destino exóticos para muchos españoles que vuelven sin conocer la realidad de esos paises ya que en la semana que están por allá no suelen salir del hotel. En los mismos hoteles les indican que es peligroso salir de allí.
Un abrazo gatita.

ADEMÁS DEL HOMO NOVUS, LA INFESTACIÓN DE CAMPOS DE GOLF

Primera parte:

ADEMÁS DEL MEJILLÓN CEBRA, LA INFESTACIÓN DE HOMO NOVUS

Fiel a los principios del periodismo de investigación, he intentado camuflar una garrafa de cinco litros de agua. La cajera no ha dicho nada sobre la gabardina que tapaba la botella, pero ha añadido su precio a mi cuenta, y mentalmento ha debido de hacer otra muesca en la culata de su arma detectora de viejas ladronas. Luego he tratado de esconder la garrafa en el autobús, debajo del asiento, y al llegar a mi destino me he dirigido a la puerta, pero antes de bajar, media docena de ciudadanos me habían alcanzado para entregarme los cinco litros de agua embotellada. He entrado a un supermercado grandisimo y la he dejado con otras garrafas de la misma marca, para ocultarla, y cuando iba a salir, el departamento de Seguridad al completo me ha rodeado, y al cabo de dos horas me ha liberado a condición de llevarme la garrafa de marras, pagándola en caja, por supuesto, con la amenaza de que la próxima vez que me vean llevarles mercancías de la competencia, llamarán a los servicios sociales y me recluirán en un geriátrico donde César Vidal da charlas a los parroquianos.

Desmoralizada, harta, y creyendo que se debía a cierta pérdida de destreza en mis dotes de quinqui, he hablado con mis nietos más listos, con los que he apostado una de mis tartas de manzana, con ralladura de corteza de limón, y caramelizada por encima, si logran pasar de matute cinco litros de agua. Los tres han venido a contarme su fracaso,

con una honestidad que no han heredado de mí, y para consolarlos, los he invitado a la tarta descomunal que había preparado por si lo lograban.

Bueno, si es tan difícil despistar cinco litros, ¿cómo es posible que el Servicio de Protección de la Naturaleza, las diferentes Policías autonómicas, los diferentes cuerpos de Policía y de la Guardia Civil no encuentren a los que roban millones de litros de agua? Medio Ambiente dice que "*trata de poner orden y frenar el descontrol, como el ocasionado por los numerosos pozos ilegales* (se habla de medio millón, pero es difícil saber la cifra exacta), *que sobreexplotan los acuíferos, y detraen para un uso particular un recurso que es de todos."* Según Adena, se extraen ilegalmente 3.600 hectómetros cúbicos de agua subterránea al año, mientras que se extraen 4.500 hectómetros cúbicos legalmente .

Seguramente es que no han mirado bien con el *Google Earth* los gigantescos depósitos de agua que salpican nuestra *"España seca"*, y que está siendo uno más de los negocios más boyantes de la economía sumergida.

Y por si fuera poco, la red de tuberías son del año de la polka, tienen fugas y se estima que lo que se pierde en una ciudad como Valencia es el equivalente de lo que se proyectaba obtener del trasvase del Ebro, mediante una obra de ingeniería costosísima contando con unos excedentes inexistentes en el Ebro. No obstante, entre todos los proyectos megalomaniacos, no se les ha ocurrido lo de revisar y reparar las fugas de la red de suministro de agua potable.

Respecto a esa peregrina explicación de que el agua de los ríos que va al mar "*se tira*", recordemos que los mares que no reciben aguas fluviales se convierten en mares muertos, ya que con el proceso normal de evaporación aumenta la salinización y la polución, y si a eso le añadimos unas prácticas mediambientales dignas de Gambia, tenemos lo que la web de la CIA destaca sobre España: "*Polución en el Mediterráneo debido al vertido de las aguas residuales incontrolado, de los vertidos procedentes del refinamiento de petroleo y gas; y procedente de la mala calidad y la cantidad no depurada de las aguas residuales del país. Polución atmosférica. Deforestación y desertización."*

Imagínense, si las sagaces autoridades que velan por nuestra seguridad y bienestar no logran encontrar 3.600 Hectómetros cúbicos de agua, con sus correspondientes depósitos, cómo van a encontrar en casi medio millón de kilómetros cuadrados la cocaina latinoamericana, el hachich norteafricano, la heroina del sudeste asiático, que pasan por España con destino a Europa, y todo el dinero negro del crímen organizado que se ha refugiado, preferentemente, en la construcción, la hostelería y las iniciativas lúdicas, como los campos de golf.

Seguramente toda la policía está dedicada a la caza y castigo de los fumadores que no cumplan las ordenanzas de la Ley Antitabaco.

El consumo aproximado de agua en España porcentualmente es:

Abastecimiento de agua de boca o urbano: 15 %
Abastecimiento industrial: 7 %
Riego de la agricultura: 78 %
Poblacion estable en España: 40.397.842 habitantes (Julio 2006)

Abastecimiento de agua para los campos de golf en la actualidad: 10% del

consumo total de agua en España.

"Las últimas extracciones ilegales detectadas por los inspectores se hallan en el polígono de Valdonaire en Humanes. Allí se han encontrado cinco pozos que suministraban agua a todas las industrias. Los propietarios de estas empresas han acordado con la Confederación Hidrográfica su clausura progresiva una vez se vayan enganchando por fases a la red del Canal de Isabel II y legalicen su situación.

Los tres primeros pozos precintados se hallan en campos de golf: RACE (San Sebastián de los Reyes), Club del Olivar de la Hinojosa (Madrid) y Villanueva de la Cañada. De los 29 campos que hay en la Comunidad de Madrid, 14 tienen abiertos expedientes sancionadores. También se han cerrado cuatro pozos más en los cascos urbanos de Las Rozas, Pozuelo y Boadilla del Monte.

En Madrid capital se precintó otro descubierto en los antiguos terrenos de la Ciudad Deportiva del Real Madrid, donde en la actualidad se construyen cuatro rascacielos. Todo parece indicar que este pozo sirvió para regar los campos de fútbol del equipo

madridista y posteriormente por una de las constructoras que está haciendo uno de los edificios.

Además, la Confederación Hidrográfica del Tajo ha cerrado un pozo ilegal en el polígono industrial de Arroyomolinos que suministraba agua a 110 empresas. Los técnicos calculan que esta instalación se utilizaba desde el año 2001 y que de ella se obtenía un millón de metros cúbicos al año, lo que supone un fraude estimado en nueve millones de euros.

Las sospechas de que en el polígono industrial de Arroyomolinos había una instalación ilegal comenzaron cuando los técnicos de la Confederación Hidrográfica del Tajo comprobaron que las 110 empresas instaladas en esta zona se habían dado de baja en la red del Canal de Isabel II en 2001. Al inspeccionar las industrias, los técnicos comprobaron que efectivamente allí se encontraba un gran pozo de 200 metros que suministraba agua a todo el área. La extracción contaba con un motor y con las canalizaciones correspondientes.

Los expertos calculan que de esta instalación se obtenía un millón de metros cúbicos al año, lo mismo que la Comunidad de Madrid consume en un día. El pozo, según los informes oficiales, tiene una antigüedad de, al menos, 30 años, aunque sólo hay constancia de que se utilizara desde 2001. La extracción fue inicialmente propiedad de la Cámara de Comercio, aunque en el momento de ser clausurada dependía directamente de la comunidad de industrias de este polígono. Según fuentes de la Confederación Hidrográfica, los propietarios intentaron legalizar el pozo pero no fue posible.

También fue descubierto otro pozo en Alcobendas, junto al supermercado Carrefour. "Con el agua que sacaban regaban el césped que tienen y las zonas ajardinadas", señaló un portavoz de la Confederación. Como en los casos precedentes, los inspectores levantaron un expediente que culminará, previsiblemente, con una multa."

No. Que lo que pasa es que no entendéis nada. Que, como dice Ángel Acebes Primo de Rivera, vosotros lo que queréis es la desertización de España por oponeros a los campos de golf (palabrita del niño Jesús y también en http://www.periodistadigital.com/economia/object.php?o=488947). O sea, te lo juro. En fin, ¡que nos pase lo menos posible!

¡Penoso! Por no hablar del lamentable estado del tratamiento de las aguas residuales o de la contaminación de los acuíferos por los productos químicos de la agricultura. El problema no es estrictamente ecológico, ni siquiera político; no tendrá solución mientras

la economía se rija por el principio del beneficio privado. Es la guerra de todos contra todos, y contra la naturaleza.

En la ciudad de Valencia las tuberias pierden agua por todos los sitios. Donde yo vivo durante más de veinte años en Agosto al haber menos consumo y no bajar la presión reventaban e inundaban un sotano propiedad de los vecinos. La solución era dar una pequeña indemnización al vecindario y seguir hasta el verano próximo. Hace un par de años renunciamos al dinero y obligamos a la concesionaria de aguas a reparar los daños del sotano bajo nuestra supervisión. Cuando vieron que aquello les costó más de 6.000 euros y una denuncia en el juzgado cambiaron todas las tuberias del barrio. No ha vuelto a producirse ninguna inundación.
En este País Valenciano de mis pecados los campos de golf florecen por doquier. No hay urbanización que se precie que no vaya acompañada de "greens" y demás chorradas. Y en cuanto a los pozos ocultos el Seprona haría bien en darse una vuelta por Murcia.
De momento la única solución que se le ocurre a la Sra. Narbona es subir el agua. Los pobres se lavaran menos y los otros seguiran llenando sus pisicnas.

Verguenza he sentido al ver que en Andalucia, donde estamos siempre amenazados por las restricciones de agua, sea uno de las comunidades que más campos de golf posee, (incluido el de mi pueblo). Y mira que es un deporte, a mi parecer, insulso.

Estas cosas del desperdicio del agua, es que me sacan de quicio, y aquí un ama de casa, luchando contra la familia para que cierren, a lo menos tardar, los grifos para ahorrar unos cubitos al mes.

LA OTRA INFILTRACIÓN

Autor: Octavio Islas. Publicado en *Excelsior*

En La ultraderecha en México, selección de columnas publicadas por Manuel Buendía a partir de 1966 en *El Día, El Sol de México, El Universal* y *Excélsior,* el reconocido periodista –quien fue asesinado por la espalda la tarde del 30 de mayo de 1984 por un sicario de la extinta Dirección Federal de Seguridad (DFS), policía política de la presidencia imperial dedicada a eliminar a críticos y opositores del presidente, del PRI y del sistema-, afirmó que la ultraderecha era una fuerza política que había tomado carta de naturalización en México.
Treinta años después de la publicación de las primeras columnas de Manuel Buendía que cumplían el propósito de documentar la presencia de la ultraderecha en México, es posible afirmar que ésta ha logrado infiltrarse en el PAN y en el gobierno -la ultraderecha finalmente logró asimilar algunas de las exitosas estrategias que venían ensayando sus enemigos, sentenciaría don Salvador Borrego , autor de algunos de los principales bestsellers de la literatura seminal de la ultraderecha mexicana, como Infiltración mundial, y Derrota mundial, libro prologado por José Vasconcelos, quien afirma su simpatía por la derrota de la Alemania nazi externando además su preocupación por el comunismo soviético, al cual califica como *"monstruo anticristiano".*
Salvador Abascal, padre de Carlos María Abascal, titular de la Secretaría de Gobernación, fue dirigente de la Unión Nacional Sinarquista, fundador del boletín La Hoja de Combate y autor de 21 libros, comparte con Salvador Borrego privilegiado sitio en el oráculo literario de la ultraderecha mexicana.
En el sitio web de Salvador Borrego   se reproduce un interesante reportaje de Víctor Manuel Muñoz Patraca, publicado el jueves 8 de febrero de 2001 en Excélsior, en el cual se afirma: *"Carlos Abascal, de rancia tradición sinarquista, es integrante de la Organización Nacional del Yunque , grupo derechista que según el número especial de la revista Proceso , "Sin maquillaje", dedicado a Vicente Fox, tiene ramificaciones en las Falanges Tradicionalistas Mexicanas y en Vertebra, que aglutina a grupos varios como la Unión Nacional de Padres de Familia, Alianza Cívica, el Centro Nacional de Comunicación Social (Cencos), Provida, la CROC de Toluca, las universidades La Salle y del Valle de México, Coparmex y Concamín"*.
Entre las organizaciones fundamentalistas de la ultraderecha privilegiadas por el caprichoso consentimiento presupuestal del gobierno del presidente Vicente Fox,

destaca Provida, presidida por don Jorge Serrano Limón , quien en su furioso embate contra la práctica del aborto en México no reparó en la importancia de manejar escrupulosamente el dinero público, y para justificar gastos inexplicables opto por incorporar facturas de pecaminosas tangas.
En días recientes, Luis Alberto Pazos de la Torre , quien hoy se desempeña como directivo del Centro de Investigaciones Sobre la Libre Empresa, A.C. (CISLE) -organismo que antes del 2 de julio se distinguió por el intenso y furioso proselitismo que desplegó contra el PRD y López Obrador a través de correos electrónicos, distribuye, a través del servicio postal mexicano, el folleto PRD ¿Caudillista o institucional?, del cual declara un tiraje de 15.000 ejemplares.
Para Luis Pazos, la *"propaganda negra"* contra López Obrador además representa una excelente oportunidad para ensayar una novedosa estrategia de mercadotecnia integral, la cual comprende una efectiva promoción a su sitio web, CDs y sus recientes libros. Todo ello en el mismo folleto.
En las actuales circunstancias que vive el país, el contenido del referido folleto resulta tan impertinente como provocador.
De acuerdo con lo asentado en el artículo *"Los malos pasos"* de Luis Pazos, publicado el 14 de febrero de 2005 en la página 17 de *La Revista,* Luis Alberto Pazos de la Torre fue señalado de desviar, como titular de Banobras, 169.000 pesos para comprar a Editorial Diana 2.050 ejemplares del libro *Los jardines secretos de Dios*, que publicó el propio Pazos bajo el pseudónimo de Alberto de la Torre.
Organismos que practican periodismo de género, como CIMAC , han acusado abiertamente a Luis Pazos, quien en 2003 "*en su calidad de presidente de la Comisión de Hacienda y Cuenta Pública, envió a las secretarías de Salud y Hacienda un oficio fechado el 17 de diciembre de 2002, en el cual les informa la asignación de los montos destinados a 14 programas que, según él, habían sido analizados y aprobados por la Cámara de Diputados. En el anexo a ese oficio Pazos incluyó un programa denominado Centros de Ayuda para la Mujer, al que asignó 30 millones de pesos, y que son operados por la organización antiabortista Provida, que dirige Jorge Serrano Limón"*.
La ultraderecha pues existe, y se encuentra muy activa.

RIPIOS A MI ORDENADOR

Por Andrés Clavería

Yo tengo un ordenador
que no lo acierto a ordenar
si lo logro encender
ya no lo sé apagar
Si los sesos de un ratón
fueran las teclas que toco
ya duraría bien poco
el animal en cuestión
El artefacto dichoso
se me rebela al instante
y resulta caprichoso
haciendo el interesante
Ya se lo dije muy serio:
el que ordena aquí, soy yo
así que tú a obedecer,
no te vaya a suceder
lo que pueda ser peor
Y le enseñé un martillito
con garras de carpintero,
y le dije muy bajito
¡Ojo! Que te hago agujero.
El artilugio ladino
bien pareció entenderlo
ahora está muy mohíno
y no quiero ofenderlo
Toco las teclas precisas
para el buen funcionamiento,
y un mejor entendimiento
ya existe entre los dos
Él, en su maquinal terreno,
yo en el terreno humano
trabajamos mano a mano
con espíritu sereno
Se acabó el sufrimiento,
acabose el sofoco
y aunque vamos poco a poco
ya nos vamos entendiendo
Cuando quiero entro en Word,
cuando quiero voy a Excel
y, si quiero, en Outlook
pasando por Internet
Navegar por esos mares
el interés acrecienta
y enseguida te das cuenta
de lo muy poco que sabes
Casi domino el inglés,
ahora ya nada me extraña:
Windows que suena tan raro
es una simple ventana
Ante tan grandes misterios
la vida la voy pasando,

y los voy desentrañando
sin que me quiten el sueño

muy bien parecido y majo,
y lo limpio cada día
con un poco de lejía,
con un paño y estropajo.

Yo no sé si al muy señor
tal disposición le gusta,
porque se enfada y reinicia,
pisotea mi pericia
y va de un lento que asusta.

Sigiloso, observador,
sé muy bien de qué se queja:
lo que provoca el desfase
es que le abruma la clase
de información que maneja.

¡Mi pequeño transistor!
Ordenar mi alma quisiste.
Pero, malvados, mis dedos
echaron por tierra tus sueños,
cuando no los entendiste.

¿POR QUÉ TENÍA EL CABELLO ROJO EL CADAVER DE SAN RAFAEL GUIZAR Y VALENCIA?

Si se analizara el cabello de San Rafael Guizar y Valencia, se podría descartar que la causa de su muerte fuera el veneno suministrado por su sobrino, Marcial Maciel Degollado, en un té.
El mismo día de su muerte, el obispo Rafael Guizar había tenido una acalorada discusión con Marcial Maciel en el seminario de Jalapa, que dirigía, y había decretado su expulsión por no tener capacidad para estudiar (su incultura es enciclopédica), ni espíritu de sacrificio, ni vocación para el sacerdocio, y haber sabido sus avances sexuales a seminaristas más pequeños, y añadió que "*si seguía el camino de las órdenes sagradas se estaba exponiendo a la condenación eterna."*
Todos, sacerdotes y seminaristas escucharon la disputa, e incluso temieron que Marcial Maciel pasara de la violencia verbal a la violencia física contra el Obispo Rafael Guizar.
Esa noche, su sobrino le llevó un té para sus molestias estomacales, y pocas horas después de bebérselo, murió don Rafael Guizar y Valencia. Un detalle hagiográfico sobre su muerte, cuenta que fue imposible acostarlo en la cama y tuvieron que dejarlo en el suelo, y explican que quiso yacer ahí "*como San Francisco*", aunque esta incapacidad para acostarlo en la cama más bien parece normal si se tiene en cuenta que las convulsiones agónicas por envenenamento son de tal violencia que llegan a fracturar la columna vertebral, y su paroxismo no diferencia a santos de pecadores.
A la semana, Marcial Maciel, abandonó el seminario, porque sus compañeros y sus superiores sospechaban que había sido el causante de la muerte de su tío.
En 1950, al exhumar del panteón el cadaver del obispo Rafael Guizar se encontró en gran parte incorrupto, y su cabello blanco había virado al rojo.
Hay demasiadas muertes "providenciales" entre quienes estorbaron a Maciel:
El Padre Francisco Orozco Yepes muere en extrañas circunstancias, cuando viajaba desde Irlanda a Roma, adonde tenía el firme propósito de denunciar las perversiones de Marcial Maciel ante la Sagrada Rota Romana. No se sabe qué o quién le hizo abandonar el avión al hacer escala en Madrid, alquilar un coche en el aeropuerto y, aparentemente, preferir hacer miles de kilómetros para ir a Roma, adonde jamás llegaría.
También murió el Padre Rafael Cuena, uno de los primeros que entregó solemnemente a Maciel sus votos de pobreza, obediencia y castidad, amén del llamado "cuarto voto", que consiste en no criticar jamás a sus superiores ante terceros.
Un obispo de México que se oponía a la Erección Canónica de la Legión de Cristo, en plena discusión, ante testigos, fue amenazado por Marcial Maciel. Pocos días después, un camión embistió en la carretera al coche del obispo, y murieron dos de sus cuatro ocupantes, pero no el obispo. Al mes , otro camión embistió el coche del obispo, y esta vez no se salvó.
Sobre la muerte del sacerdote legionario Fernández Amenabar, rector de la Anahuac, transcribo un retazo de la entrevista de Luis Miguel Carriedo a Alejandro Espinosa :

—"¿En su libro usted se refiere a la muerte de Juan Manuel Fernández Amenábar como una muerte poco clara?"
—"Si, porque hay muchas circunstancias que la enturbian. Primero, la visita de la hermana de Maciel ese día. Segundo, la visita del padre Gregorio López, también ese día. Tercero la desaparición de los documentos que Juan Manuel, ante testigos, había decidido que resguardara José Barba Martín (donde se inculpaba a Maciel). Además no creo que una persona en franca recuperación, muera de repente, porque en el hospital se le atragantó un pedazo de pollo. Para mí, ahí hay gato encerrado."
Algo así debía de temer Juan José Vaca como reacción a una carta estremecedora, en la que reprocha pormenorizadamente a Maciel el daño irreparable que le había producido, le pide cuentas, y acaba advirtiéndole:
"*Deseando ser absolutamente sincero con usted, le informo que el original de este escrito y once copias más se encuentran profesionalmente aseguradas, dentro de sobres sellados, en un depósito inaccesible a indiscreciones. Estos doce sobres llevan el nombre y dirección de sus destinatarios - altas personalidades de la Iglesia y de la sociedad, quienes eventualmente conocerán su contenido - y que inmediatamente llegarán a sus manos, en dos circunstancias. La primera, en el caso de que yo muera o desaparezca inesperadamente..."*
Juan José Vaca fue uno de los ex legionarios que, a raíz de la muerte de Fernández Amenabar y la petición de justicia que hace el padre Athié en su nombre, y en su funeral, se atrevió a denunciar los abusos sexuales que habían sufrido, y la conducta depravada de quien se hace llamar "Mon père", y que ha programado a sus adeptos para que le tributen un culto reservado a los santos.
Parece aventurado pensar que el Vaticano conoció el resultado del análisis del cabello del Obispo Rafael Guizar, antes de su canonización, y que fuese eso -y no las denuncias de sus víctimas-, lo que determinó la suspensión *ad divinis* de Marcial Maciel
¿Cuál es la substancia, más conocida en la toxicología forense que en la tricología cosmética, que habría cambiado el color del pelo del obciso?

En la intoxicación mortal por cianuro (cálcico, mercúrico, potásico o sódico), en el cadáver, se encuentra un color rojo claro en la piel (orejas, labios, mejillas) y en las uñas, un color rosado o rojo oscuro en las livideces (hipostasias) paradójicas (localizadas en territorios no declives); el color sonrosado es muy llamativo en la sangre. Antes de morir, el intoxicado presenta intensas convulsiones y si la causa fue el cianuro potásico o sódico, se producen lesiones cáusticas en las vías digestivas y, si hay vómito, en las vías respiratorias. Si el estado de coma se ha prolongado, en lugar de la coloración rojo claro, rosada, puede haber cianosis. Éste carácter cromático (rojo claro, rosado, sonrosado) se debe al hecho de que el cianuro produce vasodilatación por liberación de óxido nítrico. El pelo, al no contener sangre, no puede adquirir la coloración rojiza (1,2,3,4).
Por otra parte, cuando se encontró incorrupto el cadáver de Guizar, 12 años después de muerto, al exhumarlo, no despedía ningún mal olor (5) siendo que es característico de los muertos por intoxicación cianhídrica, el olor a almendras amargas (1,2,3).

Hola, les invito a conocer la verdad sobre Marcial Maciel. Esta última versión sobre la relación entre tío y sobrino tiene poco de haberse completado presentando a Maciel como a homicida. El método jesuita es el despojo político, como tal hicieron con TODAS las misiones franciscanas. Como astutas serpientes usaron sus métodos de persecución vía militar para hacer que monseñor Guizar abandonara su seminario para adjudicárselo a Maciel como de su propia iniciativa. Fundación por la que lo hicieron pasar como el rector del mismo, y enseguida lo enviaron a España a estudiar la segunda parte de su preparación sacerdotal en filosofía y ciencia humanas, estudios base al 'nuevo sacerdocio'. Ese seminario en Comillas pertenece a los jesuitas. ver Marcial Maciel y los Legionarios de Cristo en keibos.info

TVE-CATALUNYA: DENUNCIAR LA CRUELDAD CONTRA LOS ANIMALES HIERE LA SENSIBILIDAD

La Junta Electoral Central ha decidido cambiar el horario de emisión del anuncio publicitario del Partido Antitaurino contra el Maltrato Animal (Pacma) que TVE-Catalunya debía emitir a las 17,22, por la crudeza de sus imágenes, según aseguraron fuentes de la cadena de televisión. (información y vídeo en **http://www.pacma.net/**)
Es decir, imágenes rodadas en las fiestas de los pueblos, entre el jolgorio de niños y mayores; en las corridas de toros a las que acuden nuestros conciudadanos, llevando a sus hijos, como se ha podido atestiguar en grabaciones realizadas en las plazas de toros; las mismas escenas que forman parte de la cotidianidad de gente que pretende formar parte de la raza humana, que defiende al que maltrata salvajemente a un animal, y persigue a quien lo denuncia.
Y es la misma televisión que retransmite en directo las corridas de toros en ese mismo horario que, cuando denuncia la crueldad de las corridas de toros, opina que puede herir la sensibilidad.
Es cierto, ese espectáculo hiere la sensibilidad de quien la tiene, sea la hora que sea, y, desde luego, yo no voy a ver ese vídeo, ni ningún espectáculo en el que se provoque sufrimiento a un animal para que se divierta gente que no merece vivir.
Por la misma razón, tampoco deseo que nadie me destroce emocionalmente narrándome la crueldad a la que se somete a los animales. Así es que lo que quieran contar, por favor, que sea en la **web del Partido Antitaurino contra el maltrato animal, PACMA** **,** o en en el e.mail de Montse del Olmo, número 2 en las listas

mdelolmo@ya.com , y mejor aún, dénles su voto para que se legisle contra el maltrato animal.

Mucho cinismo creo.
Estamos viviendo tiempos de cambio con respecto del maltrato al reino animal.
En la misma cadena hay distintas inquietudes y puntos de vista. Hay quien considera que no es maltrato y hay quien sí. Deberemos acostumbrarnos a ver constantes contradiciones sobre el tema.
Supongo que sabes que, en Catalunya, hay ayuntamientos que cada año pagan la multa de rigor para salvaguardar las "costumbres" en sus "fiestas".
Dentro de un siglo, nuestros (sus) descendientes, eso ni lo plantearán. El toro, asno o cabra, serán robóticos. Entonces, las inquietudes serán otras, no lo dudes. Y bien por ellas, porque, mientras existan inquietudes, existiremos como hombres.
Un abrazo.

He visto el video y leído la web, aunque yo no podré votarles. Espero no herir tu sensibilidad si digo que soy contrario a la fiesta del toro, incluida la de mi pueblo, los sanfermines. No sé si ocurrirá lo mismo donde vives, pero aquí hay muchos que te tratan como si fueras un extranjero.
Ánimo!!

Una vez (hace muy poco) un animal aparentemente racional me hablaba así de los animales aparentemente irracionales, defendiendo la fiesta taurina:

"... el toro, al menos, puede vengarse de su agresor y cornearlo, si quiere. En cambio, los pollos de las granjas no pueden. Eso sí que es cobardía y maltrato".

Se sorprendió de que no surgieran pañuelos blancos apoyando su sentencia, según él bien razonada. Ojos en blanco, que no pañuelos, aparecieron. De asco.

RED VOLTAIRE DAÑADA POR UN ATAQUE; PERO EN PROCESO DE REPARACIÓN

"La **Red Voltaire** *está constituida por alrededor de veinte sitios Internet en ocho idiomas diferentes. En el transcurso de estas últimas semanas el servicio informativo ha sido perturbado, incluso estuvo durante nueve días fuera de servicio.*

Hemos sido víctimas de numerosos ataques informáticos durante el período que duró la ofensiva israelí contra el Líbano. Nuestros técnicos lograron parar las intrusiones y a restablecer el servicio, cada vez y en menos de cuatro horas. Sin embargo, uno de nuestros sitios en lengua rusa fue penetrado por un hacker (pirata informático) y un mensaje grosero de una supuesto grupo armado fue colocado como noticia principal. Los ficheros informáticos de nuestra librería de venta por correspondencia han sido seriamente dañados. Sobre todo, los parámetros de una de nuestras listas de difusión de lectores en lengua árabe fueron cambiados y alterados, de manera que más de 8,000 abonados recibieron una avalancha de spams bloqueando de esta manera sus correspondientes correos electrónicos. Según una encuesta del cotidiano libanés As Safir, estos ataques habrían sido perpetrados por una unidad de guerra informática de Tsahal [ejército israelí].
A comienzos de septiembre, el funcionamiento de nuestro servidor se puso caótico. Posteriormente nuestros servidores se desarreglaron y el sitio se bloqueó. Los exámenes técnicos no han permitido de determinar el origen exacto de este mal funcionamiento, si el mismo se debe a una mala intención o más bien a un problema material. Hemos procedido a cambiar el equipo comprando máquinas más modernas, renovando y actualizado los programas. A pesar de esto una cierta cantidad de datos se han perdido, complicando el restablecimiento de nuestros servicios. Nuestros técnicos están procediendo a reinstalar el conjunto de los sitios Internet de manera que las diversas publicaciones podrán estas operativas la próxima semana. Desde ya, la mayor parte de los artículos son accesibles.
La Red Voltaire ofrece cada mes a más de 2 millones de internautas un acceso gratuito a informaciones y análisis de la actualidad internacional, a partir de su sitio central (voltairenet.org) y a partir también de otros sitios periféricos (911investigations etc.). Edita igualmente y gratuitamente los sitios internet de revistas y agencias de prensa, sobre todo aquellos de los países del continente latinoamericano, asiático y del mundo

árabe.
Al mismo tiempo, los administradores y los periodistas de la Red Voltaire hacen frente a una constante adversidad: muchos de entre ellos se han visto prohibido el ingreso a los Estados Unidos o a los territorios ocupados por Israel, sus nombres han sido señalados y puestos en listas específicas para prohibirles de vuelo en compañías aéreas anglo-sajonas o ver también sus nombres inscritos en listas para negarle cualquier transacción bancaria internacional. Algunos han tenido que afrontar graves problemas de seguridad.
La continuación del trabajo de la Red Voltaire necesita de medios financieros para poder responder a estos desafíos. Contamos con vuestra apoyo en tanto que utilizador de este servicio y como ciudadano le pedimos que participe, cuales fuesen vuestros medios, para poder financiar los gastos que se generan. Usted podrá efectuar una donación ocasional mediante el servicio Paypal, o si gusta de otra opción más comprometedora, cotizando una participación de manera regular como lo hiciera Usted en una suscripción / abono. La Red Voltaire cuenta con su apoyo." (Texto publicado en Red Voltaire el 20 de octubre de 2006)

REBÉLATE CONTRA LA POBREZA. MANIFESTACIÓN, SÁBADO, 21

"Desde distintos sectores sociales, y uniendo diversidad de sensibilidades e intereses, la sociedad civil española se muestra unida para hacer un llamamiento conjunto a toda la ciudadanía para que se movilice hasta lograr medidas concretas contra la pobreza mundial.
La injusticia, la desigualdad, la discriminación, la violencia y la pobreza afectan a millones de personas en el mundo, y no vamos a quedar impasibles ante semejante indignidad. Porque sabemos que la pobreza puede erradicarse si existe la voluntad política para hacerlo.
Los líderes y gobernantes mundiales tienen la responsabilidad de hacer cumplir la agenda de la ciudadanía, y queremos lanzar un llamamiento universal contra la pobreza, porque creemos con firmeza que otro mundo más justo, sostenible y más humano es posible.
En el año 2000 los jefes de Estado y de Gobierno de 189 países, así como las instituciones internacionales, acordaron cumplir 8 Objetivos de Desarrollo del Milenio en todos los países del mundo para el año 2015 como un primer paso para acabar con la pobreza extrema. Han pasado ya 6 años y los avances son insuficientes.
El Estado español, perteneciente al conjunto de los países más ricos del mundo, debe representar fielmente el sentir solidario y comprometido de su ciudadanía, y para ello debe impulsar con la mayor urgencia un conjunto de medidas concretas para que los países y pueblos empobrecidos del mundo puedan desarrollarse y dispongan de oportunidades reales para salir de la pobreza extrema, y adoptemos todos modelos de desarrollo sostenibles que impliquen una equitativa redistribución de la riqueza y no generen exclusiones".

No pienso hacerlo.
No, porque yo soy también en la parte que me toca culpable de esa situación, y echarle la culpa al gobierno o a la "conspiración judeo-masónica" de las grandes multinacionales me parece una hipocresía.

Detrás del reflejo: Lo que está claro es que hay algún culpable, y los gobiernos y las multinacionales no son los que menos culpa tienen, por cierto. También somos culpables, desde luego, los ciudadanos de a pie, por eso creo que hemos de hacer algo.

Cuando digo hacer algo no me refiero a una manifestación de un día concreto y ya está. Me refiero a todos y cada uno de los días, empezando por nosotros mismos.

Nike o Nestlé, por ejemplo, son empresas (y mucho) culpables y explotadoras. El mundo empieza por nosotros. No siguiendo el juego a empresas así también hacemos algo. La manera de no sentir hipocresía es, simplemente, no dejándonos absorber por esa sociedad que nos empuja a determinados comportamientos, o consumos.

Lo que está claro es que hay que procurar soluciones para la pobreza. Quisiera saber qué propone hacer usted para no sentirse culpable de esa situación.

Un abrazo

Llevo escuchando eso del "hay que hacer algo" y "vamos a manifestarnos para presionar" desde que tengo uso de razón, y ya peino canas. Y la cosa no mejora, sino que empeora. Si "hay que hacer algo", que sea meter dinero en una cuenta para que compren armas o desarrollen una bomba nuclear para atacarnos. Lo demás es lavar nuestra mala conciencia.

Sí, es cierto que la corrupción en muchos de esos países pobres está a la orden del día. Es cierto que el pueblo se muere de hambre mientras el rey, el presidente, el ministro, y sus familias, tienen grifos de oro en sus palacios. Es cierto que pueden comprar armas con la ayuda que se les envíe. Todo eso es verdad, por desgracia.

Por ello, no hay que darles el dinero y ya está, que se lo quedarán los mismos de siempre, sino realizar directamente las actuaciones para el desarrollo de esos países. Si es verdad todo lo anterior, también lo es que hay miles de personas sobre el terreno (ONG´s, misioneros, etc) que se dejan la piel, al lado de los que sufren, no al lado del gobierno de sus países. Quizás es ahí donde se ha de hacer algo: directamente al pueblo.

Es un comienzo díficil, desde luego, pero es el comienzo, y quizás sea el único modo de echarlo adelante.

Sí, ya sé que es una broma lo de dar dinero para que nos peguen un bombazo; pero prefiero que ese tipo de humor lo dosifiques mucho aquí y le des libre curso en tu bitácora.
Gracias.
David, desgraciadamente este es el tipo de mensaje que reproduzco por solidaridad; pero sabiendo que sólo sirve para convencer a los ya convencidos. EN NOMBRE DE JACKIE

Autora: Amada Tercero Núñez.

Escuchaba hablar de la perra del taller del carpintero, que se alimentaba con desperdicios heterogéneos, como cortezas de queso, peladuras de patatas crudas y algún mendrugo de pan. Mi amiga, la restauradora, complementaba su dieta, y le ponía agua limpia, porque su cuenco rebosaba de aserrín y virutas.
Y un día, ardió la carpintería con la perra dentro. Cuando llegaron los bomberos y tiraron la puerta, no había rincón que no fuera una pura brasa. Entre aquel infierno de llamas y humo, salió la perra, negra de hollín, tambaleándose, pero milagrosamente viva. Se derrumbó en la calle. El carpintero lloraba por su carpintería, sus herramientas, y la menor de sus preocupaciones era la perra.
-¿A qué veterinario la llevo?
-¿Veterinario? ¿Y quién lo va a pagar?

-*Yo la llevaré* –dijo mi amiga, la restauradora. Pero después, me dio el encargo con esa confianza que me testimonia y que raya en la desfachatez:
-*La perra está en el veterinario. Hay que ir a buscarla y la tendrás que tener unos días hasta que le encontremos sitio. Y tendrás que pagar la factura, porque yo no tengo dinero…*
Me mostraron a una perra, hija de mil razas, manchada de hollín, llena de pulgas, y con la cara y la panza quemada. Se le veía flaca, flaca, con una mirada de tristeza y angustia infinita, y se me cayó el alma a los pies.
Entré a recogerla y le dije con voz temblorosa.
-*Jackie, vamos, chiquitina, te vienes conmigo.*
A la primera de cambio, me obsequiaste con un alarde de rabo cimbreante, gemiditos de alegría y una mirada entre seductora y tímida, para acurrucarte suspirante en mis brazos. Y lamiste por primera vez mi mano.
Llegamos a una casa que tú no conocías, solté la correa al cerrar la puerta de la calle, y subiste las escaleras como si supiera adónde ibas y adónde vivirías el resto de tu vida.
Te puse un cuenco de agua y, al abrir el bote, hiciste tu baile apache en dos patas alrededor de mí, moviendo el rabo como si fuera una boa de plumas de marabú, dando quejidos de placer. No pudiste comerte todo, tu estómago no estaba acostumbrado aún, y te dije
-*Ven, que tienes que descansar*.- Palmee para que te echaras en el cojín, y te paralizó el miedo. No te atrevías, y te dije: -*Súbete, es tu cama.* Y movías la cola a ras de suelo, con las orejas gachas, sin poderme obedecer por miedo al castigo. Te tomé en brazos y te coloqué yo. Sobraba cojín por todos lados. Te acaricié y te dije no sé qué ternezas, y tu gesto se convirtió en el de una emperatriz que se sabe importante y amada por sus súbditos. Y te recostaste agotada después de tanto jaleo, y descabezaste el primer sueño a mi lado. De vez en cuando, abrías los ojos, me buscabas con la mirada, y volvías a cerrarlos lanzando un suspiro ahogado.
No puedo describir tu mirada Jackie, no sé explicar todas las cosas que expresabas: podías mirar con arrobo, paciente, cariñosa, con compasión, con enfado, con tristeza, con humor, desaprobadora…
Con tu mirada mostrabas lo que sentías sin posibilidad de equívoco, porque por encima de la verbal hay una comunicación perfecta, sutil, refinadísima, que sólo existe cuando nos comportamos como animalicos sanos.
Y hasta que un ser humano no se haya visto así, reflejado en los ojos amantes de su perro, no podrá decir que alguien lo ha mirado verdaderamente, hasta el alma.
Cómo contar diez años juntas, nuestra historia de supervivientes, de ternura, de juegos, de alegría, de complicidad… Aprendí contigo que la autenticidad es un lujo que nos podíamos permitir. Se me cayeron contigo todas las corazas que sirven para relacionarse entre humanos, y nunca más las recuperaré, porque son enfermizas, y son un engorro.
Soy una de esas afortunadas que ha entendido que tú me llevabas ventaja, porque eras sentimiento y vida en estado puro, sin pasar por el filtro de las conveniencias y de los convencionalismos. Pero no fui la única: lograste una cofradía de amigos, incluso entre los que decían, muy serios, que no les gustaban los perros. Y todos te echamos de menos.
Aún me duelen las manos, porque no vienes a poner en ellas tu hocico suave y húmedo; aún me despierta no escuchar tu respiración; pero en el rincón del huerto, donde yaces, han arraigado todos los lirios que sembré para tí. Y me queda la alegría de tu recuerdo pelirrojo y luminoso; me queda el gran manojo de lirios en que te has convertido, y que florecerán cada primavera como un canto a la belleza y la vida.

Y en nombre de Jackie, en el de Lucas, Alba, Cuca, Livia, Yeni, Don Diego, y en el de todos los animales, voy a votar al **PACMA** , porque ellos lo merecen.

VOTARÉ PARA REIVINDICAR A QUIENES ME HUMANIZARON

Mi entorno estaba perfectamente dividido en dos: los que eran un peligro para mí y

los que me ayudaban a sobrevivir. Yo trataba de eludir las estrambóticas manifestaciones de la edad del pavo de mi hermano mayor, que hacía de Tarzán colgándose del montante de la puerta, agarrándome a mí en el papel de mona Chita, y al segundo de mis hermanos, con el cerebro intoxicado por las hormonas, que me sentaba a escucharle recitar aquello de "*¡Qué bonito es un entierro, con su cajita de pino y su muertecito dentro"* y aquello de *"Me agrada un cementerio/ de muertos bien relleno,/ manando sangre y cieno/ que impida el respirar...* El tercero, de vez en cuando, decidía hacer de mí la niña más educada y elegante de los contornos, y me prohibía absolutamente todo. También estaba el cuarto, jocundo y bromista, que, cuando mi madre salía y me dejaba a su cuidado, me ataba las trenzas al respaldo de la silla o me aupaba a lo alto del armario de luna para que me estuviera quieta. El quinto de mis hermanos tenía manos de trilero y de jugador de naipes, rápidas como centellas para abofetearme desprevenida. El sexto, una especie de Mefistófeles seductor, me engañaba sistemáticamente, y, gracias a sus oficios, me lancé desde una altura de 10 metros, agarrando los cuatro picos de una sábana a modo de paracaídas, aleccionada con sus convincentes explicaciones. También me convenció, a mis cuatro años, de que era vergonzoso tener miedo de un bestia de mi barrio que me doblaba la edad, y que había tomado la costumbre de vapulearme en cuanto me veía. Temerariamente, hice acopio de valor, fui a su encuentro, y le aseguré que me tendría que matar si quería perderme de vista. Pero a la tercera bofetada cambié de opinión, y corrí a refugiarme en casa, acompañada por las carcajadas de mi hermano.

Me pasé parte de la infancia añorando la unigenitura, imaginando plagas que me convirtieran en la única superviviente en un universo acogedoramente solitario.
Hasta que llegó Yeni, mi hermana adoptiva: su pelo era un amasijo oscuro, tenía los ojos color de miel y la mirada vivaz, y un inacabable surtido de juegos en los que yo no era la víctima ni el juguete, y le encontré la gracia a tener compañía. Mi hermana acudía como un rayo en cuanto me escuchaba quejarme, se agazapaba conmigo, y yo lloraba refugiada en su abrazo, reconfortada por su ternura.

Mi hermana no tardó en poner en fuga a los grandullones que antes me asustaban, y pasear, jugar a la pelota, al tú la llevas y al escondite, con ella, me aseguraba una deliciosa impunidad. Cuando alguien se acercaba a mí con malas intenciones, ella hacía una mueca en la que dejaba ver su temible dentadura y gruñía amenazadoramente. Eso bastaba: nunca tuvo que atacar a nadie. Y yo aprendí con ella que el mejor método contra los malvados no es apelar a su compasión, sino a la amenaza y al castigo, y nadie me ha hecho cambiar de idea después.

Dormíamos separadas, pero cuando me despertaba con el corazón desbocado de terror por una pesadilla, la escuchaba a ella, alerta, que gemía al sentir mi angustia. Y yo sabía que era la única que se había despertado conmigo y seguiría pendiente hasta que me volviera a dormir. Por la mañana, cuando abriera los ojos, sería su mirada de miel con chispas de luz lo primero que vería durante los años que vivió conmigo.

Ella ya no está, pero no hay día que no la recuerde, y sé que cuando la muerte acuda a mi encuentro, añoraré su abrazo, y el de todos los que, como ella, me humanizaron y descubrieron en mí el inagotable manantial de la fraternidad.

Por eso, en signo de gratitud, voy a votar al **Partido Antitaurino contra el maltrato animal (PACMA)**, que se presenta en las elecciones al Parlamento de Catalunya, y voy a hacer campaña por ellos. Porque hay que modificar las leyes para proteger su vida y sus derechos, y porque hasta que no lo hagamos, no nos podremos sentir verdaderamente humanos.

Y, además, por una vez, este voto no servirá para que nos arrepintamos después.

Bueno, es una buena opción para que una parte del voto que quizás iría a partidos de izquierda no vaya. Divide y vencerás.

Buenos días. Me gusta muchísimo este artículo, de verdad. Yo también voy a votar al PACMA.¡Felicidades y gracias!.

Detrás del reflejo: ¿Quieres decir que tendríamos que darle el voto a esta "izquierda" que no recoge las iniciativas de buena parte de la sociedad civil? ¿Sabes que ese mismo argumento se utilizó para desmontar las asociaciones vecinales y ciudadanas que tanto ayudaron para consolidar la democracia?
Y total, para que sigan haciendo una política de derechas, con políticos profesionales que ignoran las reivindicaciones y los problemas que afectan a los ciudadanos.
No, esta izquierda que manda a la policía contra los que se manifiestan y pide que se legisle y controle las bolsas de fraude inmobiliario, en vez de enviarla a investigar a los especuladores y los que blanquean dinero en la construcción, y que sólo legisla cuando existe una demanda social organizada que le puede quitar votos, y no ha escuchado, ni siquiera, las directrices de la Unión Europea para controlar el lavado de dinero negro procedente del narcotráfico, ni, por supuesto, las directivas comunitarias que afectan a los derechos de los animales.
Los partidos, sean de derechas o de izquierdas, siempre han caído en la tentación de la

política del rodillo en cuanto han contado con una mayoría absoluta.
El voto útil sólo sirve para que en el Parlamento haya un duopolio que se alterna el poder legislativo, que no es representativo de la sociedad española.
Saludos

El argumento es compartido, ya que yo también creo que sólo hay que votar a quien no tenga ninguna posibilidad de obtener representación parlamentaria. Comparto también el pogo apego a las políticas dichas de derechas, aunque todavía tengo menos aprecio por las de izquierdas; y no entiendo al señor del espejo, que da por sentado que la izquierda es algo deseable de por si; será que es zurdo?. De todas maneras dudo que vote a la gente del PACMA, pues lamentablemente (o no) no acostumbro a actuar según mis propios criterios, sinó según las circunstancias.

Yo voy a un partido que no tiene representación parlamentaria ni en ningún ayuntamiento. Pero existe. Ese partido tiene una visión global... es muy difícil que llegue a tener si quiera un representante en algún sitio, pero sí puede hacer que otros partidos "afines" se fijen en sus resultados electorales y afinen sus posturas para conseguir mi voto. El "anti-taurino", que tú nombras, como mucho conseguirá que no haya corridas de toros. Y luego quien haya ganado, derecha o izquierda, hará lo que le dé la gana. El mío no conseguirá nada tan concreto, pero puede que consiga muchas otras pequeñas victorias. Y, en el improbable caso de que sacara algún representante, siempre podría pactar... un programa de más amplio alcance que el "no a los toros".
P.D.: y si estuviera en cataluña, por supuestísimo votaría a "ciutadans". Sin ninguna duda.

Gatopardo, me ha emocionado tu escrito. Y no porque vayas a votar al PACMA, lo cual me honra por la parte que me toca (modestamente soy la candidata nº 2 por Barcelona), sino por reflejar tu relación de hermandad con ese ser que marcó tu infancia.
También la mía, y mi adolescencia, mi madurez, y espero que mi vejez, están llenas de hermanos perros y hermanos gatos sin los cuales demasiadas veces no habría tenido ganas ni de levantarme de la cama.

Por ahí he leído, que los del PACMA no sabemos gobernar... Y qué verdad tan grande es esa. Ni ganas, en realidad. No pretendemos mandar y convertirnos en lo que no somos. Pero sí puedo asegurar, y hasta jurar, que no debe haber candidatura más honesta y altruísta que la nuestra. Solo un objetivo nos mueve, y no es únicamente la abolición de las corridas, como también se ha dicho, sino poner un peldaño más en conseguir que los animales dejen de ser explotados de las miles de formas en que lo son. Podéis incluir en "animales" a hombres, mujeres, niños, niñas... que también lo somos, afortunadamente.
Nuestra lucha ya se está dando a conocer gracias al hecho de presentarnos a estas elecciones. Y con ello un objetivo ya se está cumpliendo. Si por ventura, consiguiéramos una representación parlamentaria, nuestro trabajo consistiría en empujar a los "políticos de verdad" a cambiar su visión hacia los más débiles, y a contribuir a tener un mundo más justo para todos los que nos ha tocado compartir este planeta. ¿De izquierdas? ¿De derechas? No lo sé. No creo que a los animales les importe.

Pues yo, votaciones o simpatías aparte, reivindico esa nostalgia que nos sugiere Gata, tan inútil y absurda, pero tan imprescindible para que el mundo siga rodando (mientras lo haga) con nosotros encima y me parece bien (tambien) que un puñado de otro tipo de locos denuncie nuestra (o la de los carniceros que también se dicen "humanos") loca conducta depredadora y exterminadora.
Eso también se debería poder intentar desde los partidos tradicionales, pero reconozco que es casi imposible.

Estoy de acuerdo con Montse y la mando un cariñoso saludo.

PROBLEMAS DE ACCESO A BLOGIA

Entre ayer y hoy hay personas que no han podido acceder a los blogs de Blogia. Los que conectan con proveedores como Telefónica o Telecom no han tenido problemas, pero nos llegan noticias de que los que acceden con Ono no pueden ver las páginas de Blogia. Sólo será temporalmente. (Explicación técnica: los proveedores tardan entre unas horas y tres días en obtener los cambios de los DNS).

Este problema no tiene que ver con la lentitud y cortes de los últimos días. Es parte de su solución.

Vamos a ver: dices que no has tenido ningún problema para entrar en blogia. Pero afirmas que lo de los cortes y falta de accesibilidad ha sido y es una calamidad: a ver si te aclaras: o tienes o no tienes problemas para entrar.
Ha habido dos migraciones de los blogs de Blogia a un servidor más potente, porque los blogs crecimos y duplicamos el espacio asignado, y aprovecharon para introducir mejoras y mayores prestaciones; y eso no lo ha conseguido ningún otro servidor de bitácoras. Y hablamos de un particular que vive de su trabajo e inició blogia solo y sin padrinos ni apoyo institucional.
Y no sé qué fumas tú, Pau, pero yo, con Celtas con filtro sé que cuando una empresa de estas características crece a este ritmo, a las multinacionales les interesa comprarla. Y si ésta no se deja, la marean bien para bajarle los humos, porque saben y pueden hacerlo, y como comprenderás, no estoy para gilipolleces hormonales porque haya estado en mantenimiento y buscando los códigos maliciosos que les han metido: no le voy a hacer el juego a las multinacionales.
Blogia ha sido y es el mejor servidor de bitácoras con gran diferencia, y cuando pruebes unos cuantos como yo, incluídos los de las grandes multinacionales, hablamos.
No sólo hay que tener datos, hay que saberlos elaborar, majete, y a estas alturas, si no has aprendido es que no vas a aprender nunca.

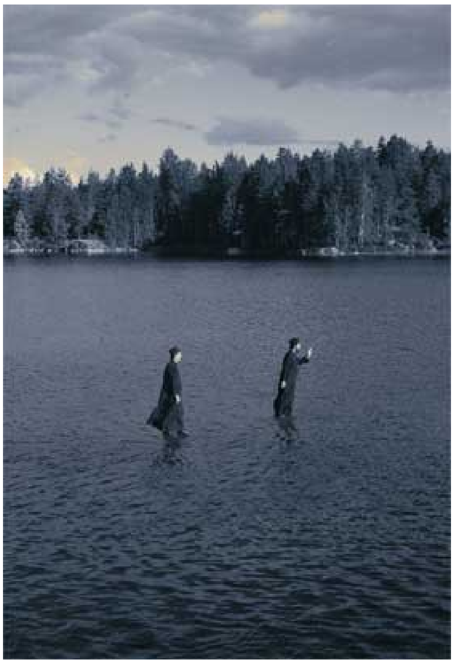
IVAN ISTOCHNICOV: EL ASTRONAUTA QUE NUNCA EXISTIÓ (y 3)



No me dijeron nada más y no pude hacer todas las preguntas que después se me habrían de ocurrir.
El hombre que sabe me invitó a dar un paseo con Yumka, que nos precedía correteando.
-Aún estoy conmocionada mentalmente. Pero trataré de comprobar los datos. Uno de mis irregulares me ha recordado que no se puede demostrar que alguien no es quien es.
-Es necesario un acto de fe para creer y afirmar la no existencia. Tanta fe como para afirmar la existencia que no se pueda comprobar.
-Nadie creerá que he visto aparecer y desaparecer a dos personas.
-Desde el momento en que David Copperfield ha hecho desaparecer la estatua de la Libertad para miles de personas...
-Decir que es un truco de magia no deja de romperme los esquemas mentales... lo que he visto es un hachazo a mi racionalidad.
-Los ojos perciben el mundo como un holograma defectuoso, y lo que creemos que es real sólo es una representación tridimensional esquemática.
-¿Qué es eso? ¿Usted apela al escepticismo?
Sonrió.
-Si.
-Pero... ¿no me había dicho que mi escepticismo mutila mi capacidad para comprender?
-Porque sólo utiliza el escepticismo para desconfiar de lo que le cuentan, y sin embargo se deja convencer por su criterio y sus sentidos, que son tan poco de fiar como los de todos.
-Lo cierto es que no leí siquiera las lecciones que exponían la filosofía del obispo Berkeley. Eso de que la realidad no existe, que sólo existe la percepción subjetiva que tenemos de ella...
-Creo que ha simplificado usted un poco a Berkeley
-Ya le he dicho que no lo leí. En aquella época aún no consideraba necesario saber lo que pensaban mis adversarios. Y mis adversarios eran todos los que no me dijeran lo que yo pudiera comprender sin muchos dolores de cabeza.
Soltó una carcajada, y Yumka caracoleó a su alrededor preparada para jugar.
-Ha descrito perfectamente lo que todos hemos hecho cuando éramos jóvenes.
Tiró una piedra y espero acuclillado a que la perra se la trajera.

-¿No le parece extraordinario que, entre todas, encuentre la que le he lanzado?
-Supongo que la reconoce por el olfato...
-Vamos a comprobarlo.
Mientras caminábamos tomaba una piedra, la mantenía en su mano, y la volvía a dejar en su sitio. Luego tomó una y, antes de lanzarla, me la enseñó. Tenía una estría rosada y memoricé su forma. Luego la lanzo. La perra volvió con una piedra en la boca y la dejó a sus pies.
No tenía estría alguna.
-Efectivamente ha traído alguna otra de las que ha tocado antes.
Y sin agacharse a mirarla siquiera, me mostró la piedra que nunca había dejado de tener en su mano.
-Usted ha dado por hecho que yo tiraba la piedra que le he enseñado y ha creído ver como lo hacía. Y ha sacado conclusiones temerarias.
-Bien. He sido víctima de mi falta de rigor, no he controlado cada uno de los datos... Y eso nos lleva al punto de partida: he de creer que el astronauta Istochnikov no ha existido jamás, o bien he de creer que existió y ahora anda por el mundo llamándose Joan Fontcuberta, aunque su edad lo desmienta...
-Esta conversación se parece a una de esas melonadas pomposas de Paulo Coelho ¿Lo está haciendo aposta?
-Si. El pomposo Coelho está propuesto para el Nobel de Literatura: me encanta pensar que puedo imitar sus ventosidades reflexivas. Y usted, ¿por qué habla como si se hubiera puesto a Bucay en vena?
-Lo siento, le estaba tomando el pelo, quería saber si estaba alerta o seguía medio idiota.
-Sigo medio idiota. Pero sigo queriendo saber donde se ha dado el cambiazo en el asunto Istochnikov .
-Lea las enseñanzas que adquirió Istochnicov en el Monasterio de Valhamönde , y que ha contado como Joan Fontcuberta: la técnica se remonta, en los anales de la alquimia clásica, al famoso "solve et coagula": la disgregación del cuerpo en partículas atómicas penetrantes que volvían a agruparse en su estructura original siguiendo los dictados de una determinada frecuencia o vibración acústica.
No dejará de ser paradójico que acabe pasando por mentirosa con esta historia, con todas las ficciones que he contado que pasan por verdad.

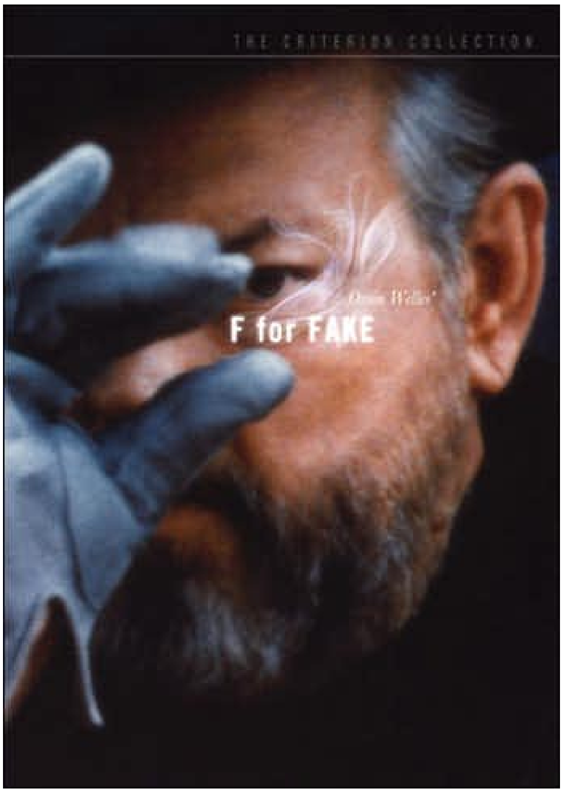
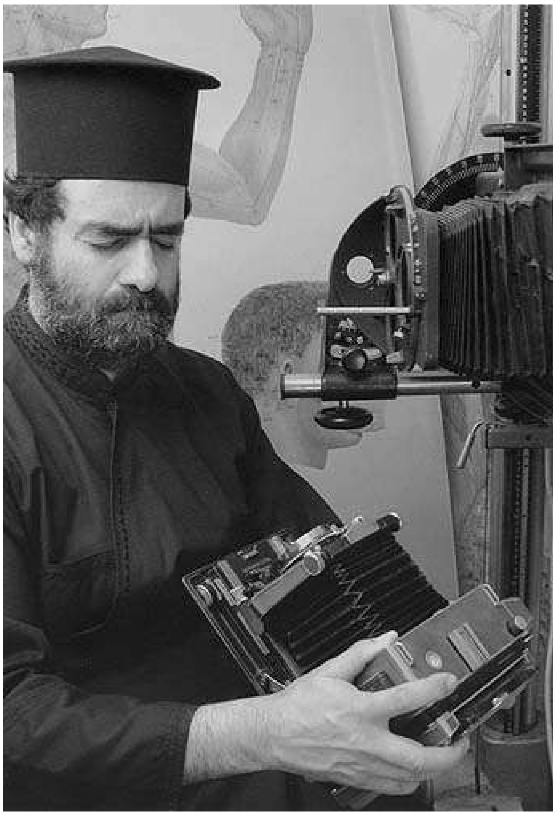
IVAN ISTOCHNIKOV O EL ASTRONAUTA QUE NUNCA EXISTIÓ (2)



Mi cuerpo se ha adaptado ya al ritmo que imponen las largas veladas escuchando al hombre que sabe, pero mi espíritu escéptico está sufriendo una ruda paliza.
Ayer me pidió que no bebiera café ni alcohol, que comiera frugalmente y no tomara ninguna substancia que modificara mi percepción, porque deseaba enseñarme algo que requería mi absoluta lucidez.
-*Sin café no lograré lucidez sino un síndrome de abstinencia brutal*- Y seguí preparando la cafetera.
La perra, que acude cuando desayunamos y da vueltas a mi alrededor, estaba en posición de alerta mirando hacia fuera. La llamé y no acudió.
-*¿Qué le pasa a Yumka?*
-*Ella siempre los percibe antes que yo.*
-*¿A quienes?*
-*Lo siento, no quiero influirle...*
Tomé el primer café mientras me preparaba el bocadillo, y me senté a comérmelo con el segundo café.
Una ráfaga de aire hizo temblar la puerta, y Yumka, con el rabo entre las piernas y las orejas aplastadas, gruñó asustada. Nadie llamó, nadie abrió la puerta que da al patio interior, simplemente una pareja de mediana edad estaban sentados a la mesa conmigo, sin saber cómo podrían haber aparecido. El hombre que sabe los saludó con naturalidad y me presentó.
-*¿Cómo han entrado?*
-*Usted quiere que le hablemos del papel que jugó Joan Fontcuberta en la historia de Iván Istochnikov ¿verdad?*
-*Sé el papel que jugó, fue una performance, puso su cara en unas fotos y se inventó toda la historia...Istochnikov nunca existió.*
-*¿Y cómo puede estar tan segura de que no sea precisamente eso lo que se inventó Joan Fontcuberta? ¿Sabe usted algo de la época que estuvo en un monasterio ortodoxo ruso?*
-*¿Joan? Nunca ha tenido inquietudes religiosas. No creo que haya estado jamás en un monasterio ortodoxo...*
-*¿Usted lo conoce bien?*
-*Suficiente como para saber que eso no es verdad.*
Habló la desconocida por primera vez: tenía un acento extraño:
-*¿Sólo díganos si lo conoce físicamente?*
-*Sí. Desde hace veinte años...*
-*Mire esta foto.*



-Sí, es Joan Fontcuberta. Pero le gusta disfrazarse...
-Efectivamente su escepticismo funciona. ¿Sabe quienes somos nosotros?
-No.
-¿Piensa que somos normales?
-Lo parecen, aunque entren sin que me dé cuenta...
-¿Tiene una explicación lógica para nuestra manera de aparecer?
-Sí. Ustedes estaban en la casa, no fuera. Y yo estaba pendiente de Yumka cuando ustedes...
-Ahora está pendiente de nosotros. Observenos bien.
-Sí, les estoy prestando toda mi atención. Diganme...
Y desaparecieron. Sencillamente desaparecieron. Tuve la sensación de estarme ahogando, se me olvidó respirar. El hombre que sabe me abrazó.
-Abuela, relájese, por favor. Relájese.
Yo boqueaba:
-¡Han desaparecido!
-Se han desmaterializado, pero aún están aquí.
Y efectivamente volvieron a aparecer en el mismo sitio.
-Por favor, disculpenos si la hemos asustado: era necesario para que supiera que no le contamos patrañas.
-No comprendo cómo lo han hecho.

-Usted trata de aplicar la lógica monolítica de una inteligencia limitada por el racionalismo, y la materia tiene leyes que la Física teórica ha formulado, pero que la inteligencia del hombre común no capta.

-Son poderes paranormales...
-No existe lo paranormal. Sólo existe una realidad que la mayoría ignora, porque no desarrolla sus potencialidades. Y la historia que deseamos contarle forma parte de esa realidad que se escapa a su lógica. ¿Quiere escucharla?
-Sí. Me habían enseñado una fotografía de Joan Fontcuberta en un monasterio ruso...
-Vamos a ir directamente al principio: formamos parte de los inciados, participamos de los saberes antiguos que hemos preservado en los monasterios. En la antigua URSS se persiguió toda la ciencia que no se ajustara a las consignas oficiales, de la misma

*manera que en el resto del mundo se le ignora, no se financia, no se investiga .
Nosotros sabíamos que el viaje de la Soyuz-2 era un fracaso seguro, y que, en las condiciones que se hizo, Iván Istochnikov y Kloka habrían muerto sin remedio.
-Murieron, quedaron en el espacio...
-Se hizo el contacto. Los sacamos de la cabina del Soyuz-2. Los trajimos sanos y salvos.*

*-¿Cómo? Ustedes tenían otra nave tripulada y nadie...
-Usted piensa en un satelite artificial como los Soyuz ¿verdad?
-Sí, claro ¿de qué otra forma se puede viajar al espacio?
-El error de partida es pensar que para que un mamífero terrestre sobreviva en el espacio ha de crearse una capsula física que lo proteja, cargada con toneladas de combustible para propulsarlo. Y para mover las toneladas de combustible que lleva son necesarias toneladas de combustible...
-Pero no se puede prescindir... ¿o sí?
-No se distingue un campo gravitacional uniforme y un marco uniformemente acelerado, según el "principio de equivalencia" de Einstein.
-Y ustedes lo aplicaron para los viajes espaciales, pero no acabo de comprender...
-El sistema solar está interconectado por una serie de túneles o espirales gravitacionales a modo de autopistas interplanetarias.
-Estan ustedes hablando de los denominados puntos de Lagrange.
-Si. Al usar esas autopistas usamos la fuerza gravitacional para viajar, en vez de luchar contra ella. Aplicando estos principios logramos naves que funcionan con mucho menos combustible. Y no nos pueden detectar los radares.
-¿Y rescataron a Istochnikov?
-Rescatamos a Istochnikov y a Kloka.
-¿Qué fue de ellos?
-Kloka murió de vieja en el monasterio. Ivan Istochnikov permaneció hasta que aprendió una lengua extranjera acorde con sus nuevoss documentos, su personalidad, su biografía...
-Entonces, la historia de Joan Fontcuberta...
-Istochnikov no sabía que su mujer estaba embarazada... y cuando se enteró de que había tenido una hija, que su mujer había muerto en aquel recinto de alta seguridad poco después... se arriesgó a chantajear a la KGB... Fue una temeridad, pero hay que reconocer que le salió bien la jugada. Su hija salió de la URSS con un pasaporte diplomático gracias a su demencial estratagema.
-¿Qué estratagema utilizó?
-Istochnikov montó una exposición pública con sus fotos, mostrando su existencia, su historia, todos los detalles de su odisea, el asunto de la Soyuz, todo, todo, absolutamente todo. Les ofreció decir que era una ficción, de modo que no habría peligro en el futuro, que nadie creería jamás en su existencia ni en su historia....en cuanto supiera que su hija había salido de Rusia. Y aceptaron liberarla.
-Perdón, pero en esas fotos está fotografiado Joan Fontcuberta, y esa exposición la hizo...
-Hay una frase críptica muy reveladora...
-No me la digan: "¿la verdad de quien no tiene que mentir, nunca es interesante?"... Olvidan que conozco fisicamente a Joan y lo puedo identificar perfectamente.
-No conocía esa frase ...
-Es mía. Y ahora diganme qué pretenden que sepa y qué quieren que cuente en mi bitácora.
-Joan Fontcuberta es la personalidad que adoptó Ivan Istochnikov. Sólo queremos que se sepa la verdad*.

El problema que se le plantea al Sr. Fontcuberta no es menino:
Estos señores, de naturaleza más o menos evanescente, como el Gato de Chesire, dicen que Istochnikov es Joan Fontcuberta y éste dice (por lo que yo sé) que él es Istochnikov.
O sea que dicen lo mismo y llegan a conclusiones antagónicas Pero, además, según Fontcuberta, Istochnikov no ha existido, lo que le lleva a un absurdo lógico: afirma ser algo que no es ni ha sido. Y le conduce a un despropósito científico: intentar demostrar la no existencia de algo afirmando que esa no-existencia (Istochnikov) es otra cosa (Fontcuberta). Dicho de forma más gráfica: si yo pongo el careto en el retrato que Tiziano hizo de Carlos V, no quiere decir esto que Carlos V no existiera. Y si insisto en decir que yo soy Carlos V, no puede extrañar a nadie que termine en el frenopático más cercano.

El Coronel Grigoriev fue, durante los años 60 y 70, jefe del Departamento de Investigación Científica del KGB. Aunque es conocido por el famoso caso del ovni de Sverdlok,su trabajo más valioso para la Unión Soviética fue el reclutamiento de científicos occidentales que actuaron como "topos" en distintos centros de investigación de Europa y Estados Unidos. El caso del profesor Milne y el MIT, en el que el MIT niega que el físico haya dado clases en su universidad e hizo desaparecer todos los documentos que lo demostraba, es un calco de procedimiento del caso Istochnikov

MI AMIGO DINOSAURIO

Conocí a Dinosaurio un 24 de Diciembre de 1995, cuando trabajaba yo con Hermanos Bernaldo Grúas SL. Me llamó la central de la Mutua Madrileña para que diera asistencia a un conductor que decía haber perdido una rueda de su coche y no poder encontrar la de repuesto. Estaba en el Km 55 de la NI (Oasis's Club, el del neón azul con la señorita tumbada que mueve la cadera).
Cuando llegué me encontré a un caballerete en batín de seda y a un erizo. Los dos en completo estado de embriaguez. La rueda no la encontraba porque estaba apoyado en ella y el único problema era quitarlo a él del arcén y mover el coche y el erizo. El rato que yo pasé no se lo deseo a nadie.
Dinosaurio no bebe alcohol. Al parecer, se lo bebió todo de pequeñito en forma de vino de misa y sangre de Cristo. No es que fuera un monaguillo beato. Es que era un hipocritilla vicioso. Cuando yo me lo topé aquella noche de Navidad tenía 40 años; era padre de varios hijos y seguía igual. La botella de coñac que agarraba con desesperación se la había encargado su mujer para un pastel de Nochebuena; si se la estaba bebiendo era para evitar la hipotermia porque estábamos a 4 bajo cero; si andaba por un puticlub de la carretera de Burgos a las dos de la mañana era porque su mujer lo había enviado a las seis de la tarde a que comprara coñac y dodotis y él se perdía siempre por la M30.
Todo esto lo cuento de forma resumida. Él me lo relato a mí con largas digresiones morales sobre el amor a la familia, la santa paciencia varonil con una mujer veleidosa, los intereses urbanísticos que plantaban autopistas engañosas por doquier, etc., etc. Remolqué su coche en la grúa (porque él no estaba en condiciones de conducir) y lo llevé a él y al erizo hasta su casa. Se sentó con muchos remilgos en el asiento del copiloto preguntando si tenía algún trapo para limpiar la grasa y, desde allí, llamó a su mujer y le contó que se había encontrado, a la salida de la farmacia, con un antiguo compañero del Colegio del Pilar ("*alcoholico, una pena*") al que había devuelto al seno de su familia ("*pero sólo estaba en la casa su pobre madre, con más de ochenta años y en silla de ruedas. Así es que tuve que darles de cenar a los dos*"). Se bajó del camión con una sonrisilla de borde musitando: *"El bruto éste no ha pasado ni por la cera de enfrente del Colegio del Pilar".*

Se dejó olvidado en la cabina del camión el erizo que había salvado de morir atropellado y aún lo tengo en casa como prueba de que, de vez en cuando, Dinosaurio no es un completo cabrón.

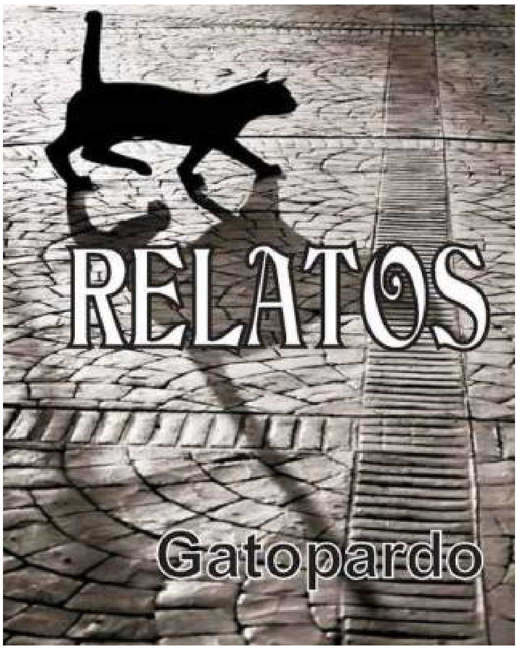
ACUMÁN PUBLICA LOS RELATOS DE GATOPARDO



Las editoriales promocionan los libros, mandando al pobre autor de la ceca a la meca, firmando libros en cualquier supermercado donde haya sección de libros, en las Ferias y las librerías, hasta destrozarse la mano escribiendo dedicatorias entusiastas para gente que no conoce; también ha de dar entrevistas en las que tiene que decir por enésima vez lo obvio en apenas dos minutos, en una maratón absolutamente desquiciante para quien necesita la soledad y la serenidad para realizar su trabajo, que no es el de vender libros, cosa que debería ser asunto de las editoriales, de las distribuidoras y de las librerías, que para eso se quedan con el 90% del precio de venta al público de los libros, mientras que el autor sólo percibe el 10% de los beneficios que reporta su trabajo .
En una especie de suprema magnanimidad, una productora de televisión cita al escritor para una entrevista a la hora que le viene bien al departamento de maquillaje, por imperativos del medio. Luego tendrá de esperar en unos hangares inhóspitos hasta que alguien le avise para grabar un minuto, si no surge algún tema candente como, por ejemplo, las declaraciones de una ex-amante de alguien que a su vez se ha hecho famoso por ser amante de un famoso con iguales prendas. Eso significa que su cara le sonará a la gente, pero sin poder discernir si es actor, cantante o amante exhibicionista , y en los días siguientes se ve interpelado con familiaridad por gente desinhibida y extrovertida.

-Te he visto en la tele
-Si...
-Si, hombre, ayer... en el programa de... no me acuerdo, estaba tomando unas cervezas y te vi en la tele del bar...
-Ah, qué bien.
-¿Es simpática la presentadora? Dicen que es una tía borde...
-Sí, fue amable...
-Ya, claro que hay muchas envidias y lo mismo le tiran a dar por eso...
-Perdona, es que me están esperando para cenar...
-Que esperen, hombre, tómate lo que quieras...
-No, gracias, es que me esperan...
-Oye, no me hagas un feo...
-Perdona, he venido a cenar, estoy muerto de hambre, y me apetece relajarme un poco con mis amigos...

-Joder, qué mal te enrollas, se te ha subido la fama a la cabeza ¿eh? Pues peor para ti, porque cantas fatal, y estás más pasado que Georgie Dann.
El diálogo que transcribo le ocurrió a un amigo mío, poeta minoritario y exquisito, solterón ya añoso, al que invitaron a una tertulia en televisión, en un programa -lo supo entonces- sobre la alarmante demografía nacional. Después de esperar una hora, pasó al plató y le indicaron que se sentara, y sin más preámbulos le preguntaron cómo podía criar y educar a tantos hijos. Respondió que no los tenía y no volvieron a dirigirle la palabra. Luego, alguien le explicó que lo habían confundido con el que ostentaba el record de familia numerosa en España.
Los escritores están que trinan cuando tienen que cumplir la agenda de promoción con cada título nuevo que publican, no hay ninguno que no acabe con los nervios destrozados; pero se aguantan y tragan porque ése es el trato, ése es el sistema, y se pliegan.
Publicaciones Acumán aceptó no marearme con la presentación, venta y promoción del libro, y aceptó que mantuviera mi anonimato por el bonito sistema de no decirles quién soy.
Próximamente se pondrá a la venta mi libro , y no contarán con mi presencia ni mi encanto retrechero para la promoción; pero como los beneficios que la editorial logre de su venta irán destinados a proyectos de ayuda al desarrollo en Tolima (Colombia), me siento en la obligación moral de pediros que compréis este libro y que lo recomendéis, si no queréis que una de mis certeras maldiciones os alcance.
Observad que no os he pedido que lo leáis: basta con comprarlo, porque, afortunadamente, no tengo el ego de escritora, que, junto con el ego de actor y el ego de político, es la variedad más apestosa de divismo que existe. Lo mío es el ego de *Miss Camiseta Mojada*, a pesar de que nadie haya tenido la delicadeza de darme jamás el título.

Querida Gata: Me parece muy mal que nos sometas al tercer grado de comprar el libro, especialmente a tus colegas los jubilados, pero lo que sí te agradezco de todo corazón es que no nos obligues, encima, a leerlo, es un detalle de incalculable valor por tu parte.
Ahora en serio, creo que a quien hay que felicitar es a Publicaciones Acumán por contar

entre sus donantes a la próxima Borges (ya sé que no te gustan las comparaciones, por eso la hago) del panorama literario mundial y esta vez sí Premio Nobel de Literatura, pero, además, guapa, no como Borges (q.e.p.d.).

Toma nota: pongo una letra detrás de la otra, cada palabra separada de la anterior y me niego a considerar que hacer eso requiera más inteligencia que hacer un sofrito, un agujero con la taladradora o una costura francesa.

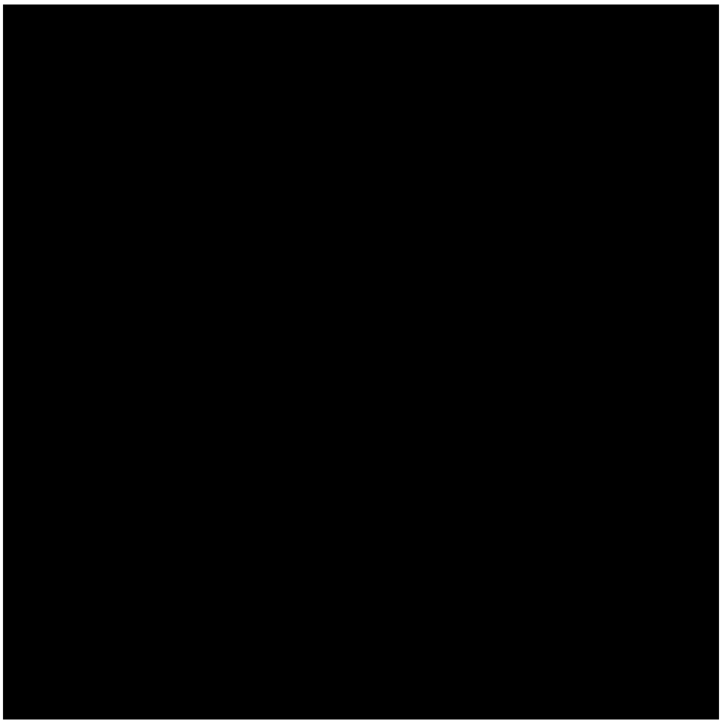
PORCUS BIPEDUS IBERICUS



Por Andrés Clavería

Se trata de una especie animal, muy semejante en sus signos externos al *homo sapiens*, sus principales diferencias las encontramos en su comportamiento en sociedad, aunque es fácil confundirlo con el género humano, si no fuera por su falta de humanidad.
Porcus bipedus ibericus destaca inconfundiblemente por su falta de sensibilidad ciudadana, no le afecta lo mas mínimo a su conciencia ningún acto por vandálico que resulte. Diríase que su goce principal es transgredir las normas de convivencia que la civilización ha adoptado para vivir en comunidad.
Porcus, al contrario que algunas especies denominadas salvajes, tiene su principal hábitat en los núcleos urbanos, preferentemente en aquellos que por su densidad demográfica hace difícil su posible identificación tras haber consumado sus fechorías. Generalmente es un noctívago que frecuenta discotecas y lugares donde se venden bebidas alcohólicas, no le importa que por un vaso de whisky o de una botella de cerveza, le cobren varios euros, no sólo disfruta consumiendo el líquido, también le produce enorme placer ver como el vaso o la botella se fragmenta en mil cortantes pedazos al estrellarlos contra el suelo.
Nada le importa del posible peligro que sus actos puedan provocar a personas o máquinas, queda demostrado que nada le afecta a su personalidad, desde el momento en que renuncia ser persona. Al ser adicto al alcohol, con frecuencia se transforma en semi-consumidor de las bebidas que ha comprado, ya que la mayor parte de las que ha pagado las devuelve en la noche de autos por las aceras en forma eruptiva. La otra mitad, creo es la que les sirve, de forma espirituosa, para su malsana inspiración, y

encima de sus coches y motos, eufóricos de potencia y decibelios, salen a cien millas por hora a la caza de la víctima de turno.
Si sus recorridos nocturnos los hace a pie, sus efectos, son igualmente desastrosos y devastadores, a su paso como un vendaval tronza árboles jóvenes, arranca bancos de las plazas públicas, derriba contenedores de basura y deja tras de si, una estela de repugnante desorden.
Estoy seguro de que proponer la extinción de una especie que no fuera ésta, levantaría airadas polémicas entre personas y colectivos. Sin embargo, tengo la convicción que más tarde o más temprano los seres humanos, sin excepción de sexo, edad, o credo político, tendremos la insoslayable obligación de luchar contra Porcus Bipedus, y su erradicación nunca dejará de ser un deber de ciudadanía.
En realidad son muy pocos, aunque cunden mucho.

Esto de que habla el sr. Andrés es algo que siempre me ha impresionado de este país. Uno ha viajado poco pero lo suficiente como para ver que el resto del personal anda por otras sendas. En Portugal no se llega a esos niveles ni de lejos. Entonces, en cambio de hablar de "Porcus bipedus ibericus", deberíamos decir "hispanus" y no "ibéricus".
Hace tres años estuve en Senegal, un país algo sucio, la verdad. Salí de noche a una disco con amigos y amigas senegaleses, claro. La diferencia es del todo ostensible. Hablamos de África, de conciertos y baile hasta la mañana siguiente, será que como son pobres no tienen botellas, será eso.
En Cuba pasó lo mismo, cuando la fiesta es de cubanos la cosa se vuelve limpia, si por medio hay españoles, la cosa se ensucia, si hay franceses o alemanes no, esos solo ensucian en España. ¿Es posible que los contagiemos?
Nunca he visto gente tan borracha por la calle como en Irlanda. Fiestorras atiborradas de personal borracho como una cuba, cuando se largaban, no sabía como, el suelo quedaba limpio.
Nos lo deberíamos mirar porque creo, somos el único país europeo donde aun se escupe en la calle.

En principio me resisto a mirar a un/una chico/a de 20 años y dibujar mentalmente un/una cerdo/a (digo 20 años aproximando y sugestionado por las imágenes, conste), aunque parezca tentadoramente sencillo. Me resulta más legítimo dibujarlo (un magnífico ejemplar de cerdo convicto, para ser exactos) cuando una hermosa familia hace lo propio en el monte, tras una barbacoa (tras, en el tiempo, no en el espacio) o, lo que es lo mismo, cuando lo hace alguien quien, presumo, ha finalizado su educación y está en disposición de implantarla a terceros (el famoso "¡pásalo!").

Cualquiera de esos "otros cerdos" o cerditos-hucha podría ser cualquiera de mis sobrinos e, incluso, sobrinas (no en vano hemos cambiado de siglo). Y, sinceramente, no creo que sea tan difícil reconducir la actitud de un grupo (cualquier psicólogo refrendaría que es más fácil dirigir a una muchedumbre que a cada uno de sus individuos, por separado). Un simple bono de consumición gratis por cada equis botellas que acaben en una papelera (que alguien, encargado también de repartir bonos y/o centavos de bono, custodiaría (igual que ocurre en los roperos de las discotecas, igual que los aparcacoches)) bastaría para acabar con el avance de la desertización. Y el ruido desaparecería con un acondicionamiento de insonorización, mucho más barato que los efectos colaterales de caer tan Baco a cielo raso.

El verdadero problema no es la suciedad, sino que se necesite alcohol para legitimar una fiesta. Y no son cerdos. Son cerditos-hucha. ¿Los condenamos o les metemos las monedas adecuadas, señor Clavería? Hombre de poca fe.

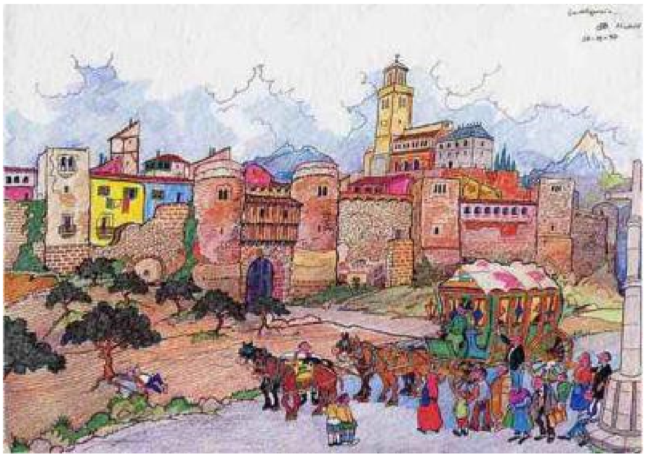
DICCIONARIO DE JERGAS DE HABLA HISPANA



Una noticia que nos llena de alegría es la edición en papel del diccionario de [Jergas de habla hispana], extraída de la admirable web de Roxana Fitch en internet, sobre la que publicamos el artículo de Gatopardo, *Nuestra patria es el lenguaje*.
Jergas de habla hispana se puede adquirir a través de Amazon.com y esperamos que la falta de una editorial y una distribuidora poderosas no impida que se acoja y se valore su excepcional iniciativa, y se logre financiar su continuidad a través de las fundaciones y las becas que promueven la investigación lexicográfica, porque es impresionante lo que ha llegado a realizar sin ayuda alguna, como iniciativa individual. Roxana Fitch en su página web, *Jergas de habla hispana*, explica:
"Todo empezó hace más o menos diez años, cuando una amiga española, fanática de las telenovelas mexicanas, empezó a escribirme todas las palabras "raras" que oía en tan emocionantes episodios de los culebrones y que no entendía.
Yo respondía a sus interrogantes, y luego ella volvía a escribir con más vocabulario "incomprensible". Decidí entonces que lo que ella necesitaba era un mini glosario de mexicanismos. Fue así que nació el primero y más grande de los diccionarios de jerga que se encuentran en este sitio web. Cuando empecé a entrar y participar en chats por internet, por allá en el lejano 1996, me di cuenta que también yo me quedaba confundida al leer las palabras "exóticas" con las que se expresaban los amigos de otros países, y decidí que sería bueno compilar glosarios de esos países para poder comprender mejor a mis amigos, apoyándome en su sabiduría popular. De ahí fue fácil llegar a la conclusión que habría que representar a TODOS los países donde se habla español. La verdad es que nunca pensé que este pasatiempo me convertiría en lexicógrafa improvisada, y que ocuparía tanto del poco tiempo libre que tengo. Pero el tema me apasiona, y creo que vale la pena continuar desarrollando los glosarios.
Aprendí lo básico del lenguaje .htm para armar un sitio web funcionante y así poder compartir mis investigaciones con el resto del mundo. Como ya me han comentado, el diseño del sitio no es maravilloso, pero he hecho lo que he podido sin apoyo alguno (aparte de apoyo moral), y se me puede perdonar si no me he preocupado demasiado por el lado estético del sitio: mi enfoque siempre ha sido en su contenido.
Yo no tenía particular experiencia en armar glosarios, pero con el pasar del tiempo fui aprendiendo, y aprendí también a investigar mejor el vocabulario en cuestión. Decidí, después de un tiempo, que era necesario distinguir entre lo que se puede llamar modismo y (en el caso de los países latinoamericanos) lo que en realidad puede considerarse americanismo. Por americanismo me refiero a dos tipos de vocablos "españoles": 1) el que existe en el español de España, pero es usado con acepción/acepciones diferente/s de la/s acepción/acepciones conocida/s en España; 2) el no originado en España, sino producto de uno de los países de habla hispana del continente americano. En fin, para algunos países en particular, me vi obligada a crear otro apartado más, dedicado al vocabulario autóctono (nahua y quechua, por ahora..). Mi intención en este caso no es el de listar palabras originarias de estos idiomas que se han incorporado al idioma español (y a otros idiomas), como lo pueden ser voces como "tomate", "aguacate", "chicle", "chocolate", "coyote" (nahua) "hamaca", "barbacoa", "iguana", "canoa", "huracán" (taíno), "cóndor", "llama", "vicuña" (quechua), etc. Lo que estoy coleccionando son los términos amerindios de uso corriente en ciertos países americanos, y usados en lugar de o con igual frecuencia que su correspondiente castellano: "molcajete" (mortero en nahua), *"cancha" (campo en quechua). Estas secciones de los diccionarios están en pleno desarrollo (los apartados para el aymara, el taíno y el guaraní todavía están en fase de elaboración).*
Este diccionario no ha sido respaldado por ninguna entidad académica: es 100% popular. Desde el principio me opuse a la idea de basarme en material publicado por otros. Ya que tenía la posibilidad de entrar en contacto inmediato con gente de todos los países que me interesaban, lo ideal era basarme en sus aportes directos: vox populi. Fue así que JHH empezó a recibir la información necesaria para recopilar vocabulario

por parte de sus mismos usuarios, algunos de los cuales se han vuelto valiosos colaboradores fijos. De cualquier modo, para complementar en modo ameno esa ayuda externa, leo libros escritos por autores contemporáneos de todos los países de habla hispana para "cosechar" material interesante para el sitio, pero también leo mucho en internet, sobre todo en donde más se usa el castellano coloquial, como en los foros y en los blogs.
Mis estudios lingüísticos formales serán limitados, pero no me dejo abrumar por la tarea e impongo un método concienzudo a mis investigaciones. La añadidura de una voz nueva puede ser resultado de un intercambio de informaciones entre mis colaboradores y yo, y de investigaciones mías por separado, con el propósito de aclarar el significado del aporte. Raramente puedo inserir el material que me llega tal cual. Me interesa identificar la palabra/expresión 1) gramaticalmente; 2) la definición debe ser en castellano "neutro"; 3) el ejemplo dado debe ilustrar bien el uso del vocablo y de paso reflejar el modo de hablar de la gente del país en cuestión.
Soy traductora de profesión, y paso la mitad de mis días con las narices metidas en algún diccionario u otro. Una cosa que siempre he lamentado en la mayoría de los diccionarios es la parquedad, y a veces hasta aridez de ejemplos en oraciones del vocabulario presentado. En muchos casos la definición es buena, pero no es suficiente si la persona que consulta el diccionario desea utilizar la palabra en una oración. "¿Con cuál verbo se usará este adjetivo?", me pregunto, "¿con tener, estar, ir, ser, andar... o con todos?" "¿y esta expresión se usa con cuál preposición: a, de, con?" Los diccionarios raramente lo especifican, pero si hay un ejemplo, uno se da una idea. Es por esto que creo firmemente que los ejemplos que incluyo para cada voz (excepto para ciertas palabras usadas exclusivamente como insultos o que son sinónimos de partes del cuerpo humano, que me resultarían en ejemplos que rayan en lo obsceno). Me esfuerzo por crear ejemplos no demasiado aburridos y—en lo posible—que den un toque auténtico y muestren la idiosincrasia en el habla específica de cada país. Armo mis ejemplos, los someto al juicio de mis colaboradores, y una vez obtenida su aprobación, los subo al glosario. En algunas ocasiones son los colaboradores mismos que aportan los ejemplos. El propósito de este diccionario es no sólo de hacer conocer cierto vocabulario "alternativo", sino también de ayudar a usarlo con desenvoltura si así se desea.
Para el futuro
En conclusión, soy la primera en decir que este diccionario no está completo. Pero tampoco lo está ninguno de los demás diccionarios. El idioma vive, se desarrolla y le "nacen retoños" continuamente. Hago lo que puedo con la ayuda de todos ustedes, colaboradores fijos y ocasionales. Y sigo ampliando el proyecto. Las ideas no faltan:
1) crear un diccionario de sinónimos, con la voz inicial en español neutro definida con la jerga correspondiente de todos los países que tienen una versión jergal de tal palabra.
2) añadir una sección interactiva donde la gente pueda contar sus experiencias personales en situaciones en que, al estar en contacto con personas de habla hispana de otro país, se ha verificado confusión y malentendidos por el uso de modismos y/o regionalismos.
3) darles "voces" a algunos ejemplos, añadiendo archivos audio que se puedan escuchar para que la gente conozca los acentos diferentes de cada país (y en muchos casos, de las diferencias en acento y cadencia dentro de un mismo país). Desde el inicio del 2006 empiezo a coleccionar grabaciones."

El archivo sonoro en su página web, por si mismo, ya merecería un premio si no escatimáramos tanto el reconocimiento para circunscribirlo al círculo endogámico académico.

Creo que es un trabajo impresionante y muy profesional. Creo que me hubiera encantado tener un diccionario así cuando llegué a México y no hubiera pasado tantos momentos de desconcierto, como cuando pedí unos culeros en la tienda y me dijeron que aqui eran gratis y es que resulta que culeros aqui no son los pañales como es en Cuba, aqui esa palabra tiene una acepción muy fea.

SEÑOR RATZINGER: ¿ME PERMITE QUE LE DIGA DE USTED?

*****Señor Ratzinger: no creo que usted se equivocara y no midiera las reacciones que iba a provocar entre los seguidores más primarios y poco reflexivos del profeta Mahoma, ni creo que pensara que no se iban a ofender porque dijera que son una panda de salvajes asesinos, a los que ya identificó en 1993, pelé-melé, con los marxistas y la Teología de la liberación, en ******"El fundamentalismo islámico"

Que conste que creo que está usted en su perfecto derecho y dentro de sus atribuciones al calificar como irracionales violentos a los islamistas, porque no en vano ostenta usted la jefatura de los que hicieron las cruzadas combatiendo a sangre y fuego a los infieles mahometanos. Como por ejemplo, los miles de palestinos del campo de refugiados de Sabra y Chatila, en Líbano, que hace 24 años fueron masacrados por las falanges cristianas, con el apoyo logístico de los israelíes, que utilizaron armas con silenciadores, hachas y cuchillos durante tres largos días, desde la noche del día 16 de setiembre de 1982 sin encontrar resistencia. Entre los cadáveres se encontraron, sobre todo, mujeres, niños y ancianos.

Ha tenido usted el don de la oportunidad al ofrecer un retrato atroz y conveniente de los que son los enemigos designados por sus socios en la guerra, para que las protestas y las algaradas que provoque, justifiquen una respuesta ejemplar

Porque los niños que se salvaron de las innumerables Sabra y Chatila ya son adultos, es posible que hayan tenido hijos, y ya les toca entrar en la lista para las próximas expediciones punitivas de los cristianos y los judíos contra los lectores del Corán, que no tienen los valores occidentales de diálogo, paz y cordura que usted predica.

No fue un desliz, ni mucho menos: fue su forma de sumarse al festín de sangre que se está preparando.

Occidente Vs Islam?... no sè.
Pero da la impresion de que algunos grupos de izquierda de mi pais, defienden abstracciones conceptuales que no entienden en absoluto.
Se puede hablar, dibujar, hacer peliculas... ¡eso sì!, siempre y cuando su corte peyorativo no se refiera al Islam; de ser asì... se autoadjudica, aquel que haga una de esas cosas, el rotulo de inmundicia.
Pero todo eso lo sè, no por esos delincuentes autocratas, sino por mis compatriotas que son mas Ayatolah, que el mismisimo Komeini.
Mis valores son los occidentales, no son perfectos y estan muy lejos de serlos,pero dentro de ésta imperfeccion yo puedo publicar esto; En las divinas perfecciones de esos maniaticos lo dudo.

El conflicto, creo, no es entre la cruz y el islam, ni entre occidente y oriente. El conflicto, creo, es entre defensores de la duda y defensores del dogma, independientemente que el dogma sea cristiano, islámico, marxista o neoconservador.

O lo que es lo mismo, entre defensores del humor y amargados vengativos.

De acuerdo contigo, Gata. Si Fachinger no echa más leña al fuego, se queda descolgado de la ofensiva fanática protestante-ultracatólica de las Azores de la que se desmarcó su antecesor por cabezonería o por convicción (eso nunca lo sabremos, yo por lo menos). Y la leña en el fuego impide la reflexión que conduce a la evolución tan necesaria para ideologías y religiones.

"No juzguéis y no seréis juzgados": cualquiera que emite un juicio o imparta una lección corre el riesgo de que ese juicio se vuelva contra él. Ratzinger dijo lo que dijo no como Papa, sino en un ambiente universitario, al que además pertenece. Yo creo que habría que tomar sus palabras por lo que son y desligarlas de la persona, del cargo que ostenta y de la institución a la que representa.

Fecha: 20/09/2006 17:36.

Autor: Gatopardo

Toda creencia es perfectamente irracional y debería ser estrictamente privada, y da igual que se crea en ovnis, en Jesucristo, en Mahoma, en la Toráh, en la reencarnación o en el Sursumcorda. Y el respeto que se exige por las creencias tiene sentido si vaciamos las palabras de contenido y llamamos respeto a ese sentimiento gaseoso y delicuescente que últimamente se intenta poner de moda degradando su significado; pero el respeto sólo lo merece quien se lo gana, quien ha conquistado metas con su esfuerzo o su heroismo, quien ha logrado algo difícil y meritorio; jamás quien no ha hecho otra cosa que tragarse crédulamente una milonga mística, sea la que sea, que no forma parte del mundo de las ideas, de una concepción del mundo propia, elaborada por reflexión y deducción.
Desde el Papa hasta el último rabino , pasando por los imán de cada mezquita y sus ayatolah carecen de méritos ni valores dignos del verdadero respeto. Si lo consiguen por sus logros en otros terrenos de su actividad, no me parece que haya que escatimárselo; pero por sus creencias, no, porque creer es gratis.
Y los que dirigen a los creyentes y los inducen a cometer bestialidades, me merecen el mismo desprecio que los capos de la maffia, y me da igual qué Dios invoquen ni en qué "libro sagrado" se instruyan.
He dicho.
Respecto al contenido universitario del discurso de Ratzinger, aviso que lo he leído y tiene tan poco fuste si lo ha escrito como doctor en teología o como supremo pontifice, porque es una proclama que ignora que la mayor cantidad de muertos no está en el bando de los cristianos sino en el de los civiles no combatientes de los países árabes.

No creo que sea despreciable la cantidad de personas a las que representa este sujeto denominado "el papa" -será el suyo, porque el mio no es-.
Lo cierto es que varios millones de personas, sean o no limitados intelectuales, pre o cuasihumanos o de altura intelectual similar, lo consideran su lider en todos los aspectos de su vida.
Creo que la cuestión es bien diferente. Por qué el resto, los demás, no hacemos una especie de apostolado activo en el que hagamos ver que todo esto -lo de la religión-, no es más que un invento humano, que todos están equivocados -algo demostrable- y que todos los grandes problemas de la humanidad, en cualquier tiempo, tiene su origen en la religión.
Tal vez unos pocos se decidan a pensar y acabemos con una gran parte de los problemas que tiene el mundo.

Lo más triste, con independencia de la consideración que cada uno otorgue a una religión, es que no veo a los católicos felices. No los veo conciliadores, ni exultantes, llenos de dicha, ni esperanzados, siquiera.

Arrastran los mismos problemas y soportan las mismas carencias que los demás, que todos. Incluso los noto a la defensiva. ¿Qué clase de mensaje espiritual les han inoculado? están como adormilados, inertes. Flotan...

No sé... ¿no es raro?

LA NOCHE DE LOS LÁPICES EN ARGENTINA Y LA MEMORIA COLECTIVA

"Primero mataremos a todos los subversivos, luego a sus colaboradores, después a los simpatizantes, luego a los indiferentes; y por último a los tímidos" **General Ibérico Saint Jean, Gobernador de la Provincia de Buenos Aires. 1977**

Sabemos que bajo el manto de la lucha contra la subversión, entonces, -como ahora bajo el de la lucha contra el terrorismo-, la mayoría de los ciudadanos que se consideran decentes se alinean contra quienes son detenidos, secuestrados, torturados, asesinados

o "desaparecidos", y las familias descubren la cerrazón, la indiferencia, la sospecha o la abierta hostilidad cuando tratan de compartir su desgarradora experiencia.

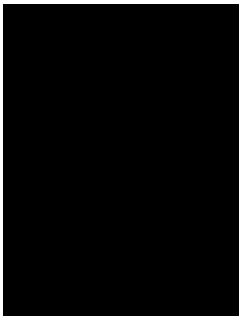
En Argentina, las familias de los centenares de adolescentes que a partir de 1976 fueron secuestrados por comandos especiales, pertenecientes al ejercito de la dictadura, sin que se les diera razón de su paradero, vivos ni muertos, tuvieron que aprender cuánta mugre moral puede albergar en su corazón la buena gente.

"Las dos y treinta y cinco. El grupo encapuchado irrumpló en el N° 2539 de la calle 73: "¡Ejército Argentino, entreguen las armas!". Se abalanzaron sobre Ignacio Javier de Acha y Olga Koifmann que estaban acostados y los empujaron hacia la pared de la cocina: "Los libros, ¿dónde están los libros y las armas"? "No tenemos armas, y los únicos libros son los de los chicos, de la escuela"; balbuceó Olga.
El pequeño Pablo había quedado hipnotizado por el cañón de una de las armas. "Por favor, tengan cuidado, está recién operado del corazón, tiene sólo tres años.
"Señora, no complique las cosas", advirtió uno de los encapuchados. -"¿Quién es esta?". Preguntaban por Sonia, de 11 años. "¿Y éste que hace?". "Es Claudio, va al bachillerato, al Colegio Nacional", contestó Ignacio de Acha. "Bien debemos llevarlo por razones de seguridad del Ejército".

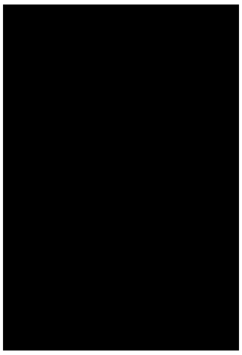
.

Claudio de Acha Koifman tenía 16 años, fue salvaje y sistemáticamente torturado durante meses, finalmente fue asesinado, y su cadaver jamás apareció.

"Las cuatro y cuarenta. Calle 116 N° 542. Olga Fermán de Ungaro pidió tiempo para vestirse a los ocho hombres del Ejército que querían entrar, y se desesperó hasta el cuarto de Daniel y Horacio para avisarles. Los chicos tuvieron tiempo de desprenderse del "arma" que escondían debajo de la almohada: el libro de Politzer voló por la ventana. Prisionera en la cocina, Olga escuchó el interrogatorio y los golpes. Horacio y Daniel repetían que no sabían nombres, que no conocían a las personas por las que preguntaban los encapuchados. Le dijeron: "Los llevamos para Interrogarlos. Más tarde se los devolveremos, señora". Y escuchó cómo los arrastraban desnudos por las escaleras.

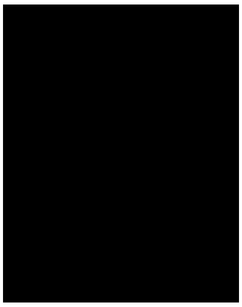


Horacio de Ungaro tenía 17 años, y su amigo Daniel Alberto Racero, que pernoctaba aquella noche en su casa, tenía 18 años. Fueron torturados sistemáticamente, durante meses, finalmente fueron asesinados, y jamás se han encontrado sus cadáveres.



"Las cinco de la madrugada. Después de rajar a culatazos la puerta del N° 2123 de la calle 17, los seis hombres uniformados con ropa de fajina del Ejército, sólo dos a cara descubierta, le exigieron a gritos a Irma Muntaner de López que los llevara hasta sus hijos. Los precedió encañonada, oor el pasillo lateral de la casa. Cinco autos grandes en la puerta y hombres parapetrados en los tejados. Supo qué buscaban sin precisiones cuando entraron el almacén donde dormían Panchito y Víctor.

"¿Dónde estan las armas?", preguntaron. Panchito negó que las tuvieran, pero insistieron: él debía tener asignada una. El grupo que se había desplazado para revisar el resto de la cesa regresó frustrado: ni armas ni volantes. Como machacaban con la acusación de armas escondidas, Panchito les señaló el ropero que compartía con su hermano. Encontraron un rifle de aire comprimido, viejo y partido en dos, y una pistola de aire comprimido, pero nueva. "¿Nos estás cargando?", grítaron furiosos. "Nos lo tenemos que llevar señora. Cuando conteste lo que queremos saber se lo devolvemos". Penchito se atrevió: "Es que yo no sé nada". "Entonces, pibe", amenazó uno de ellos, "atente a las consecuencias"



Francisco López Muntaner, Panchito; tenía 16 años, estudiaba, y los fines de semana hacía trabajos como voluntario en los barrios pobres. Fue torturado sistemáticamente durante meses, finalmente asesinado: nunca se encontró su cadaver.

"Rosa Matera se acomodaba al sueño leve de sus setenta y ocho años, cuando escuchó los primeros golpes en la puerta, al poco sobre los muebles heredados de sus padres, los pasos duros en el living y las voces extrañas. Encontró fuerzas para salir de su dormitorio y gritó con las entrañas porque sus pulmones estaban enfermos, para impedir que los seis o siete hombres maltrataran a María Clara y a Claudia. La empujaron con las armas hasta su cama, pero se repuso y volvió al escuchar el interrogatorio, las cabezas gachas de las chicas, vendas en sus ojos. Entonces la encerraron y ataron el picaporte. Las frases le llegaron a trozos. Luego, el silencio. Se arrastró hasta la ventana y vio a Claudia y a María Clara forzadas a subir a un camión del Ejército. El living había quedado desierto. Sólo unas láminas y el collage inconcluso sobre la mesa. Apenas llegaron al departamento del sexto piso de la calle 56 N° 586, el doctor Falcone y Nelva Méndez, avisados por el conserje, Rosa se desmayó."

.

María Clara Cioochini tenía 18 años, había sido scout en su parroquia, formaba parte de grupos de base cristianos, y huyó de su ciudad natal, Bahía Blanca, por miedo a los críminales de la triple A. En La Plata, esa noche pernoctaba en la casa de la abuela de su amiga María Claudia Falcone, de 16 años.

.

Como ellos, desaparecieron unas treinta mil personas en Argentina. Un plan de exterminio trazado cuidadosamente, sin titubeos ni concesiones a los escrúpulos ni a los remordimientos. Con el fin de *"luchar contra la subversión"* violaron, se ensañaron en destrozar, ante todo, los genitales de sus víctimas, mediante golpes, tajos, picana. Torturaron científicamente, con los métodos que provocaran el máximo sufrimiento hasta la extenuación. Y la muerte de sus torturados era motivo de risas y bromas entre los torturadores.

Mientras, las madres y las abuelas de los desaparecidos escribieron cartas, llamaron a todas las puertas, pidieron *habeas corpus*, preguntaron a los que salían en libertad al cabo de meses o de años, sobrevientes con la muerte en el alma, acudieron a manifestarse a la Plaza de Mayo, con sus pañuelos a la cabeza y las fotos de aquellos pobres despojos que un día fueron sus hijos y sus nietos, para reclamar por los secuestrados. "*Se han vuelto locas*" -decían- y las rehuían quienes hasta entonces habían sido sus amigos, sus vecinos, sus familiares. Les aconsejaban rezar, resignarse, y se enfadaban con su actitud de enfrentamiento podía perjudicarles, comprometerles, porque, al fin y al cabo, hablamos de subversivos, de terroristas, que no merecen piedad. Y si los han detenido, por algo será.

Pero no todos los desaparecidos tuvieron madres, hermanas, abuelas que trataran de liberarlos: la mayoría se tuvo que contentar con el epitafio de la vergüenza que su detención produjo, y desaparecieron en algún vuelo de la muerte, en alguna fosa común, cuando ya habían sido enterrados en el silencio ominoso de su familia y de sus conocidos, más indignados con las víctimas que con sus verdugos. Es gente que apenas puede pronunciar el nombre de sus desaparecidos, porque aún no los han perdonado por haberles sacado a flote toda su cobardía.

Sólo una corrección: Los secuestros de La noche de los lápices fue en la ciudad de La Plata, capital de la provincia de Buenos Aires, no en la ciudad de Buenos Aires.

Lo único que lamento de éstos recuerdos es que, desde mi punto de vista, no se hace una verdadera revisión de lo que pasó acá, en Argentina, y en éste momento sólo es usado políticamente.
Hay muchas ollas por destapar, sólo que los "cocineros" no lo hacen, no lo quieren hacer, más de uno se quemaría con el vapor.
Realmente lo lamento, por la memoria de ellos, los desaparecidos, y, también, la nuestra.
Un saludo

Y en verdad que hay que ser cobarde para negar a un hijo o a un nieto. Ya sé que no se puede criticar sin conocer de primera mano las circunstancias; pero desde la lejanía cuesta creer que se pueda renegar de quienes amamos.
Claro que el terror debió de ser brutal, para todos...

Un abrazo

Hay una obra "Supongamos..." de la autora argentina, Alicia Múñoz,donde dos abuelas, la biológica y la "adoptiva" se enfrentan por la nieta....refleja muy bien, algunas de las consecuencias 23 años despues de esas matanzas

Para comprender la historia de la pasada década del 70 es necesario conocer bien todo lo que pasó desde que Perón regresó a la Argentina en Noviembre/72 hasta su muerte 01/07/74. Entonces se comprobará que él no está libre de culpabilidad. Es totalmente injusto juzgar con excesiva dureza a unos y no juzgar así a todos. Después del ataque al cuartel de Azul por parte de guerrilleros marxistas, Perón calificó a los guerrilleros de "delincuentes, mercenarios y enemigos de la patria",.."y son enemigos aunque levanten su bandera"..."La lucha será larga y no finalizará hasta que los últimos guerrilleros que van quedando sean exterminados uno a uno para el bien de la república." Muchos jefes militares escucharon este discurso y son muchos los que lo leyeron 2 y 3 veces. Por tratar de cumplir con las "ordenes y los deseos de Perón" ahora están cumpliendo largas condenas en cárceles comunes a pesar de que son ya nonagenarios. Los miembros del gobierno, casi todos ex montoneros y ex erpianos no tocan a Perón porque necesitan colgarse de su saco para así poder seguir ganando elecciones. Antonio Nour.

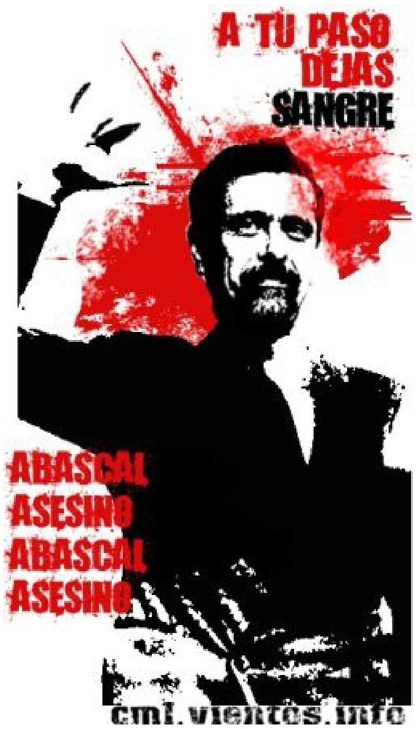
BIENVENIDA DE UN MEXICANO A FOXILANDIA



Foxilandia

Por Gerardo Albarrán de Alba *
Publicado en la revista **Proceso**

Bienvenidos a Foxilandia, el país en marcha y en paz que asegura el presidente le dejará a su sucesor, mientras la violencia política en Oaxaca secuestra la paz social durante 115 días de manifestaciones que al principio eran por reivindicaciones sindicales y muy pronto devinieron en tomas de edificios públicos y estaciones de radio privadas, policías que acribillan a balazos los plantones y matan a seis personas, turbas que lo mismo arman barricadas incendiando autobuses o casi linchan a empleados públicos, y misteriosas guerrillas que aparecen y desaparecen de la noche a la mañana sembrando zozobra, ahora en demanda de que renuncie o destituyan al gobernador priista Ulises Ruiz que se aferra a un poder que no puede ejercer.

Bienvenidos al país del no pasa nada que presume el presidente ante la prensa

extranjera, donde el crimen organizado ha ejecutado a más de mil personas en lo que va solamente de este año con una saña inaudita, como el comando que irrumpió en una discoteca de Uruapan y arrojó a la pista de baile las cabezas de cinco personas decapitadas en un ajuste de cuentas, o las otras dos cabezas que hace meses clavaron en picas a las puertas de la estación de policía de Acapulco en venganza por un operativo, o la docena de granadas de mano que han hecho estallar en varios cuarteles policiacos de esa misma ciudad en el último semestre, o las fosas con decenas de cadáveres con rastros de tortura que lo mismo aparecen en ciudades fronterizas con Estados Unidos que en el centro del país, o los asesinatos de media docena de directores de corporaciones policiacas en varios estados y hasta de un juez federal que negó la libertad a un narcotraficante, o el misterioso estrangulamiento del hermano del expresidente Carlos Salinas de Gortari, o los extraños atentados contra dos funcionarios públicos del sector financiero acribillados en plena calle de la capital federal la semana pasada, o los recurrentes enfrentamientos a tiros entre bandas fuertemente armadas, ya comunes en Baja California, Quintana Roo, Tamaulipas, Nuevo León, Michoacán, Sonora, Sinaloa, Guerrero…

Bienvenidos al país del surrealista equilibrio macroeconómico y la estabilidad financiera que alaba el Banco Mundial, pero que expulsa a cuatrocientas mil personas al año que migran hacia Estados Unidos en busca de los trabajos que aquí no encuentran, parte de los 40 millones de personas que sobreviven por debajo de la línea de la pobreza (la mitad, en la miseria extrema), y cuyas remesas –casi al nivel de las exportaciones petroleras– , porque ese dinero sí llega a la gente.

Bienvenidos al país de las libertades pregonadas de dientes para afuera, donde el poder político se presta a cancelar al Canal 40 para entregárselo a TV Azteca, y modifica las leyes que regulan las concesiones públicas al antojo de los intereses de Televisa; donde la esposa del presidente demanda por daño moral a Proceso por publicar un documento escrito por ella misma como adelanto de un libro para el que abrió su vida privada pensando que sería una novela rosa, pero que en realidad la desnuda; y han sido asesinados 23 periodistas en lo que va del sexenio (la mitad, sólo en los últimos dos años) y otros dos fueron secuestrados hace meses y siguen desaparecidos, sin que nadie haya sido juzgado por estos crímenes.

Bienvenidos al país que se ufana de los demócratas de ocasión y las oportunidades para los que menos tienen, donde primero se privatiza impunemente la esperanza y luego se desata el encono social -si no mediante el fraude electoral , sí desde el ilegítimo avasallamiento desde el poder–, para que después venga el más rancio conservadurismo social, empresarial y político a demandar que el gobierno mande al Ejército y a la policía a que les parta ya toda su puta madre a esa pinche bola de nacos, indios muertos de hambre y desarrapados que bloqueó sus negocios y sus paseos por Reforma, el centro y el Zócalo capitalino durante mes y medio. (Y no soy yo quien dramatiza la vulgaridad, se lo escuché durante 48 días a gente común en los modernos centros comerciales, restaurantes, bares y cafeterías, que ahora celebran a medias haber recuperado por las buenas sus espacios cool.)

Bienvenidos a un país que se pudre, carcomido por la ingobernabilidad, sin que nadie que pueda pretendiera hacer algo para evitarlo. ¡Carajo! Pareciera que Zitarrosa le lloraba a México cuando cantó: *"En mi país / qué tristeza / la pobreza / y el rencor"*.
